Locations: Atlanta, Austin, Boston, Charlotte, Chicago, Cincinnati, Cleveland, Dallas, Denver, Detroit, Harrisburg, Houston, Kansas City, Los Angeles, McLean, Minneapolis, New York, Philadelphia, Pittsburgh, Sacramento, San Francisco & St. Louis Offices Only

Overview

Deloitte is one of the leading professional services organizations in the United States, specializing in audit, tax, consulting, and financial advisory services with clients in more than 20 industries. We provide powerful business solutions to some of the world's most well-known and respected companies, including more than 75 percent of the Fortune 100.

At Deloitte, you can have a rewarding career on every level. In addition to challenging and meaningful work, you'll have the chance to give back to your community, make a positive impact on the environment, participate in a range of diversity and inclusion initiatives, and find the support, coaching, and training it takes to advance your career. Our commitment to individual choice lets you customize aspects of your career path, your educational opportunities and your benefits. And our culture of innovation means your ideas on how to improve our business and your clients' will be heard.

Visit www.deloitte.com/us/careers to learn more about our culture, benefits and opportunities.

Deloitte Consulting LLP is one of the world's leading management consulting firms for executable strategy, operations, technology, and human capital advisory services. The consulting practice is built around integrated core capabilities – people, process and technology and industry expertise – the capabilities needed to help clients to tackle their most complex challenges.

Business Technology Analyst, Deloitte Consulting LLP

If you are interested in helping clients in their efforts to address some of their most complex business problems through the effective application of technology and want to do this in an exciting environment, then our Business Technology Analyst (BTA) program can be the start of an exciting career for you. As a member of an entrepreneurial client project team, you will have the opportunity to learn first-hand how we help many of the world's most influential companies develop their information technology strategy and enhance their technology investments. You will work with a diverse group of people across many different industries, business competencies, and technologies. You will have the opportunity to demonstrate leadership and teamwork and can gain increased responsibilities through multiple client experiences.

As an example, you may be a part of a focused team assisting a client in determining how the IT function can more effectively support the enterprise strategy, or you may have the chance to contribute to a team working to help a client transform their finance function by establishing a single data and technology architecture for its enterprise financial systems. You may also play a role in helping a client in their efforts to design, develop, and implement a new health care system that could save lives.

When you start, you will receive up to four weeks of orientation, professional training, and relevant technology education to help you launch your consulting career. We provide mentoring and counseling programs, as well as professional and technology training. Additionally, top performing BTAs have the opportunity to apply for our Graduate School Assistance Program (GSAP) after two years of employment with us.

New Analysts within our Technology service area have the opportunity to work directly with our clients providing services designed to help them solve their most complex business problems. We are specifically recruiting MIZZOU students for our SAP service line, which involves providing consulting services with SAP package services. SAP offers a complete range of implementation services- from business case development and system design to configuration, testing and deployment with SAP package services.

Requirements

Qualifications for our Business Technology Analyst Program include:

- Undergraduate or Master's degree
- 3.4 cumulative GPA strongly preferred with equal or stronger performance in your major(s)
- Strong academic performance and extracurricular activities
- Experience, interest and aptitude in technology
- Sharp analytical mind
- Demonstrated leadership abilities
- Excellent communication and interpersonal skills
- Willingness to travel (required)

Academic Focus & Experience:

In addition to the above, we are seeking candidates who have demonstrated exceptional performance in these and other related majors:

- **Technology:** Computer Science, Computer Information Systems, Management Information Systems
- **Business:** Accounting, Business, Finance, Marketing, Operations, Supply Chain
- **Engineering:** Computer Engineering, Electrical Engineering, Engineering Management, Industrial Engineering
- Exposure to business processes and how SAP technologies support business functions
- SAP Overview and/or SAP course
- Application of SAP in academic and/or work environments
- Understanding of system development life cycles (SDLC)
- Classes in technology programming, business analytics, and/or business process
