RELEVANT QUALIFICATIONS:

(this where you highlight your skills that directly match the role you are applying for) below is an example...

In many of John's previous positions he has had user interactions either dealing with requirements gathering, help desk interaction (resolving problems) either remotely or at the user desktop, as well as project meetings with outside business stakeholders pitching a solution.

Below is a highlight of projects that John specifically had heavy user/business interaction:

- ABC Stores Corporate Office Help Desk Team Member 88-90
- School of Education IT Dept (Project Lead) Data Gathering/Report Definition (90-92)
- Food and Drug (Corporate Software Specialist) 92-95 (Daily interactions installing/teaching/resolving issues)
- Airline Company Technical Lead - Working with users to determine how they process data, etc as part of program conversion services.
- STAFFING COMPANY - As Internet Technical Director John met with clients and prospective clients to propose/present solutions, as well as taught training classes to clients once the system was being implemented.
- James/Johnson - Requirements gathering from end-users, presenting solutions, working with users to overcome obstacles in the use of software that John was responsible for.
- **BI (Business Intelligence) Development**
 - James 2005-2009 - Creation of DTS Packages
 - Johnson 2009 - Present (Creation SSIS Data Transformation/Business Process Jobs) SQL 2000/2005/2008
- **Data Warehousing**
 - Food and Drug (Involved in Large Data Warehousing project as a team member ON the TeraData System)
 - Various other projects in John's background dealing with reporting databases, and data marts; Currently John has not worked with cubes, although, he is willing to learn and excel at that also.
