

Journeyman Commercial Plumber Job Description

Job Description

We are looking for a strong team member that wants to take the next step in their career! If that is you, we are offering you a full time position with North America's up and coming team for water filtration engineering systems. We offer a mentor training system that can advance aspirations to become an engineer, as well as online accredited certification. As a commercial journeyman plumber, you will be responsible for supporting the engineering and fabrication process as well as installing, repairing and maintaining pipes, fixtures and other plumbing used for water softening and filtration in residential, commercial, industrial or public sites.

Responsibilities

- Reads blueprints, drawings and specifications to determine the layout of filtration and plumbing systems, water supply networks and drainage systems.
- Inspects, maintains, installs and repairs water filtration system equipment, including storage tank, hydro pneumatic tank, water pumps and small air compressors.
- Makes recommendations on required tools and correct equipment needed for all projects.
- Plan, install and service plumbing systems, fixtures, piping equipment and controls.
- Work in cooperation with other trades and laborers to ensure that all specifications, legislation and policies are met, and to ensure efficient completion of any project.
- Performs preventative maintenance and respond to emergency repairs.

Qualifications

- Must be certified Journeyman Plumber from an accredited organization in the US or at least a 4th year level Apprentice.
- 4 years' experience or more in Commercial Plumbing.
- Excellent Customer Service Skills.
- Effective verbal and written communication skills.
- Computer skills. Work, Excel, Power Point
- Ensure all standards of building codes and safety are met.
- Valid Driver's License.
