

Part V Equipment Maintenance Log for 3rd & 4th Generation Perc Dry Cleaning Machines

Department of
Environmental
Conservation

Record the date of maintenance of any air cleaning component or exhaust system, such as:

- REGENERATION of the carbon in a carbon adsorber
- REPLACEMENT of the carbon in the carbon adsorber
- maintenance of drying sensors
- REPLACEMENT of carbon cartridges in the Perc-contaminated Wastewater Treatment Unit (if used); record DATE of replacement; record the amount of activated carbon in the adsorber (dry weight in pounds) in the "Notes" column.
- other machine maintenance activities

In the "Notes" column also RECORD THE NUMBER OF LOADS between each of the following occurrences:

- REGENERATION of the carbon in a carbon adsorber;
- cleaning and replacement of lint filters and carbon adsorber pre-filters;
- repair or replacement of exhaust fans.

Date	Activity	Notes

Failure to complete this form is a violation of 6NYCRR Part 232 and could result in enforcement action, including monetary penalties.

This form must be kept on-site for at least five (5) years.
