

A self-introduction letter

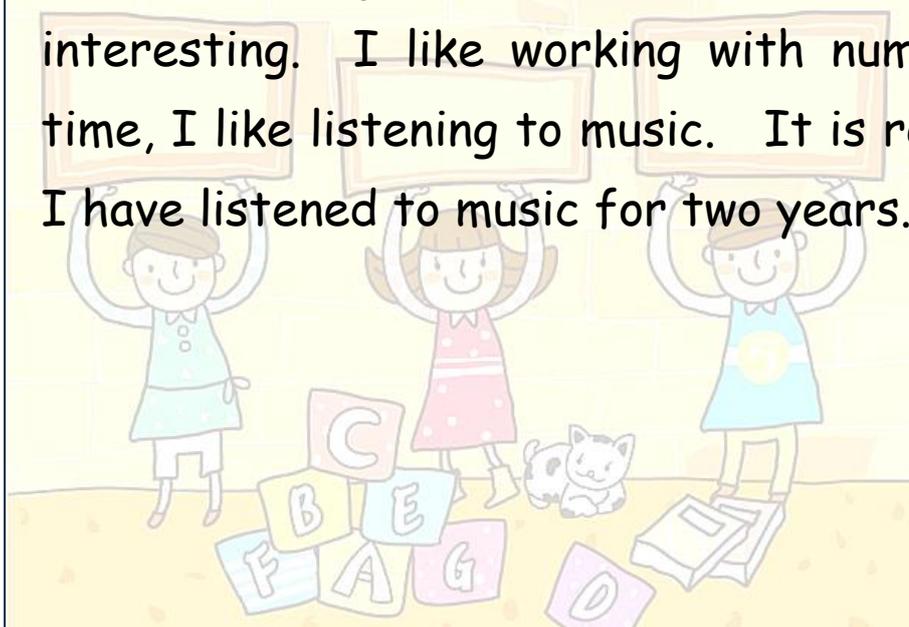

Dear Principal,

I am Tammy. I want to study at your school because your school does not only encourage students to study hard for brilliant academic results but also cares for their development in various aspects. Now I am going to introduce myself.

I am twelve years old. I live in Yuen Long. There are four members in my family. They are my father, my mother, my elder brothers and me. My father is a worker. My mother is a housewife. I love my family.

Currently I am studying at Kwong Ming School class 6B. I have joined the school Olympic Maths Club since I was at P.3. I do sums with my club members in every lesson. My favourite subject is Maths because it is challenging and interesting. I like working with numbers. In my leisure time, I like listening to music. It is relaxing and enjoyable. I have listened to music for two years.

Since I was six, I have dreamt to be a doctor. The purpose of being a doctor is not to make money but to save people's lives. It is a rewarding and meaningful career. If I were a doctor, I would go to some charity organizations such as The Doctor without Border to help the patients in some poor areas. Africa would be my target place where a lot of people suffer from disease. I wish I could help them. In order to achieve my target of being a doctor, I must work hard. I must learn Biology, Chemistry and Physics by heart. I realize they are difficult subjects but I am not afraid of taking challenges as I believe where there is a will, there is a way.

Thank for reading my letter. I am looking forward to having an interview at your convenience.

Yours sincerely,

Tammy

6B Tammy Tong
