Aquafine’s SP & SL Series provide a compact design and economical ultraviolet water treatment for low-flow disinfection applications, such as laboratory and medical facility water, pharmaceutical make-up processes, final electronic component rinsing and recirculation loops, to name a few.

The SP series models produce little change in water temperature, even after prolonged periods of no water flow, making them ideal for such applications as water for vending machines.

The SL 1 and MP 2 SL models may also be configured for TOC reduction or ozone destruction applications found in high purity or ultrapure water processes.

Available in 5 standard models, the SP and SL Series feature flow rates ranging from 1 to 24 U.S. GPM (0.2 to 5.5 m³/hr).

Advantages

- Compact Design
- Application Specific Reactor Design
- Lower Maintenance Costs
- Single Ended (SE) Lamps/High Purity Quartz
- UL & CE listed

Microelectronics
Food & Beverage
Special Applications
The Aquafine SP & SL Series consists of a 316L stainless steel treatment chamber and a 304 stainless steel control panel in one integral unit. Excluding the SP models, all units come complete with a standard Running Time Meter. All models are compact in size, maximizing installation flexibility and preserving floorspace. Single-ended lamps allow quick change-outs without tools.

**Features:**
- Stainless Steel Control Cabinet
- 316L Stainless Steel Treatment Chamber (excluding SP models)
- Lamp Status Indicator
- Running Time Meter (excluding SP models)
- Single Ended (SE) Lamps/High Purity Quartz
- All Models are CE and UL Listed

**Options:**
- UV & Temperature Monitoring System (select models)
- UV & Temperature Detector;** Hot Water Sanitizable
- UV Intensity 4-20mA**
- Lamp Out Alert (LOA)
- Stainless Steel Compression Nuts
- Sample Ports
- Sanitary Fittings
- Validated Lamps
- Additional Voltages Available
