## RULE NUMBER 1

If it doesn't create a lead, or directly contribute towards closing a sale, **it doesn't belong**

## RULE NUMBER 2

If the cost per lead is too high,  
it doesn't belong

**Exception to this rule:** If you can recover cost through:

- higher conversion rate to closed deals
- higher average deal size

LINK

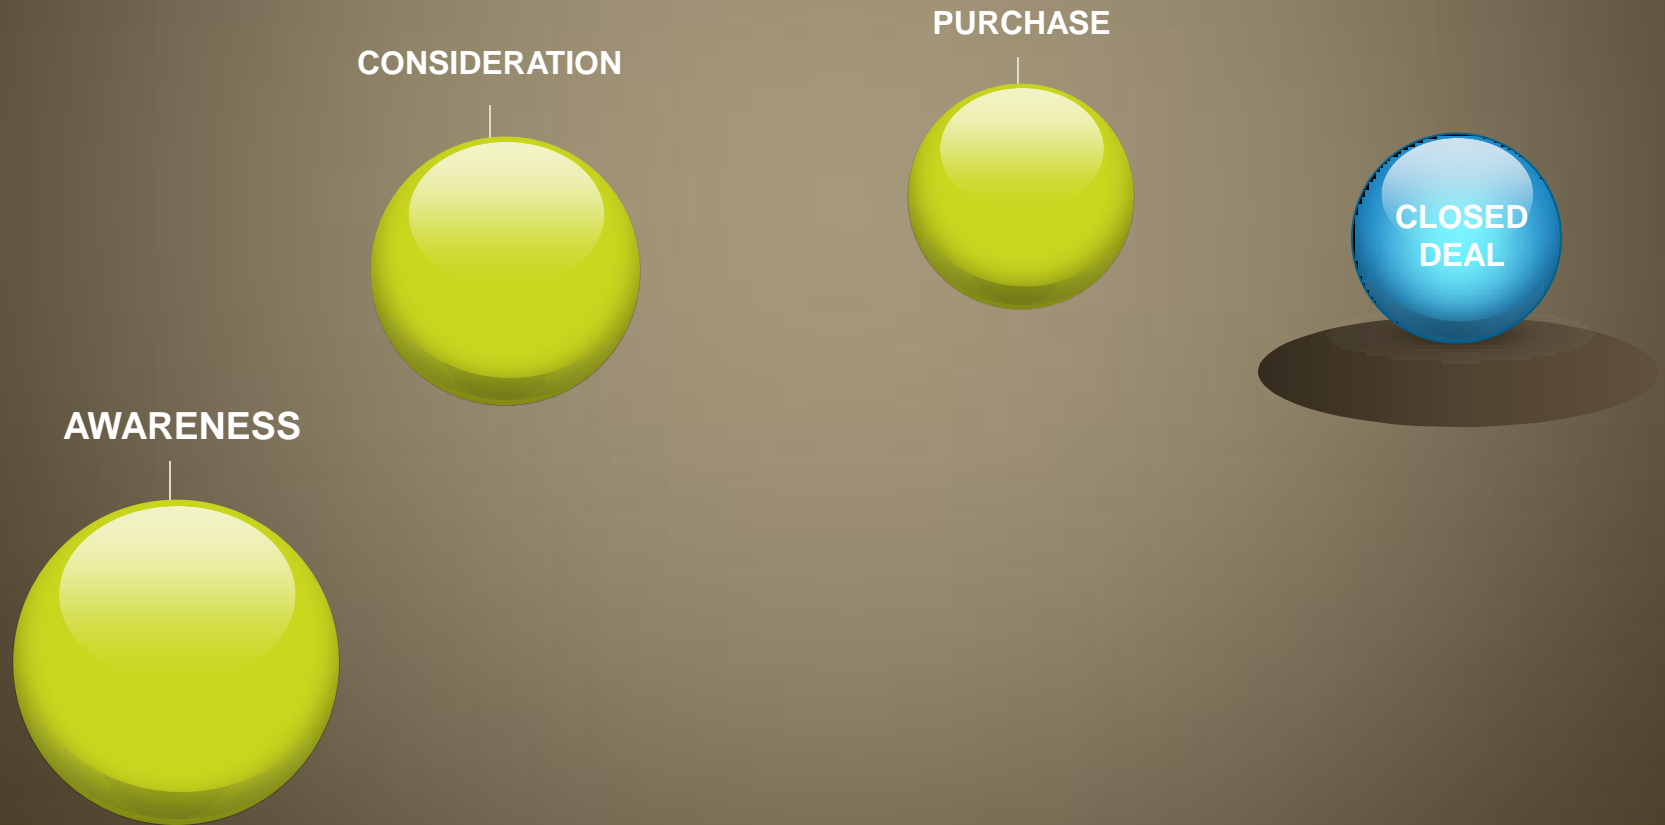

# CLEARLY LINK FLOWS FROM START TO FINISH

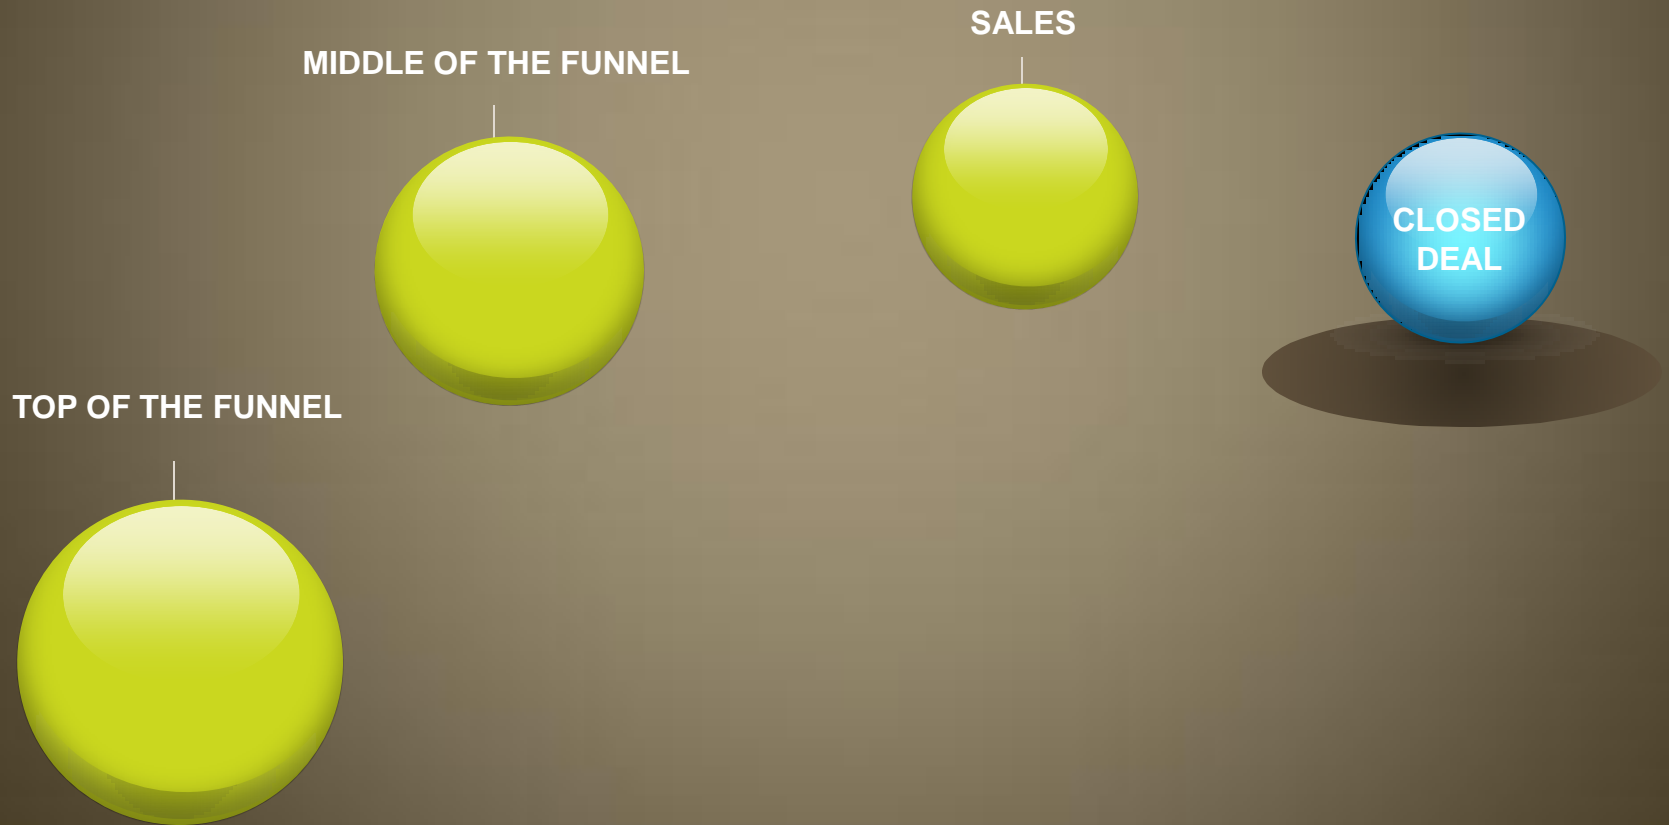

1. At the end of every action, there should be a clear link to the next action
2. The overall flow from start to finish should be carefully designed
3. Every action should contribute clearly to moving the lead through the closed deal

WEBSITE GRADE

# 95

 POWERED BY  
 WebsiteGrader

[Email This](#) | [Facebook This](#) | [Tweet This](#) | [Put this badge on your website »](#)

The website **www.forentrepreneurs.com** ranks **96,774** of the **2,068,415** websites that have been ranked so far.

A website grade of **95.3/100** for **www.forentrepreneurs.com** means that means that of the millions of websites that have previously been evaluated, our algorithm has calculated that this site scores higher than **95.3%** of them in terms of its marketing effectiveness. The algorithm uses a proprietary blend of over 50 different variables, including search engine data , website structure, approximate traffic, site performance, and others.

### I. Create Content

Every web page has the potential to rank well in search engines and draw traffic from other sources, like social media sites and the blogosphere. Of course, whether a page draws traffic (and links) depends on whether it's optimized and how remarkable (useful, interesting, etc.) it is. But in general, most pages do "ok" and contribute to the cause, so it's both a quality and a quantity game.

#### A. Blog Analysis

Bloggging is a great way to reach your target audience with your thoughts, opinions, and offerings on relevant topics.

# PROBLEM: GETTING A MEETING

## Project Management

- tracks resource costs as forecasted, actual, and variance by resource and activity
- compares planned versus actual schedules
- calculates percent complete
- custom reporting allows unlimited report formats that can be reused
- supports plotters
- prints sideways
- includes on-line, context-sensitive help and a tutorial

## Project Scheduler 4

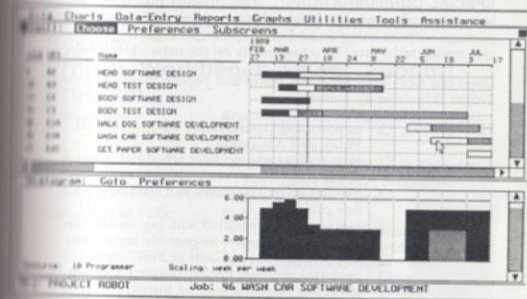

Manufacturer: Scitor Corporation  
 Price: \$685  
 Retail List Price: \$835  
 Requirements: 512K; mouse recommended  
 Version: 2.0

If you are looking for a capable project management tool that offers excellent presentation-quality graphics, consider Project Scheduler 4. This program supports multiple projects so that managers can access pooled information about scheduling, resource and cost information from simultaneous projects.

With its graphical interface, this product lets you use a mouse to manipulate data on screen. It produces graphs, charts, and reports of superior quality that are ideal for conveying project information to others. You can create graphics ranging from wall diagrams detailing all project information to top-view dependency networks displayed on a single page.

Project Scheduler 4 uses Gantt charts, histograms, cost curves, network diagrams to enter and display jobs and their dependencies. The Gantt charts let you see the actual scheduling timing of your entire project, while the network diagrams let you examine the relationships among your smaller, independent

## Project Management 773

An example of Project Scheduler 4 Gantt/Histogram.

The Gantt/Histogram chart allows you to look at a Gantt chart and a resource histogram on the same screen so you can quickly identify where you have scheduled your resources. For example, if you are interested in a given resource, the histogram at the bottom of the screen displays information on tasks that are assigned to that resource, and the Gantt chart at the top of the screen shows the jobs to which that resource has been assigned. You can then print a list of all the jobs that have been assigned to that resource.

A Work Breakdown Structure summary provides you with the ability to summarize jobs at various levels. Project Scheduler 4 is also good for those who are interested in breaking down and summarizing multiple projects. Project Scheduler 4 will do resource leveling but not across multiple projects.

Project Scheduler 4 lets you create a project description report that contains general information about resource totals and a variance report that details cost and schedule variance per task.

If you prefer not to use a mouse, you can install a driver that allows you to use your keyboard, although a mouse is recommended.
