Standard Sequencing

Description	Specifications	Price
Tube*	Standard single pass reaction	\$ 5.00
96-well plate	Standard single pass reaction in 96 well plate (min. 48 samples)	\$ 3.00
Express Plate (pre-mix)	94 DNA Read reactions (min 94 samples, 2 controls)	\$ 2.00
Ready to Load Service	Up to 95 reads for post-BigDye cleanup samples	\$ 0.50

SimpleSeq Kits

Description	Specifications	Price
SimpleSeq 96-Rxn Kit	96 reactions and barcode-labeled tubes	\$ 480.00
Reactivation of SimpleSeq Tubes	Single additional reaction for template in SimpleSeq tube	\$ 5.00
Power Read Upgrade	Upgrade of a SimpleSeq reaction	\$ 2.50
SimpleSeq Webless Kit	96 pre-mixed reactions in our barcode labeled tubes	\$ 480.00

Difficult Template Reads

Description	Specifications	Price
Power Read - Tube*	Reaction for difficult templates	\$ 8.00
Power Read - 96well Plate	Reaction for difficult templates	\$ 5.00
Express Plate (pre-mix)	94 Power Read reactions for your pre-mixed plate	\$ 4.00

BAC & Large Insert Clones

Description	Specifications	Price
BAC Read*	Reaction for insert in BAC or other large clone	\$ 15.00
BAC END Sequencing		\$ 90.00

Additional Services

Description	Specifications	Price
Primer Walking	0.7-10 kbp DNA samples; price is per base	\$ 0.13
Publication Quality (.3kb-3.0kb)		\$ 0.30
Publication Quality (3.0kb-10.0kb)		\$ 0.26
Publication Quality (10.0kb-20.0kb)		\$ 0.23
Primer Synthesis	Synthesis and storage (6 mos)	\$ 8.50
Primer Design & Synthesis	Design, synthesis, and storage (6 mos)	\$ 15.00
Plasmid or PCR - Tube	Plasmid preparation of a single tube template	\$ 3.00
PCR - 96well Plate	PCR purification for a plate based submission	\$ 135.00
Plasmid - 96well Plate	Plasmid preparation for a plate based submission	\$ 190.00

*Additional charges apply if Eurofins barcode labels are not used for tube submission
