

Palmyra Bowling Bingo Bowl

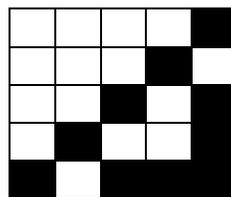

The object of the game is to achieve one of the Bowling Bingo wins listed below. The first team to accomplish the Strike, Spare or Gutter Ball gets the prize!

One player's frame = one square. The total count for the frame must match one of the squares. If there are no squares left with that number the next player bowls and nothing is recorded.

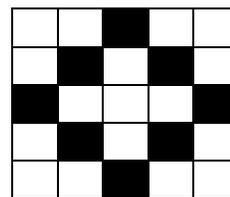

If a bowler knocks down 8 pins on their first shot, they could throw a gutter ball and then they cross off one of the eight's on the game card. If they try for the spare and knock down the two remaining pins, they would cross off the / on the game card. If they miss the spare, but have an eight left on their card, they would cross off the eight.

Strike

Spare

Gutter Ball

X	9	7	8	5
9	4	X	/	4
8	X	Free Square	X	5
/	8	X	7	3
5	7	3	9	6

The X = a Strike (knocking down all 10 pins in one ball)

The / = a Spare (knocking down all ten pins with two balls).

The other numbers represent the amount of pins knocked down in one player's frame.

Every time a player bowls they have a chance to cross off a square. Only mark one square per each player's frame.
