Baby Infant Growth Chart Calculator
WHO 0-2 Years: Weight For Age Percentile

Weight Age 0-2   Length Age 0-2   Weight Length 0-2   Head Circum 0-2
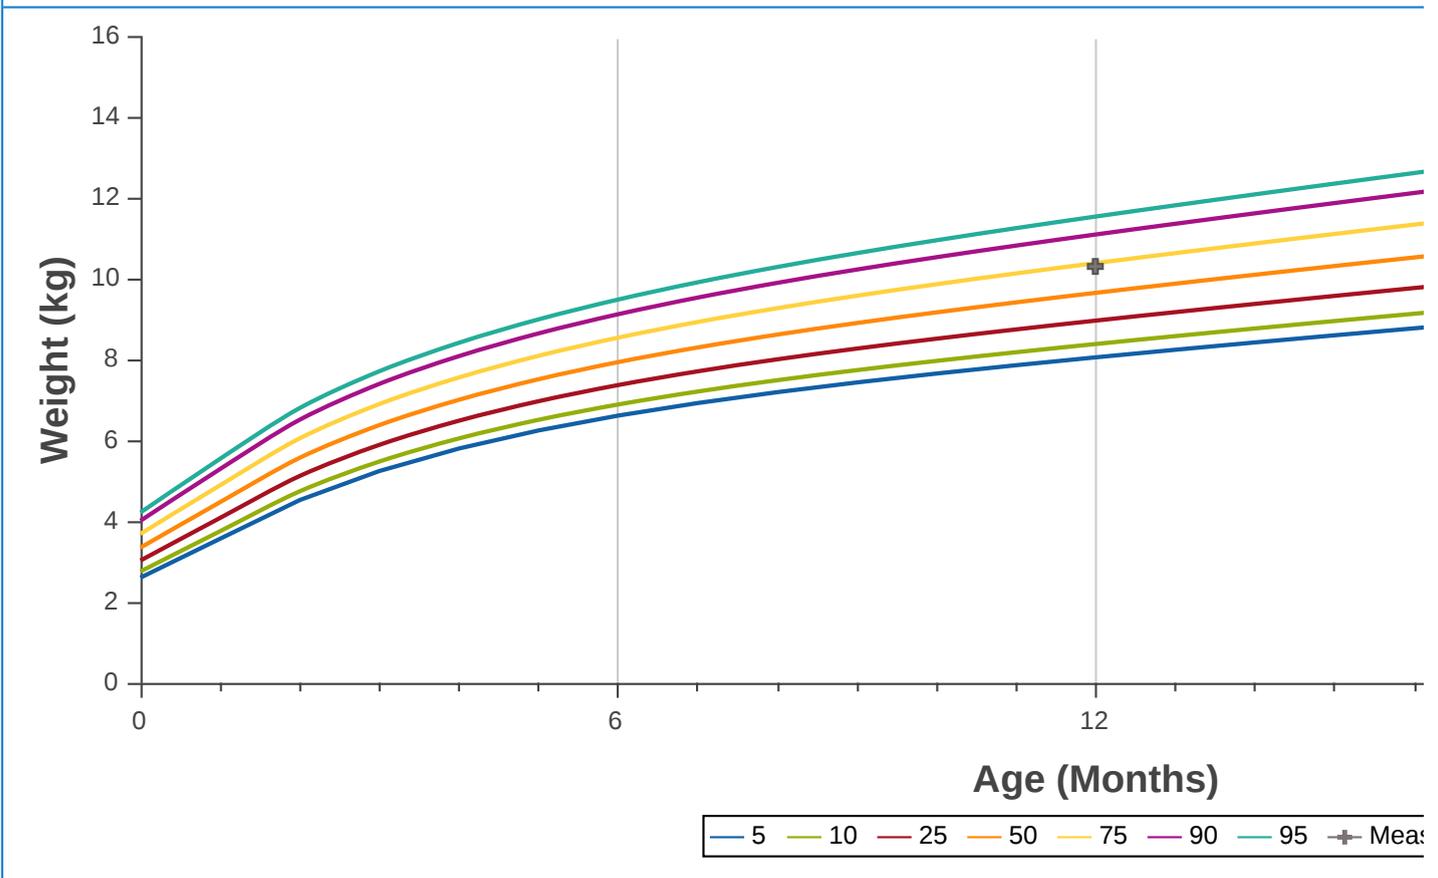

WHO: Weight For Age - Infant 0 to 2 Years

Gender	Male Female		
Birthday	08/19/2015	**Measure Date**	08/18/2016
Weight	10.3	**Unit**	kg lb

Solution: Percentile and Age

Percentile	72.6%
Age	12.0 months
Weight	10.3 kg / 22.7 lb

Chart: Weight vs. Age Percentile Graph

Description:

Note, the CDC recommends the use of the WHO charts for babies and infants from birth to two years of age. This app uses WHO tables and data for calculations.

This calculator provides your baby's weight percentile based on age. The percentile shows how your infant's

weight compares to other infants. The percentile tells you what percentage of babies weigh less than your baby. For example out of a sample of 100 babies, a percentile value of 40 percent means your baby weighs more than 40 babies and weighs less than the other 60 babies.

A percentile of 50% represents the average or mean weight. A value below 50 percent means a baby weighs less than the average. A value greater than 50 percent means a baby is above average. This does not mean your baby is overweight or underweight. A doctor or physician should be consulted to determine weight status.

Calculation Instructions:

1. Note, this calculator uses the World Health Organization (WHO) infant charts for 0-2 year olds
2. Enter Birthday
3. Enter Measurement Date
4. Enter Weight

Outputs:

1. Percentile - The weight percentile of the child.
2. Age - The age of the child in months
3. Weight - The mass of the child in metric and standard units.
4. Graph Plot - Weight versus age graph with 5, 10, 25, 50, 75, 95 and calculated percentile lines.

CDC Recommended Growth Charts:

The United States Center for Disease Control (CDC) recommends using the World Health Organization (WHO) charts for the first two year of life (0 to 2 years). After two years, it is recommended to return to the CDC charts.

Weight-Age (WHO 0-2 years)   Length-Age (WHO 0-2 years)

Weight-Length (WHO 0-2 years)   Head Circumference-Age (WHO 0-2 years)

Weight-Age (CDC 2-20 Years)   Stature-Age (CDC 2-20 Years)

Weight-Stature (CDC 2-20 Years)

CDC Growth Charts:

Weight-Age (CDC 0-3 years)   Length-Age (CDC 0-3 years)

Weight-Length (CDC 0-3 years)   Head Circumference-Age (CDC 0-3 years)

Weight-Age (CDC 2-20 Years)   Stature-Age (CDC 2-20 Years)

Weight-Stature (CDC 2-20 Years)

WHO Growth Charts:

Weight-Age (WHO 0-5 years)   Length-Age (WHO 0-2 years)

Height-Age (WHO 2-5 years)   Weight-Length (WHO 0-2 years)

Weight-Height (WHO 2-5 years)   Head Circumference-Age (WHO 0-5 years)

Chinese Growth Charts:

Weight-Age (China 0-18 years)   Length-Age (China 0-3 years)

Height-Age (China 3-18 years)   Head Circumference-Age (China 0-6 years)

Weight-Length (China 0-3 years)   Weight-Height (China 3-18 years)

Preterm Infant Growth Charts:

Weight-Age (23-41 Gestational Weeks)   Length-Age (23-41 Gestational Weeks)

Head Circumference-Age (23-41 Gestational)
