

PHP/LAMP Web Developer Job Description

LAMP Developer

Hembree Consulting Services, Inc. (HCSI) is a leading software development and consulting firm. HCSI specializes in enterprise software solutions for the Department of Defense and Business.

We are seeking a talented PHP/LAMP developer to support the development of a new and exciting business solution as well as to provide support and development services for our key DoD product lines. This individual will work to add functionality to HCSI R&D projects as well as to provide support for existing product lines as needed. The ideal candidate will have a can-do attitude, passion for technology, extensive PHP/MySQL development experience, and will be able to get up to speed quickly.

In the role of PHP Developer, you will lead our Technology Team, providing planning and development of projects of various scale, form, and duration, utilizing your expert knowledge of PHP and MySQL. You will use your eye for detail and obsession for clean, well composed code to build out a range of projects from dynamic websites, digital devices to mobile web applications, playing a critical role in bringing the company's vision to life. Working collaboratively with each of our practice areas, you will collaborate with your peers to assess project plans for feasibility, while providing your own input from a technology perspective. The candidate should have some team leadership experience in working with sub-contractors and other developers that might be assigned to projects being led by you.

Required Skills

We're looking for a PHP developer with a proven track record for creating efficient, scalable, and manageable enterprise-level systems using open source technologies. The right individual for this role will keep up to date with new and emerging technologies while sharing that knowledge with the team, contributing to an environment built on innovation. Extra attention will be given for individuals with HTML5, Linux and XML, and any knowledge of Blog Platforms and/or any social media enabling media integration and scalability with business solutions.

Requirements:

- Minimum 4 years experience with PHP, MySQL, Linux, ApacheServer, server administration, and hardware experience
- Familiarity with APIs, web services, and 3rd party platforms and libraries, such as Blog Platforms, and Social Networks (i.e. Facebook, Twitter, etc.) enabling social media integration and scalability
- Experience working within a team setting
- History of successful schedule and budget management
- Solid trouble shooting, bug tracking, and quality assurance methodologies
- Understanding of / experience with unit testing and source code control

- Able to stay ahead of the curve with new and emerging technologies
- Knowledge of industry, able to make recommendations to customize solutions for the company and its customers.
- Computer Science degree/diploma or equivalent experience is preferred.

Bonus Skills

- Web Services - Experience building modern web services using XML.
- Work with digital devices and network appliances connecting to enterprise business systems.

Experience

This is a senior position; we're looking for somebody who has at least 4+ years of development experience; proven track record of accomplishments; excellent written and oral communication skills who can conduct meetings and/or help prepare for meetings with clients.

Other Details

HCSI offers a competitive salary and a full list of benefits, including health, 401K, vision and dental coverage. You will work in a fun and creative environment with a talented group of individuals. This position will serve as lead developer at HCSI and will also manage sub-contractors used for development, participate in requirement meetings, design reviews as well as design / code solutions.

We are open to all candidates, though preference will be given to candidates in the Indiana /southern Indiana area. May work out of home but will be required to attend meetings and other functions in Jasper, Indiana office on a fairly regular basis.
