

### 3-Generation Pedigree Chart

In a **Pedigree Chart**, you will only enter your direct line. You are number 1. Your father is number 2. Your mother is number 3. All men are even numbers, and all women are odd numbers. You will notice there is no room for your brothers and sisters nor your aunts and uncles.

With the 3-generation Pedigree Chart below you will start with yourself and enter your birth date. This is the only information you can enter for yourself. Then go on to the next generation and enter the birth dates for your father and mother. Also enter their marriage date. As you continue on, enter information about your grandparents including their birth date, marriage date and death date.
