

## PRODUCT FACT SHEET

### Overview:

Terumo BCT is a global leader in blood component and cellular technologies, serving customers in 120 countries and territories. As the only company with the unique combination of apheresis collections, manual and automated whole blood processing, and pathogen reduction coupled with leading technologies in therapeutic apheresis and cell processing, we believe in the potential of blood to do even more for patients than it does today. This belief inspires our innovation and strengthens our collaboration with customers.

**Terumo BCT leverages its expertise on behalf of customers and researchers in three segments: Blood Centers, Hospitals and Therapeutic Apheresis Centers, and Biotech and Cell Processing Organizations**

### OUR BLOOD CENTER TECHNOLOGIES:

- Increase the value of every blood donation through efficient collections that produce high-quality blood components needed to transfuse more patients
- Provide the most comprehensive product offerings to support blood centers at every step in their operations:
  - **Donor Management:** Matching and optimizing each donor to better collection options with the DonorMAX Program, Trima Prediction of Donation and Productivity Tools
  - **Blood Collections:** Enhancing efficiency and flexibility for in-center and mobile blood drives with the Trima Accel® Automated Blood Collection System, Cadence Data Collection System, Outcome Review, Vista® Information System, Trima Accel Reporter, TOMEs Data Management Software, T-RAC II System, IMUFLEX® Blood Bag System with In-Line Filter, TERUFLEX® Blood Bag System, Blood Collection Accessories and Solutions
  - **Blood Processing:** Improving lab efficiency, blood component quality and process control through automation via the Atreus® Whole Blood Processing System, Atreus System Manager, TACSI™ (Terumo Automated Centrifuge and Separator Integration), OrbiSac System, T-ACE II+ Blood Component Expressor, T-SEAL II and Teruseal Tube Sealers, TSCD II and TSCD Sterile Tubing Welders
  - **Pathogen Reduction:** Working toward safer blood for patients, with safe and simple procedures for operators using Mirasol® Pathogen Reduction Technology System and Mirasol Manager

### FOR THE HOSPITALS AND THERAPEUTIC APHERESIS CENTER CUSTOMER SEGMENT WE:

- Help customers bring even more treatment options to patients
- Deliver a combination of powerful and flexible platforms designed to treat multiple disease states: Spectra Optia® Apheresis System and COBE® Spectra Apheresis System

### IN THE BIOTECH AND CELL PROCESSING CUSTOMER SEGMENT WE:

- Support researchers in developing cell therapies that may fundamentally improve health care
- Provide a suite of devices that wash, separate, concentrate and culture cells for research, industry and clinical use: Quantum® Cell Expansion System, COBE® 2991 Cell Processor, Elutra® Cell Separation System and Sterile Tubing Welders
