- Knowledge about renewable energy (solar); skills in energy project finance
- Proactive personality, capacity to deal with banks and to represent Ecos
- Openness to continuous learning processes

Investment and Project Finance Analyst (Solar Energy): Job Description

The Investment and Project Finance Analyst’s responsibilities include assessing project bankability, financing options for projects, creating financial models and managing financing processes.

Activities will generally focus on project financial analysis and derived thereof on determining whether a project is bankable or not. For that purpose, the Analyst must have skills in financial and business analysis, business strategy, operational effectiveness, and ideally legal structuring, elements which are key contributors to our investment and project financing success. The analyst will be assigned with specific responsibilities in the process of an investment in a company or project.

As the candidate gains experience, he/she will become increasingly responsible for determining the most advantageous structure for an acquisition or project financing and will likely participate in negotiations. Once a transaction has closed, the Analyst will work with the Investment Manager in its interactions with portfolio companies on how to prioritize and implement opportunities for value addition.

The candidate must show interest in growing personally and professionally into a position in which he/she can take over additional or more direct responsibilities at Ecos, if need be.
