## Introduction

Thank you for your interest in **JSN Epic** template. We really appreciate your choice and truly hope our product will bring more value to your website and business.

To have the best template understanding, we recommend you read the documentation in the following order:

1. **JoomlaShine Template Configuration Video** – a short video tutorial about the fast way to learn JSN Epic template. [Click here](#) to see the video tutorial.
2. **JSN Epic Configuration Manual** - This document will give detailed information about each template feature and how to apply it to your real website.
3. **JSN Epic Customization Manual** - This document will show you how to customize the template to make it suit your needs.

You can print all documents for convenient reading.

### Attention!

Features marked with **PRO** are available only in **JSN Epic PRO Edition** and are NOT available in **Free Edition**.

## JSN Template Framework

JSN Epic as well as all other Joomla templates from JoomlaShine is built based on **JSN Template Framework** – A clever template control system. Currently, it utilizes Bootstrap to provide users an intuitive interface. JSN Template Framework will be installed automatically when you install JSN Epic.

There are a lot of features in JSN Epic come from JSN Template Framework: Sample data installation, files modification checking and more. To learn more about it, please check [blog posts about JSN Template Framework on JSN blog](#).

You can update it whenever a new framework version is released. For more details, please check the section [Template Information & Auto Update notification](#).

## Hot Features Overview

### Joomla! 2.5 and 3.x support

*Joomla! 2.5 and 3.x support*

FILES DOWNLOAD		
Title	Version	Date
<b>JSN Epic PRO UNLIMITED</b>		
⊕ JSN Epic PRO UNLIMITED for Joomla! 2.5.x - 3.x (installation package)	6.0.0	10/09/2013
⊕ JSN Epic PRO UNLIMITED for Joomla! 2.5.x (Quickstart package)	6.0.0	26/07/2013
⊕ JSN Epic PRO UNLIMITED for Joomla! 3.x (Quickstart package)	6.0.0	18/05/2013
⊕ JSN Epic theme for EasyBlog	6.0.0	10/09/2013
⊕ JSN Epic theme for Kunena	6.0.0	10/09/2013
⊕ JSN Epic Graphics Package	6.0.0	01/12/2012
⊕ JSN Epic Documentation Package	6.0.0	27/07/2013
⊕ JSN Epic German Documentation Package	6.0.0	07/03/2013

### *Product files download*

In [Customer Area](#), you can choose to download appropriate installation file for the Joomla! version you are using.

- **JSN Epic XXX for Joomla! 2.5.x – 3.x (installation package)** where XXX is the template edition you have (FREE, PRO STANDARD or PRO UNLIMITED) – A data package which allows you to install JSN Epic template on available Joomla websites.
- **JSN Epic XXX for Joomla! YYY (Quickstart package)** where YYY is the Joomla version (2.5.x or 3.x) – It contains both the latest Joomla installation file and JSN Epic data. You install this package normally as the flow to install Joomla. After that, you will get a totally new Joomla website with JSN Epic template and its sample data.

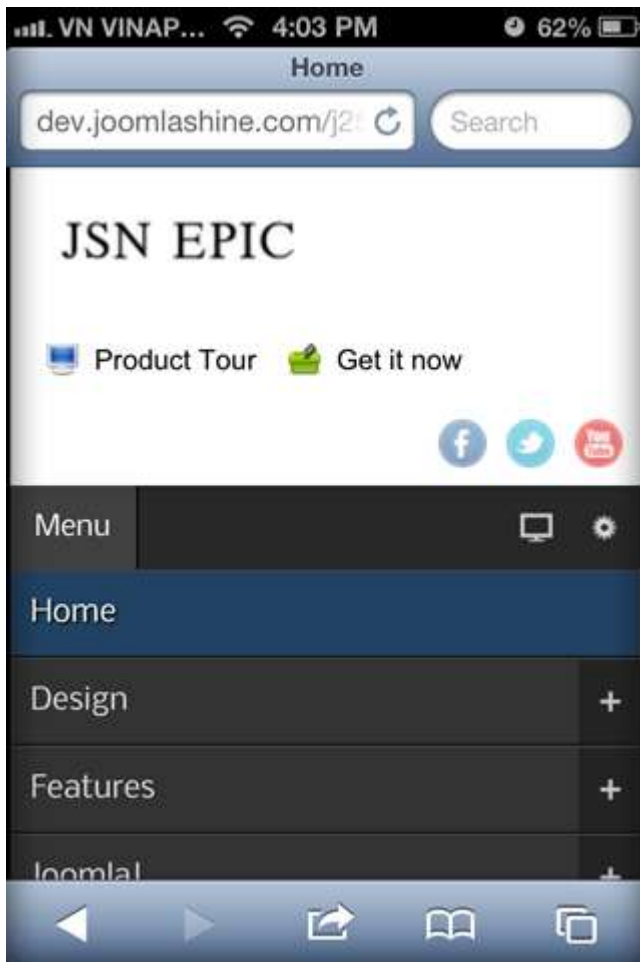

Besides these, you can download **JSN Epic Documentation package**, **JSN Epic Graphics PRO**, etc.

## Responsive design **PRO**

All JoomlaShine.com templates are responsive. They work normally on for modern mobile devices such as iPhone, Android and Windows mobile-based.

### Mobile layout overview on iPhone

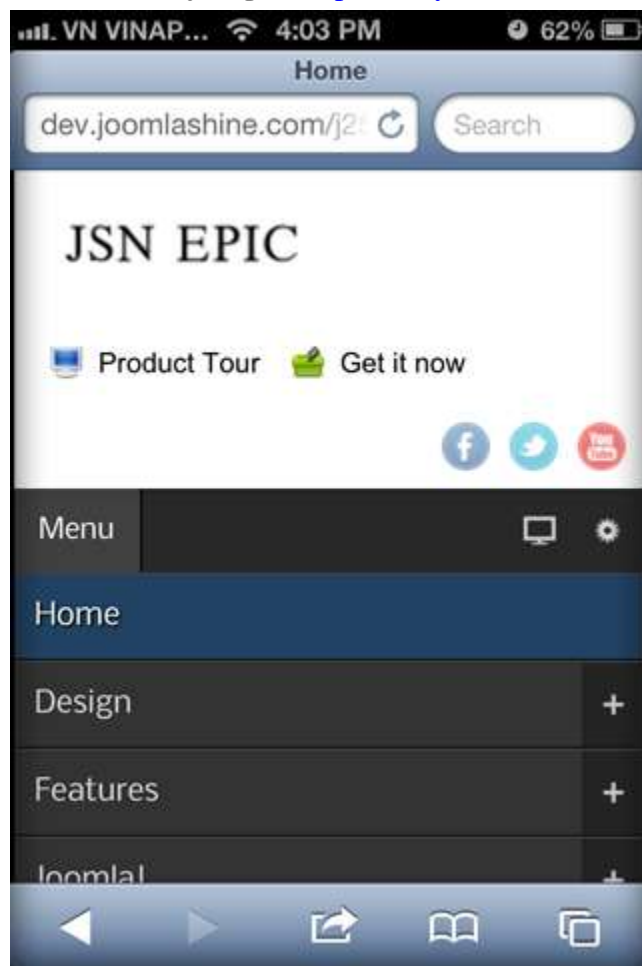

*Header and top content*

*Main body*

*Bottom content*

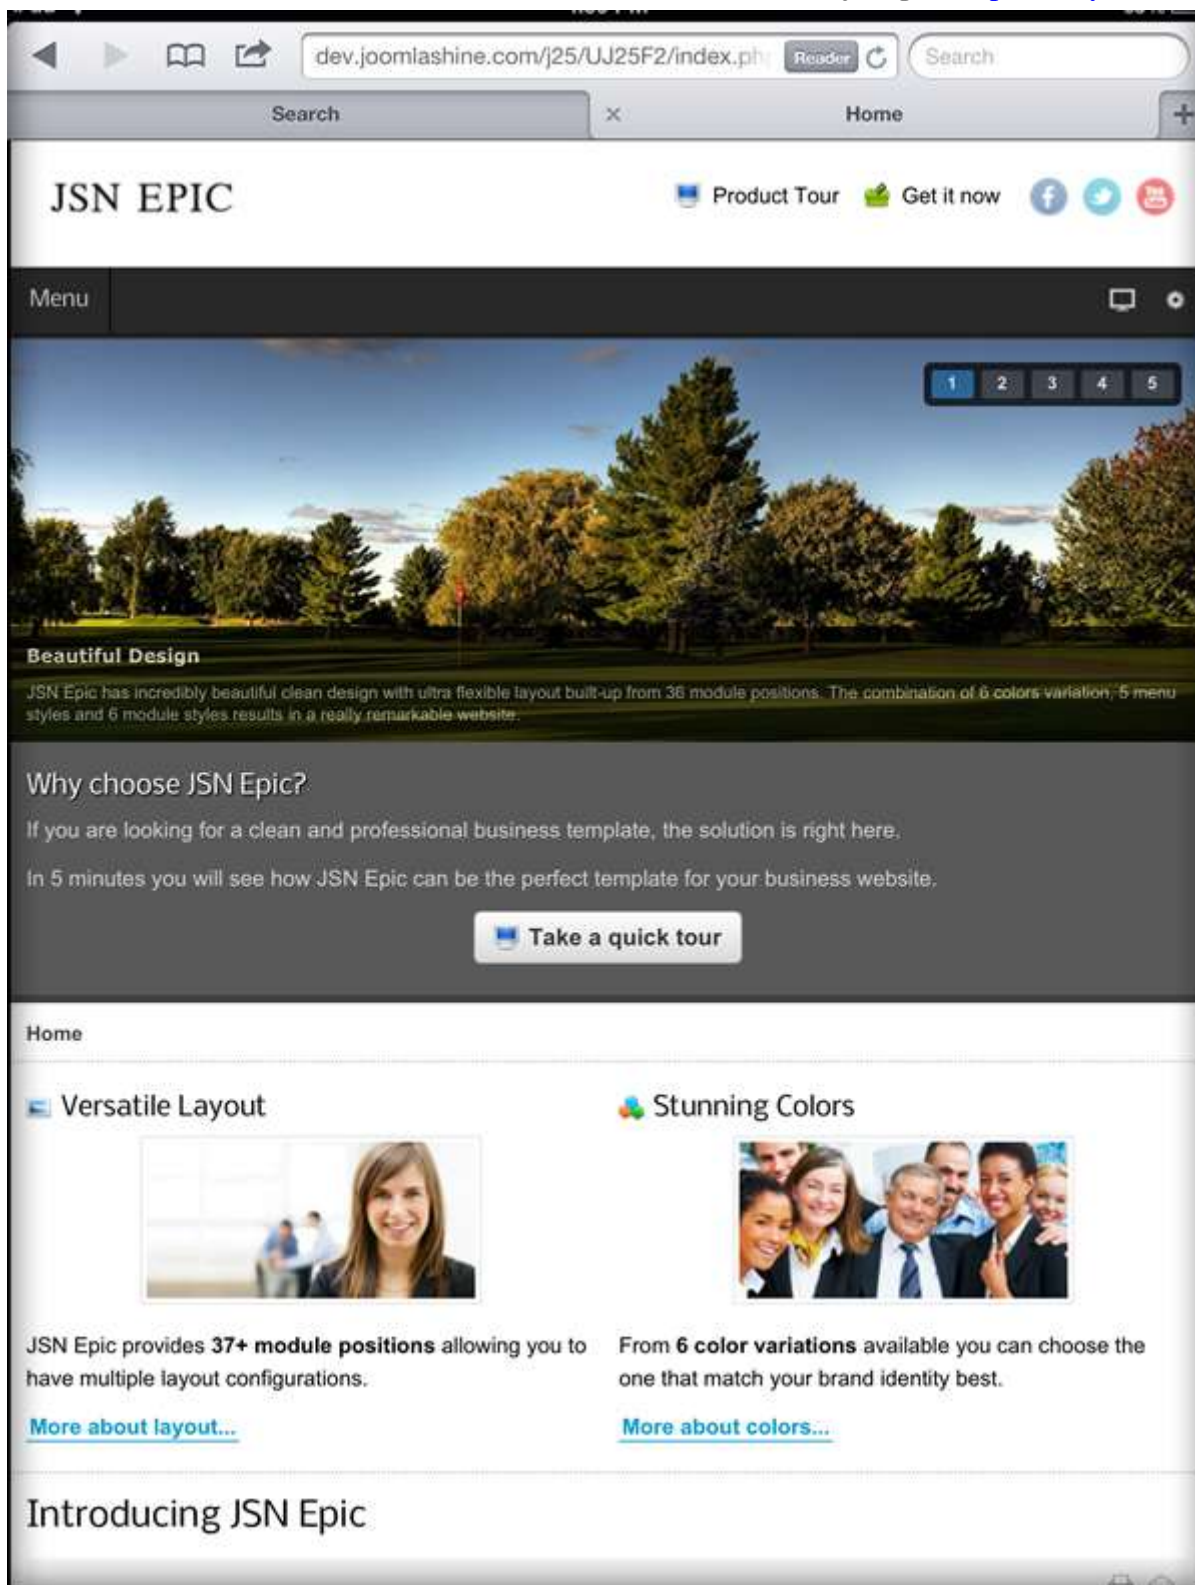

*Mobile menu*

Both of the above screenshots are taken from iPhone 4S, but the mobile edition works well in all modern large screen devices based on Android and Windows mobile as well.

### Mobile layout overview on iPad

Both vertical or horizontal iPhone and vertical iPad are presented in the same way with 2 columns layout, horizontal iPhone is presented with 3 columns layout.

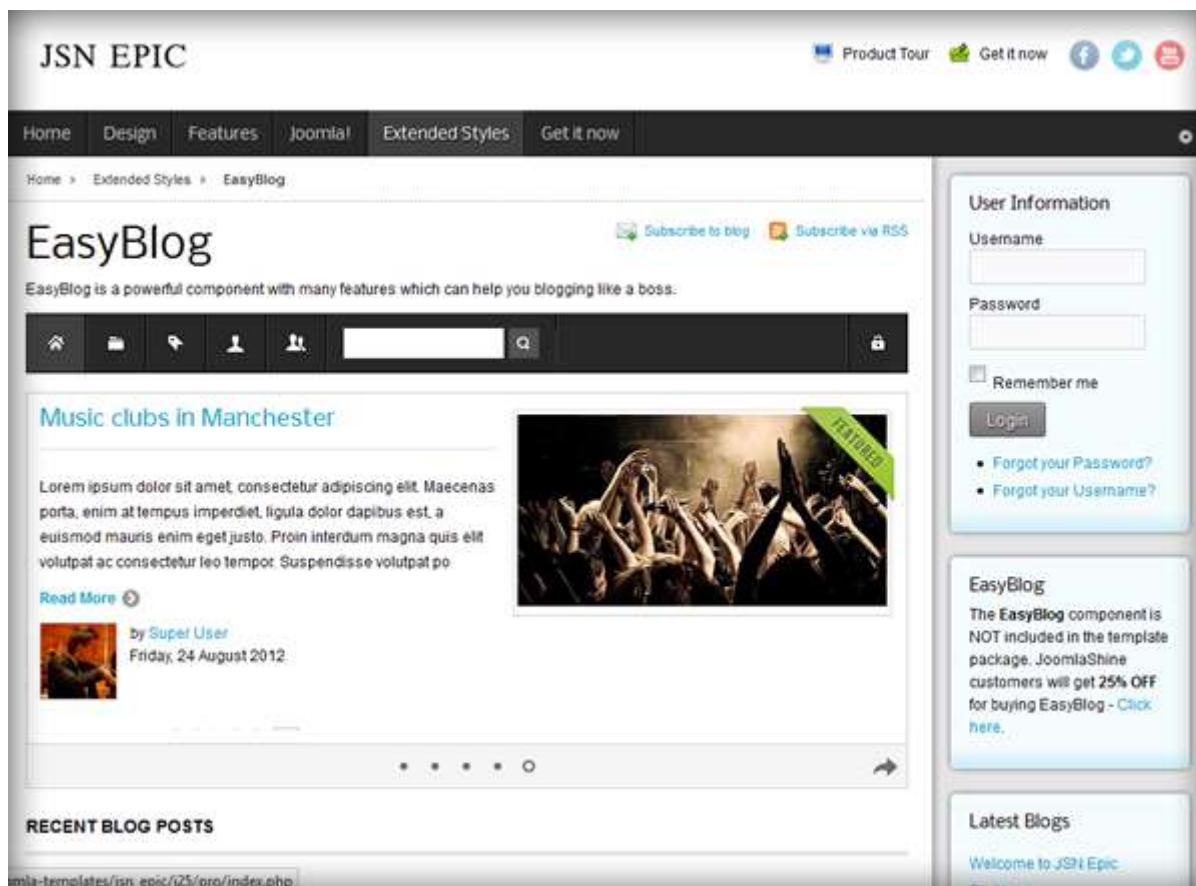

*Mobile layout overview on iPad*

**Read more:** Section [Mobile settings](#)

## Extended styles

### EasyBlog Support **PRO**

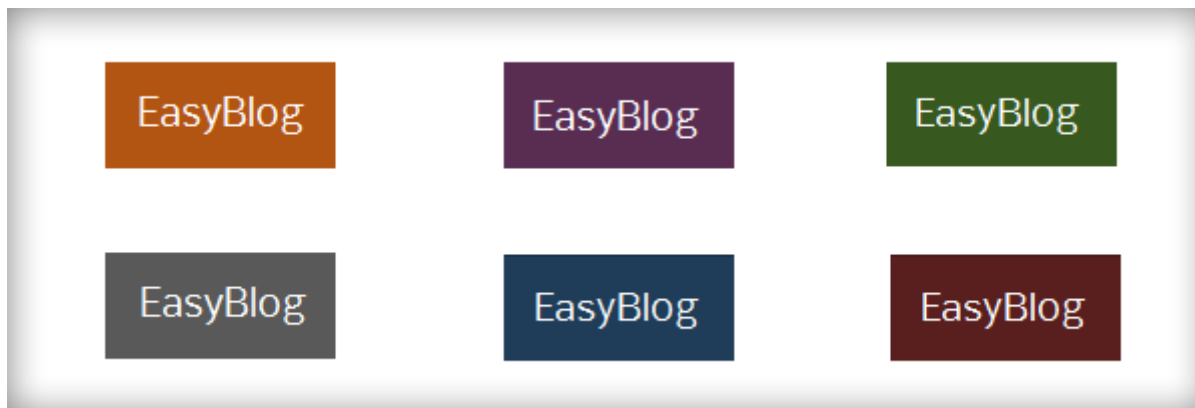

*JSN Epic theme*

After purchasing **JSN Epic template**, you can download **JSN Epic theme** in the Customer Area. This theme helps you build a nice blog easily.

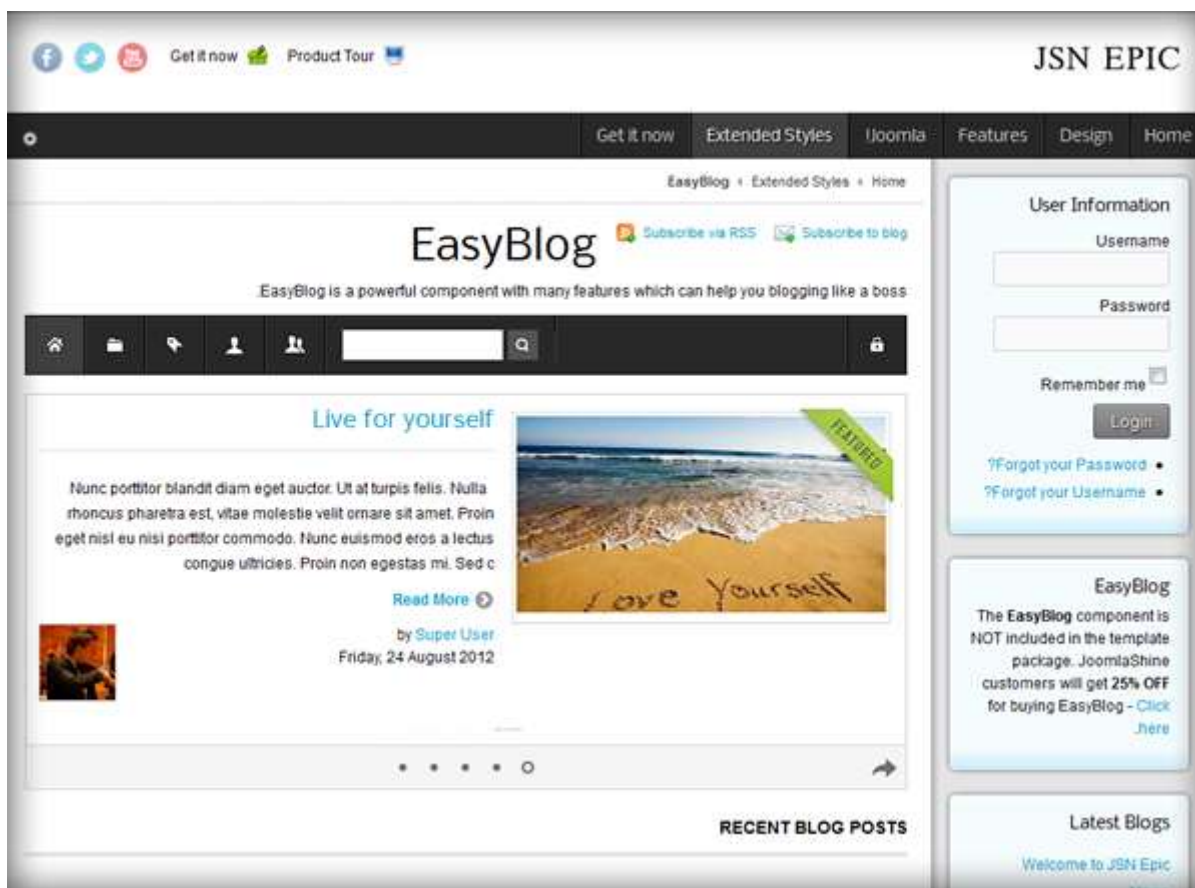

### 6 colors support

JSN Epic theme comes with 6 colors which go with 6 defined colors of JSN Epic template: Red, green, orange, blue, violet and grey.

## RTL Support

To set RTL support to EasyBlog, you just need to add **&jsn\_setdirection=rtl** to the end of the website address. Then, add **&jsn\_setdirection=ltr** to switch it to normal layout.

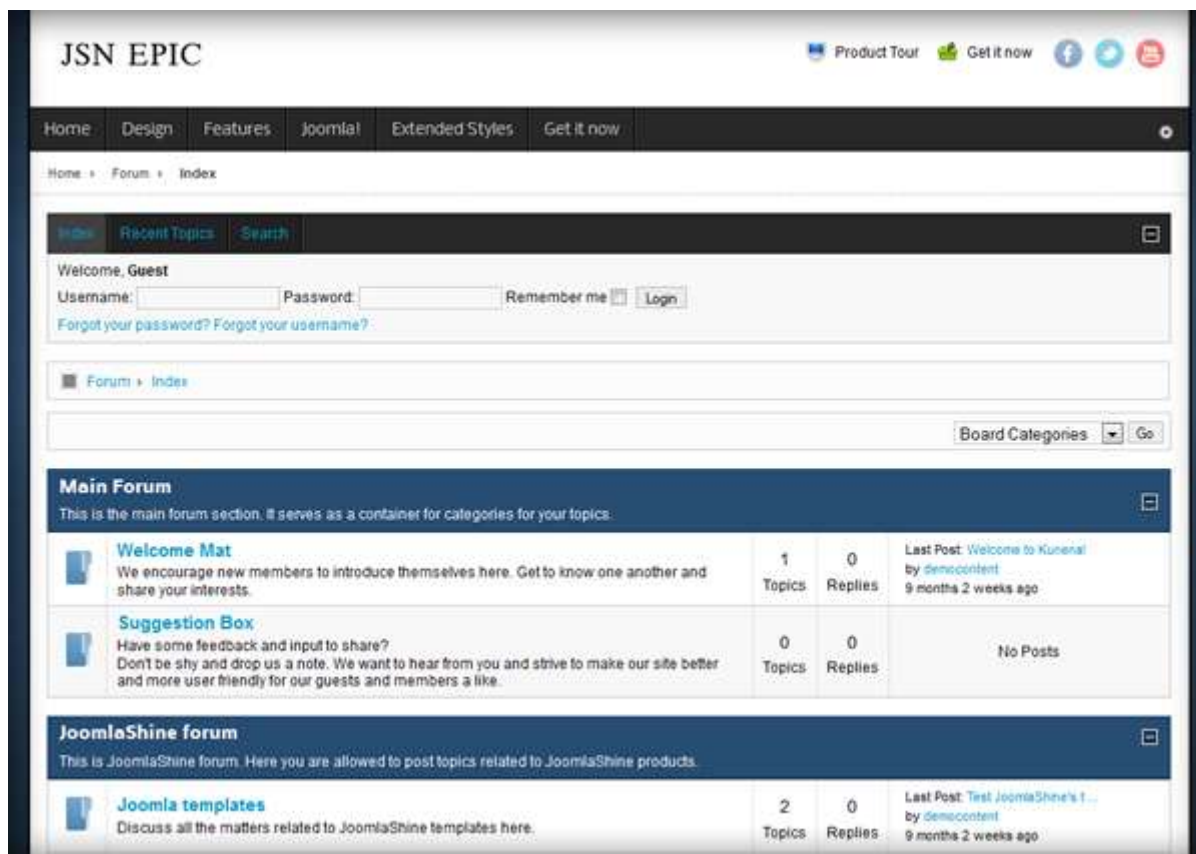

Besides these, JSN Epic theme brings you a better design better with some enhanced design elements - Such as calendar display, line borders, etc. when compared to the default theme.

**Read more:** Section [EasyBlog](#) **PRO**

## Kunena Support **PRO**

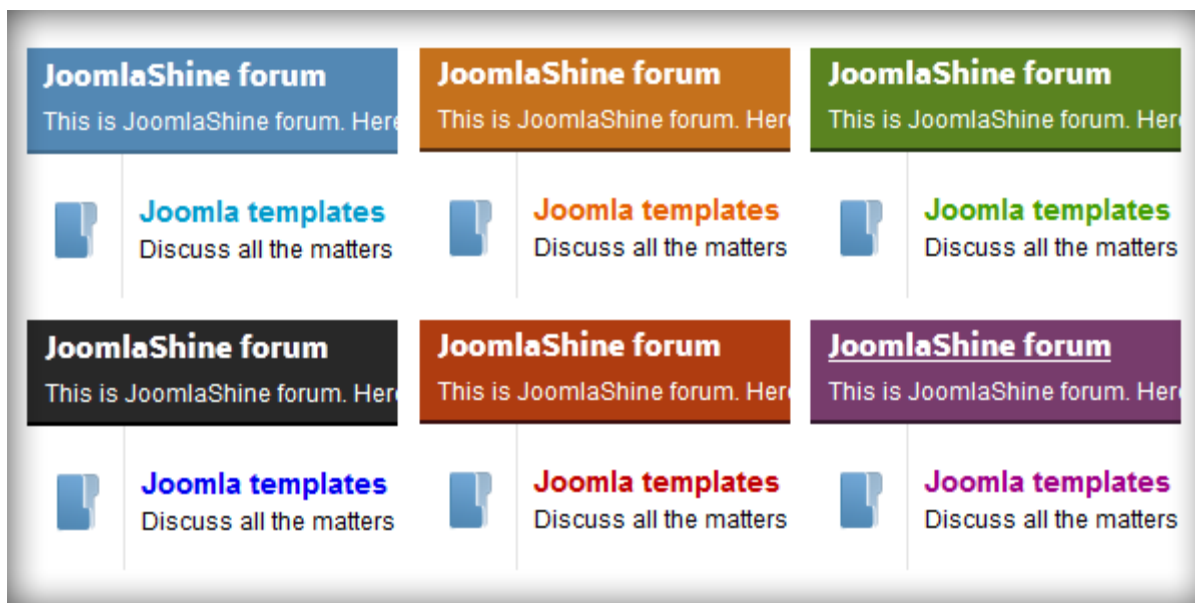

### *JSN Epic theme for Kunena*

After purchasing **JSN Epic template**, you can download **JSN Epic theme** at the Customer Area. This theme helps you build a nice forum easily.

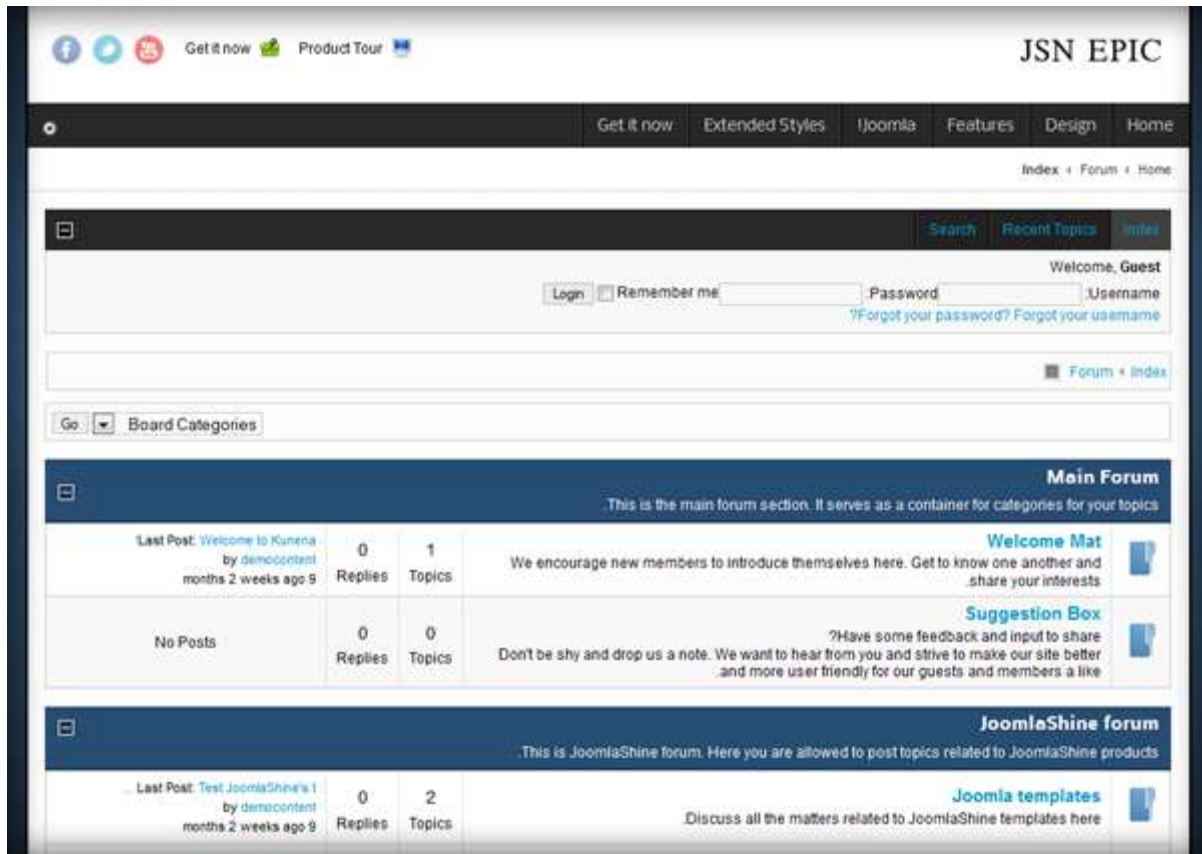

## 6 colors support

JSN Epic theme comes with 6 colors which go with 6 defined colors of JSN Epic template: Blue, red, green, violet, orange and grey.

## RTL Support

To set RTL support to Kunena, you just need to add **&jsn\_setdirection=rtl** to the end of the website address. Then, add **&jsn\_setdirection=ltr** to switch it to normal layout.

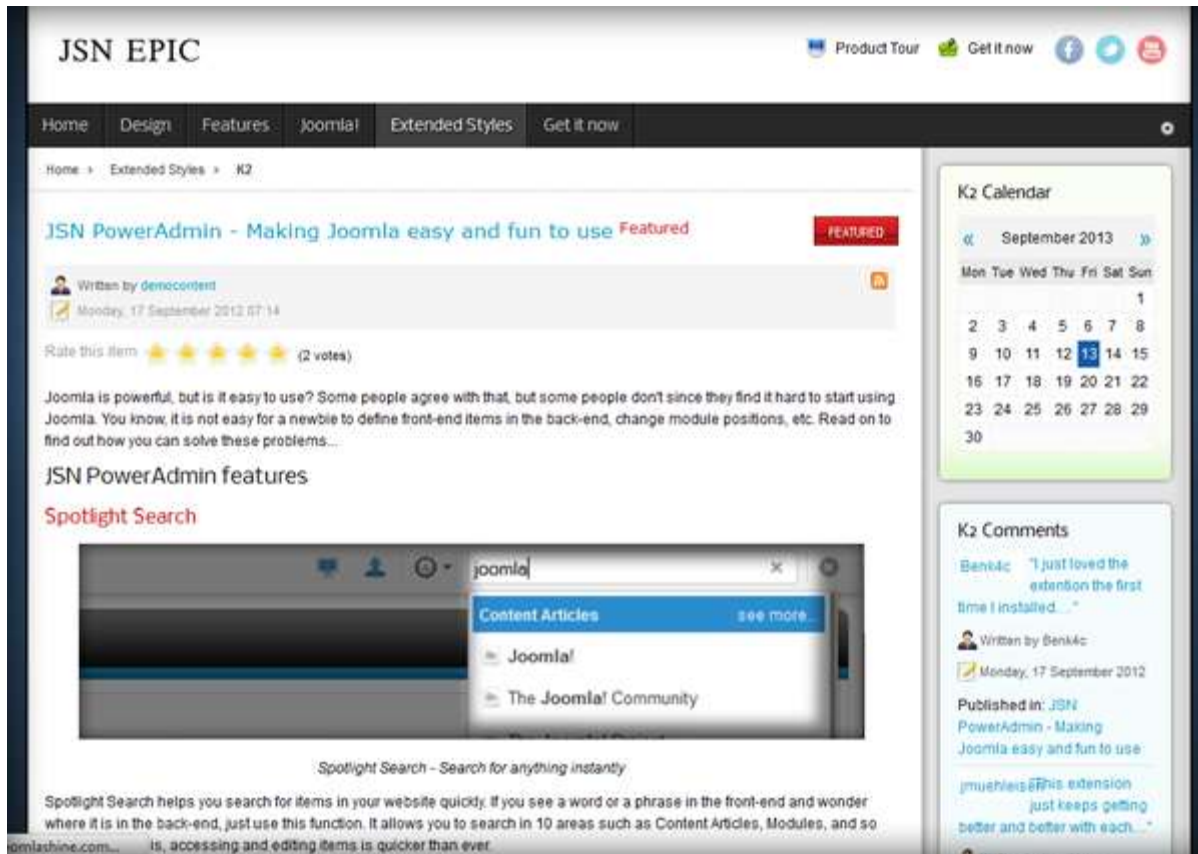

## Attention!

Kunena is not included in the JSN Epic template package. You can download Kunena freely at <http://www.kunena.org/>

## K2 Support

Here is how K2 and JSN Epic combination looks like. You can see all **K2 components** such as K2 Comment, K2 Content, K2 Users, TagCloud, Article, etc work well with JSN Epic.

*JSN Epic is fully supported K2 style*

## Attention!

K2 is not included in the JSN Epic template package. You can download K2 freely at <http://getk2.org/>

*Read more: Section K2*

## CSS/JS Compression **PRO**

At JoomlaShine.com, we put great effort into optimizing our templates performance with multiple techniques like image sprites application, clean html code output and now one new step – **CSS/JS Compression**.

URL	Size	Timeline
GET dev1	37 KB	2.41s
GET modal.css	433 B	563ms
GET template.css	10.5 KB	546ms

GET k2-logo.png	1.6 KB	

*After enabling CSS/JS compression*

This feature significantly reduces http request number to server as well as overall loading size, which results in 35% performance boost. For more information, please read the section **Compress CSS/JS** in this document.

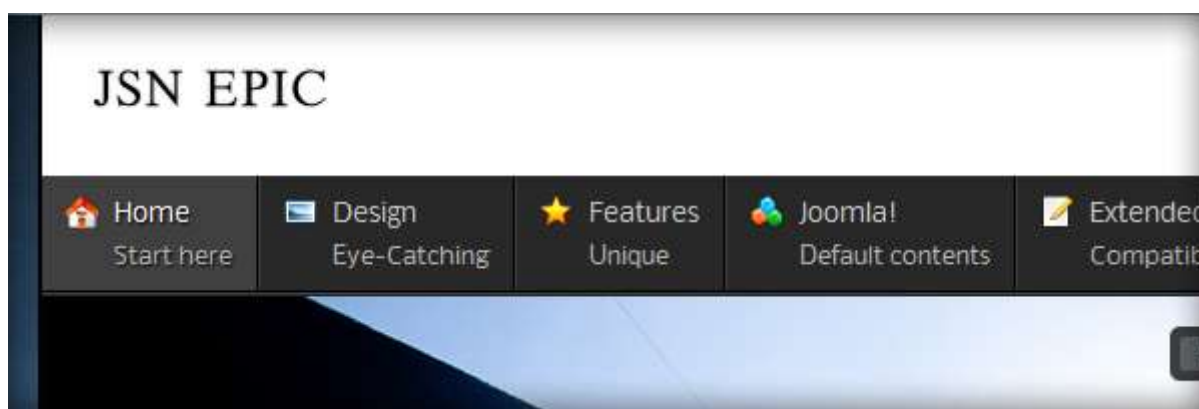

*Read more: Section [CSS/JS Compression](#) **PRO***

## Unilcons **PRO**

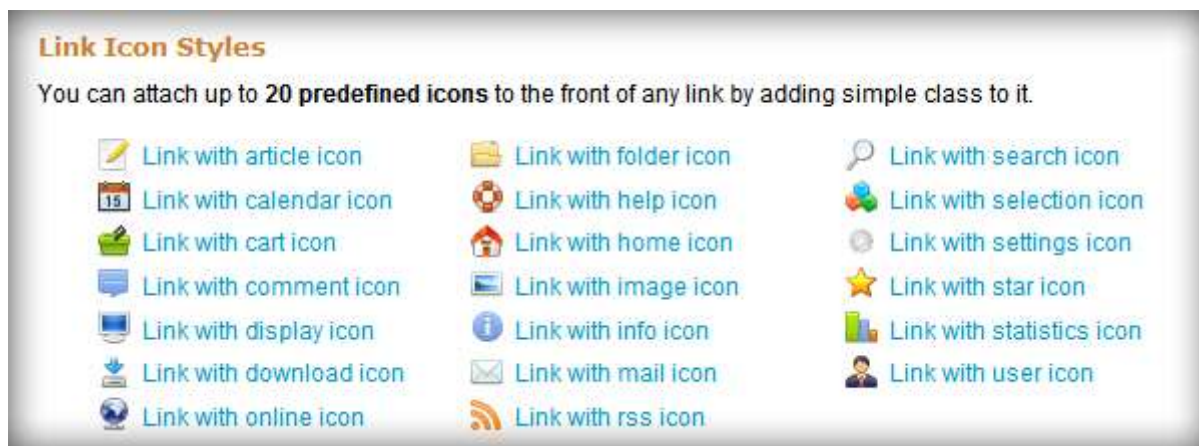

JSN Epic is shipped with **20 carefully selected icons** which can be used for multiple purposes. We call this concept **UniIcons**.

Here you can see quick examples of how these beautiful icons can be utilized.

*UniIcons attached to menu items*

*UniIcons attached to links*

*UniIcons attached to module header*

*UniIcons attached to list items*

## Multiple icons, single image

JSN Epic utilizes the image sprite CSS technique to reduce the number of HTTP requests to the server.

Technically, all icons are merged in one single image file and visitors will need to make **just one single request/download** to the server to get all icons. If you have some extra time, please read [more about CSS sprites](#).

## Native RTL support

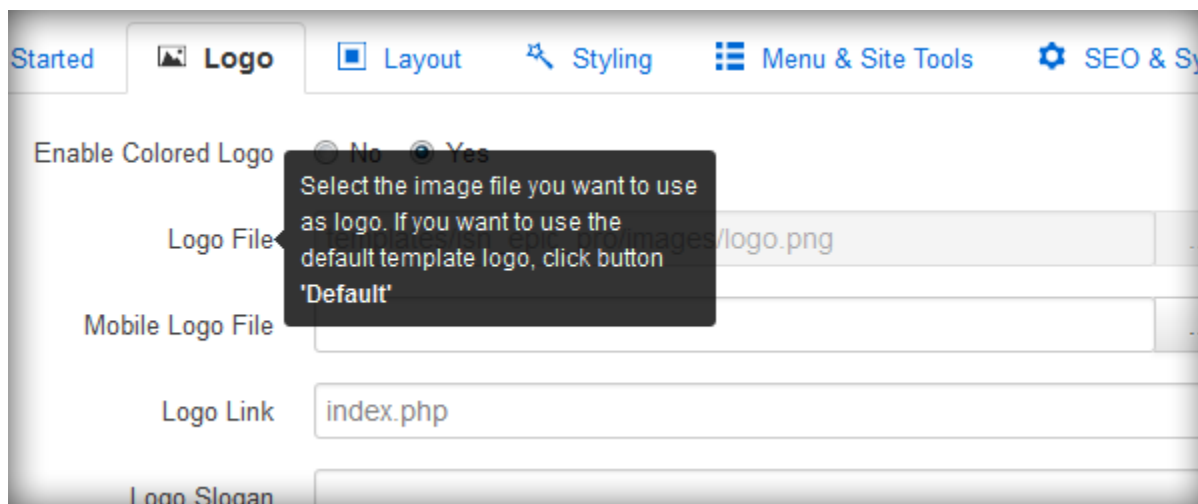

### *Right To Left JSN Epic layout*

All JoomlaShine templates are equipped with **native RTL support**. We spent a huge amount of time tweaking every tiny detail of the template to make it look absolutely awesome in the RTL mode. Everything is horizontally-flipped including the dropdown main menu and side menu.

You don't have to do any additional template configuration to enable the RTL mode. Just set some RTL language in Joomla! administration and our template will automatically detect and enable the RTL mode.

## Multilingual support

In JoomlaShine.com templates, all the wording of both back-end and front-end are moved to separate language files, so you can easily translate them into any language you want. Currently our templates support **14 primary languages** with more to come in the future.

*English*

*German*

For more information about supported languages, please read section **Multilingual support** in this document

**Read more:** Section [Multilingual support](#).

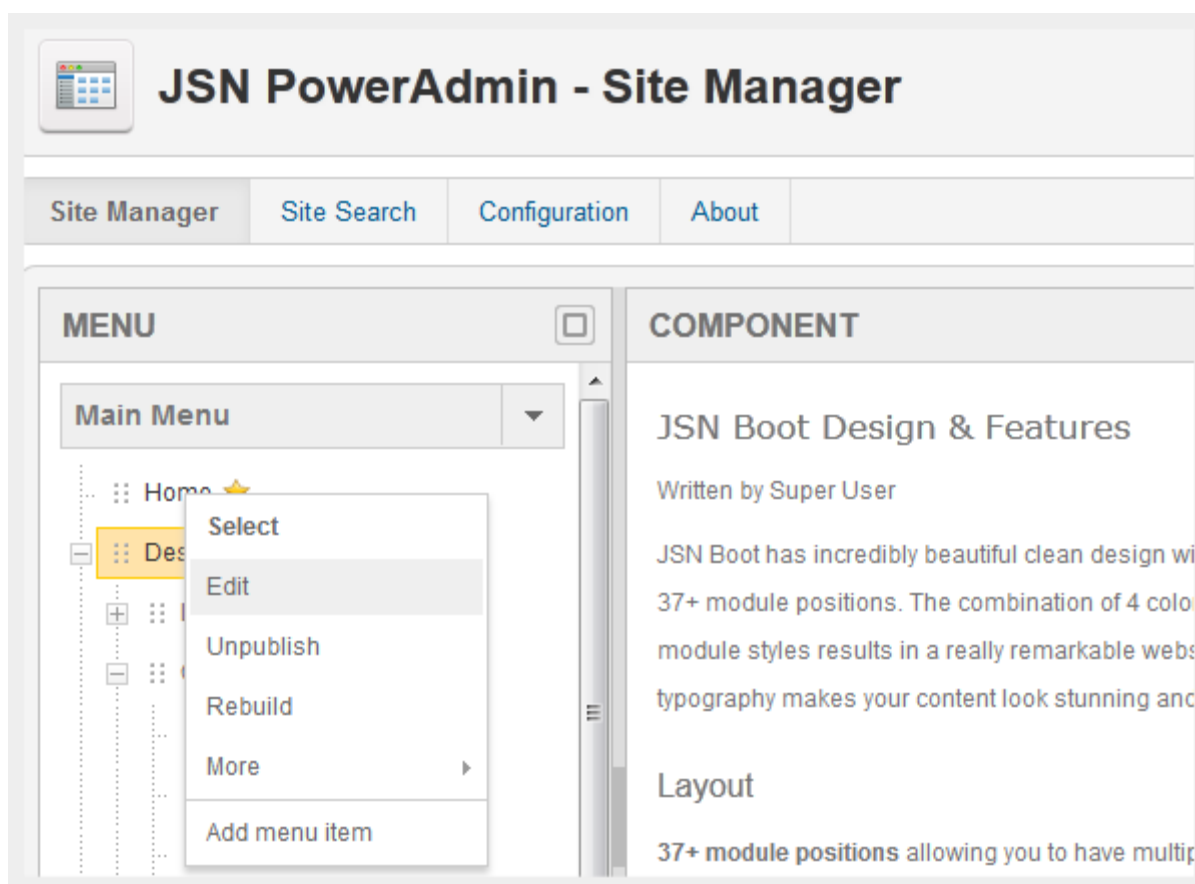

## Free extensions

### JSN PowerAdmin – Joomla Admin made easy

JSN PowerAdmin makes your Joomla administration process easy and enjoyable. It allows you to have full control over your Joomla website in a single screen. You can manipulate elements by using an intuitive GUI with drag-n-drop operations.

Main features of JSN PowerAdmin:

- Search any items quickly in back-end with **Spotlight Search**
- Control the website content in one place with **Site Manager**

JSN PowerAdmin is totally FREE!

[VIEW DEMO](#) – [DOWNLOAD JSN POWERADMIN](#)

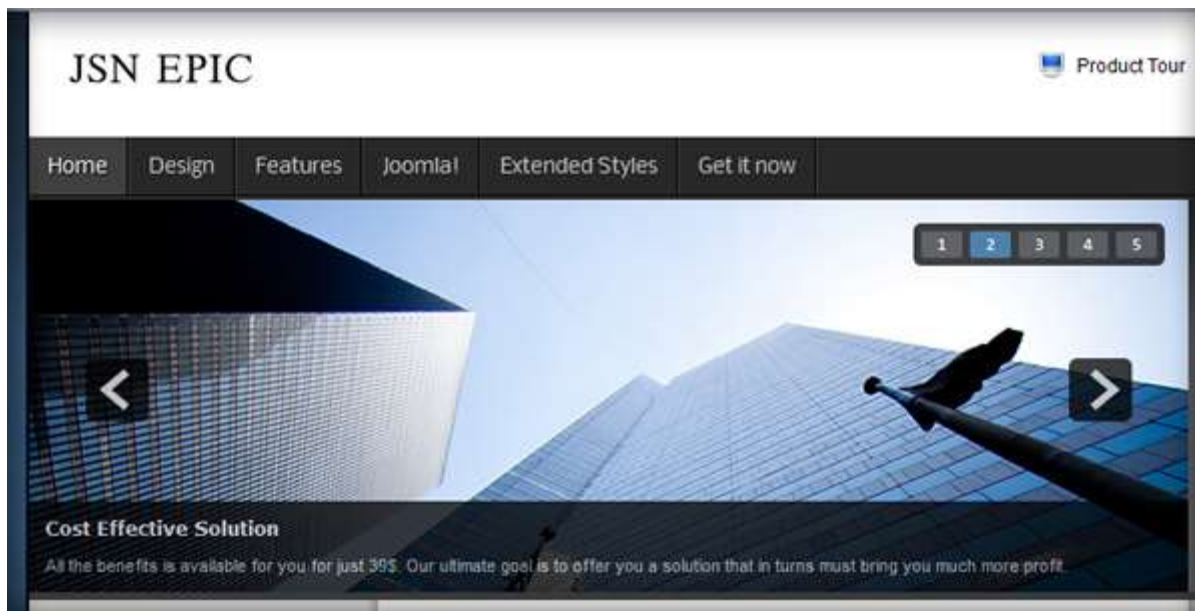

## JSN ImageShow – Stunning Joomla gallery

The image gallery you see on our demo website is another cool product **JSN ImageShow** from JoomlaShine.com. This product is shipped with component, module and content plug-in so that you can present a gallery anywhere on every website. The image gallery works normally on desktop and mobile devices.

### Presentation as module

Here you can see how JSN ImageShow is presented as a slideshow module in position **promo**.

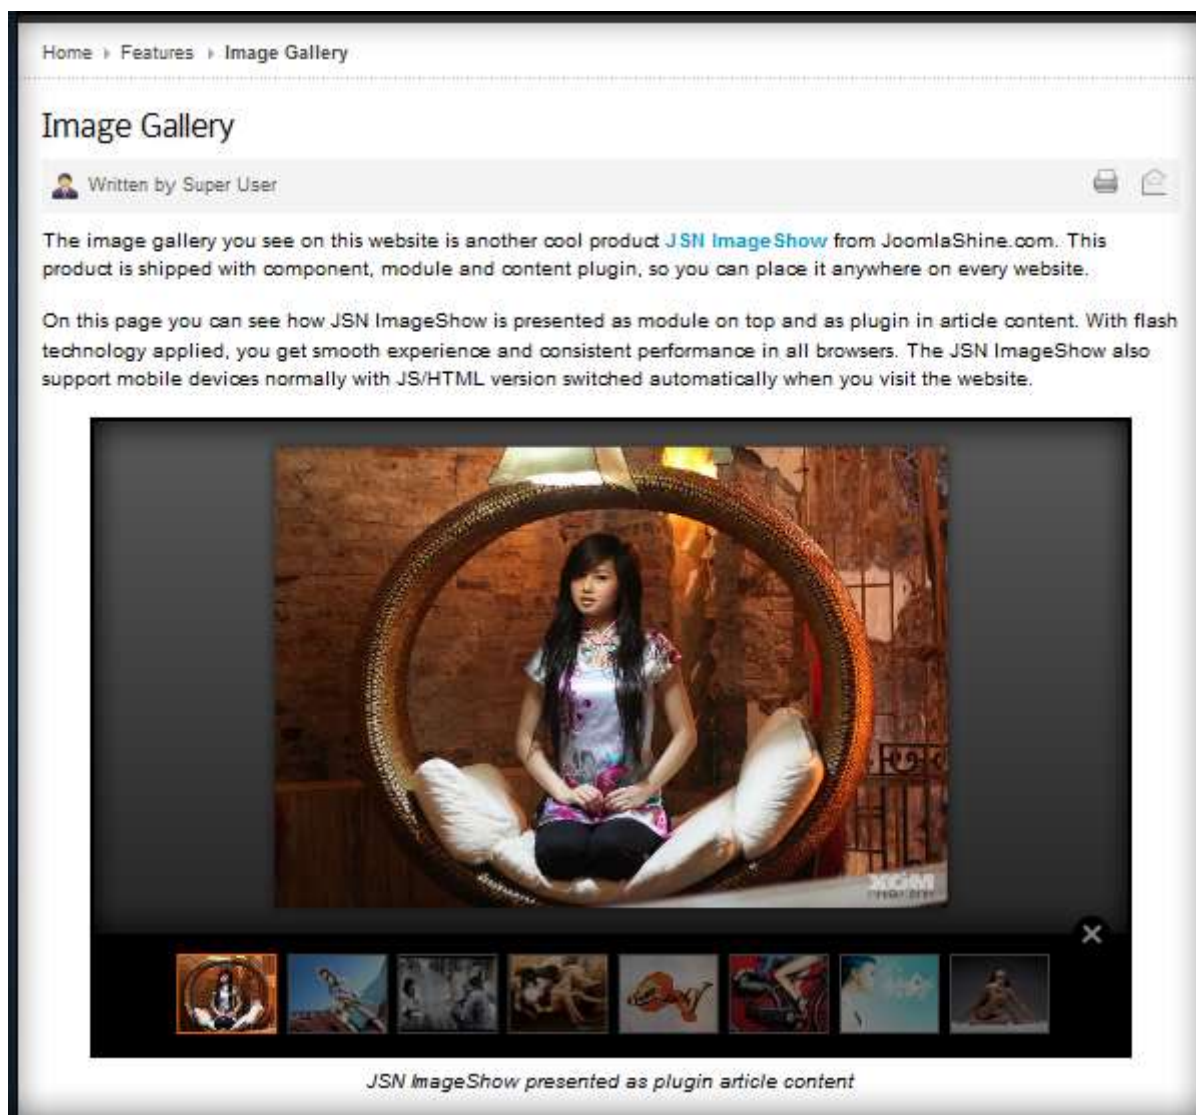

*JSN ImageShow presented as slideshow module*

## Presentation as plugin

Here you can see how JSN ImageShow is presented as full featured gallery with thumbnails inside the article.

*JSN ImageShow presented as gallery in main body content*

JSN ImageShow is NOT included in the template package, but you can download it separately **for free**.

[VIEW DEMO](#) – [DOWNLOAD JSN IMAGESHOW](#)

## JSN UniForm – Easy Joomla form builder

JSN UniForm will bring you the new indulgence since you find out it is the easiest-to-use form extension for your site. Contact us, survey and job application are just some of thousand forms that this single extension can help you to create and control.

Besides the intuitive **drag-n-drop operation**, **flexible form presentation** and **multiple pages layout**, JSN UniForm also assists you to deeply understand your collected data with the multiple admins email notification, clean result display or submission filter.

The screenshot shows a web form titled "JoomlaShine Template Survey". Below the title is a paragraph: "We appreciate your opinion and take seriously to the each answer. In order to thank you for your participa shopping voucher for JoomlaShine's product purchase." The form has two sections. The first section is titled "Who are you? Tell more about yourself \*" and contains four radio button options: "Individual building website for himself", "Freelancer building websites for clients", "Web Agency", and "Others". Below these options is a large, empty rectangular text input field with a small grid icon in the bottom right corner. The second section is titled "Your Joomla experience: \*" and contains three radio button options: "Less than 1 year", "1-3 years", and "More than 3 years".

*A survey created by JSN UniForm*

JSN UniForm is NOT included in the template package, but you can download it separately **for free**.

[VIEW DEMO](#) – [DOWNLOAD JSN UNIFORM](#)

## Getting Started

### Template installation

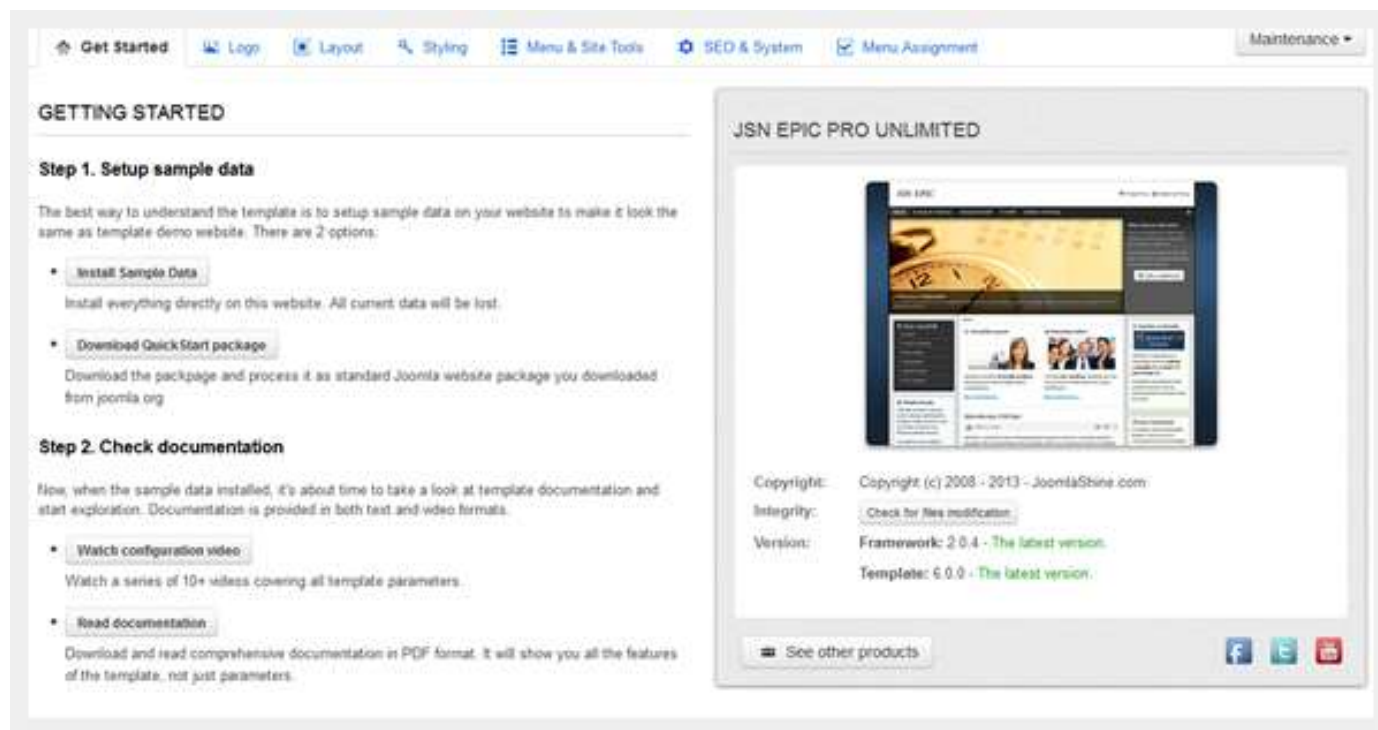

After downloading, you should have a template installation file called **jsn\_epic\_XXX\_Z.Z.Z\_install.zip**, where:

- **XXX** is the template edition. It can be **free** or **pro**.
- **Z.Z.Z** is the template version.

This is a standard Joomla! template installation file which can be installed in Joomla! administration as usual. Here are quick instructions to remind you:

1. In Joomla! administration, go to menu **Extensions** ->**Extension Manager**
2. Once you are on **Extension Manager**, click **Browse** button and select template installation file **jsn\_epic\_XXX\_Z.Z.Z\_install.zip**. After that, click on button **Upload & Install**.
3. Installation file will be uploaded to your server and installed in Joomla!
4. Set the templates as default, go to menu **Extensions** ->**Template Manager**

## Template Parameters

### *Template parameters logically grouped in panels*

All JoomlaShine templates can be effortlessly configured by template parameters. In template setting page, there are **nearly 40 template parameters** arranged into logical groups for convenient operation.

To access template setting page, please take the following steps:

1. Go to the template manager by menu **Extensions ->Template Manager**.
2. Click on template name **JSN\_Epic\_XXX**, where XXX is the template edition you have.
3. Here in the **Template Edit** page, you will see the list of template parameters in section **Parameters**.
4. Click button **Save** to save all changes you've made.

## Template Information & Auto Update notification

### JSN EPIC PRO UNLIMITED

Copyright: Copyright (c) 2008 - 2013 - JoomlaShine.com

Integrity:

Version: Framework: 2.0.4 - The latest version.  
Template: 6.0.0 - The latest version.

[f](#) [t](#) [y](#)

In the first parameter, you can find important information about the latest template version. We really do treat our templates as a piece of software, which needs to be continuously improved. So you should always make sure you are using the latest version.

Also, in this section you can find some other relevant information such as **Author** and **Copyright**.

JSN Epic automatically checks the latest version available for **template version** and **framework version** to download.

- If you want to update Framework only, click on the button **Update to Y.Y.Y** (Y.Y.Y is the latest framework version) which is next to the current framework version. After that a new modal window appears on your web browser, you click on the button **Update**, waiting for the update process, then click **Finish**.
- If you want to update both framework and template, click on the button **Update to X.X.X** (X.X.X is the latest template version) which is next to the current template version. You fill in the JoomlaShine customer account and click on the button **Update**, waiting for the update process, then click **Finish**.

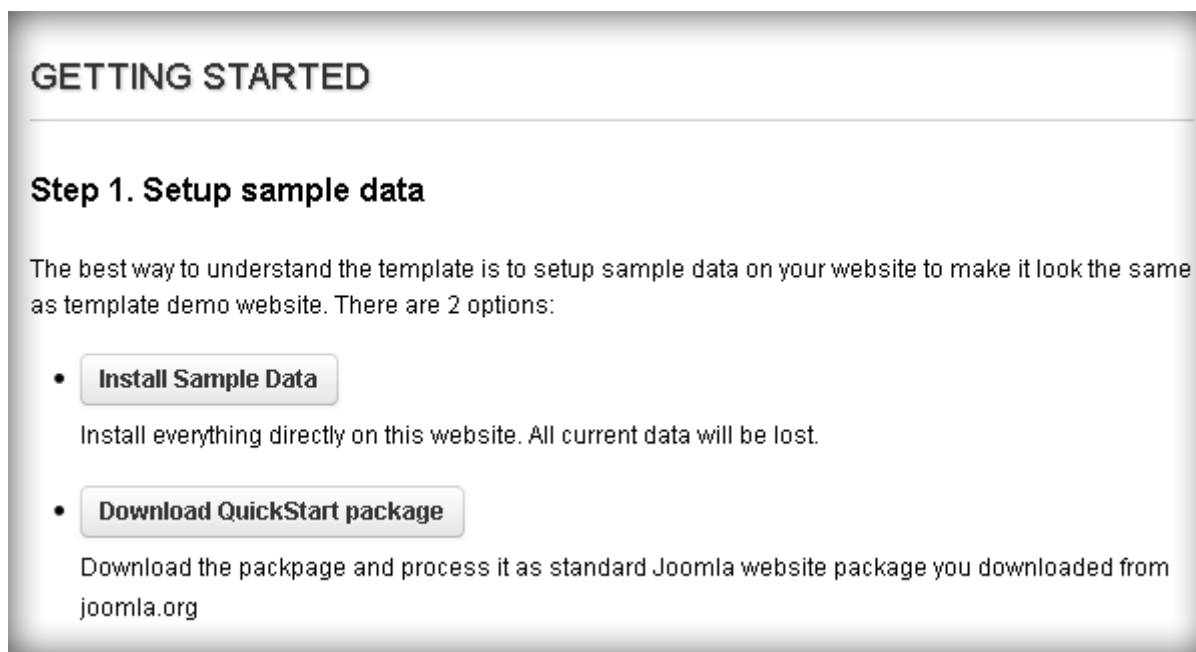

The screenshot shows a modal window titled "JSN MICO PRO STANDARD" with the subtitle "Update Template to the latest version". The main text states: "This updater will guide you through the process of updating your template to the latest version." Below this is a yellow box labeled "Important information" containing two bullet points: "All website content and template parameters remain the same after the update." and "If you made changes to template files, then you will have to port those changes to new template manually after the update process. Detailed instructions will be provided." Underneath is a section titled "Enter JoomlaShine.com Customer Account" with the instruction: "For verification, please enter the JoomlaShine customer account that you created when making purchase." This section contains two input fields: "Username:" and "Password:". Below the input fields is a blue "Update" button. At the bottom right of the modal is a blue "Close" button.

### *Update template to the latest version*

After that the window about successful upgrade appears in your web browser.

Please note, if you customized the CSS files of original template, the changes would be lost. The best if you do backup the customized CSS files before the upgrade process.

## Sample Data Installation

All JoomlaShine templates have unique feature of installing sample data which makes your testing website look the same as on the template demo website. You can choose to install:

- **Sample Data** – A light package with only JSN Epic data. You install it on your available Joomla websites.
- **QuickStart package** – It contains both the latest Joomla installation file and JSN Epic data. You install this package normally as the flow to install Joomla. After that, you will get a totally new Joomla website with JSN Epic template and its sample data.

Below is the instruction to install **Sample Data** package:

1. First, go to the template settings page, at the parameter **GETTING START**, click **Install sample data** button.

The screenshot shows a Joomla! dialog box titled "Install Sample Data". The text inside states: "This installer will make your website looks the same as JSN Epic PRO live demo website." Below this is a yellow box with a red header "Important information" containing two bullet points: "Installing sample data will delete all data on this website." and "It is NOT recommended to install sample data on production website." At the bottom, there is a checkbox with a checkmark and the text "I agree that installing sample data will delete all content on this website". Two buttons are at the bottom right: "Install Sample Data" (blue) and "Cancel" (grey).

**Install Sample Data**

This installer will make your website looks the same as JSN Epic PRO live demo website.

**Important information**

- Installing sample data will delete all data on this website.
- It is NOT recommended to install sample data on production website.

☒ I agree that installing sample data will delete all content on this website

**Install Sample Data** Cancel

2. Next, on page **Sample Data Installation** follow on-screen instruction to start the process.

- **Download sample data package** of the demo website data such as: demo articles, demo menus, demo template settings, etc.
- **Install free extensions:** JSN ImageShow, JSN PowerAdmin and JSN UniForm. You can install them or not.
- **Install sample data:** this step will check the template version before installing the sample data.

## Install Sample Data

There are several stages involved in the process. Please be patient.

- ~~Download sample data package.~~ ✓
- For the best experience, it's strongly recommended for you to install following free extensions.
  - ☒ JSN ImageShow **New Installation**
    - ☒ JSN Extension Framework **Update**
    - ☒ JSN ImageShow Source Picasa **New Installation**
    - ☒ JSN ImageShow Theme Classic **New Installation**
    - ☒ JSN ImageShow Theme Slider **New Installation**
    - ☒ JSN ImageShow Theme Grid **New Installation**
    - ☒ JSN ImageShow Theme Carousel **New Installation**
    - ☒ JSN ImageShow Theme Stip **New Installation**
    - ☒ JSN ImageShow Theme Flow **New Installation**
  - ☒ JSN PowerAdmin **Update**
    - ☒ JSN Extension Framework **Update**
  - ☒ JSN Uniform **New Installation**
    - ☒ JSN Extension Framework **Update**

3. Finally, you should click the **Finish** button to **Return to template settings page** for further configuration.

## Install Sample Data

- Download sample data package. ✓
- For the best experience, it's strongly recommended for you to install following free extensions.
  - JSN ImageShow ✓
    - JSN Extension Framework ✓
    - JSN ImageShow Source Picasa ✓
    - JSN ImageShow Theme Classic ✓
    - JSN ImageShow Theme Slider ✓
    - JSN ImageShow Theme Grid ✓
    - JSN ImageShow Theme Carousel ✓
    - JSN ImageShow Theme Strip ✓
    - JSN ImageShow Theme Flow ✓
  - JSN PowerAdmin ✓
    - JSN Extension Framework ✓
  - JSN Uniform ✓
    - JSN Extension Framework ✓
- Install sample data. ✓

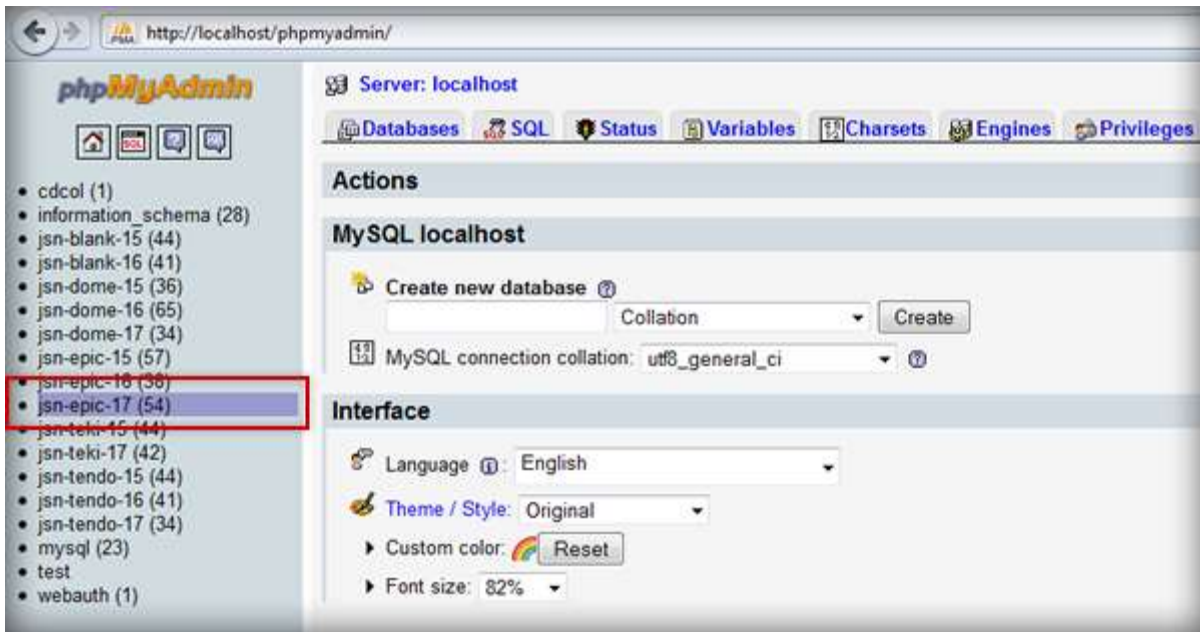

**Sample data is successfully installed**

## Original data restoration

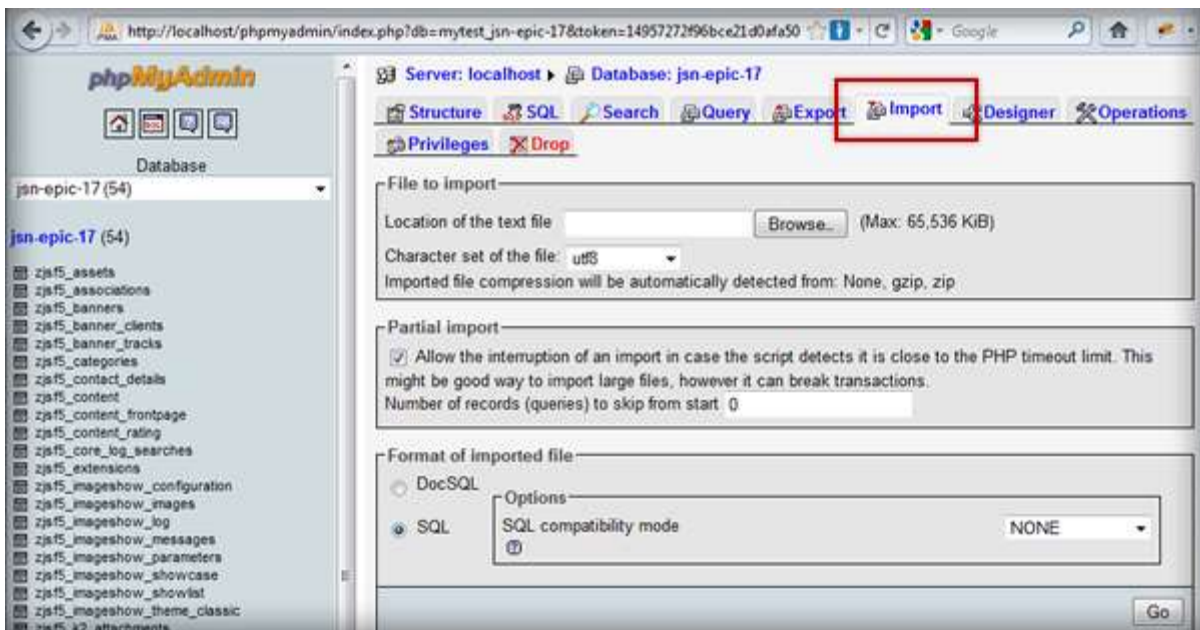

Before the sample data installation process, all original data of your website is automatically backed up into a backup file located in folder **/backup** inside the **joomla\_root\_folder/templates/jsn\_Epic\_XXX/**, where **XXX** is the template edition on your server. Technically, this is the zip file which contains a plain text file with SQL instructions that need to be executed on your Joomla! database.

Below are the instructions on how to do that by using software phpMyAdmin 3.2.1.

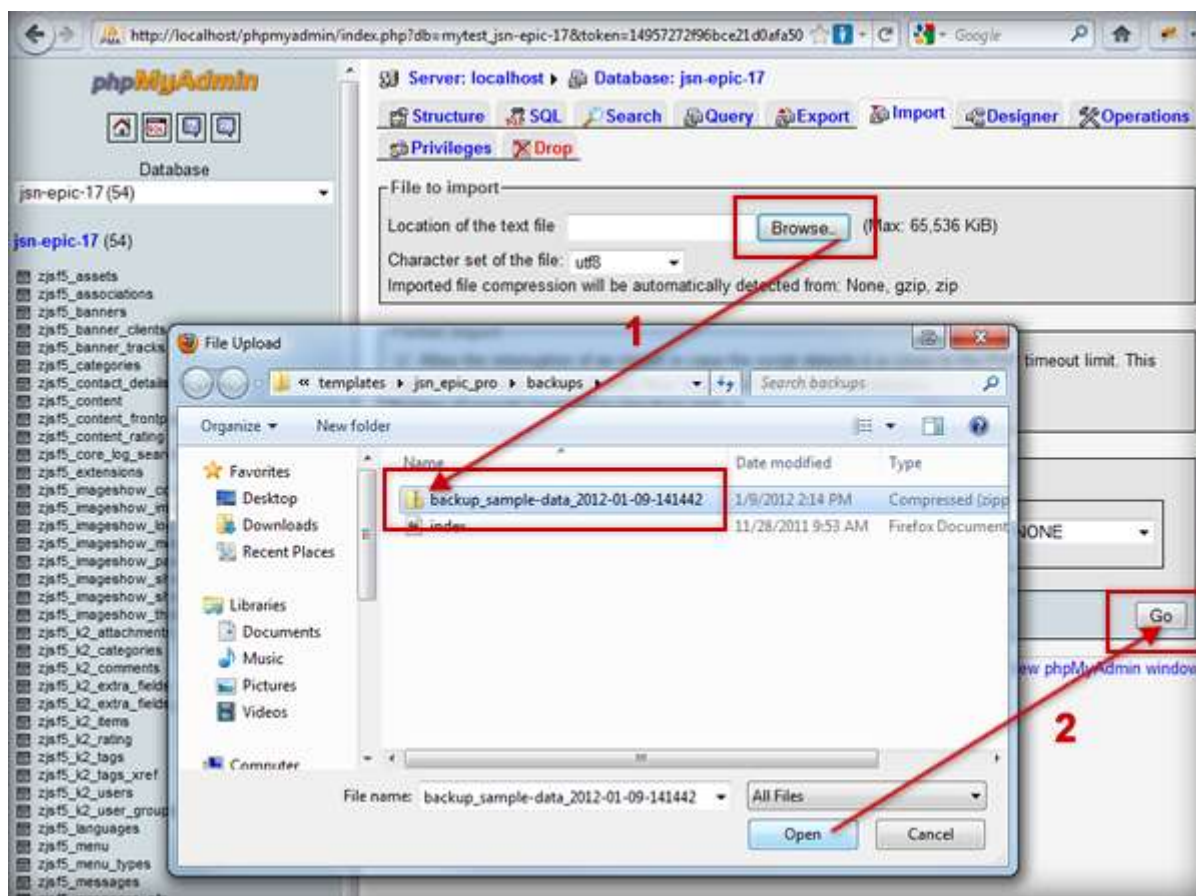

1. First, login to phpMyAdmin and select your Joomla! database on the left column

2. Next, select tab **Import** on the horizontal menu bar

3. Next, click button **Browse..**, then select the backup zip file and click button **Go** at the right corner of the page.

After script execution, you can get back to your website to check how the original data was restored.

## **Video tutorial**

It guides you how to install a JSN template and sample data visually. Here are [video tutorials](#).

**JSN Epic** in the video is an example and these instructions can be applied to other **JSN templates** as well.

## Favicon configuration

Favicon is a small icon positioned on the left of the address bar of your browser. By default, Joomla! has an icon as shown on the screenshot below.

*Default Joomla! favicon*

On your website, you might want to use your own icon, like the one we are using on our site joomlashine.com.

*JoomlaShine favicon*

Here are instructions on how to do that:

### Step 1: Create your own favicon file

Technically, favicon is a regular **16px \* 16px** icon file with exact name **favicon.ico**. In most cases, favicon is the sized-down version of the company logo saved in the icon format. In some cases, the logo is too specific and favicon needs to be built from scratch.

You can use some professional icon editor software like [Axialis IconWorkshop](#) and [Iconcool Editor](#) or to use [online favicon generators](#). The first method gives you better quality, but takes more effort. The second method is easier, but the quality is not the best.

### Step 2: Upload favicon file to your server

After you got the favicon file, it's time to upload it to your server. You need to upload the icon file to template folder overwriting the default file. This is the folder **joomla\_root\_folder/templates/jsn\_epic\_XXX/**, where **XXX** is the template edition.

If you have permission problems while using FTP, then we strongly recommend you use a great Joomla! extension called [eXplorer](#). And you don't need to declare logo width/height anywhere. Template will automatically present it as it is.

If you don't see your new icon, that doesn't necessarily mean you did anything wrong. Browsers are designed to minimize data traffic, so they don't refresh the favicon every time they show a page. Even refreshing the page (**F5**) won't help. So you need to refresh more thoroughly:

- **Mozilla / Firefox / Safari**: hold down Shift while clicking Reload, or press Ctrl-Shift-R (Cmd-Shift-R on Apple Mac)
- **Internet Explorer**: hold Ctrl while clicking Refresh, or press Ctrl-F5
- **Konqueror**: simply click the Reload button, or press F5
- **Opera**: users may need to completely clear their cache in **Tools ->Preferences**
- **Chrome**: Shift-F5

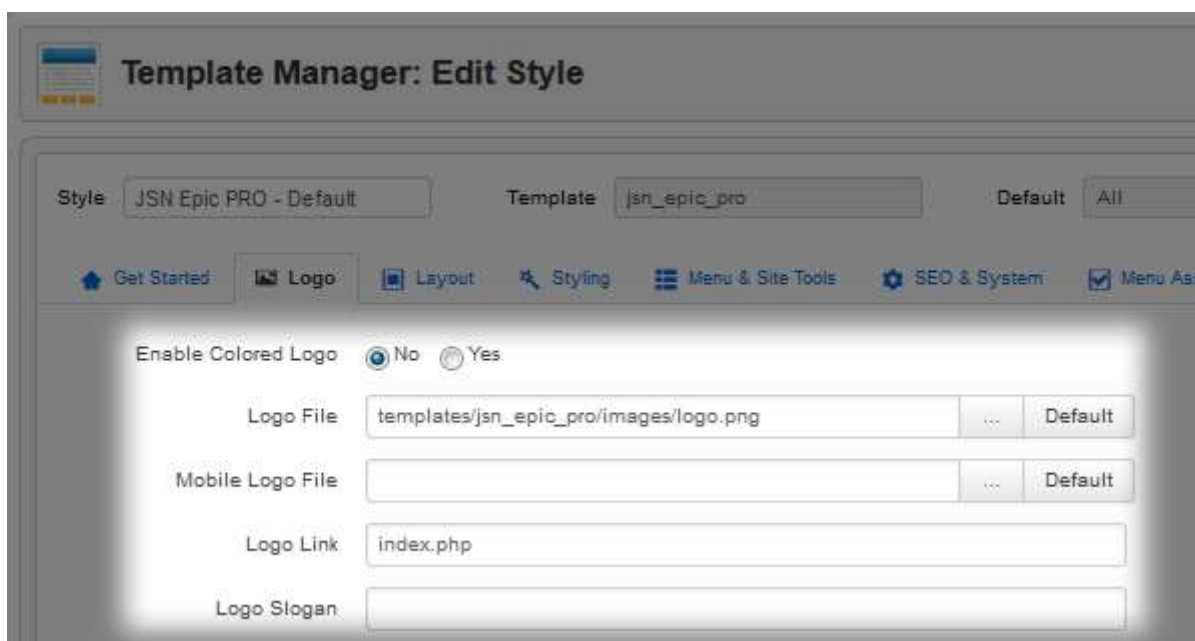

If this doesn't work, you will need to delete the temporary internet files and history and then open your page again.

## Logo

The logo **JSN Epic** is the default sample logo and you should replace it with your own. Technically, logo is an image file called **logo.png** located in folder **joomla\_root\_folder/templates/jsn\_epic\_XXX/images/**, where **XXX** the template edition you have.

You can manually choose your own logo file via template parameter **Logo File**. Additionally, you don't need to declare logo width/height anywhere. Template will automatically present it as it is.

### *Parameters to set logo*

When the logo file is ready, you can set up the following parameters:

- **Logo File** - Select the image file you want to use as logo.
- **Mobile Logo File** – Set specific logo for your website on mobile devices. Please leave this parameter empty if on mobile, you want to use the re-sized logo which is used on the desktop already.
- **Logo Link** – Set URL where the logo image should link to. You can set here:
  1. Absolute link like **<http://www.joomlashine.com>**

2. Relative link starting from Joomla! root folder like **index.php**

Leave this parameter empty if you do NOT want your logo to be clickable at all.

- **Logo Slogan** – Set the slogan text to be inserted to the logo image attribute **alt**. Text in **alt** attribute is visible to screen readers (good for accessibility) and search engines (good for SEO).
- **Enable Colored Logo** – Define if you want to use special colored logo for each template color. Colored logo file is located under folder **images/colors/{color\_name}/ inside the template folder**.

### Set up rich-media logo via module in position “logo”

JSN Epic provides a module position called **logo**, where you can put any Custom HTML module with rich-media logo. Another advantage is that you can create multiple modules with different logos and display them in various pages using the menu-module assignment feature in Joomla!.

### Attention!

If template detects that there are some module presented in position **logo**, then it will disable default logo with all logo parameters: **Enable Colored Logo**, **Logo Link** and **Logo Slogan**.

## **Video tutorial**

It guides you how to configure logo visually. Here are [video tutorials](#).

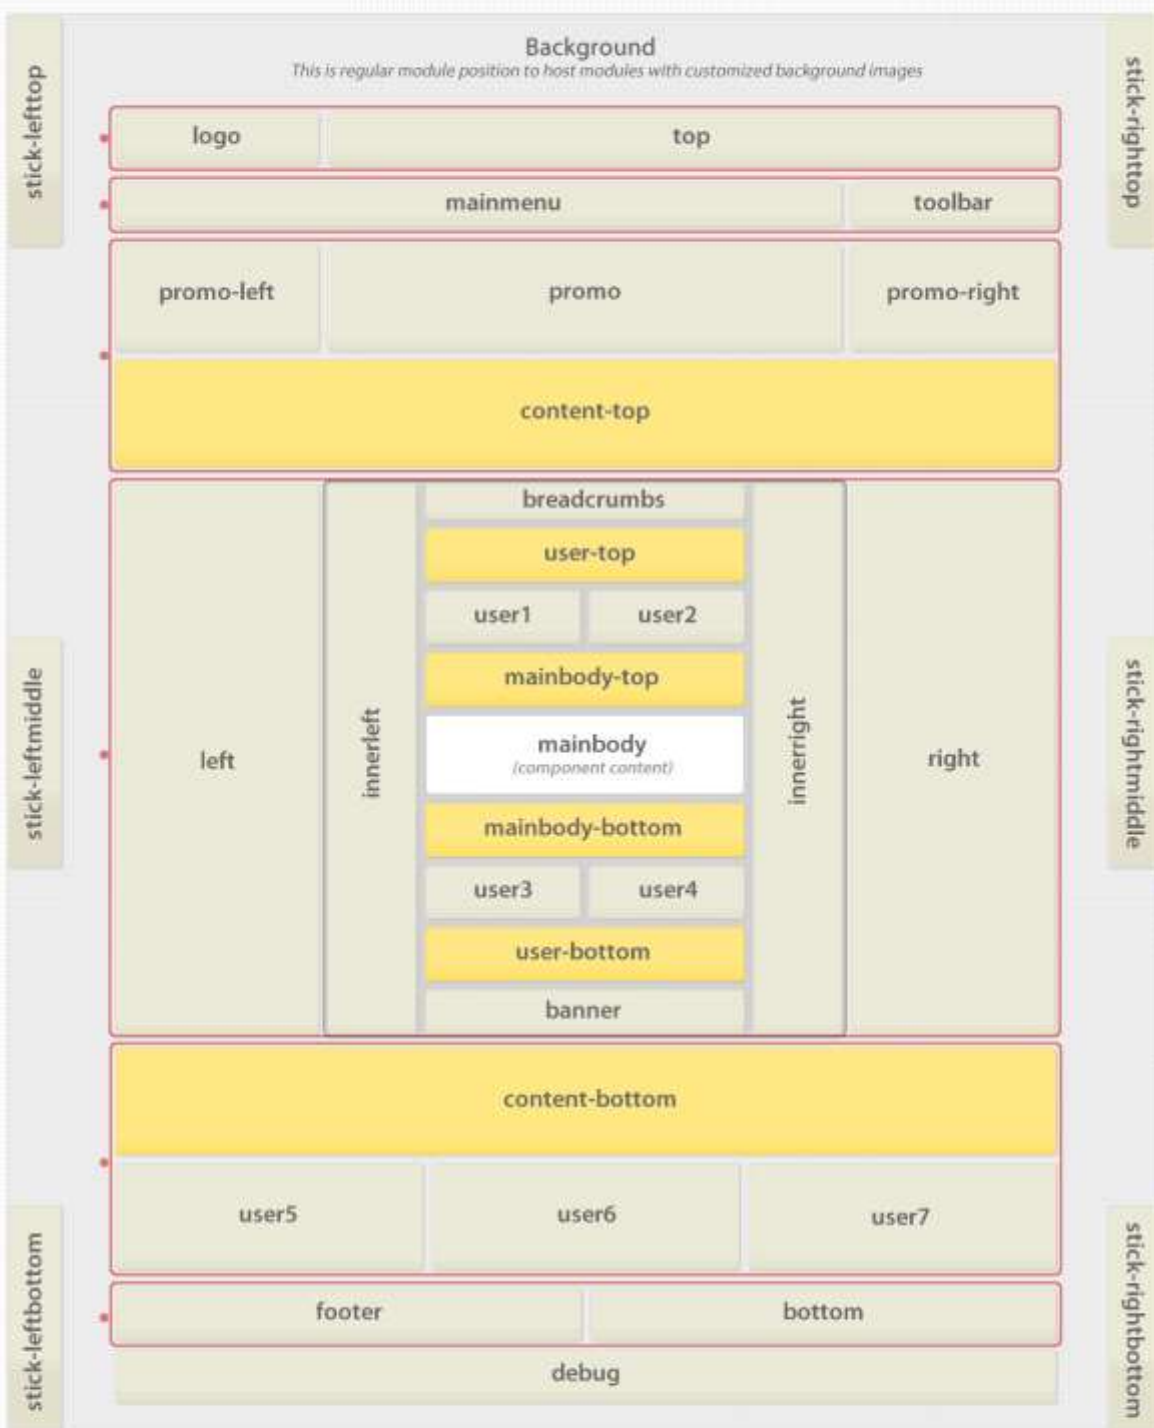

**JSN Epic** in the video is an example and these instructions can be applied to **JSN templates** as well.

## Layout

### Module positions

JSN Epic provides **37+module positions** allowing you to have multiple layout configurations. All module positions are collapsible which means if you don't use all the positions they will be left as blank for neighboring modules.

## JOOMLASHINE TEMPLATE FULL LAYOUT

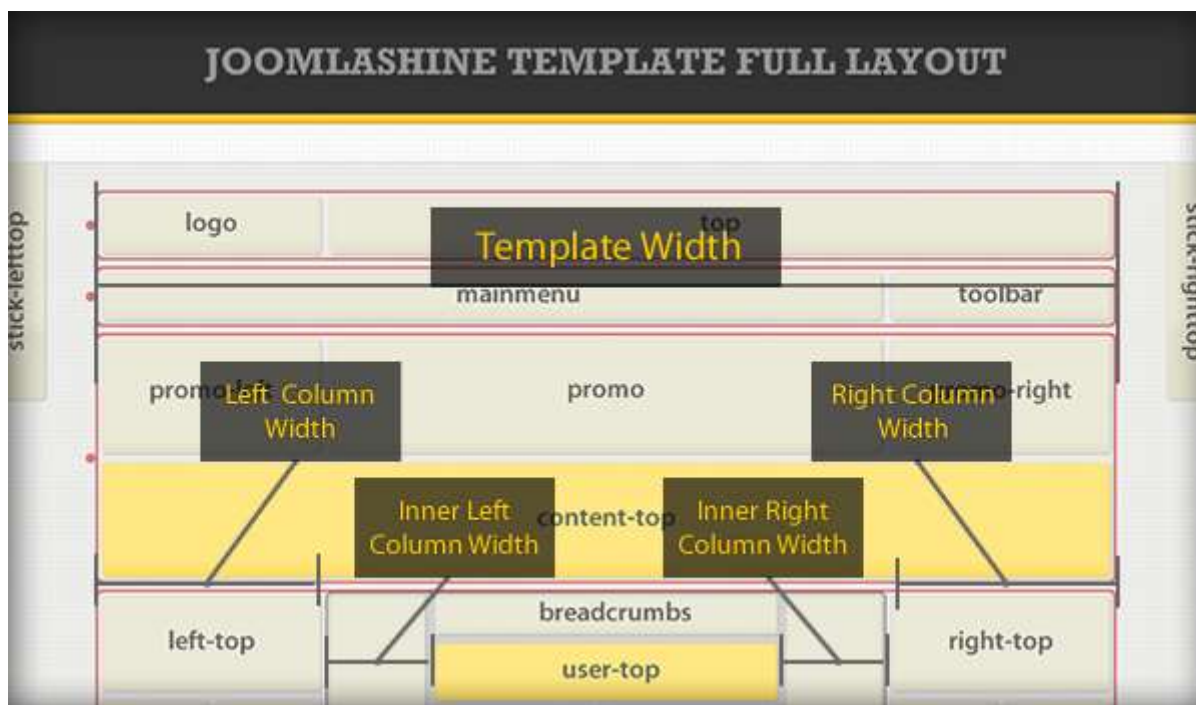

Position with modules arranged in **vertical** layout

Position with modules arranged in **horizontal** layout

## Layout dimensions

JSN Epic allows you to change the width size of several critical layout elements. All settings can be done via template parameters in the section **Layout**.

## Template Width

Template width can be configured in two different ways.

### Configuration by template parameter (lowest priority)

	<p>Template width can be set by template parameter <b>Template Width Type</b>. There are three options for you to choose:</p> <ul style="list-style-type: none"><li>• <b>Fixed</b> – Template width is fixed in pixels defined in parameter <b>Fixed Width (px)</b>.</li><li>• <b>Float</b> - Template width is fixed in percentage defined in parameter <b>Float Width (%)</b>.</li><li>• <b>Responsive</b> - Template width fits into different resolution:<ul style="list-style-type: none"><li>• <b>Mobile Device:</b> Template width fits into mobile devices - tablets and smartphones.</li><li>• <b>Wide Desktop:</b> Template width fits into desktop with width display 1200 px and higher.</li></ul></li></ul> <p>This is the default setting and has the lowest priority.</p>
--	--

### Configuration by "Page Class" (higher priority)

	<p>Template width can be set by <b>Page Class</b> of a menu item with syntax <b>custom-width-xxx</b>, where <b>xxx</b> is the width value you choose.</p> <p>There are the following possible values: <b>fixed</b>, <b>float</b> and <b>responsive</b>. For example:</p> <ul style="list-style-type: none"><li>• <b>custom-width-fixed</b></li></ul> <p>This setting will override the default settings by template parameter <i>Template Width</i>.</p>
--	--

## Columns Width and Position

Thanks to the Bootstrap grid system, the layout is divided into 12 equal columns. Each position of horizontal layout should take the width equal the columns number. You can drag and drop module positions to adjust width or change positions.

*Visual column widths and positions*

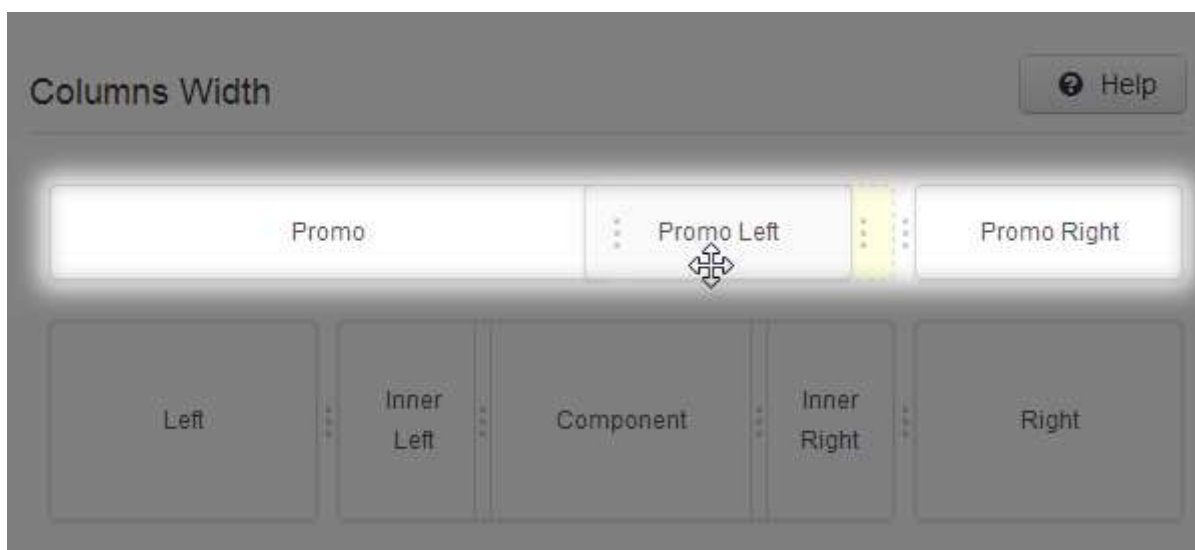

*12 Bootstrap grids*

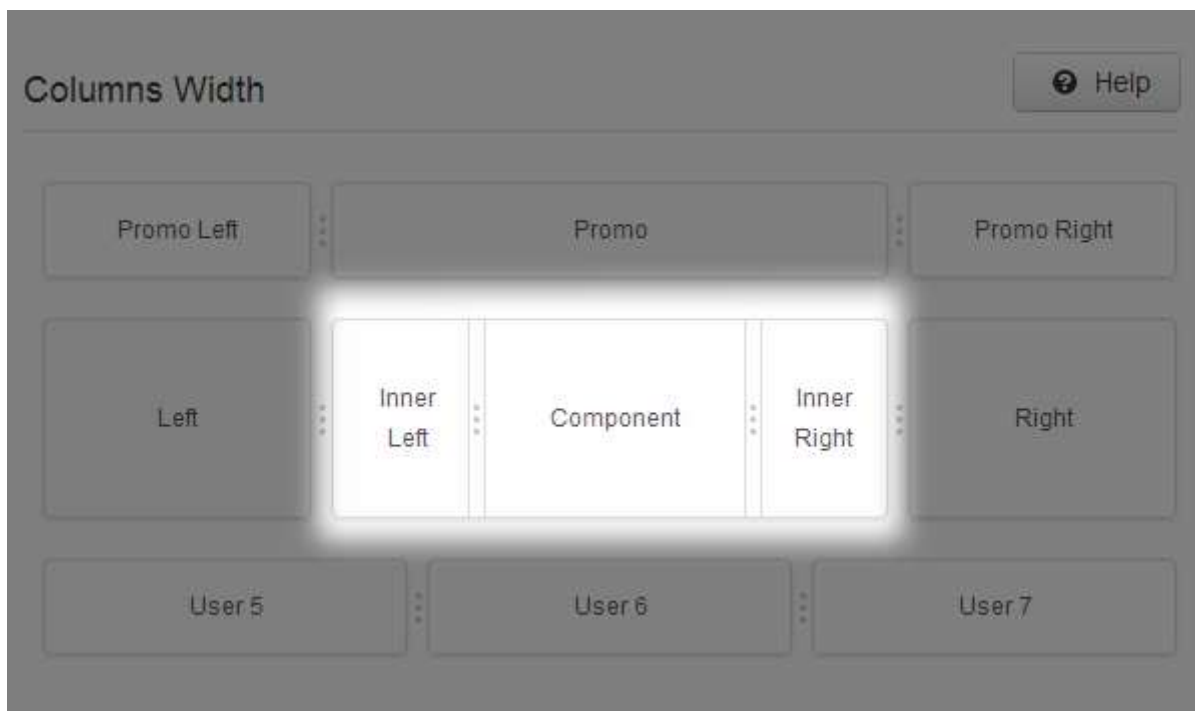

*Columns width adjustment*

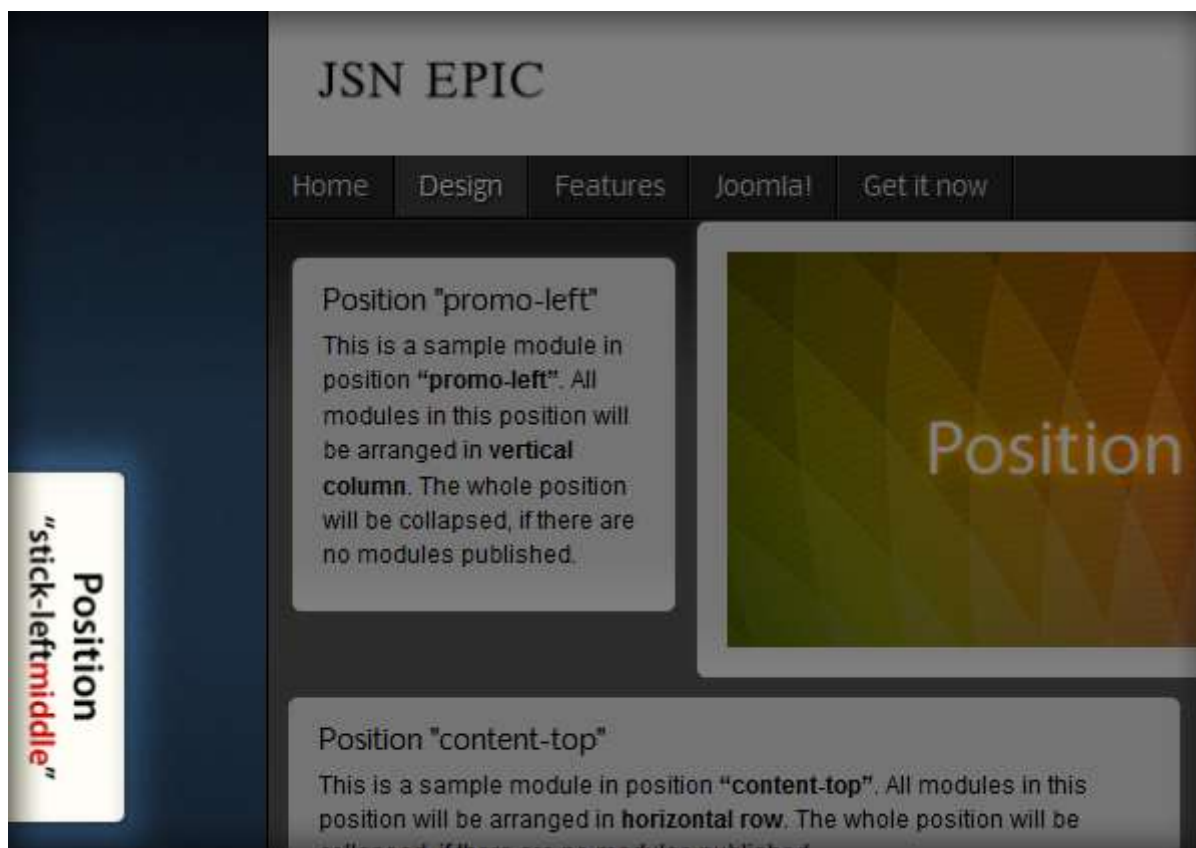

*Columns position change*

Please be aware that, you can adjust all the column widths and change almost all column positions. However, you are not allowed to change the positions of separate elements in the center block of “Inner Left”, “Component” and “Inner Right”.

*The center block “Inner Left”, “Component” and “Inner Right”*

## Stick Positions

The template layout includes 6 stick positions: **stick-lefttop**, **stick-leftmiddle**, **stick-leftbottom**, **stick-righttop**, **stick-rightmiddle** and **stick-rightbottom**. You can assign any modules or create custom HTML module into mentioned positions for better website presentation. The module “sticks” into your layout, so when you scroll mouse up and down, the assigned module is moved in appropriate direction.

Let's see how we can create a custom HTML module then place it in the stick-lefttop position.

1. In Joomla Administration you go to **Extensions ->Module Manager**
2. Click on a button **New** then choose **Custom HTML**
3. Fill the settings:
  - **Title:** My stick module
  - **Show Title:** No
  - **Published:** Published
  - **Position:** stick-lefttop
  - **Customer Output:** Type HTML code into this field

Get free e-book to learn how to build a Joomla website with easy steps - <http://ow.ly/fh6dL>

Above, we created a new module then assigned to the position stick-lefttop. You can assign a module to the rest 5 stick positions: **stick-leftmiddle**, **stick-leftbottom**, **stick-righttop**, **stick-rightmiddle**, **stick-rightbottom**.

## **Video tutorial**

It guides you how to configure layout visually. Here are [video tutorials](#).

**JSN Epic** in the video is an example and these instructions can be applied to **JSN templates** as well.

## Mobile settings **PRO**

All JoomlaShine templates are equipped with responsive design feature making your website look beautiful in both smartphones and tablets.

### Enable Mobile Support

To enable responsive design with mobile please set the parameter **Template width type** as **Responsive** and choose **Mobile Device** in parameter **Responsive Width**.

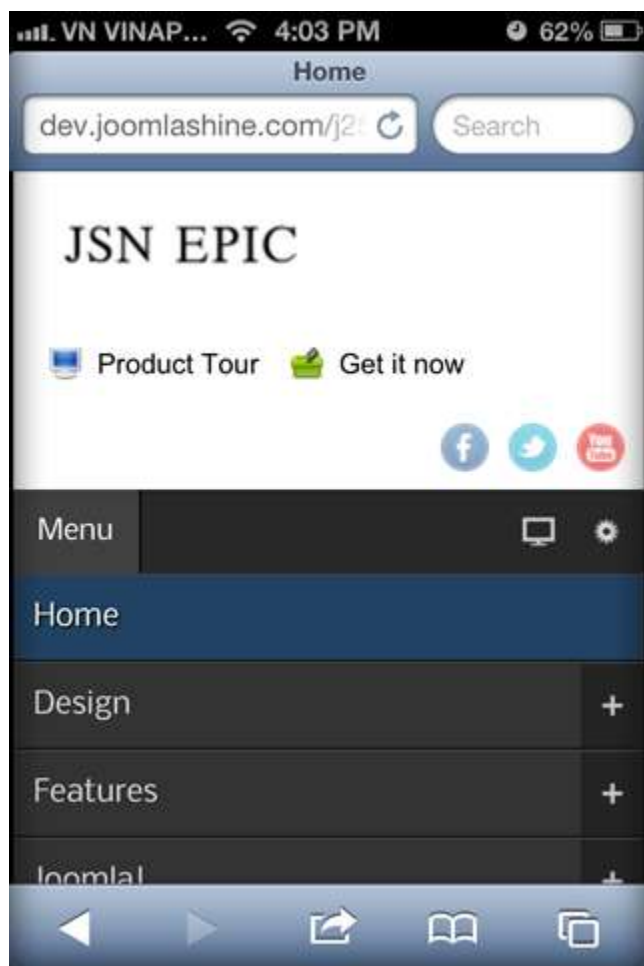

The screenshot shows the Joomla! JSN Epic configuration interface. At the top, there are navigation tabs: 'Get Started', 'Logo', 'Layout' (selected), 'Styling', and 'Menu & Site Tools'. Below the tabs, the 'Overall Width' section is visible. It contains two settings: 'Template Width Type' is a dropdown menu set to 'Responsive', and 'Responsive Width' has two checkboxes, 'Mobile Device' and 'Wide Desktop', both of which are checked. Red rectangular boxes are drawn around the 'Responsive' dropdown and the 'Mobile Device' checkbox to highlight the required settings.

#### *Mobile settings*

After that all modules will be automatically rearranged to fit different screen resolutions.

- If the client device is a smartphone like iPhone or Android-based phone, all content will be arranged in one column.
- If the client device is a tablet like iPad, Kindle Fire, etc. all content will be arranged in two or three columns.

Also, main menu will be transformed into compact dropdown menu.

*Opened mobile menu*

*1-column module*

As default, all modules will be displayed on both desktop and mobile. To display a module on only desktop or on only mobile, add **Module Class Suffix** parameter as following:

- Display a module on only desktop: **display-desktop**

The screenshot shows the Joomla! module configuration interface. The 'Advanced Options' section is expanded. The 'Module Class Suffix' field is highlighted with a red box and contains the text 'display-desktop'. Other fields include 'Alternative Layout' (Default), 'Caching' (Use Global), and 'Cache Time' (900).

- Display a module on only mobile: **display-mobile**

The screenshot shows the Joomla! module configuration interface. The 'Advanced Options' section is expanded. The 'Module Class Suffix' field is highlighted with a red box and contains the text 'display-mobile'. Other fields include 'Alternative Layout' (Default), 'Caching' (Use Global), and 'Cache Time' (900).

- Display a module on only mobile: **display-tablet**

The screenshot shows the Joomla! module configuration interface. The 'Advanced Options' section is expanded. The 'Module Class Suffix' field is highlighted with a red box and contains the text 'display-tablet'. Other fields include 'Alternative Layout' (Default), 'Caching' (Use Global), and 'Cache Time' (900).

- Display a module on only mobile: **display-smartphone**

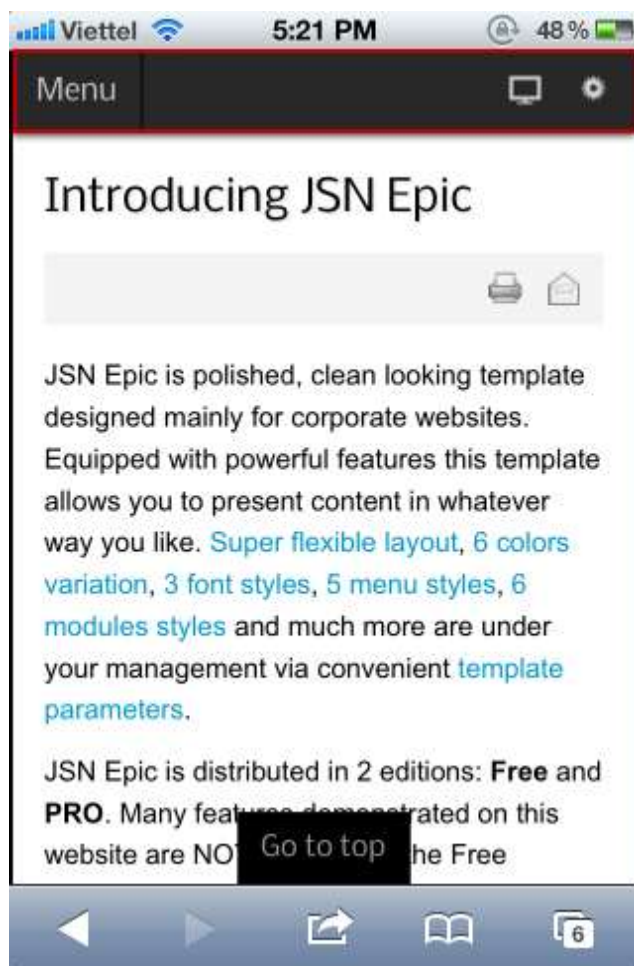

The screenshot shows the Joomla! module configuration interface. The 'Advanced Options' section is expanded. The 'Module Class Suffix' field is highlighted with a red box and contains the text 'display-smartphone'. Other fields include 'Alternative Layout' (Default), 'Caching' (Use Global), and 'Cache Time' (900).

## Enable Mobile Menu Sticky

With **Mobile Menu Sticky**, the menu will appear anytime. This will help you control all menus easily.

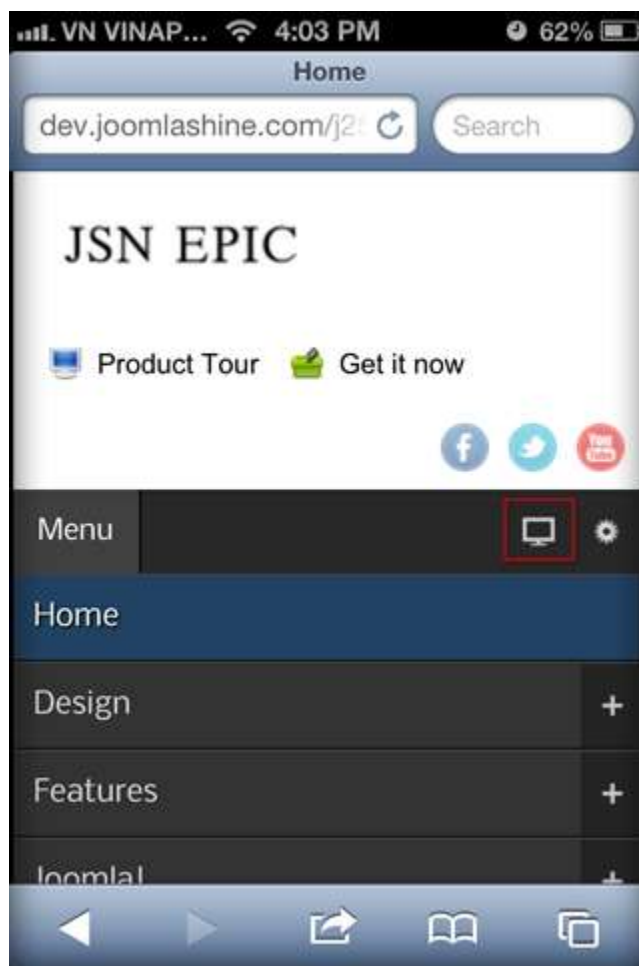

To enable this feature, in the section **Menu & Site Tools** -> parameter **Enable Sticky Menu** -> choose the option **Mobile**.

*Enable Mobile Menu Stick*

## Show Desktop Switcher

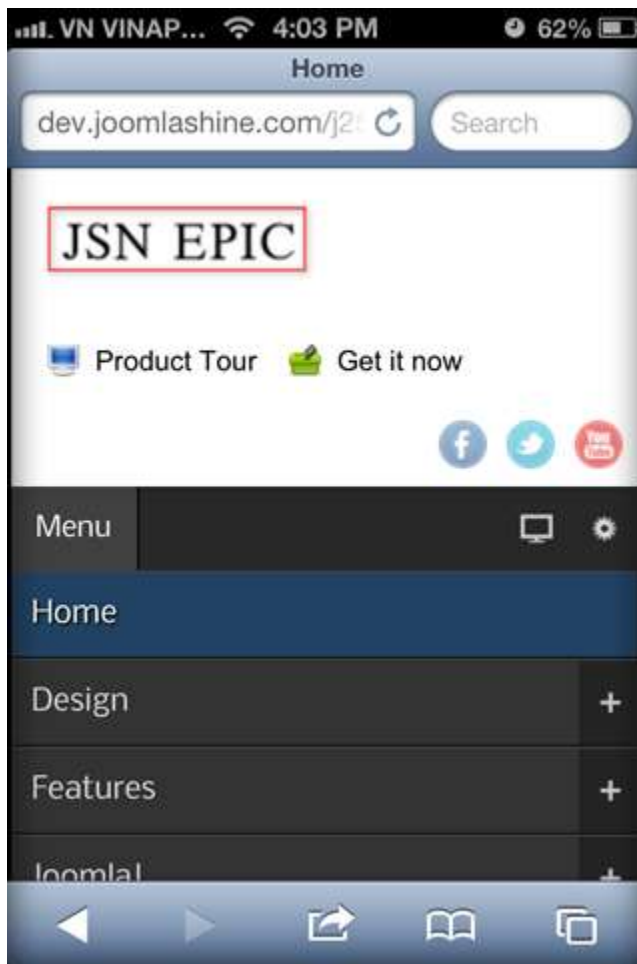

By using parameter **Show Desktop Switcher** in the section **Layout** you can configure to show button to allow your website visitor to jump back to desktop layout.

*Desktop Switcher*

## Mobile Logo File

Normally, the default logo will be automatically resized and displayed nicely in mobile layout. But if you want to have specifically designed logo, then you can select it in the section **Logo** -> parameter **Mobile Logo File**.

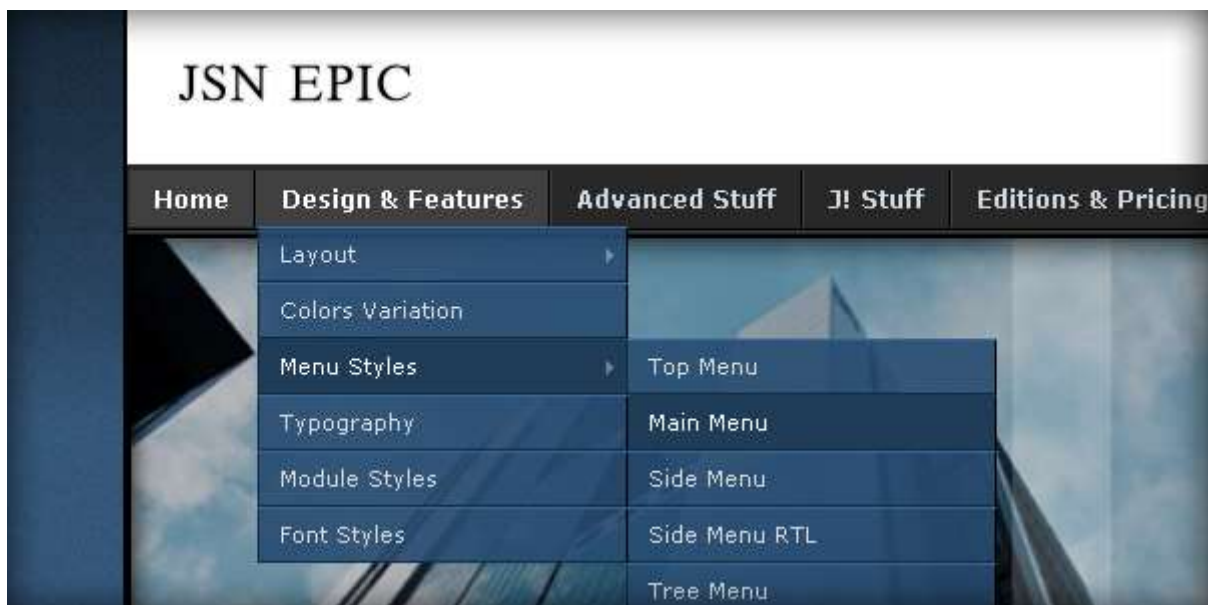

*Mobile Logo File*

## Colors Variation

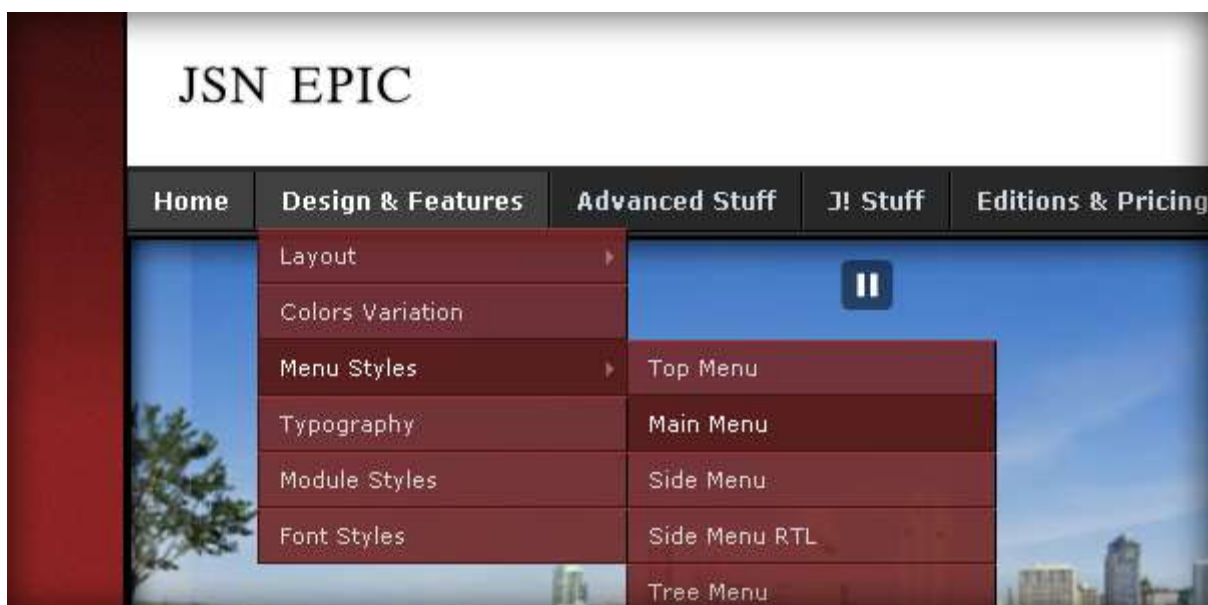

### Template Color **PRO**

JSN Epic provides **six major color variations** for you to choose from. Each color variation covers not only the main background, but also fills drop-down menu, links, table's header and some others.

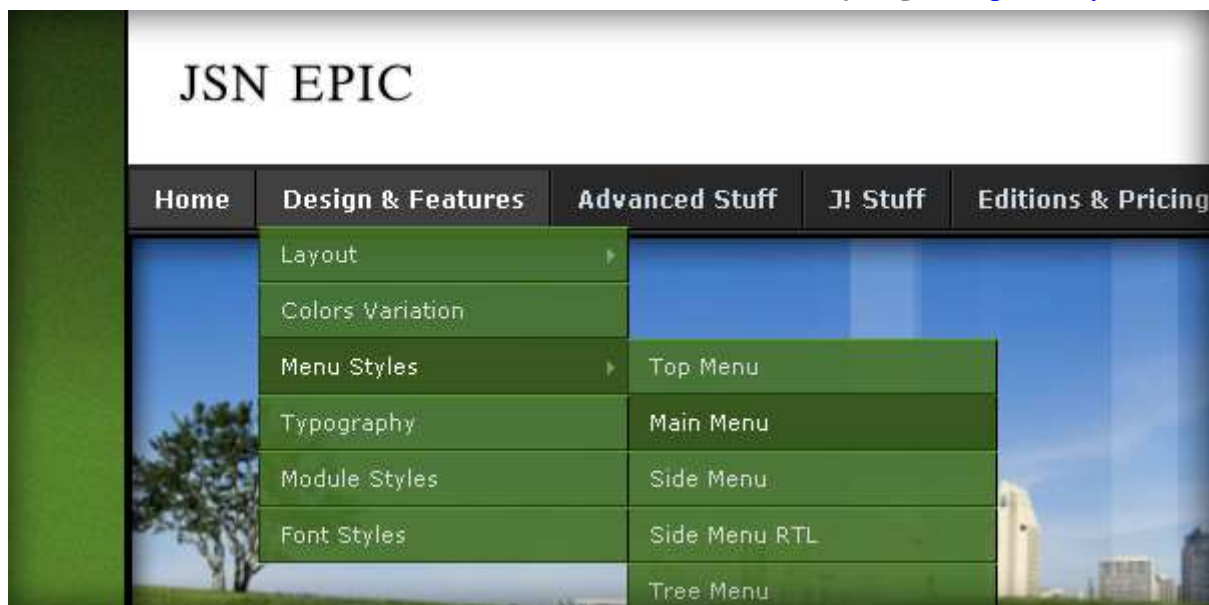

All available colors are described below.

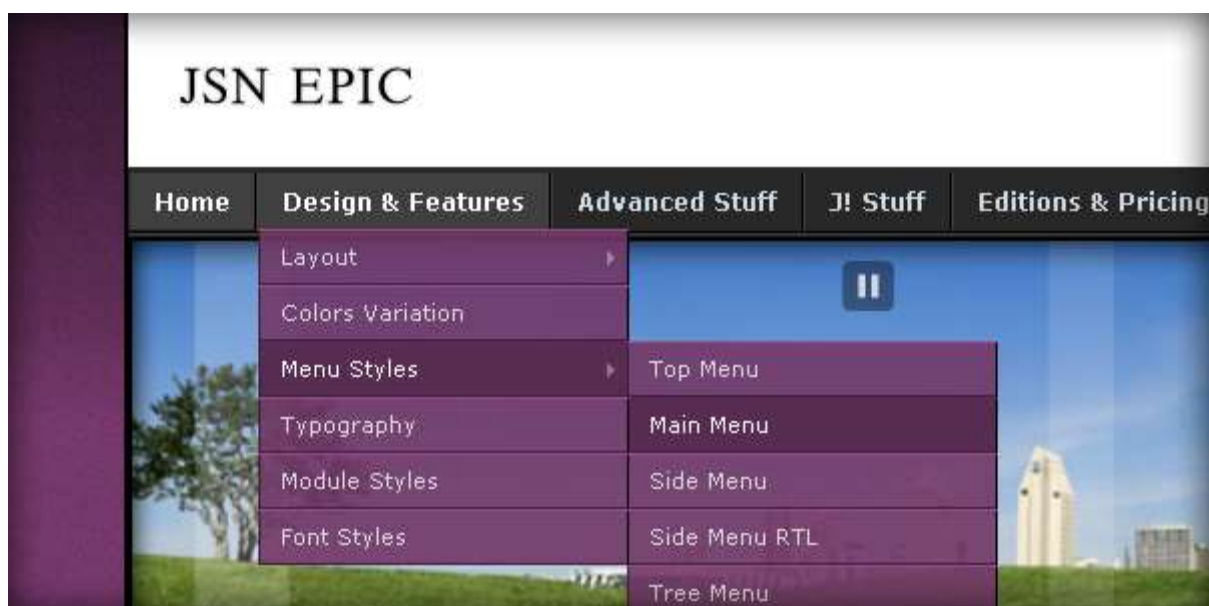

**Blue**

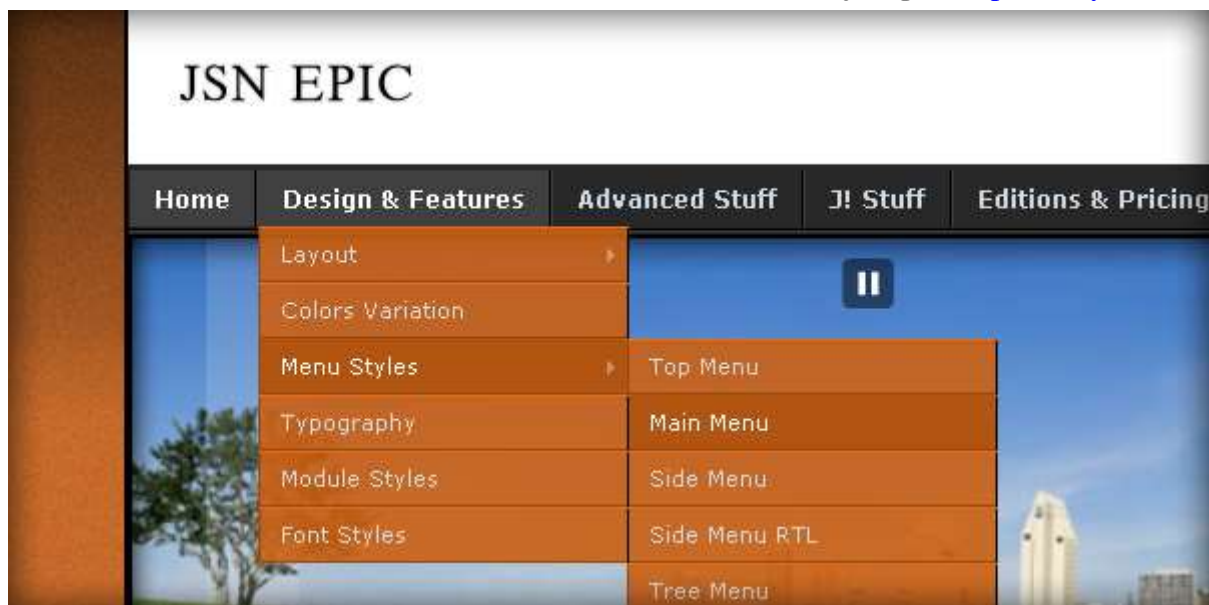

**Red**

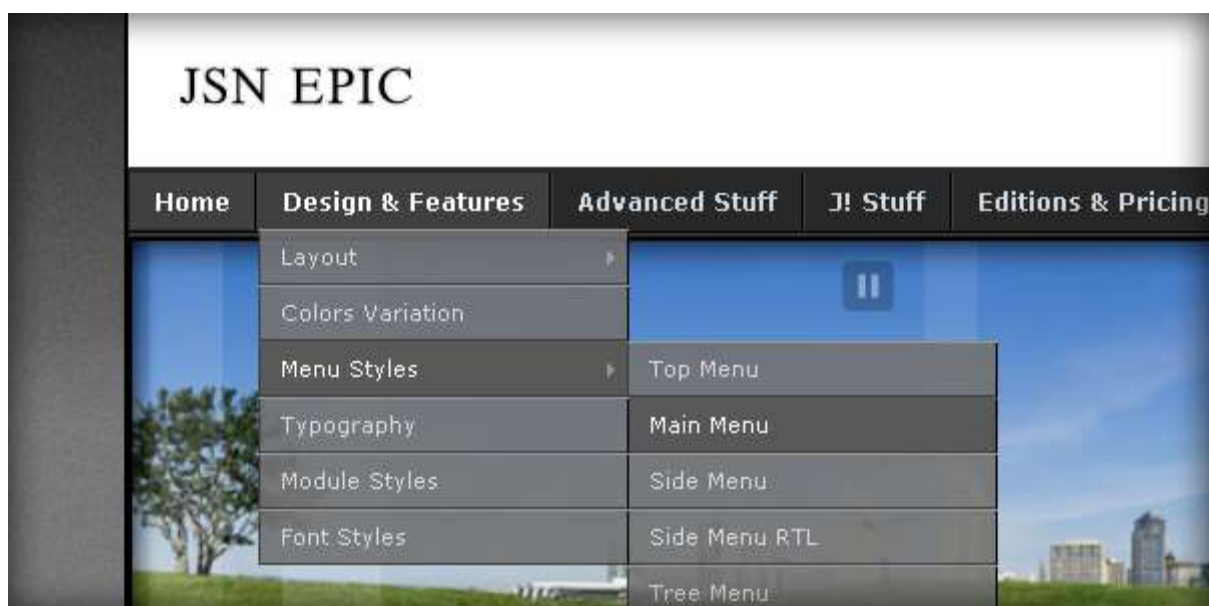

**Green**

**Violet**

**Orange**

**Grey**

Template color can be configured in three different ways.

### Configuration by template parameter (lowest priority)

	<p>Template color can be set by template parameter <b>Template Color</b> in <b>Styling</b> section.</p> <p>This is the default setting and has the lowest priority.</p>
--	---

### Configuration by "Page Class" (higher priority)

	<p>Template color can be set by <b>Page Class</b> of a menu item with syntax <b>custom-color-xxx</b>, where <b>xxx</b> is the color you want to have.</p> <p>There are the following possible values: <b>blue, red, green, orange, grey</b> and <b>violet</b>.</p> <p>For example:</p> <ul style="list-style-type: none"><li>• <b>custom-color-red</b></li></ul> <p>This setting will override the default settings by template parameter <i>Template Color</i>.</p>
--	--

### Configuration by Site tools panel (top priority)

	<p>Template color can be selected by <b>Color Selector</b> from <b>Site tools</b>.</p> <p>This setting is considered as the visitor's preference and has top priority. It will overwrite both <i>Page Class</i> and default settings of parameter <i>Template Color</i>.</p>
--	--

## **Video tutorial**

It guides you how to configure colors visually. Here are [video tutorials](#).

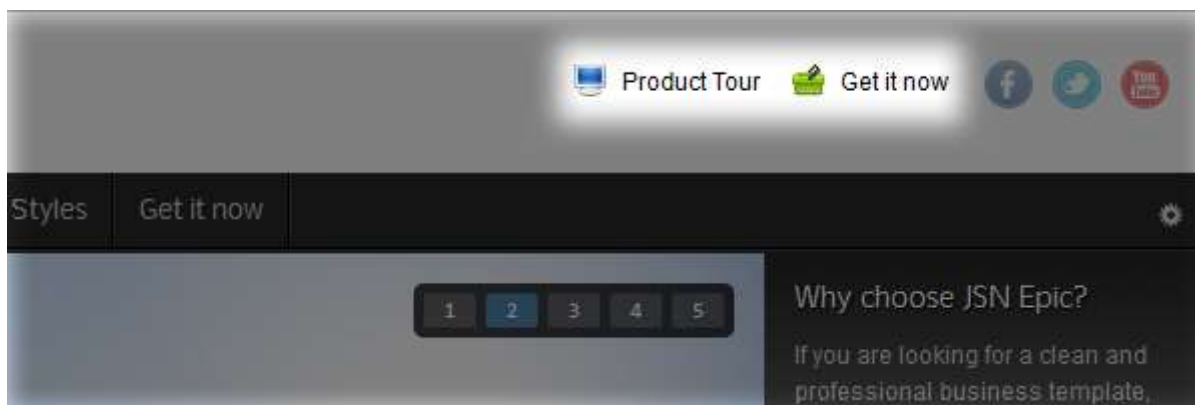

**JSN Epic** in the video is an example and these instructions can be applied to **JSN templates** as well.

## Menu Styles

JSN Epic provides **five menu styles** to present your website navigation. The default Joomla! built-in menu module (**mod\_mainmenu**) is utilized, so you don't need to install any external menu modules.

### Top Menu

Top Menu allows you to arrange menu items in horizontal lines and assign icons to them. All icons are configured directly in the menu item settings page which is very convenient.

To set up Top Menu please select the menu module you want to use and set up parameters as follows:

- Title: **Top Menu** (or any other you like)
- Show title: **Hide**
- Position: **top**
- Access: **public**
- Language: **All**
- Select Menu: **Top Menu** (you might want to use another sources here)
- Start Level: **1**
- End Level: **2**
- Show sub-menu items: **No**
- Menu Class Suffix: **menu-topmenumenu-iconmenu** (Please only use "menu-iconmenu" if you want to display icons)

### Attention!

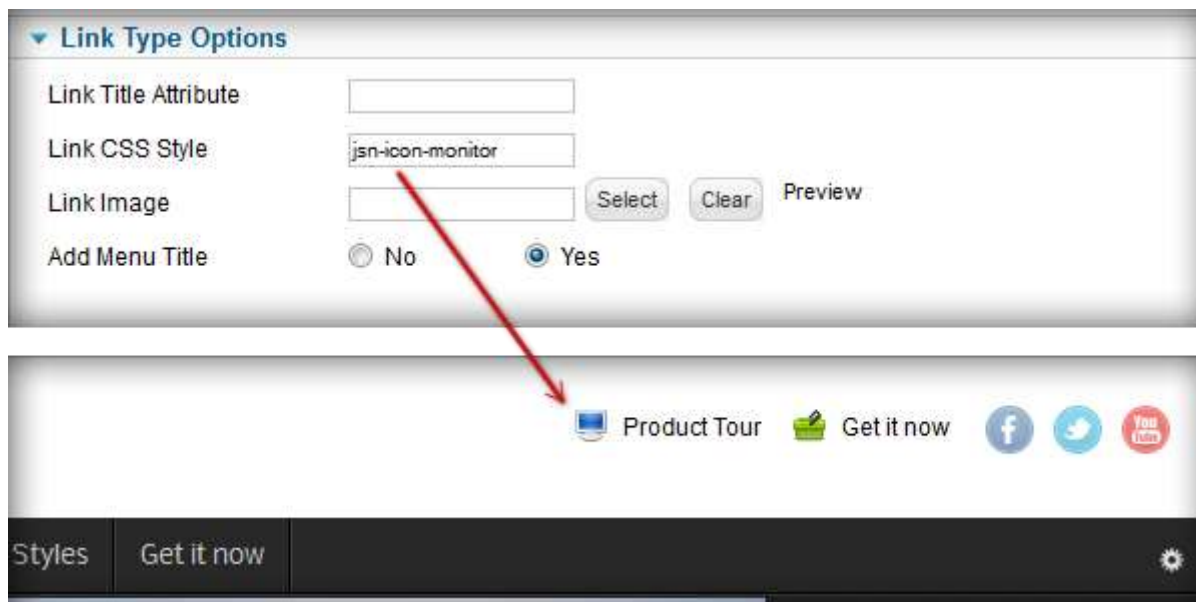

There is a common misconception about **Menu Class Suffix** and **Module Class Suffix**. They are absolutely different parameters, so please pay attention to their settings.

## Top Menu icons **PRO**

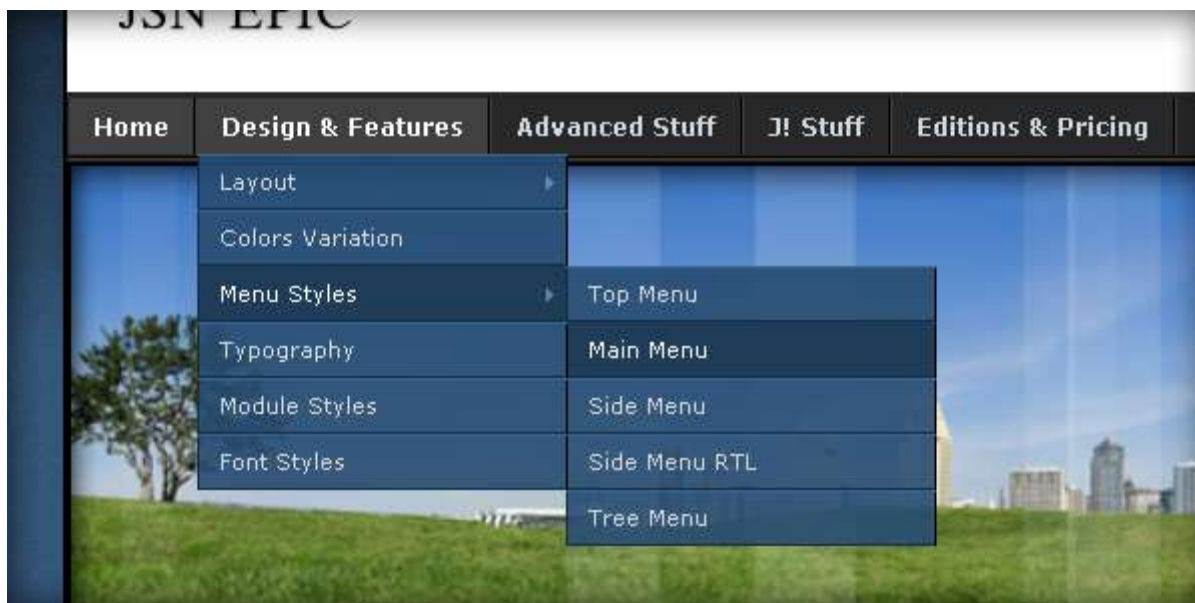

You can attach any of the **UniIcons** to top menu items to make them more appealing. **UniIcons** is the set of **20 predefined icons** that can be used for multiple purposes. For more information about the available icons and their names, please read section **UniIcons** of this document.

To set up icons, you need to go to menu item settings and take the following steps:

Add symbol combination **jsn-icon-xxx** to menu item's parameter **Link CSS Style**, where **xxx** is the icon name.

## Main Menu

Main Menu is a powerful menu built with clean accessible XHTML code structure and effective drop-down submenu panels.

To set up Main Menu please select the menu you want to use and set up parameters as follows:

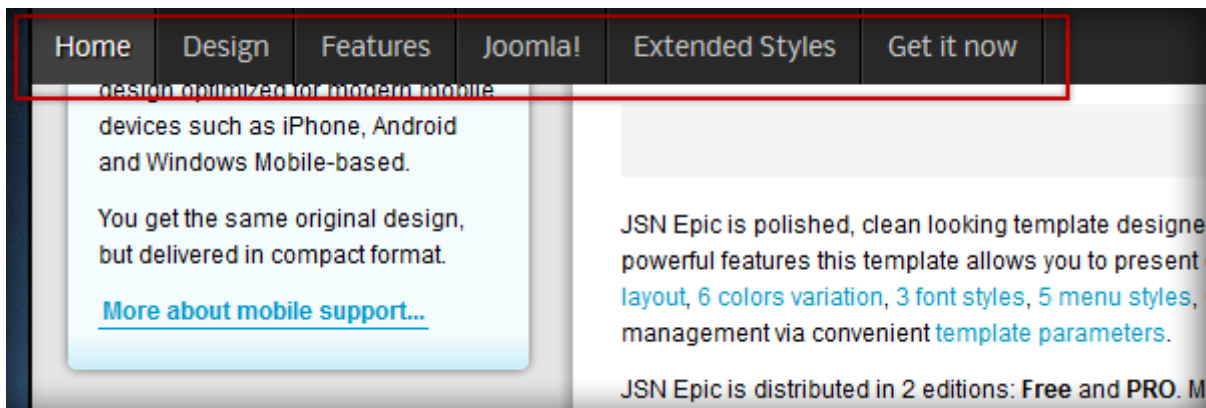

- Title: **Main Menu**(*or any other you like*)
- Show title: **Hide**
- Position: **mainmenu**
- Access: **public**
- Language: **All**
- Select Menu: **Main Menu**(*you might want to use another menu source here*)
- Start Level:**1**
- End Level: **All**
- Show Sub-menu Items:**Yes**
- Menu Class Suffix: **menu-mainmenu menu-iconmenu menu-richmenu** (*Please only use “menu-iconmenu” if you want to display icons and use “menu-richmenu” if you want to display rich text*)

## Attention!

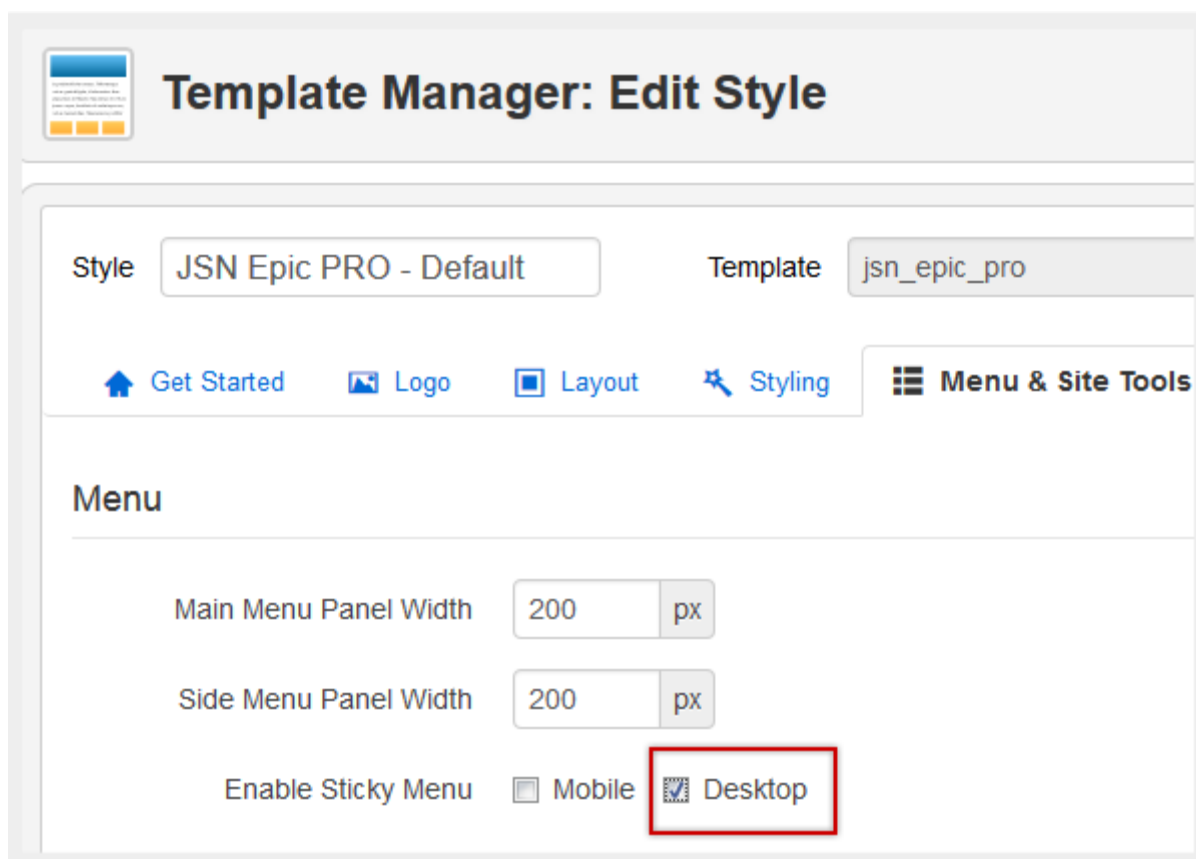

There is a common misconception about **Menu Class Suffix** and **Module Class Suffix**. They are absolutely different parameters, so please pay attention to their settings.

## Sticky Desktop Menu **PRO**

With **Sticky Desktop Menu**, the main menu will always appear at the top – even when you scroll the web page down. To enable this feature, you tick the box **Desktop** in the parameter **Enable Sticky Menu**.

*The Sticky Desktop Menu*

*The Sticky Desktop Menu setting*

## Main Menu Icons **PRO**

You can attach any of the **UniIcons** to menu items to make them more appealing.

To set up icons, you need to go to menu item settings and take the following steps:

Add symbol combination **jsn-icon-xxx** to menu item's parameter **Link CSS Style**, where **xxx** is the icon name.

**UniIcons** is the set of **20 predefined icons** that can be used for multiple purposes. For more information about available icons and their names, please read section **UniIcons** of this document.

### Attention!

There is a common misconception about **Menu Class Suffix** and **Module Class Suffix**. They are absolutely different parameters, so please pay attention to their settings.

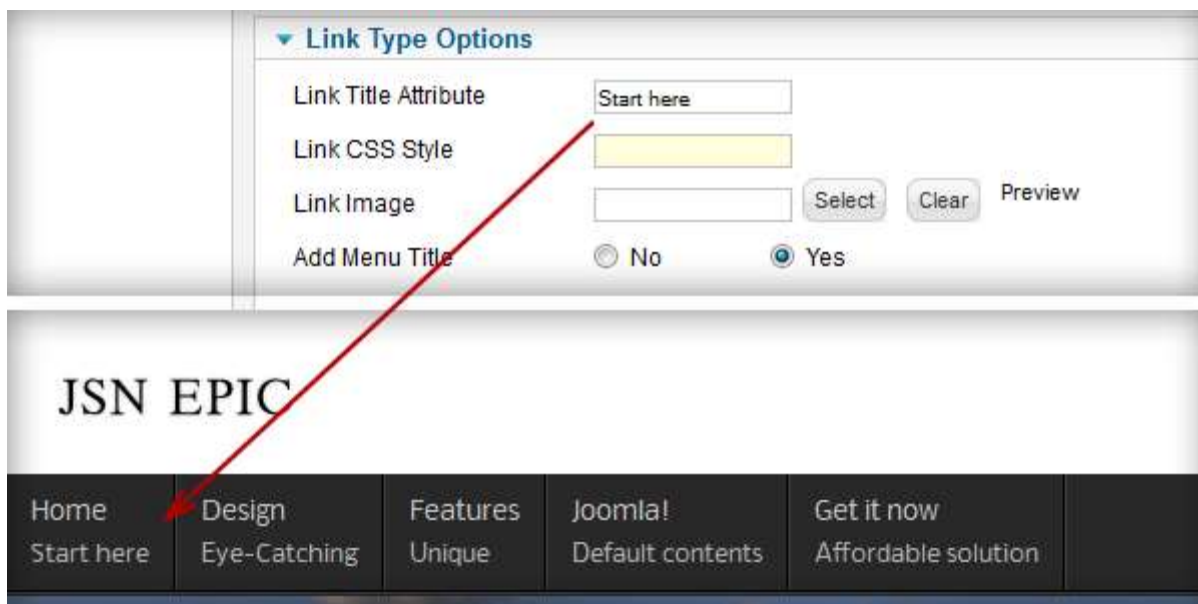

## Main Menu Rich Text **PRO**

You can add descriptive text to menu items to make them much clearer.

To set up descriptive text, you need to go to menu item settings and take the following steps:

Add descriptive text to menu item's parameter **Link Title Attribute**.

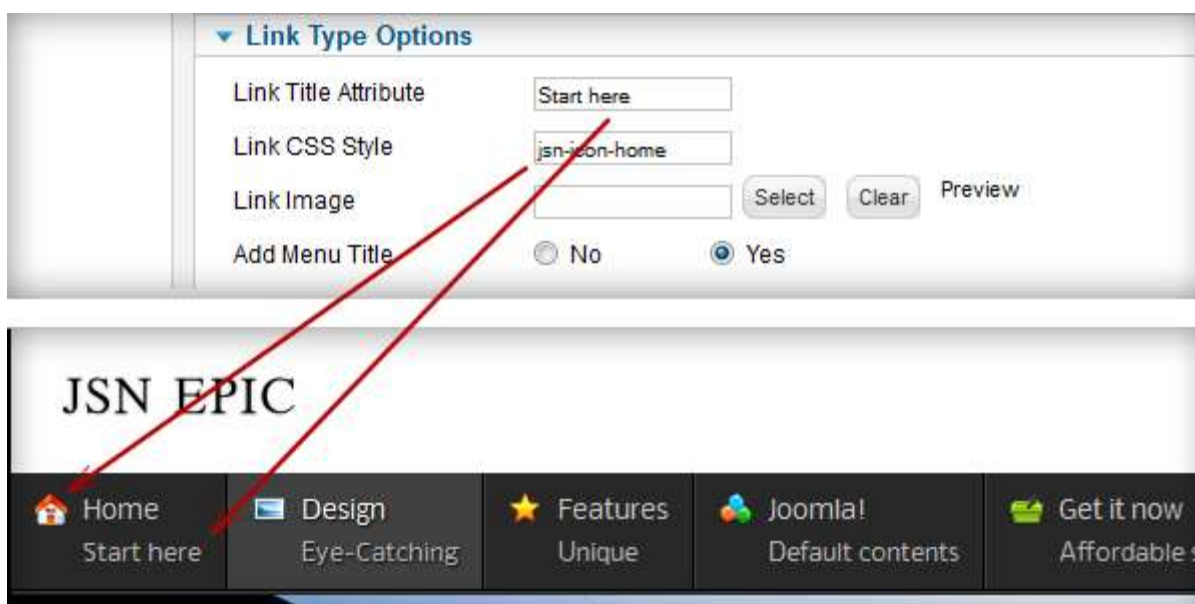

## Main Menu Icons and Rich Text in combination **PRO**

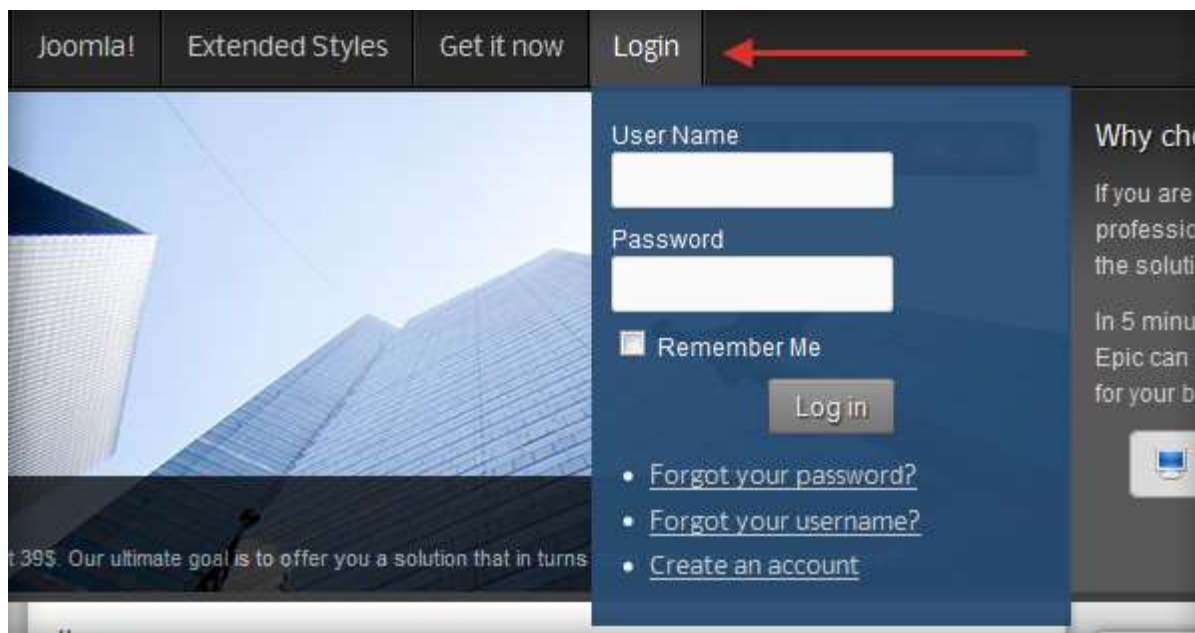

You can set up menu items to utilize both icons and rich text in combination.

## Presenting Main Menu with modules **PRO**

You can present Main Menu with modules in in position **mainmenu**.

To do it, please set up parameters of the chosen module as following:

- Title: **Login**(or any other you like)
- Show title: **Show**
- Position: **mainmenu**
- Module Class Suffix:
  - **display-dropdown**: The module will be elegantly arranged in the submenu panel.
  - **display-inline**:The module will be located directly on the main menu bar.

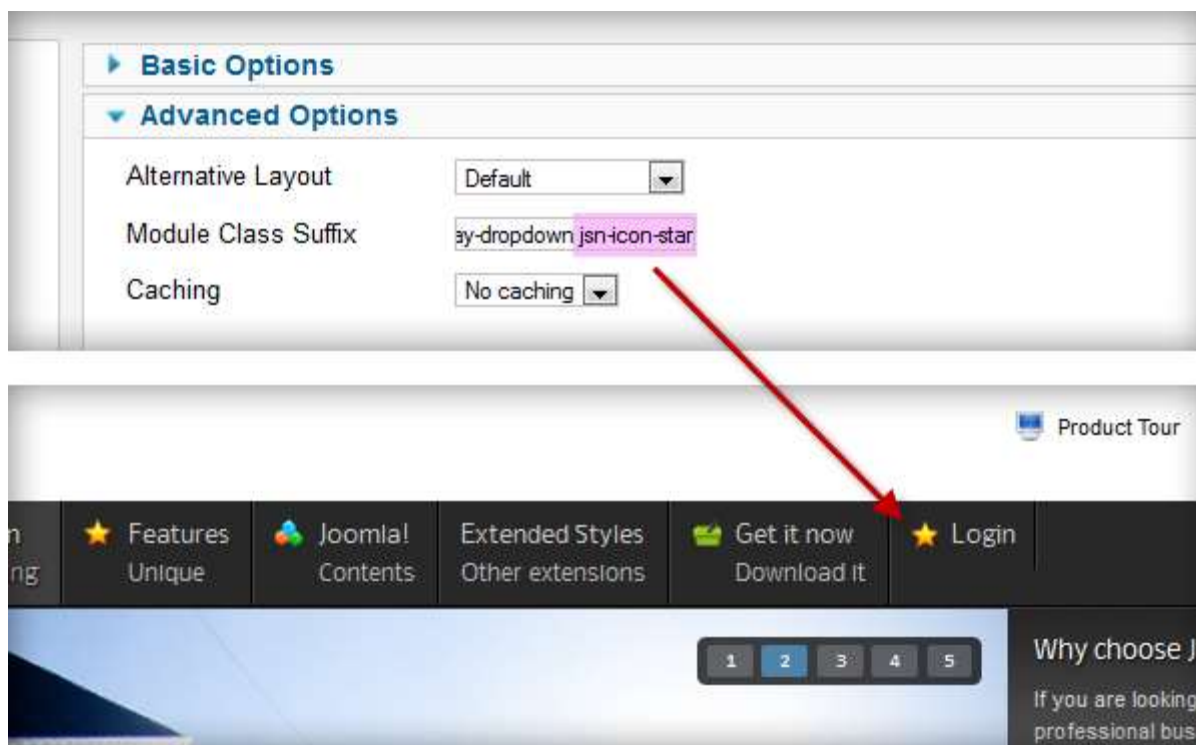

Login module with **dropdown** type

Search module with **inline** type

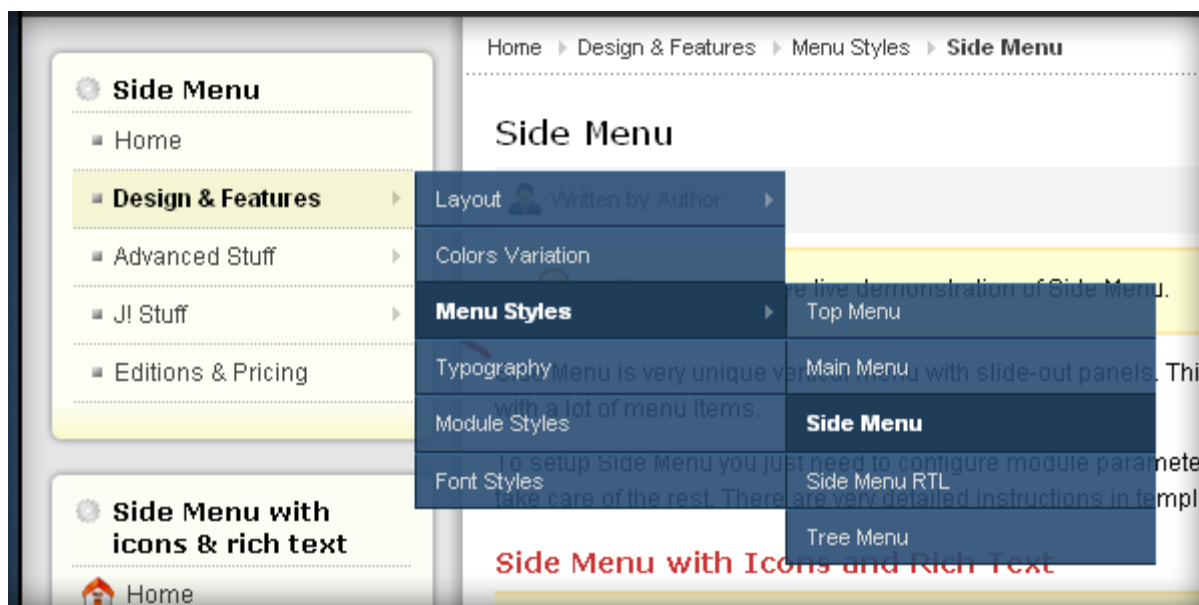

If you want to add an icon to this item, you add **jsn-icon-xxx** to the Module Class Suffix, with **xxx** is the icon name.

## Attention!

You are not allowed to insert Rich text to this Main menu item with Module.

## Side Menu **PRO**

Side Menu is a unique vertical menu with slide-out panels. This menu is extremely efficient when you have complex navigation with a lot of menu items.

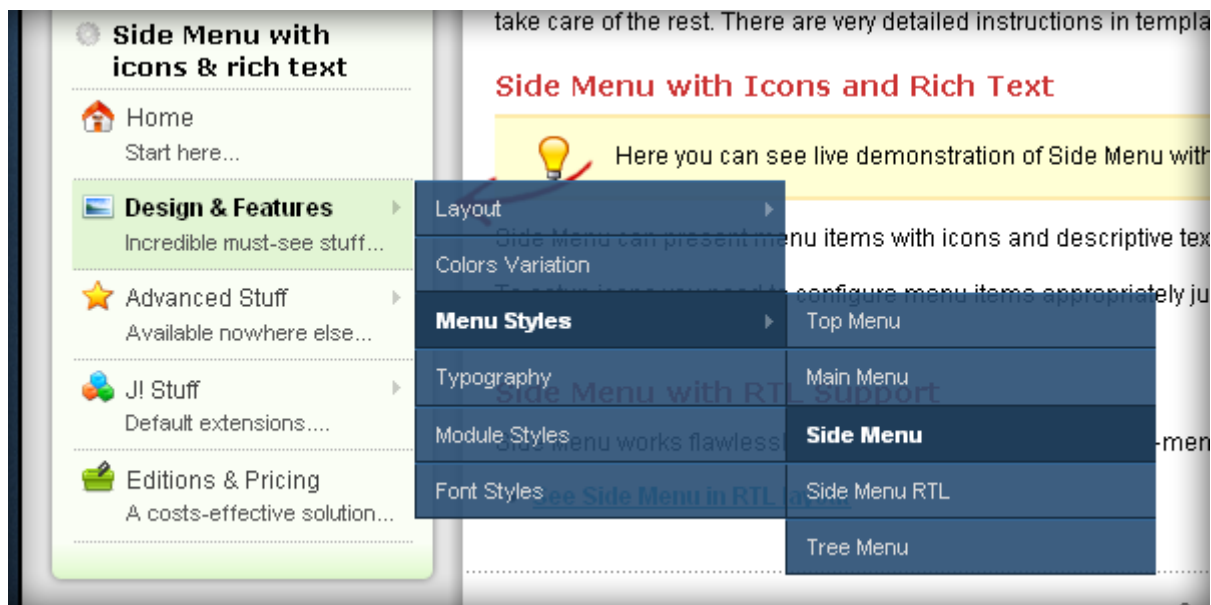

To set up Side Menu please select the menu module you want to use and set up parameters as following:

- Title: **Side Menu** (or any other you like)
- Show Title: **Show**
- Position: **left**
- Access: **Public**
- Language: **All**
- Select Menu: **Main Menu** (you might want to use another menu source here)
- Start Level: **1**
- End Level: **All**
- Show sub-menu items: **Yes**
- Menu Class Suffix: **menu-sidemenu menu-iconmenu menu-richmenu** (Please only use “menu-iconmenu” if you want to display icons and use “menu-richmenu” if you want to display rich text)

## Attention!

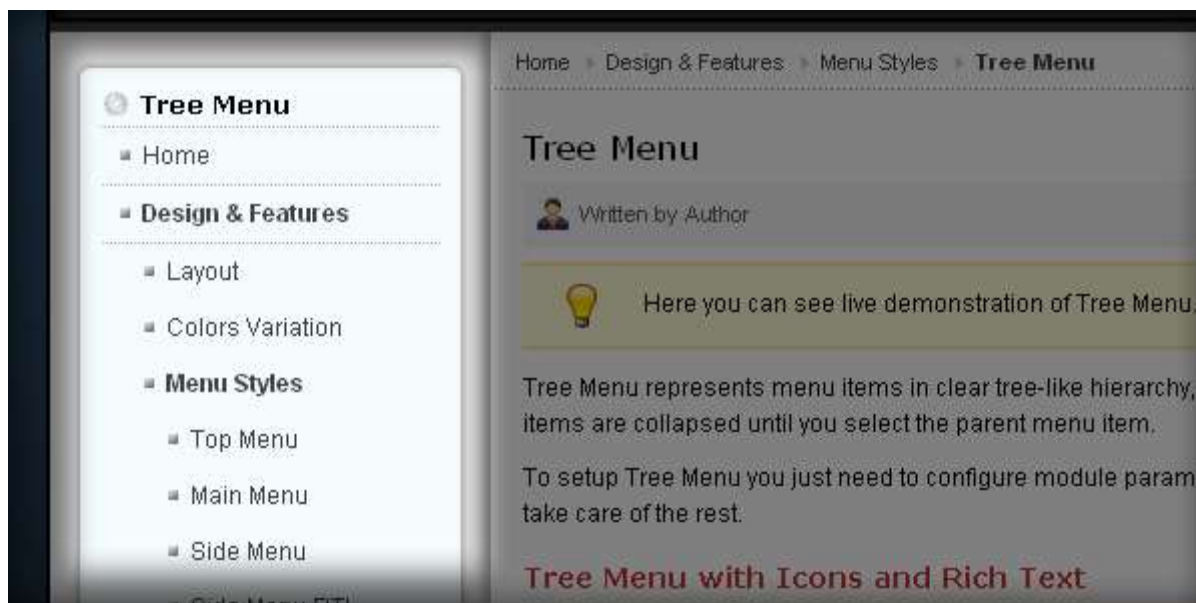

There is a common misconception about **Menu Class Suffix** and **Module Class Suffix**. They are absolutely different parameters, so please pay attention to their settings.

## Side Menu Icons and Rich Text **PRO**

You can set up menu items to utilize both icons and rich text just as you can with Main Menu.

## Tree Menu

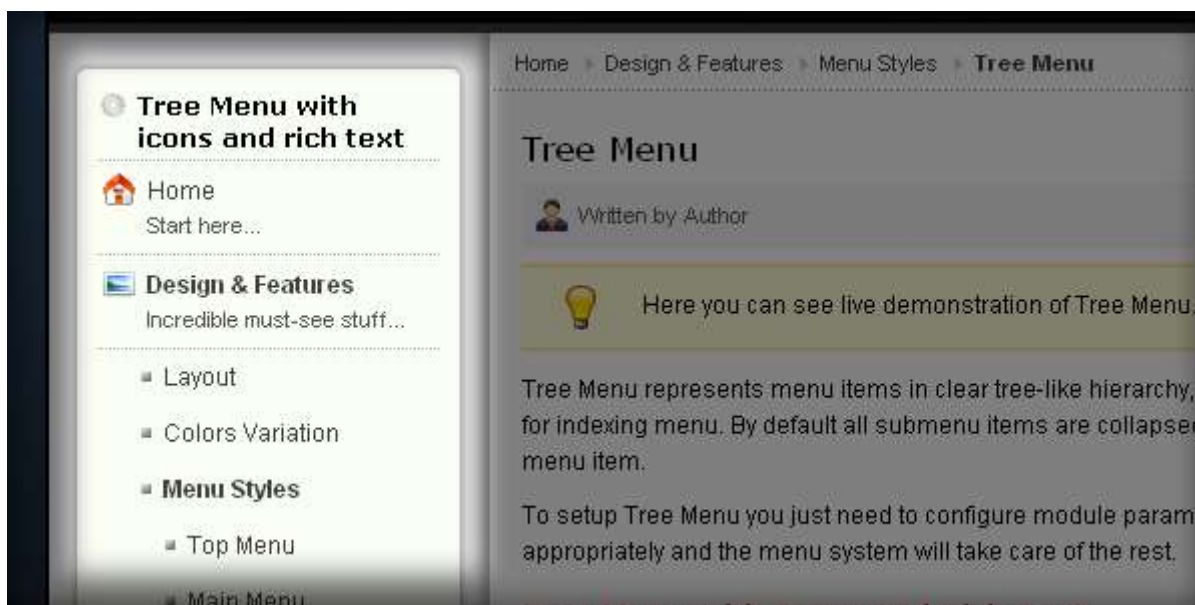

Tree Menu represents menu items in a clear tree-like hierarchy which is very appropriate for indexing menu. By default all sub-menu items are collapsed until you select the parent menu item.

To set up Tree Menu please select the menu module you want to use and set up parameters as following:

- Title: **Tree Menu**(or any other you like)
- Show Title: **Show**
- Position: **right**
- Access: **Public**
- Language: **All**
- Select Menu: **Main Menu** (you might want to use another menu source here)
- Start Level: **1**
- End Level: **All**
- Show sub-menu items:**No**
- Menu Class Suffix: **menu-treemenu menu-iconmenu menu-richmenu** (Please only use “menu-iconmenu” if you want to display icons and use “menu-richmenu” if you want to display rich text)

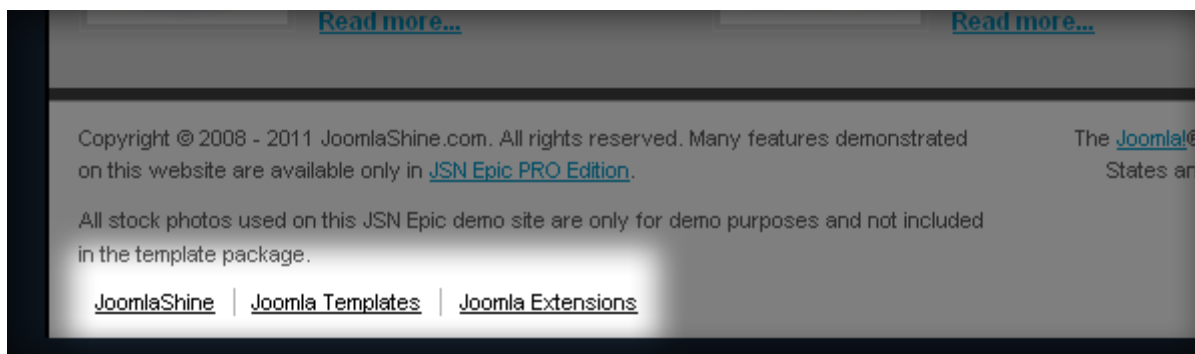

## Tree Menu Icons and Rich Text **PRO**

You can set up menu items to utilize both icons and rich text just as you can with Main Menu.

## Div Menu

Div Menu is a simple yet nice menu bar with items separated by barely visible dashes. This menu is very suitable for footer navigation presentation.

To set up Div Menu please select the menu module you want to use and set up parameters as following:

- Title: **Div Menu**(*or any other you like*)
- Show title: **Hide**
- Position: **footer**
- Access: **Public**
- Language: **All**
- Menu Name: **othermenu** (*you might want to use another menu source here*)
- Start Level: **1**
- End Level: **1**
- Show sub-menu items: **No**
- Menu Class Suffix: **menu-divmenu**

### Attention!

There is a common misconception about **Menu Class Suffix** and **Module Class Suffix**. They are absolutely different parameters, so please pay attention to their settings.

## **Video tutorial**

It guides you how to configure menus visually. Here are [video tutorials](#).

**JSN Epic** in the video is an example and these instructions can be applied to all **JSN templates** as well.

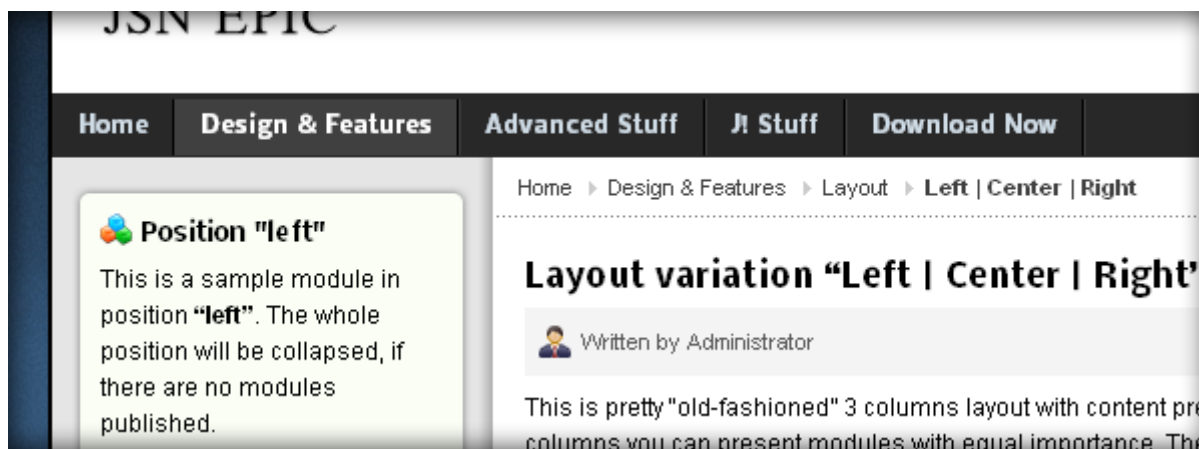

## Font Styles

### Font Face **PRO**

JSN Epic provides **four font face** options for major website types. Each font face option is actually a combination of various font types for Heading & Title, Main Menu and Body.

To configure these font, please go to section **Styling** ->**Font**.

#### Business / Corporation Website (default)

*Business font face*

This compact neat text style is an excellent choice for business oriented websites as well as corporate websites. The combination of **Nobile** and **Arial** font type looks very natural and common for most of users since they are most popular font types of used on the Internet.

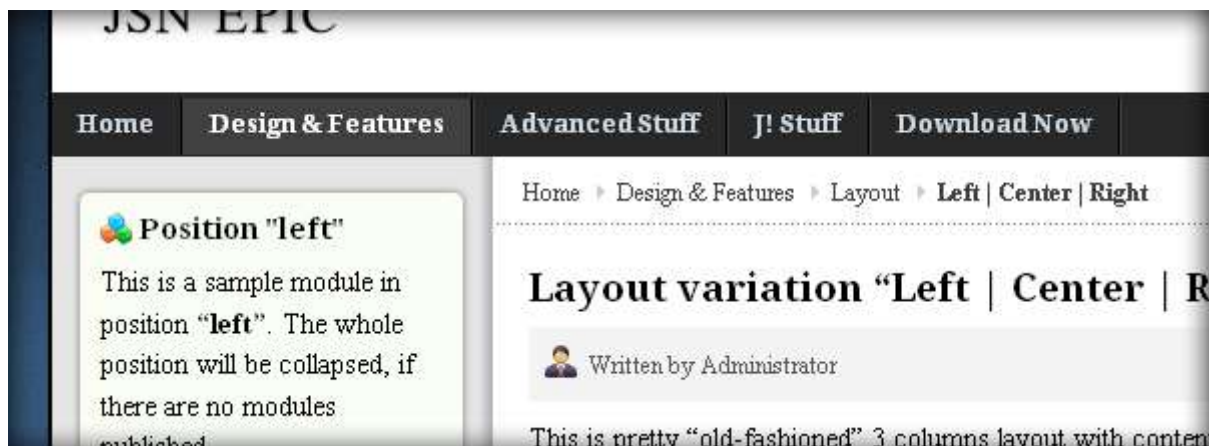

## Personal / Blog Website

### *Personal / Blog font face*

This text style is a little bigger than normal, which makes it a perfect choice for small websites like personal or blog websites. The combination of **Italiana** and **Trebuchet MS** font type make contents very easy to read and the looks impressive.

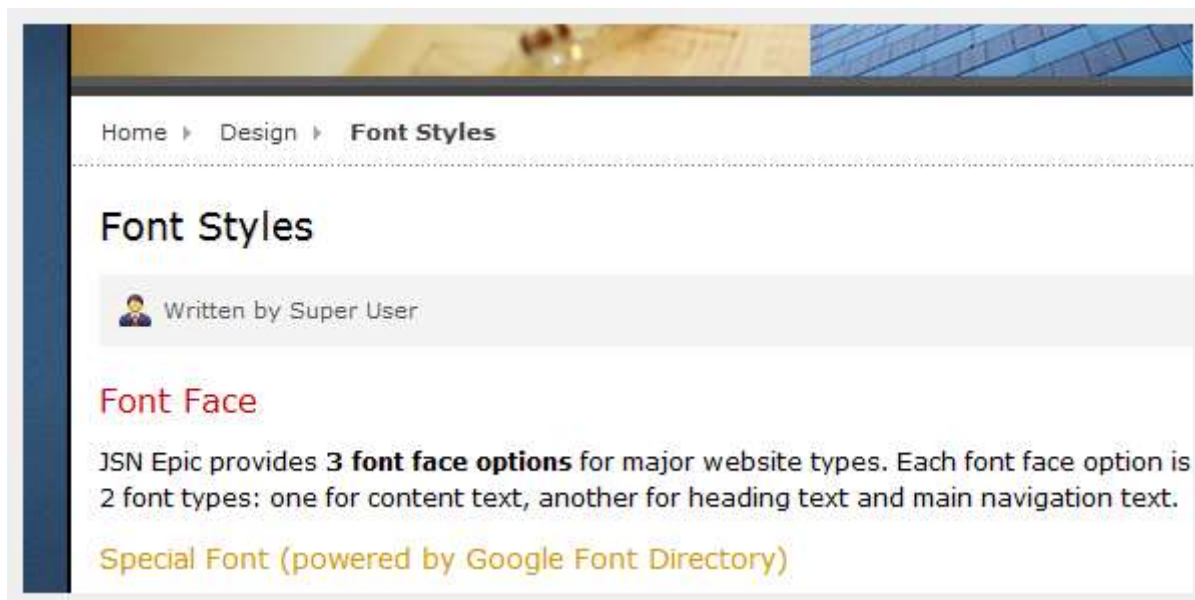

## Online News / Magazines

### *Online News / Magazines font face*

This text style utilizes two fonts called **Droid Serif** and **Times New Roman**. These fonts are widely used in the printing industry and in some of the extremely popular online news websites like [The New York Times](http://www.nytimes.com). If you want to run an online news / magazine website, it's worth trying this font combination.

## Custom

*An example of using “custom” font face*

## Font face customization

Creating your own font face styles and font sizes would be much easier with the option “**Custom**”. It allows you to customize font faces of *Heading & Title*, *Main Menu* and *Body* as you desire. For each, there are two options of

### Font type :

- **Standard Fonts:** These are the most common fonts since they are installed in almost all computers already: For example Times New Roman, Verdana and so on.
- **Google Fonts:** These are beautifully styled fonts by Google; for example: Oswald, Open Sans and so on. They help you identify your unique website easily.

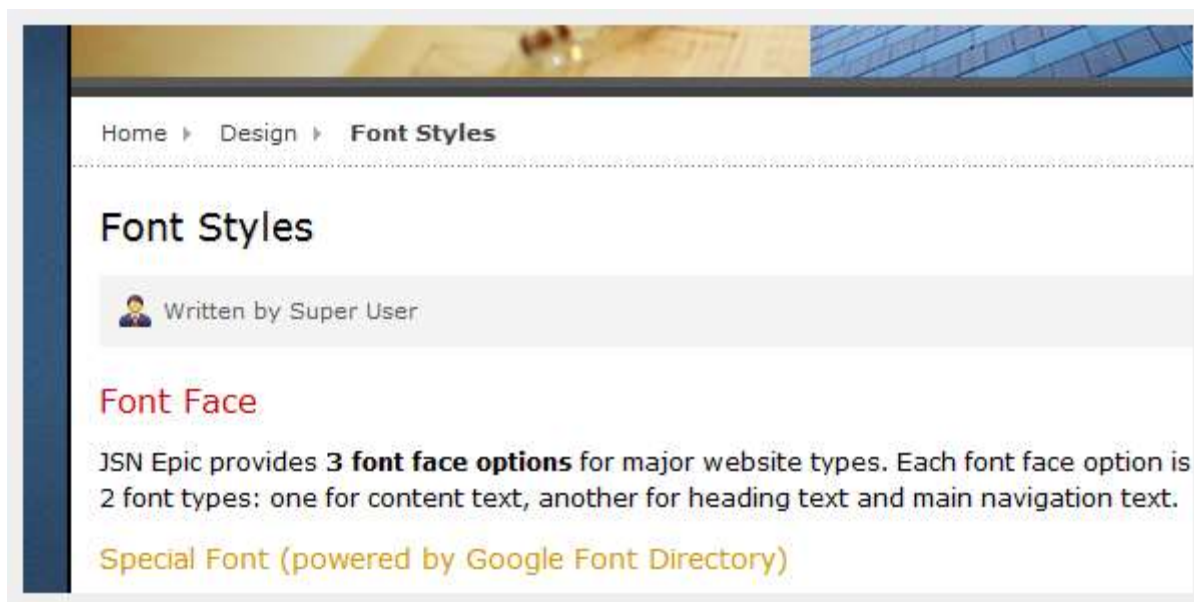

The screenshot displays the 'Font' configuration panel. It features a title 'Font' at the top. Below it, there are three main sections: 'Font Style', 'Heading & Title', and 'Main Menu'. Each section contains two dropdown menus: 'Font Type' and 'Font Family'. The 'Font Style' section has a 'Font Style' dropdown menu set to 'Custom'. The 'Heading & Title' section has a 'Font Type' dropdown menu set to 'Standard Fonts' and a 'Font Family' dropdown menu set to 'Verdana'. The 'Main Menu' section has a 'Font Type' dropdown menu set to 'Standard Fonts' and a 'Font Family' dropdown menu set to 'Verdana'. The 'Body' section has a 'Font Type' dropdown menu set to 'Standard Fonts' and a 'Font Family' dropdown menu set to 'Verdana'.

*The customization of Customize Body font face*

## Font size customization

You can adjust font size in percentage. Below are some examples of different font sizes.

*Font size 75% (default)*

*Font size 100%*

To configure it, choose **Font Style** “Custom” then adjust the parameter **Font size** as you want.

*Customize Font size*

## Text style configuration

You can configure template text style in the two following ways:

### Configuration by template parameter (lowest priority)

	<p>Template text style can be set by template parameter <b>Font Style</b> in the section <b>Styling</b>.</p> <p>This is the default setting and has the lowest priority.</p>
--	--

### Configuration by "Page Class" (higher priority)

	<p>Template text style can be set by <b>Page Class</b> of a menu item with syntax <b>custom-textstyle-xxx</b>, where <b>xxx</b> is the style you want to have.</p> <p>There are the following possible values: <b>business</b>, <b>personal</b> and <b>news</b>.</p> <p>For example:</p> <ul style="list-style-type: none"><li>• <b>custom-textstyle-personal</b></li></ul> <p>This setting will override the default settings by template parameter <i>Template Text Style</i>.</p>
--	--

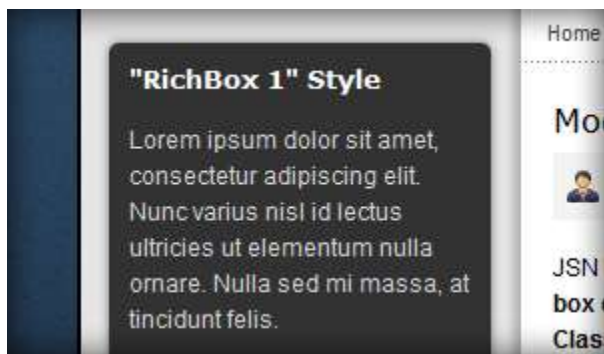

## Module Styles

JSN Epic provides **six box designs** for module background styling which can be combined with **UniIcons** for module title styling.

Module styles are configured by module's parameter **Module Class Suffix**. All available values are described below and need to be applied **without double quotes**.

### Module Box Designs

Box designs to be applied to modules.

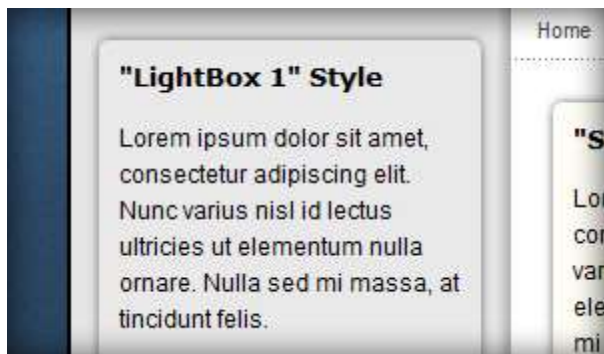

“richbox-1”

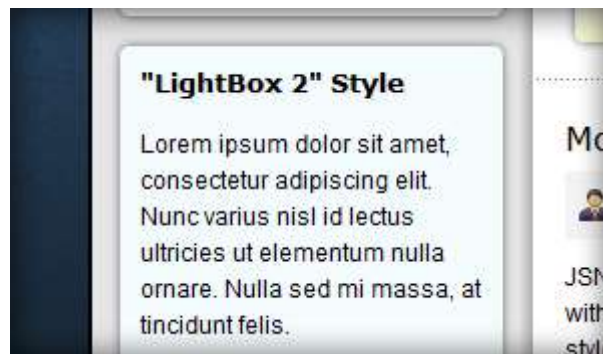

“richbox-2”

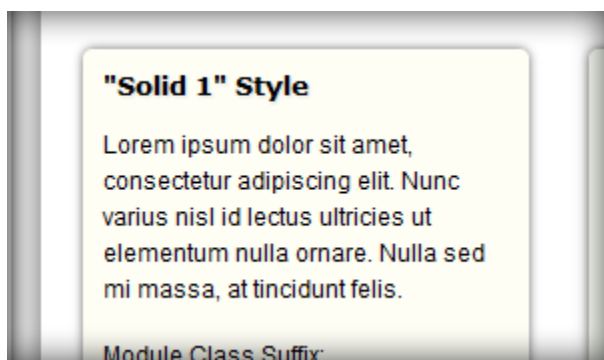

**Box designs available in PRO edition only** **PRO**

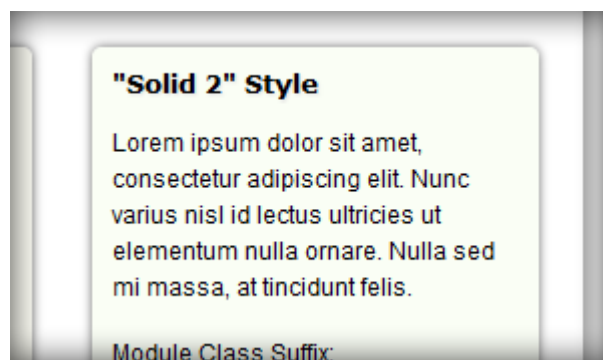

**“lightbox-1”**

**“lightbox-2”**

**“solid-1”**

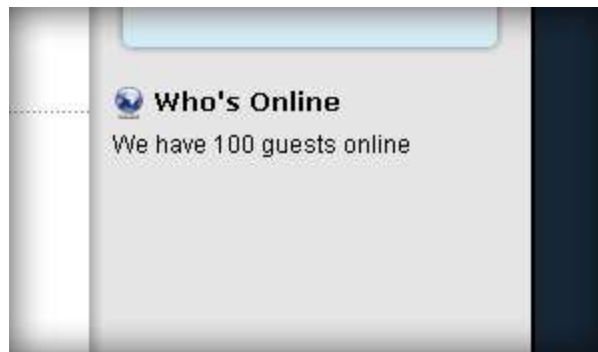

**“solid-2”**

## Module Icon Designs **PRO**

You can attach any of the **UniIcons** to the module's title. To set up icons, you need to add the string **jsn-icon-xxx** to the module class suffix, where **xxx** is the icon name.

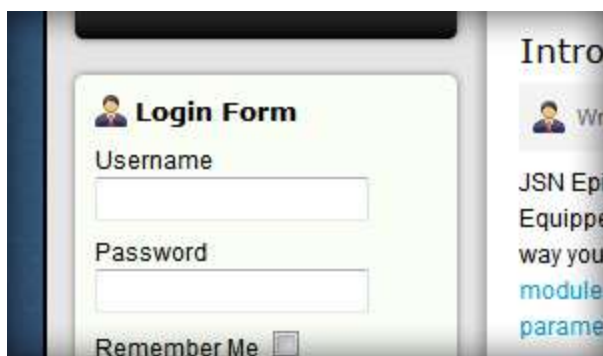

“jsn-icon-star”

“jsn-icon-online”

All icon designs can be used in **combination with a module box design** like examples below:

“solid-2 jsn-icon-user”

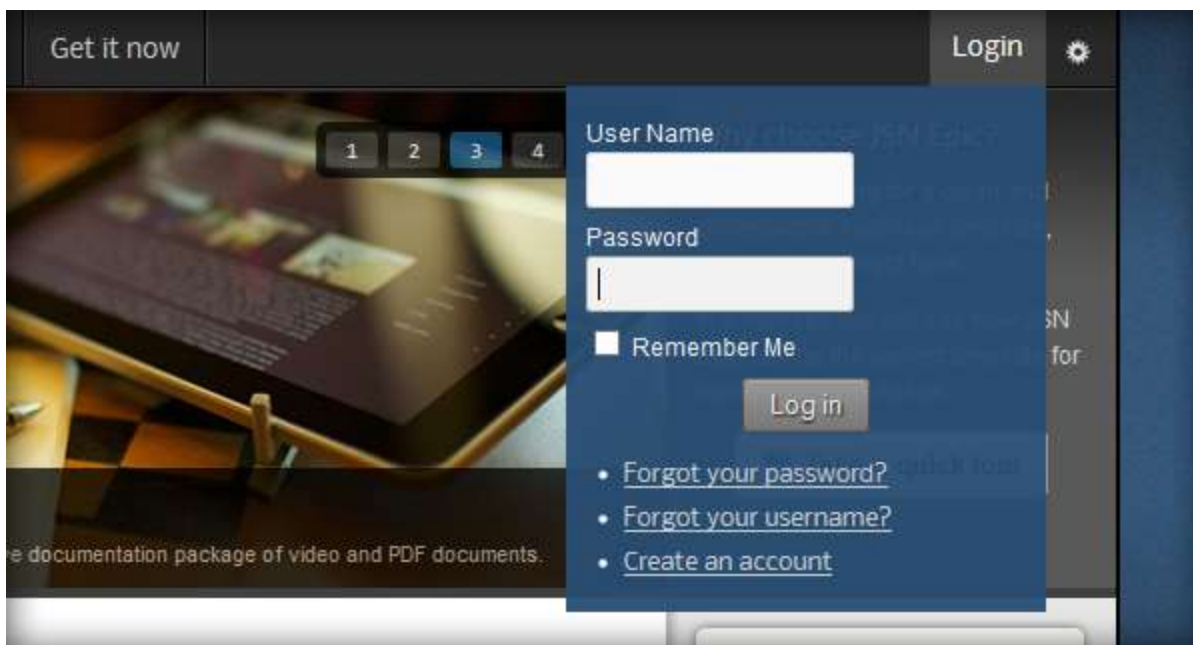

“solid-1 jsn-icon-comment”

For more information about available icons and their names, please read section **UniIcons** of this document.

## Presenting Modules in Toolbar position

You can present Modules in Toolbar position.

To do it, please set up parameters of the chosen module as following:

- Title: **Login**(or any other you like)
- Show title: **Show**
- Position: **toolbar**
- Module Class Suffix:
  - **display-dropdown**: The module will be elegantly arranged in the submenu panel.
  - **display-inline**: The module will be located directly on the main menu bar.

Login module with **dropdown** type

Search module with **inline** type

If you want to add an icon to this item, you add **jsn-icon-xxx** to the Module Class Suffix, with **xxx** is the icon name.

## Typography

JSN Epic was created with **a strong focus on typography** and we believe it contains the most comprehensive content presentation capability. Headings, text, links, tables, images, everything was designed with high level of refinement. Let's take a look.

## Content columns **PRO**

It's a pretty common situation when you need to arrange your content in multiple columns. JSN Epic offers you very a convenient and accessible method to create **multiple column content**. This is a real step forward removing table tags from your content and leaving them only for showing tabular data.

You can arrange your content in **as many columns as you like**. JSN Epic will detect the number of columns you have and automatically arrange them. The only thing you need to do is to set class **grid-layout** to parent DIV tag.

Below are screenshots of how this feature looks and example how to use it.

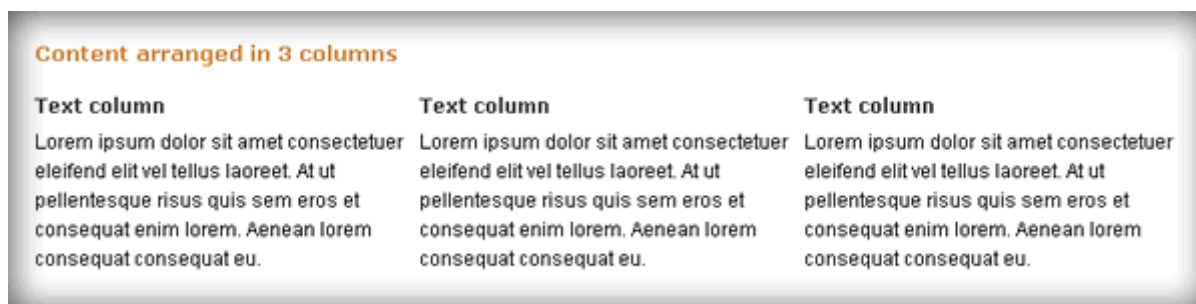

### Content arranged in 2 columns

#### Usage:

```
<div class="grid-layout">  
<div>Text in column 1</div>  
<div>Text in column 2</div>  
</div>
```

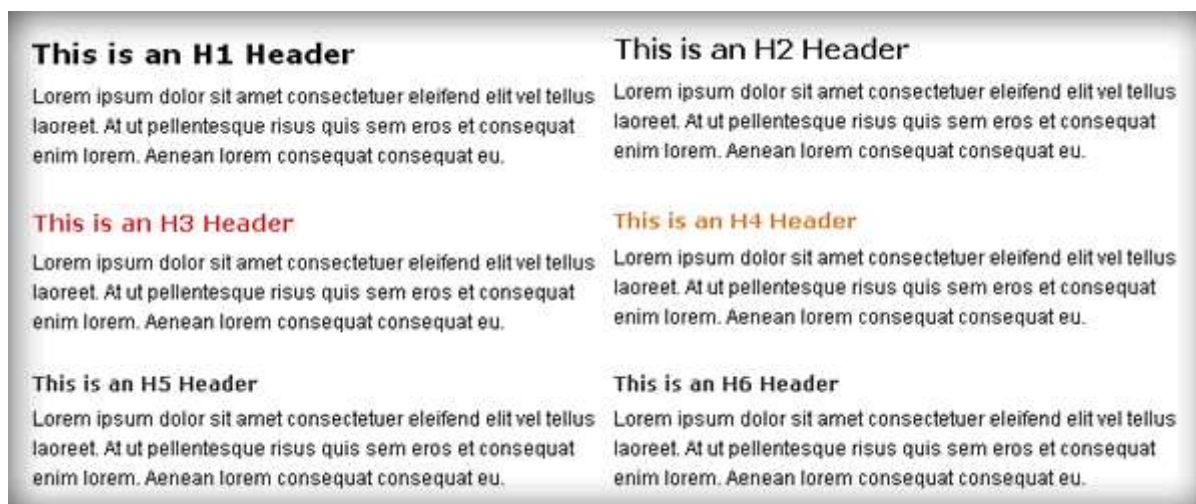

### Content arranged in 3 columns

#### Usage:

```
<div class="grid-layout">  
<div>Text in column 1</div>  
<div>Text in column 2</div>  
<div>Text in column 3</div>  
</div>
```

## Heading styles

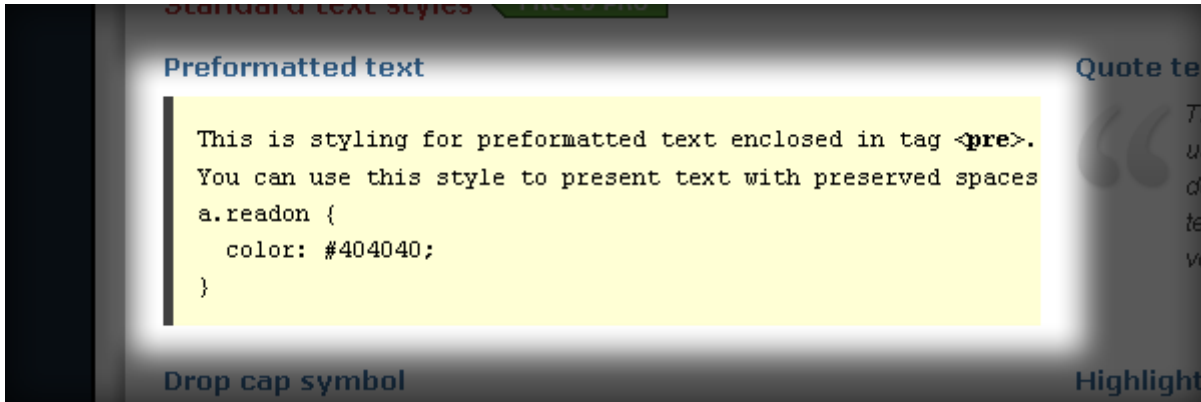

As we all know, headings are “title” of undergoing text blocks, so it must have a distinguish look. JSN Epic provides styling for five main headings. To apply them you just need to wrap your heading text in regular heading tags like `<h1>...</h1>`, `<h2>...</h2>`, `<h3>...</h3>`, etc.

## Text styles

JSN Epic provides **12 text styles** for making your content easier to scan and read. Below are screenshots of text styles and usage examples.

### Preformatted text

You can use this style to present text with preserved spaces like text block of CSS code or other programming language.

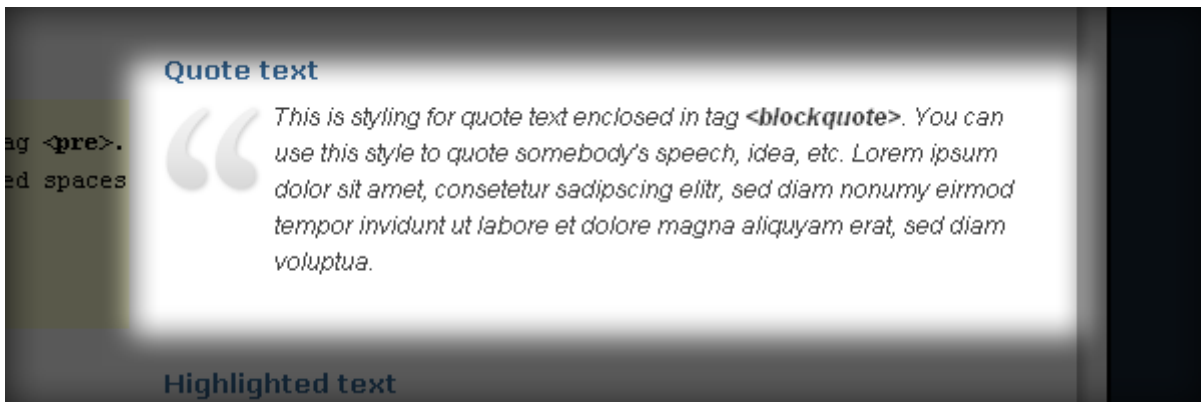

#### Usage:

**<pre>**Your preformatted text**</pre>**

### Quote text

You can use this style to quote somebody's speech, idea or a fragment from books, articles, etc.

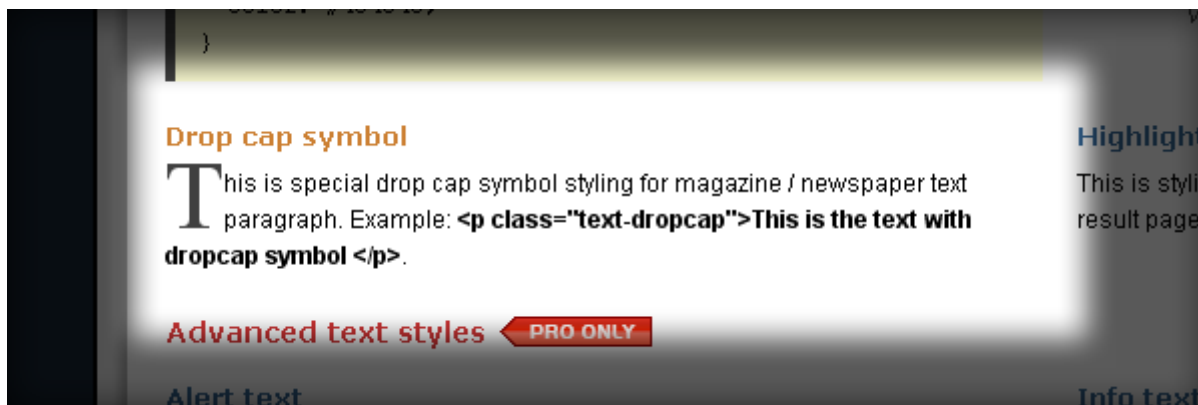

#### Usage:

**<blockquote>**Your quote text**</blockquote>**

## Drop cap symbol

You can use this special drop cap symbol style for magazine / newspaper text paragraph.

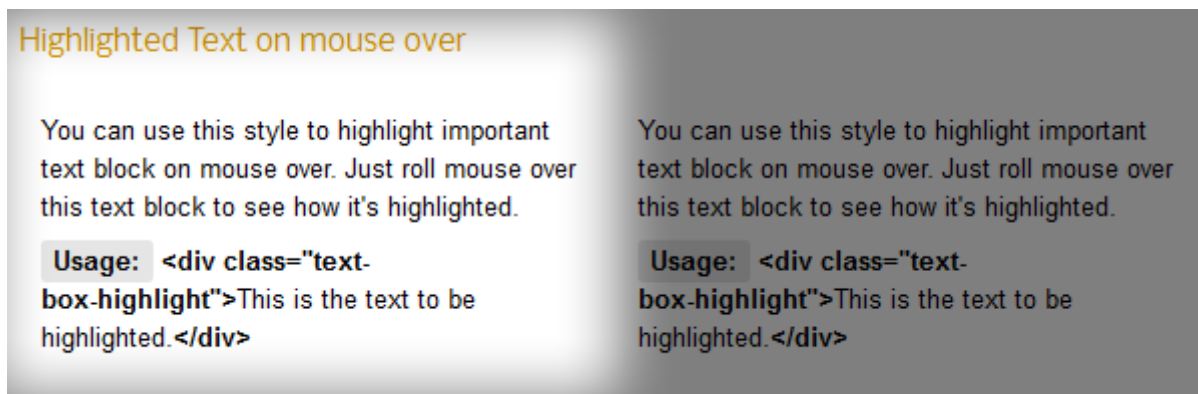

Usage:

```
<div class="text-dropcap"><p>Your magazine text paragraph.</p></div>
```

## Highlighted text on mouse over

You can use this style to highlight important box of words or expression on mouse over.

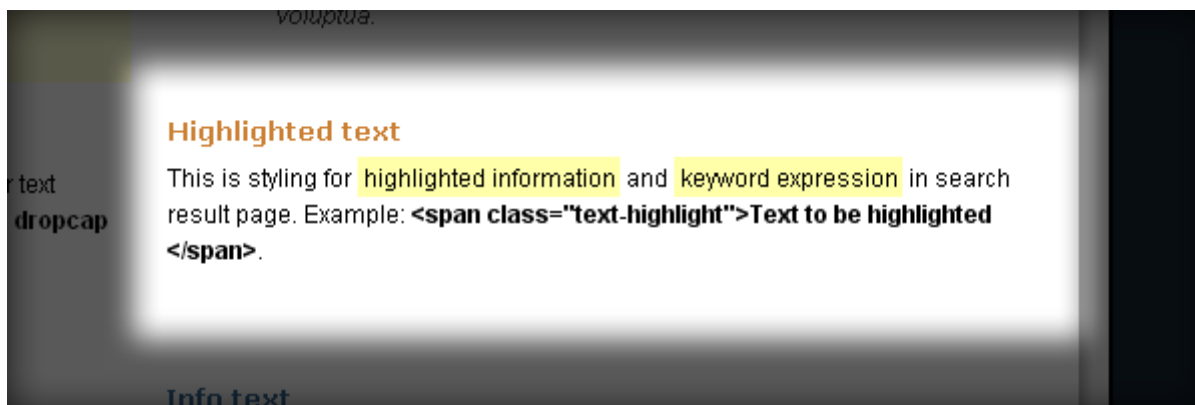

Usage:

```
<div class="text-box-highlight">Text to be highlighted.</div>
```

## Highlighted text

You can use this style to highlight important words and / or keyword expression in search result page.

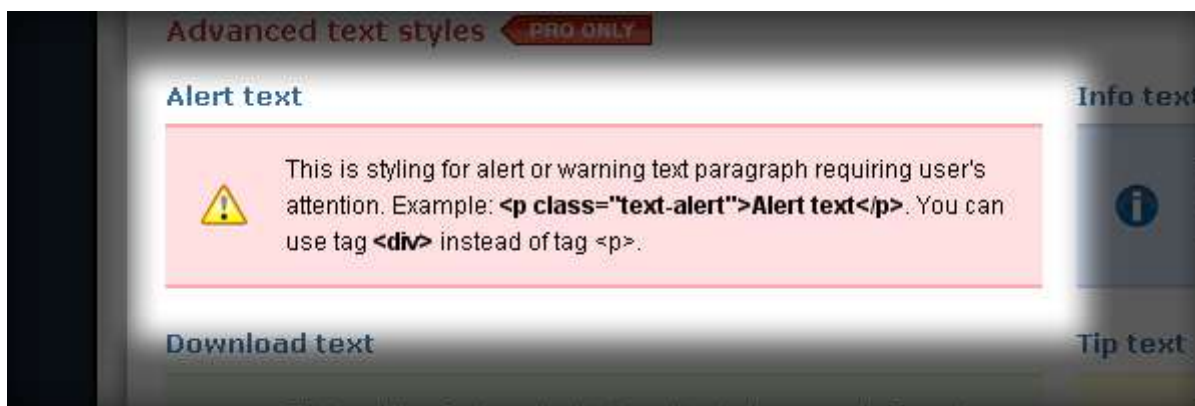

### Usage:

**<span class="text-highlight">Text to be highlighted.</span>**

## Alert text **PRO**

You can use this style for alert or warning text paragraphs which require user's attention.

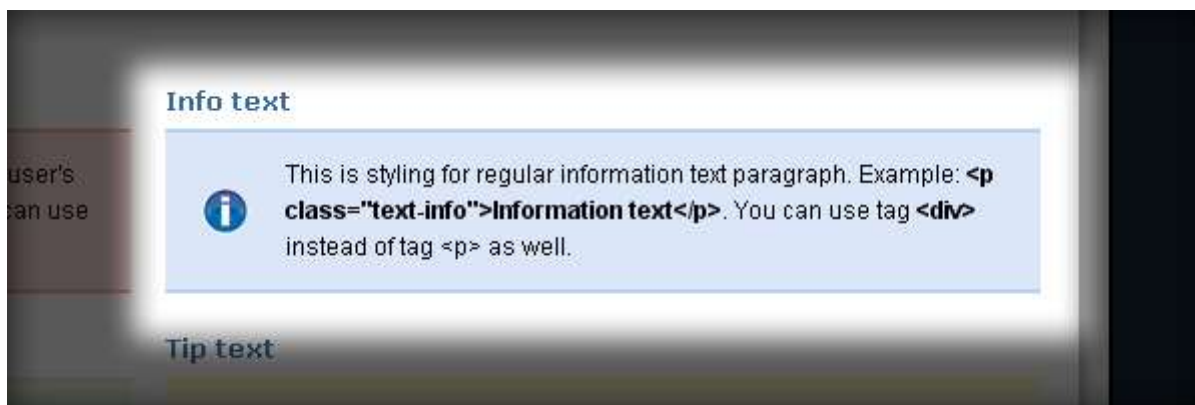

### Usage:

**<p class="text-alert">Your alert text that requires user's attentions.</p>.**

**<div class="text-alert">Your alert text that requires user's attentions.</div>.**

## Info text **PRO**

You can use this style for regular information text paragraphs that do not require much user's attention.

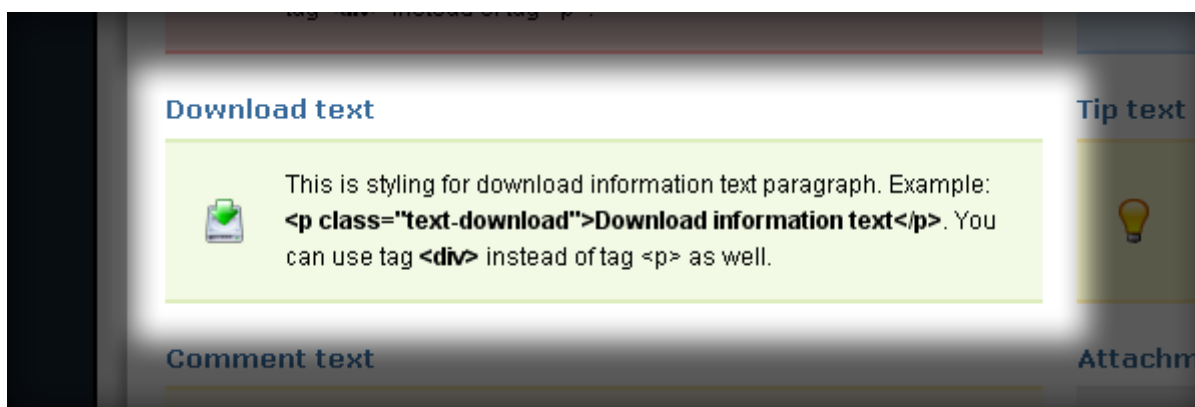

### Usage:

**<p class="text-info">**Your information text.**</p>**.

**<div class="text-info">**Your information text.**</div>**.

## Download text **PRO**

You can use this style for information text paragraph related to the download process.

### Usage:

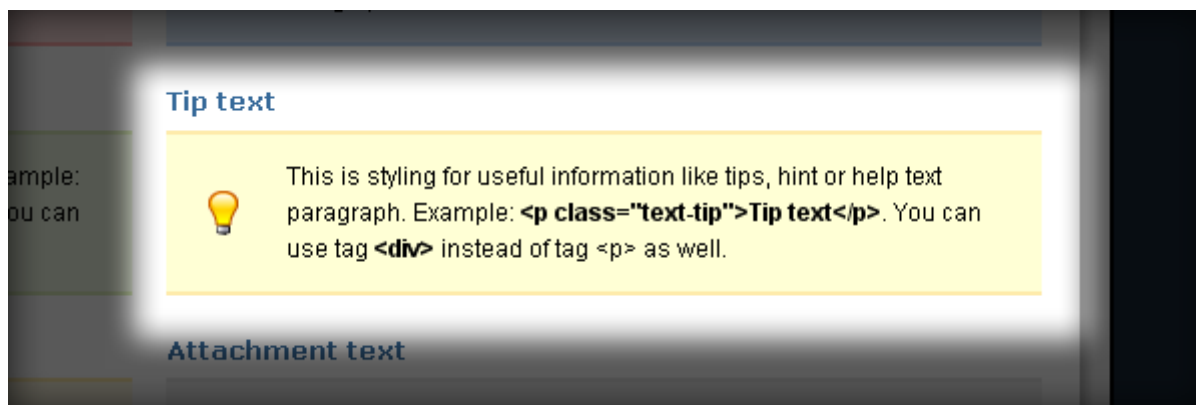

**<p class="text-download">**Your download text.**</p>**.

**<div class="text-download">**Your download text.**</div>**.

## Tip text **PRO**

You can use this style for useful information like tips, hints or help text.

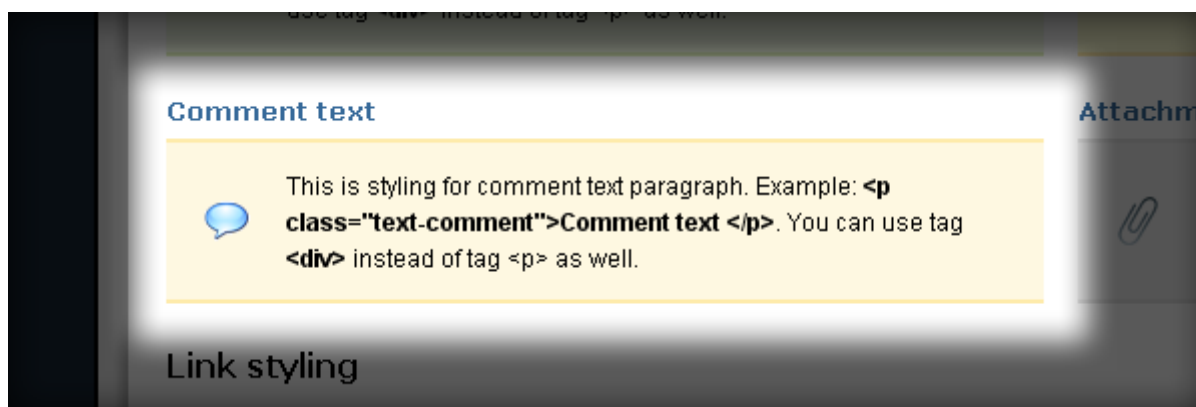

### Usage:

**<p class="text-tip">**Your tip, hint or help text.**</p>**

**<div class="text-tip">**Your tip, hint or help text.**</div>**

## Comment text **PRO**

You can use this style for comment text paragraphs.

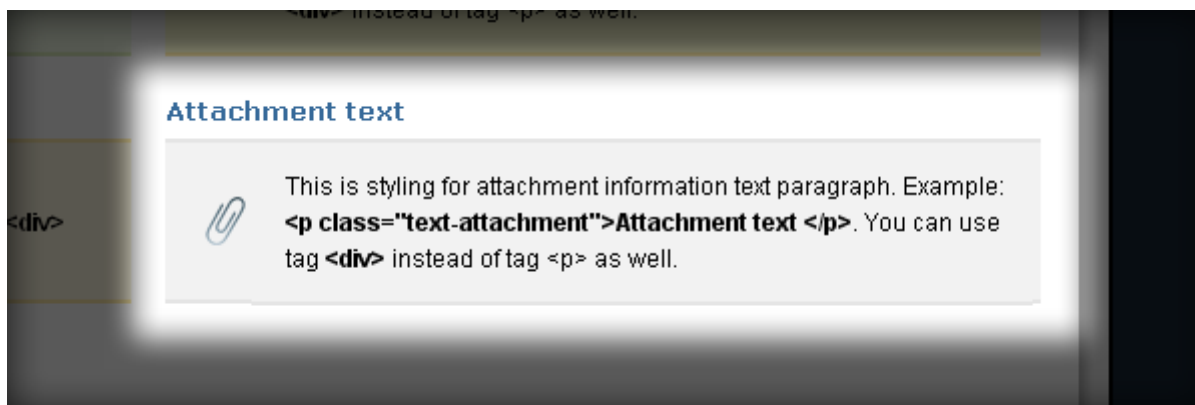

### Usage:

**<p class="text-comment">**Your comment text.**</p>**

**<div class="text-comment">**Your comment text.**</div>**

## Attachment text **PRO**

You can use this style for information text paragraphs related to attachment file.

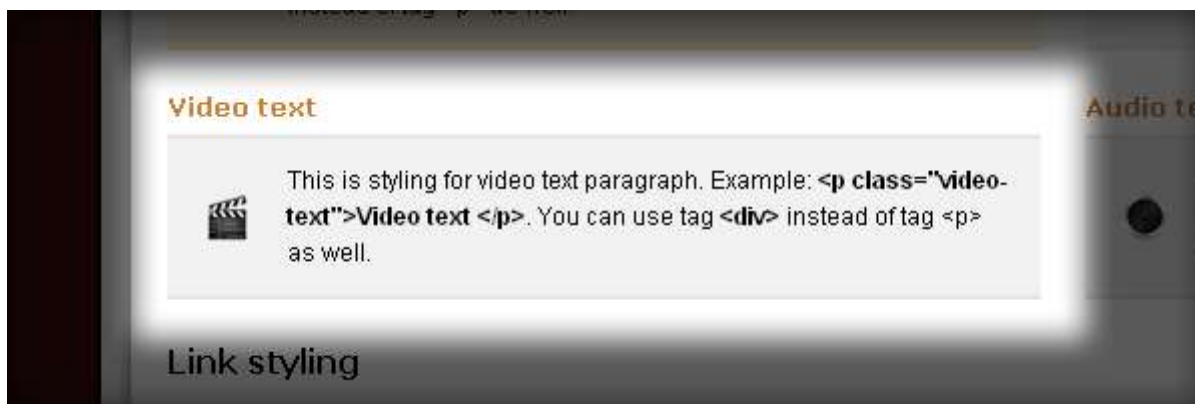

### Usage:

**<p class="text-attachment">**Your attachment text.**</p>**.

## Video text **PRO**

You can use this style for description text paragraphs that related to video file.

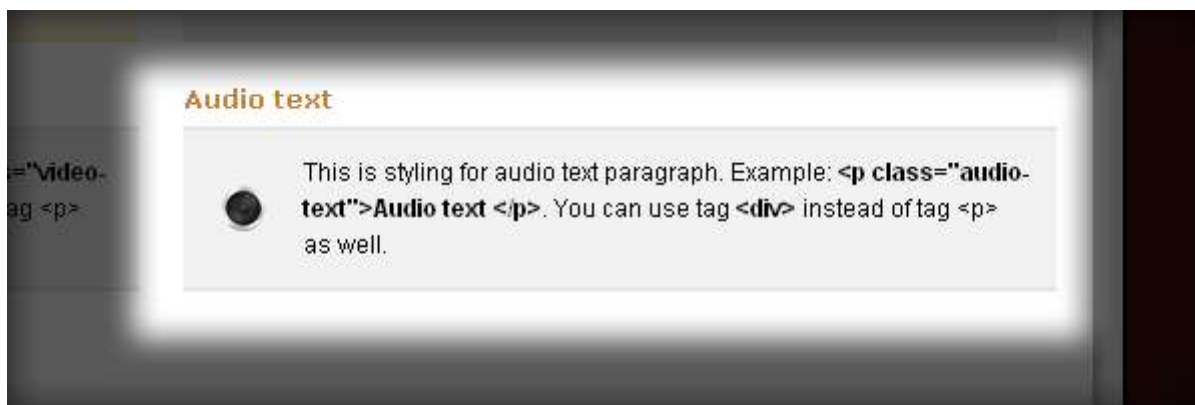

### Usage:

**<p class="text-video">**Your video text.**</p>**

**<div class="text-video">**Your video text.**</div>**.

## Audio text **PRO**

You can use this style for description text paragraph related to audio file.

### Usage:

**<p class="text-audio">**Your attachment text.**</p>**

**<div class="text-audio">**Your attachment text.**</div>**.

## Link styles **PRO**

### Action link styles

With action link styles, website hyperlink's color will be changed when you hover mouse over website hyperlink.

#### Action link styles

#### Usage:

`<a class="link-action" href="url">This is link text.</a>`

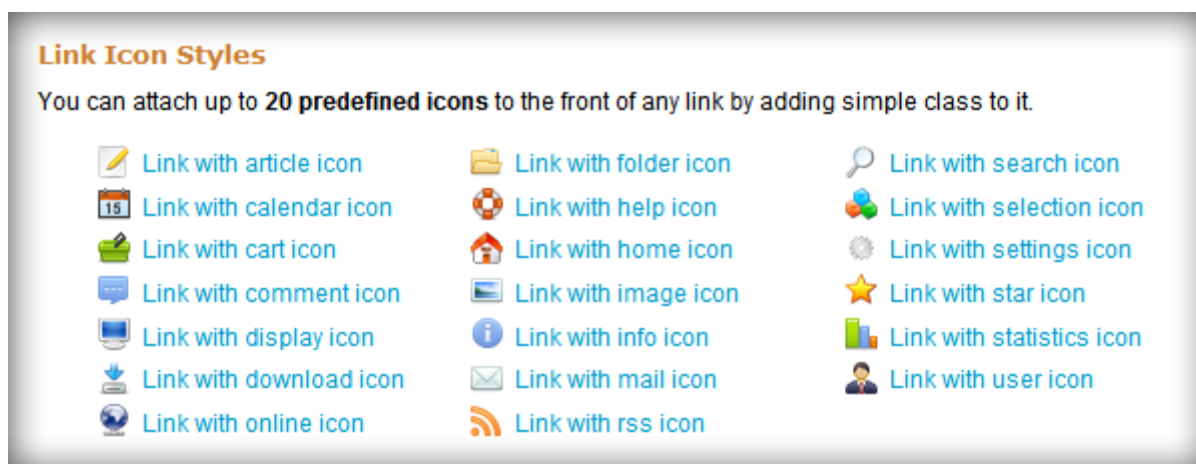

Where **url** is the website hyperlink.

#### Example:

`<a class="link-action" href="http://www.joomlashine.com">Joomlashine.</a>`

### Icon link styles

You can attach any of **UniIcons** to the front of any link by adding simple class to it.

#### Usage:

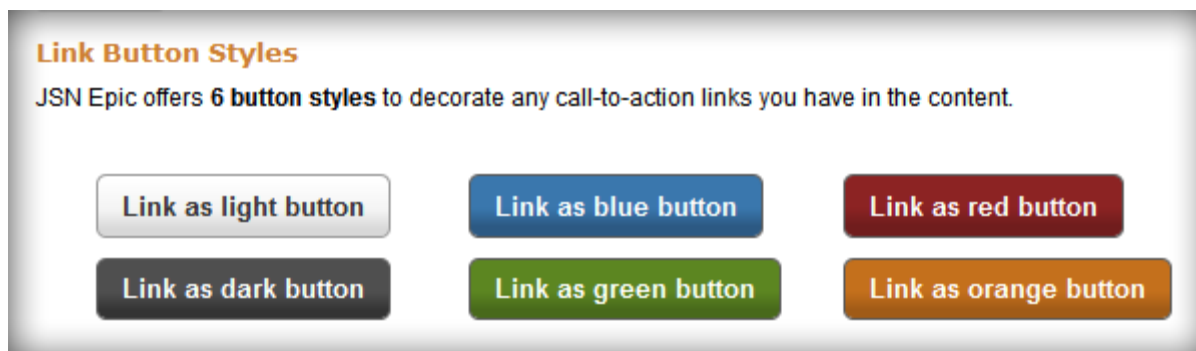

`<a class="link-icon jsn-icon-xxx">This is link text.</a>`, where **xxx** is the name of icon to be applied.

#### Example:

`<a class="link-icon jsn-icon-download">This is link to download something.</a>`

## Button link styles

JSN Epic offers **6 button styles** to decorate any call-to-action links you have in the content.

### Usage:

```
<a class="link-button button-xxx">This is link text.</a>
```

where **xxx** is the button color name selected from: **light**, **dark**, **green**, **orange**, **blue** and **red**.

### Example:

```
<a class="link-button button-orange">See plans & pricing.</a>
```

## Button and Icon link styles combined

You can use both button and icon link style combined.

### Usage:

```
<a class="link-button button-xxx"><span class="link-icon jsn-icon-yyy">This is link text.</span></a>
```

where **xxx** and **yyy** are button color and icon names respectively.

### Example:

```
<span class="link-button button-green"><a class="link-icon jsn-icon-cart">Add to cart.</a></span>
```

## Extension link styles

JSN Epic is able to attach not only descriptive icon to the front of link as described in the above section, but also **23 extension icons** to the end of the link.

There are 2 ways of utilization extension icons.

### Automatic assignment

JSN Epic is able to detect links to various popular file extensions and assign icons accordingly. This feature utilizes the modern CSS2 specification allowing you to have links with meaningful icons assigned without any modification in XHTML code. Moreover, it can detect the protocol type to assign icons to links to instant messengers, email, etc.

### Manual assignment

As stated before, most browsers icons will be automatically assigned thanks to the modern CSS2 specification. Unfortunately IE6 does not support this specification and you have manually set an appropriate class for links. Also, this can help if, for some reason, you turned off the auto icon link template parameter but still want to manually apply icons to links.

**Usage:** `<a class="link-icon-extjsn-icon-ext-xxx">This is link text.</a>`, where **xxx** is the icon name described below.

Get free e-book to learn how to build a Joomla website with easy steps - <http://ow.ly/fh6dL>

 - “ <b>aim</b> ”	 - “ <b>excel</b> ”	 - “ <b>movie</b> ”	 - “ <b>skype</b> ”
 - “ <b>application</b> ”	 - “ <b>feed</b> ”	 - “ <b>msn</b> ”	 - “ <b>text</b> ”
 - “ <b>archive</b> ”	 - “ <b>flash</b> ”	 - “ <b>music</b> ”	 - “ <b>torrent</b> ”
 - “ <b>calendar</b> ”	 - “ <b>font</b> ”	 - “ <b>pdf</b> ”	 - “ <b>vcard</b> ”
 - “ <b>css</b> ”	 - “ <b>mail</b> ”	 - “ <b>powerpoint</b> ”	 - “ <b>yahoo</b> ”
 - “ <b>doc</b> ”	 - “ <b>mobile</b> ”	 - “ <b>quicktime</b> ”	 - “ <b>windowsmedia</b> ”

JSN Epic utilizes the CSS sprite technique to reduce the number of HTTP requests to server in order to get icons. Technically, all icons are merged in one single image file and visitors will need to make **one single request/download** to get that file with all icons. If you have extra time, please read [more about CSS sprites](#).

## Table styles **PRO**

Tabular data is a very common type of information to be presented on the web. By default, tables look ugly and not much readable. With JSN Epic you have **3 table styles** to present virtually any kind of tabular data you have.

### Color Header table style

Table header	Column header 1	Column header 2	Column header 3
Row header 1	Lorem ipsum	Dolor sit amet	Lorem ipsum
Row header 1	Lorem ipsum	Dolor sit amet	Lorem ipsum
Row header 1	Lorem ipsum	Dolor sit amet	Lorem ipsum
Row header 1	Lorem ipsum	Dolor sit amet	Lorem ipsum
Table footer	Footer data		

Usage:

`<table class="table-style style-colorheader">...</table>`

### Color Stripes table style

Table header	Column header 1	Column header 2	Column header 3
Row header 1	Lorem ipsum	Dolor sit amet	Lorem ipsum
Row header 1	Lorem ipsum	Dolor sit amet	Lorem ipsum
Row header 1	Lorem ipsum	Dolor sit amet	Lorem ipsum
Row header 1	Lorem ipsum	Dolor sit amet	Lorem ipsum
Table footer	Footer data		

Usage:

`<table class="table-style style-colorstripes">...</table>`

## Grey Stripes table style

Table header	Column header 1	Column header 2	Column header 3
Row header 1	Lorem ipsum	Dolor sit amet	Lorem ipsum
Row header 1	Lorem ipsum	Dolor sit amet	Lorem ipsum
Row header 1	Lorem ipsum	Dolor sit amet	Lorem ipsum
Row header 1	Lorem ipsum	Dolor sit amet	Lorem ipsum
Table footer			Footer data

### Usage:

`<table class="table-style style-greystripes">...</table>`

### Attention!

In order to get table styles shown correctly, you need to create solid XHTML code as show bellow.

```
<table width="100%" class="table-style style-colorheader">
  <thead>
    <tr>
      <th>Table header</th>
      <th>Column header 1</th>
      <th class="highlight">Column header 2</th>
      <th>Column header 3</th>
    </tr>
  </thead>
  <tfoot>
    <tr>
      <th>Table footer</th>
      <td colspan="3">Footer data</td>
    </tr>
  </tfoot>
  <tbody>
    <tr class="odd">
      <th>Row header 1</th>
      <td>Lorem ipsum</td>
      <td class="highlight">Dolor sit amet</td>
      <td>Lorem ipsum</td>

```

## List styles

List is the crucial element in every content, not only online websites. List can really help readers to scan the content and catch important pieces by just a glance.

### Standard list styles

#### Unordered list

##### Unordered list

This is styling for standard unordered list. Example:

- Lorem ipsum dolor sit amet
- Consetetur sadipscing elitr
- Sed diam voluptua

Usage: `<ul><li>...</li></ul>`

#### Ordered list

##### Ordered list

This is styling for standard ordered list. Example: `<ol>`

1. Lorem ipsum dolor sit amet
2. Consetetur sadipscing elitr
3. Sed diam voluptua

Usage: `<ol><li>...</li></ol>`

## Arrow list styles

### Red arrow

#### Red arrow list

This is styling for list with red arrow bullets.

Example: `<ul class="list-arrow-red">...</ul>`.

- ▶ Lorem ipsum dolor sit amet
- ▶ Consetetur sadipscing elitr
- ▶ Sed diam voluptua

#### Usage:

`<ul class="list-arrow arrow-red"><li>...</li></ul>`

### Blue arrow

#### Blue arrow list

This is styling for list with blue arrow bullets.

Example: `<ul class="list-arrow-blue">...</ul>`.

- ▶ Lorem ipsum dolor sit amet
- ▶ Consetetur sadipscing elitr
- ▶ Sed diam voluptua

#### Usage:

`<ul class="list-arrow arrow-blue"><li>...</li></ul>`

### Green arrow

#### Green arrow list

This is styling for list with green arrow bullets.

Example: `<ul class="list-arrow-green">...</ul>`.

- ▶ Lorem ipsum dolor sit amet
- ▶ Consetetur sadipscing elitr
- ▶ Sed diam voluptua

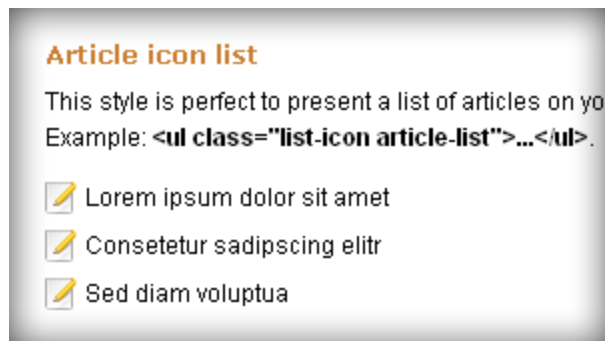

#### Usage:

`<ul class="list-arrow arrow-green"><li>...</li></ul>`

## Icon list styles **PRO**

You can attach any of **UniIcons** to items in the list. To set up icons, you need to add string **jsn-icon-xxx** to **<ul>** class, where **xxx** is the icon name.

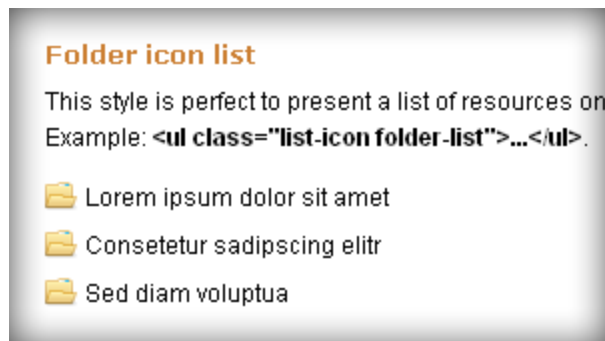

### Article icon list

#### Usage:

```
<ul class="list-icon jsn-icon-  
article"><li>...</li></ul>
```

### Folder icon list

#### Usage:

```
<ul class="list-icon jsn-icon-  
folder"><li>...</li></ul>
```

For more information about available icons and their names, please read section **UniIcons** of this document.

## Number list style **PRO**

### Blue Bullet number list

- 1 Lorem ipsum dolor sit amet**  
Lorem Ipsum is simply dummy text of the print industry.
- 2 Consetetur sadipscing elitr**  
Lorem Ipsum has been the industry's standard text ever since the 1500s, when an unknown printer took a galley of type and set it to make a type specimen book.
- 3 Sed diam voluptua**  
It has survived not only five centuries, but also the adaptation to typesetting, remaining essentially unchanged.

#### Usage:

```
<ul class="list-number-bullet bullet-blue"><li>...
```

### Green Bullet number list

- 1 Lorem ipsum dolor sit amet**  
Lorem Ipsum is simply dummy text of the print industry.
- 2 Consetetur sadipscing elitr**  
Lorem Ipsum has been the industry's standard text ever since the 1500s, when an unknown printer took a galley of type and set it to make a type specimen book.
- 3 Sed diam voluptua**  
It has survived not only five centuries, but also the adaptation to typesetting, remaining essentially unchanged.

#### Usage:

```
<ul class="list-number-bullet bullet-green"><li>...
```

### Grey Bullet number list

- 1 Lorem ipsum dolor sit amet**  
Lorem Ipsum is simply dummy text of the print industry.
- 2 Consetetur sadipscing elitr**  
Lorem Ipsum has been the industry's standard text ever since the 1500s, when an unknown printer took a galley of type and set it to make a type specimen book.
- 3 Sed diam voluptua**  
It has survived not only five centuries, but also the adaptation to typesetting, remaining essentially unchanged.

#### Usage:

```
<ul class="list-number-bullet bullet-grey"><li>...
```

### Orange Bullet number list

- 1 Lorem ipsum dolor sit amet**  
Lorem Ipsum is simply dummy text of the print industry.
- 2 Consetetur sadipscing elitr**  
Lorem Ipsum has been the industry's standard text ever since the 1500s, when an unknown printer took a galley of type and set it to make a type specimen book.
- 3 Sed diam voluptua**  
It has survived not only five centuries, but also the adaptation to typesetting, remaining essentially unchanged.

#### Usage:

```
<ul class="list-number-bullet bullet-orange"><li>...
```

### Red Bullet number list

- 1 Lorem ipsum dolor sit amet**  
Lorem Ipsum is simply dummy text of the print industry.
- 2 Consetetur sadipscing elitr**  
Lorem Ipsum has been the industry's standard since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book.
- 3 Sed diam voluptua**  
It has survived not only five centuries, but also the adaptation to typesetting, remaining essentially unchanged.

#### Usage:

```
<ul class="list-number-bullet bullet-red"><li>...
```

### Violet Bullet number list

- 1 Lorem ipsum dolor sit amet**  
Lorem Ipsum is simply dummy text of the print industry.
- 2 Consetetur sadipscing elitr**  
Lorem Ipsum has been the industry's standard since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book.
- 3 Sed diam voluptua**  
It has survived not only five centuries, but also the adaptation to typesetting, remaining essentially unchanged.

#### Usage:

```
<ul class="list-number-bullet bullet-violet"><li>...
```

### Blue Digit number list

- 1 Lorem ipsum dolor sit amet**  
Lorem Ipsum is simply dummy text of the print industry.
- 2 Consetetur sadipscing elitr**  
Lorem Ipsum has been the industry's standard since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book.
- 3 Sed diam voluptua**  
It has survived not only five centuries, but also the adaptation to typesetting, remaining essentially unchanged.

#### Usage:

```
<ul class="list-number-digit digit-blue"><li>...
```

### Green Digit number list

- 1 Lorem ipsum dolor sit amet**  
Lorem Ipsum is simply dummy text of the print industry.
- 2 Consetetur sadipscing elitr**  
Lorem Ipsum has been the industry's standard since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book.
- 3 Sed diam voluptua**  
It has survived not only five centuries, but also the adaptation to typesetting, remaining essentially unchanged.

#### Usage:

```
<ul class="list-number-digit digit-green"><li>...
```

### Grey Digit number list

- 1 Lorem ipsum dolor sit amet**  
Lorem Ipsum is simply dummy text of the print industry.
- 2 Consetetur sadipscing elitr**  
Lorem Ipsum has been the industry's standard since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book.
- 3 Sed diam voluptua**  
It has survived not only five centuries, but also the adaptation to typesetting, remaining essentially unchanged.

#### Usage:

`<ul class="list-number-digit digit-grey"><li>...`

### Orange Digit number list

- 1 Lorem ipsum dolor sit amet**  
Lorem Ipsum is simply dummy text of the print industry.
- 2 Consetetur sadipscing elitr**  
Lorem Ipsum has been the industry's standard since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book.
- 3 Sed diam voluptua**  
It has survived not only five centuries, but also the adaptation to typesetting, remaining essentially unchanged.

#### Usage:

`<ul class="list-number-digit digit-orange"><li>...`

### Red Digit number list

- 1 Lorem ipsum dolor sit amet**  
Lorem Ipsum is simply dummy text of the print industry.
- 2 Consetetur sadipscing elitr**  
Lorem Ipsum has been the industry's standard since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book.
- 3 Sed diam voluptua**  
It has survived not only five centuries, but also the adaptation to typesetting, remaining essentially unchanged.

#### Usage:

`<ul class="list-number-digit digit-red"><li>...`

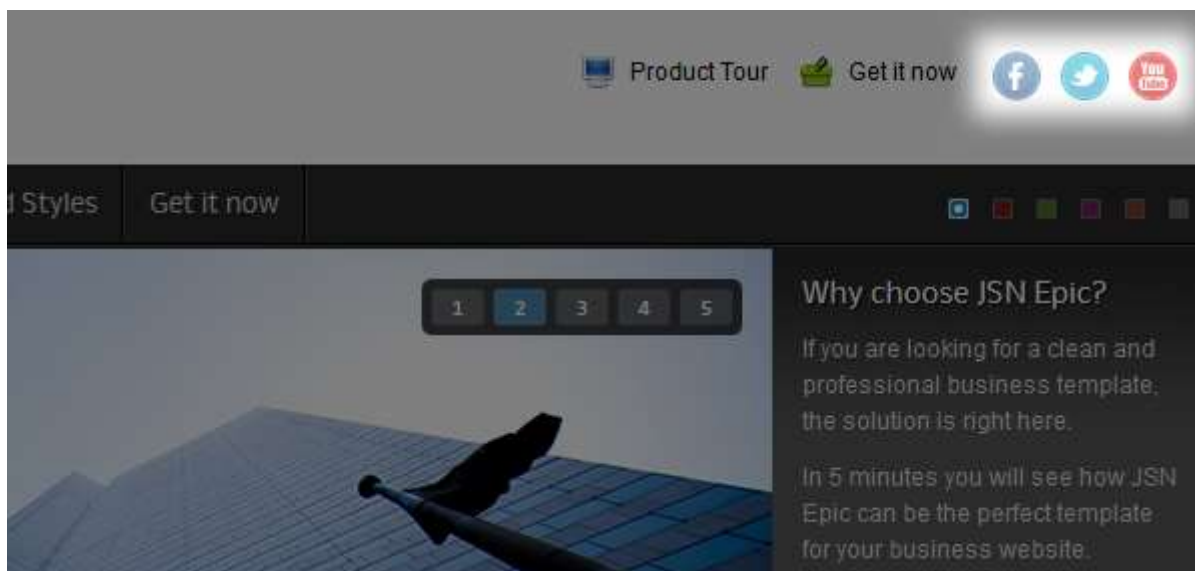

### Violet Digit number list

- 1 Lorem ipsum dolor sit amet**  
Lorem Ipsum is simply dummy text of the print industry.
- 2 Consetetur sadipscing elitr**  
Lorem Ipsum has been the industry's standard since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book.
- 3 Sed diam voluptua**  
It has survived not only five centuries, but also the adaptation to typesetting, remaining essentially unchanged.

#### Usage:

`<ul class="list-number-digit digit-violet"><li>...`

## Social Icons **PRO**

*Social icons in JSN Epic*

In JSN Epic, you are free to integrate your social channels without digging into the code. Just configure the social icons with their URLs with the parameter **“Social icons”** in the section **“SEO & System”** in the back-end. You can also change positions of social icons by dragging and dropping them.

*Change social channels*

*Change positions of social channels*

There are there default social channels: Facebook, Twitter and YouTube. You can integrate more 9 social channels: Google+, Pinterest, MySpace, Flickr, Dribbble, StumbleUpon, Yahoo, Skype and RSS. Just click the button on the right and add new URLs to the pop-up “Social Network Integration”, the corresponding social integrations will be shown up.

### Social Network Integration

Facebook	<input type="text" value="http://www.facebook.com/joomlashine"/>
Twitter	<input type="text" value="http://www.twitter.com/joomlashine"/>
Google+	<input type="text" value="http://plus.google.com/your_user_id"/>
YouTube	<input type="text" value="http://www.youtube.com/joomlashine"/>
Pinterest	<input type="text" value="http://www.pinterest.com/your_user_name"/>
MySpace	<input type="text" value="http://www.myspace.com/your_user_name"/>
Flickr	<input type="text" value="http://www.flickr.com/people/your_user_name"/>
Dribble	<input type="text" value="http://www.dribble.com/your_user_name"/>
StumbleUpon	<input type="text" value="http://your_user_name.stumbleupon.com"/>
Yahoo	<input type="text" value="ymsgr:sendim?your_user_name"/>
Skype	<input type="text" value="skype:your_user_name?call"/>

*The pop-up of Social Network Integration*

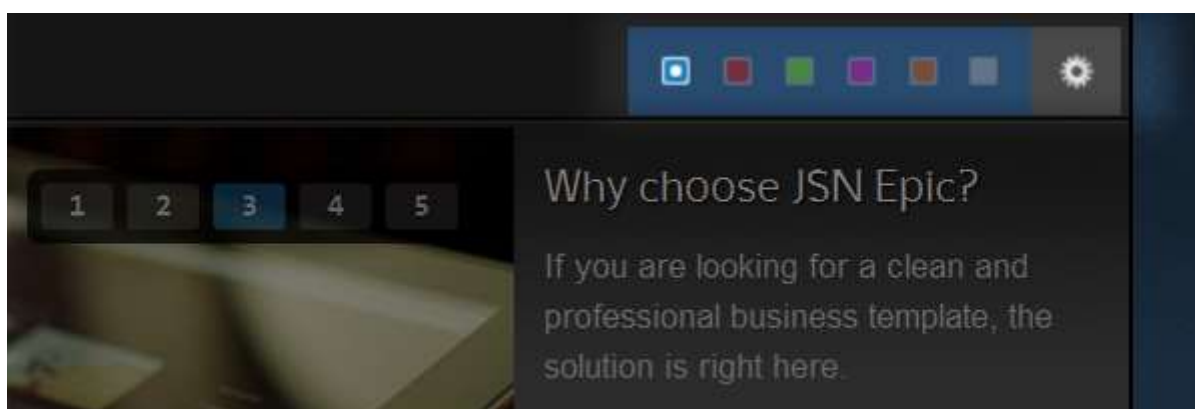

## Site Tools **PRO**

JSN Epic provides three brand new features to enhance website user experience with **Color Selector**. By enabling this selector, you will certainly be giving visitors the best user experience on your website. The setting from Site tools will be stored as visitor's browser cookies for further usage.

### Site tools Presentation

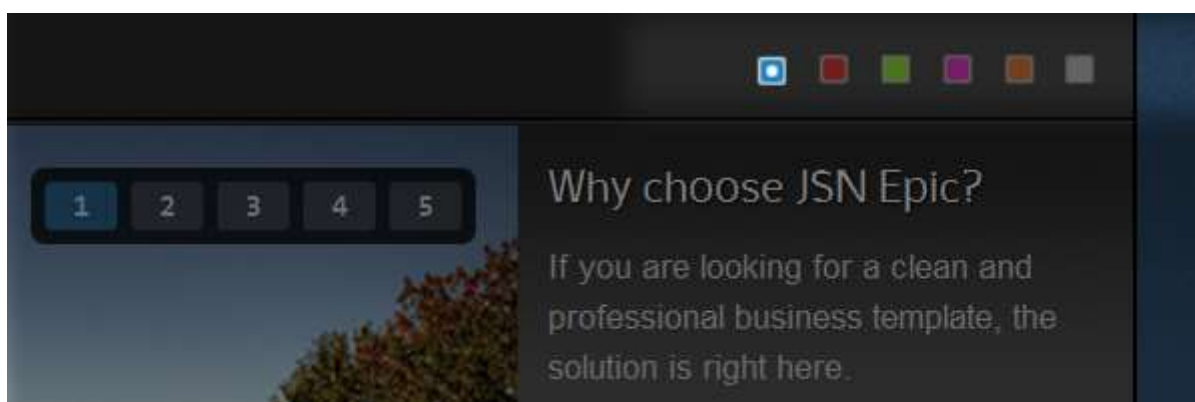

You have two options to present Site tools.

#### As Menu

With this option, all selectors are elegantly arranged in the submenu panel. The as-menu animation, transparency and background color settings will be inherited from the Main Menu settings.

#### Inline Row

With this option, all selectors are located directly on the main menu bar. If you want to enable only some selectors, this option is the best.

## Colors in Site Tools

In the back-end, you are able to manage your site tools easily. You can choose which colors to be show up and rearrange their orders as you want by ticking or dragging then dropping the applicable checkboxes.

The screenshot shows the 'Site Tools' configuration window. It has a title bar 'Site Tools' and a subtitle 'Show Site Tools'. Below the subtitle, there is a dropdown menu currently set to 'As Menu'. To the left of the dropdown is the label 'Colors in Selector'. Below the dropdown, there is a list of color options, each with a checked checkbox: Blue, Red, Green, Violet (which is highlighted with a grey background), Orange, and Grey.

Color	Selected
Blue	<input checked="" type="checkbox"/>
Red	<input checked="" type="checkbox"/>
Green	<input checked="" type="checkbox"/>
Violet	<input checked="" type="checkbox"/>
Orange	<input checked="" type="checkbox"/>
Grey	<input checked="" type="checkbox"/>

*Colors in Site Tools*

## **Video tutorial**

It guides you how to configure sitetools visually. Here are [video tutorials](#).

**JSN Epic** in the video is an example and these instructions can be applied to **JSN templates** template as well.

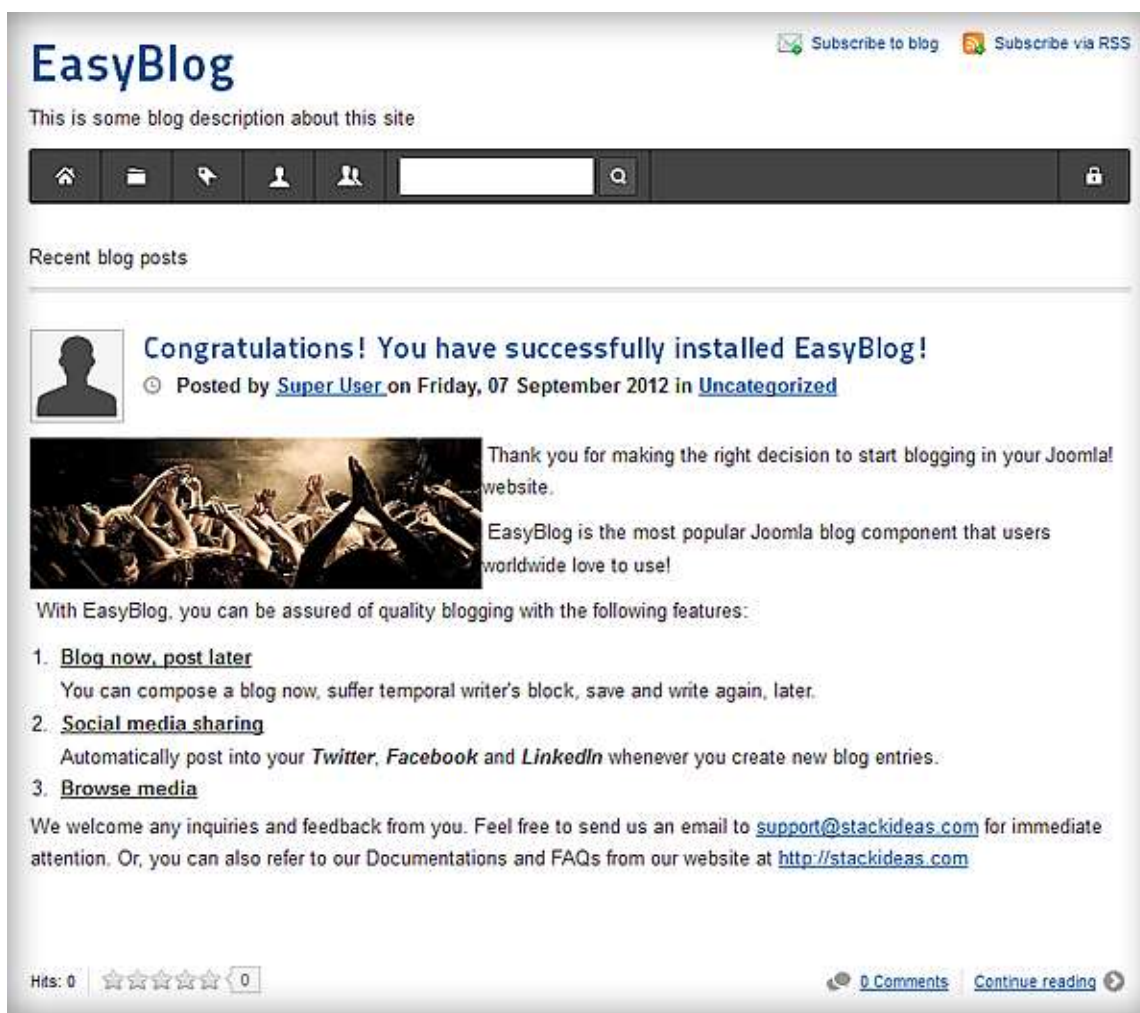

## Extended styles

One of the hottest features of JSN Epic is that it supports 3 popular Joomla extensions: **EasyBlog**, **Kunena&K2**.

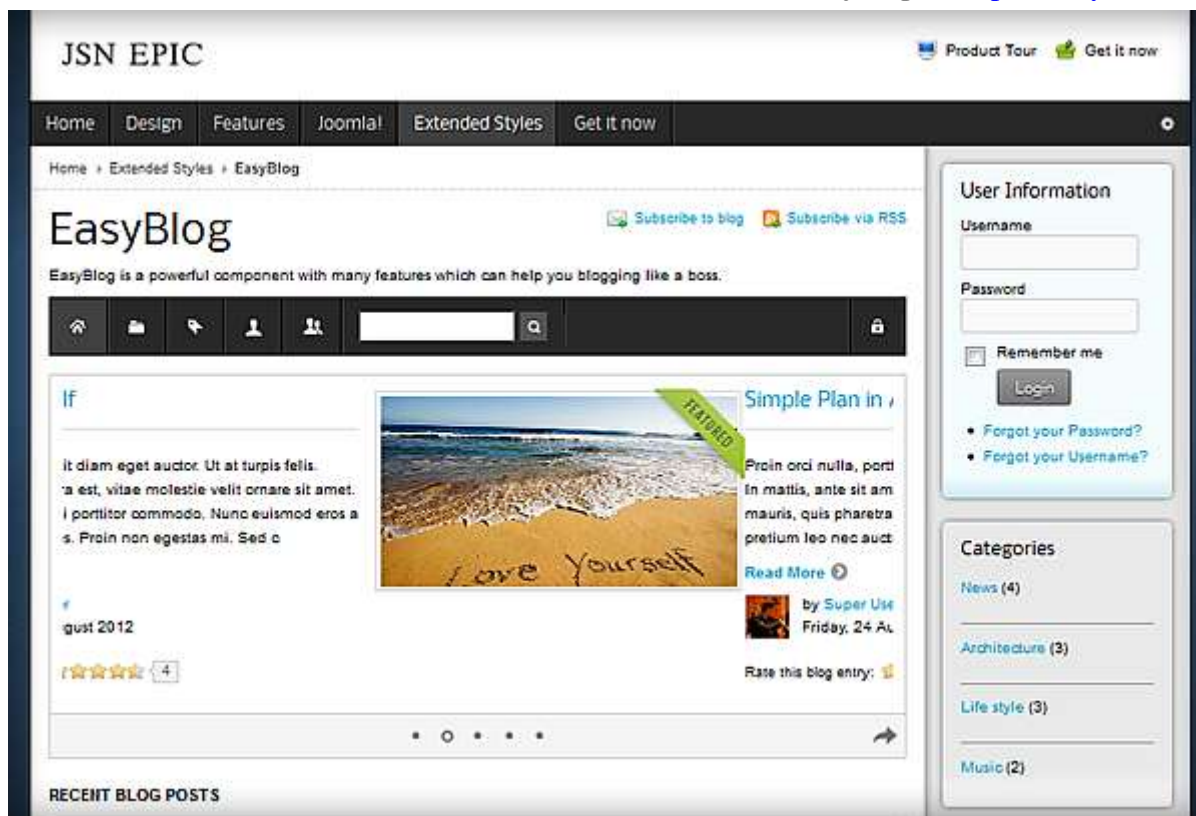

### EasyBlog **PRO**

Thanks to EasyBlog, you can create a nice blog easily. Now JSN Epic supports EasyBlog with an EasyBlog Theme. You can create a blog with enhanced design, 6 color variations and RTL support.

Here you can see the differences between EasyBlog with its **Default theme** and EasyBlog with **JSN Epic theme**.

*EasyBlog Default theme*

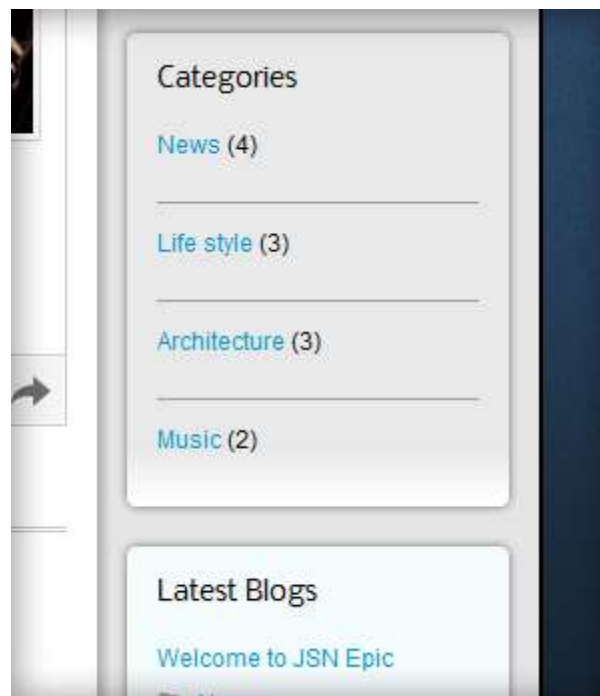

*EasyBlog with JSN Epic Theme*

## Modules

You get styled modules with JSN Epic theme.

*Composing dashboard in Default theme*

*Composing dashboard in JSN Epic Theme*

## Installation

1. You install [EasyBlog](#) via Joomla! administration.
2. Log in the [Customer Area](#), download JSN Epic theme.
3. Unzip file **jsn\_epic\_theme\_unzip\_me\_first.zip**, then copy the folder **jsn\_epic** to the path **joomla\_root\components\com\_easyblog\themes**
4. Go to **Component -> EasyBlog -> Themes -> Set jsn\_epic as default**

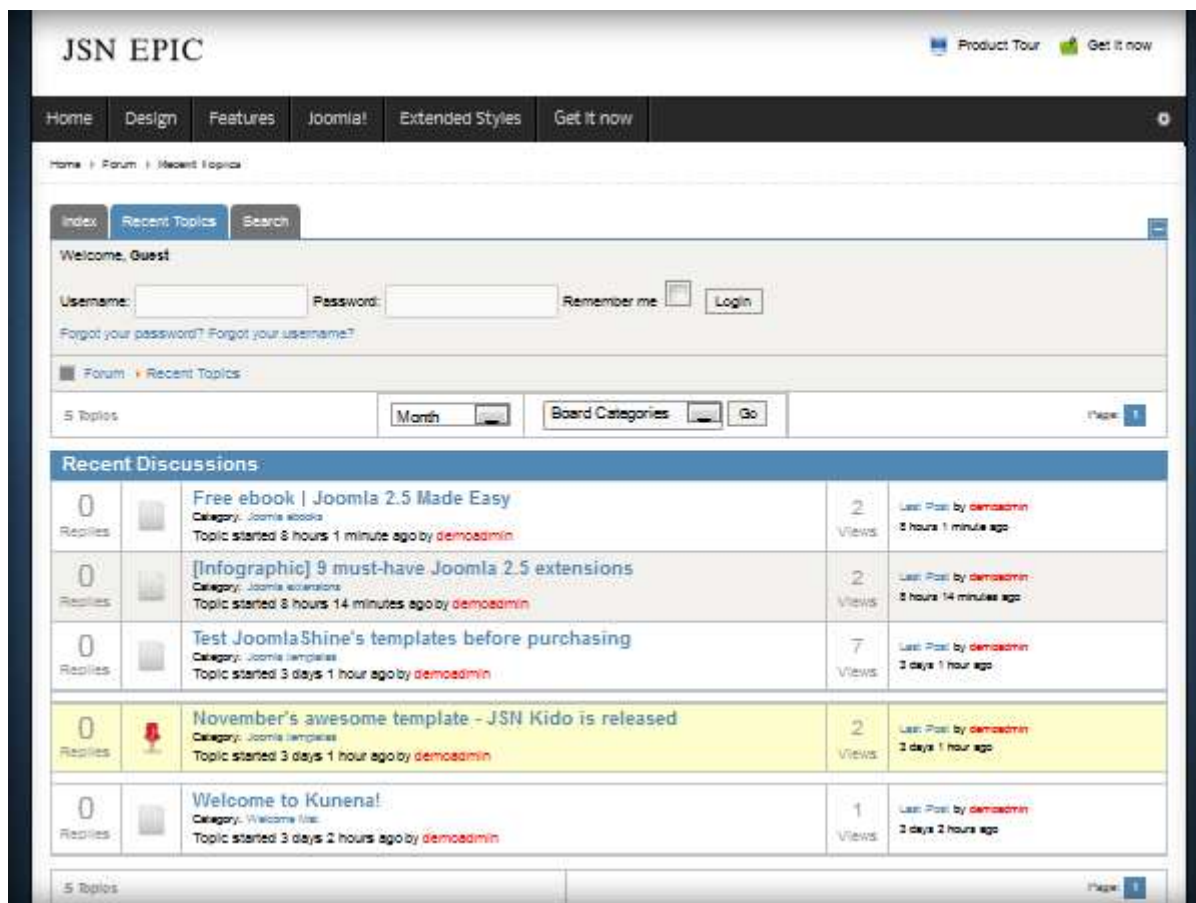

Now you have the JSN Epic theme on your blog.

## Attention!

EasyBlog is not included in the JSN Epic template package. You can buy it with 30% discount at <http://www.joomlashine.com/joomlashine/our-partners.html>

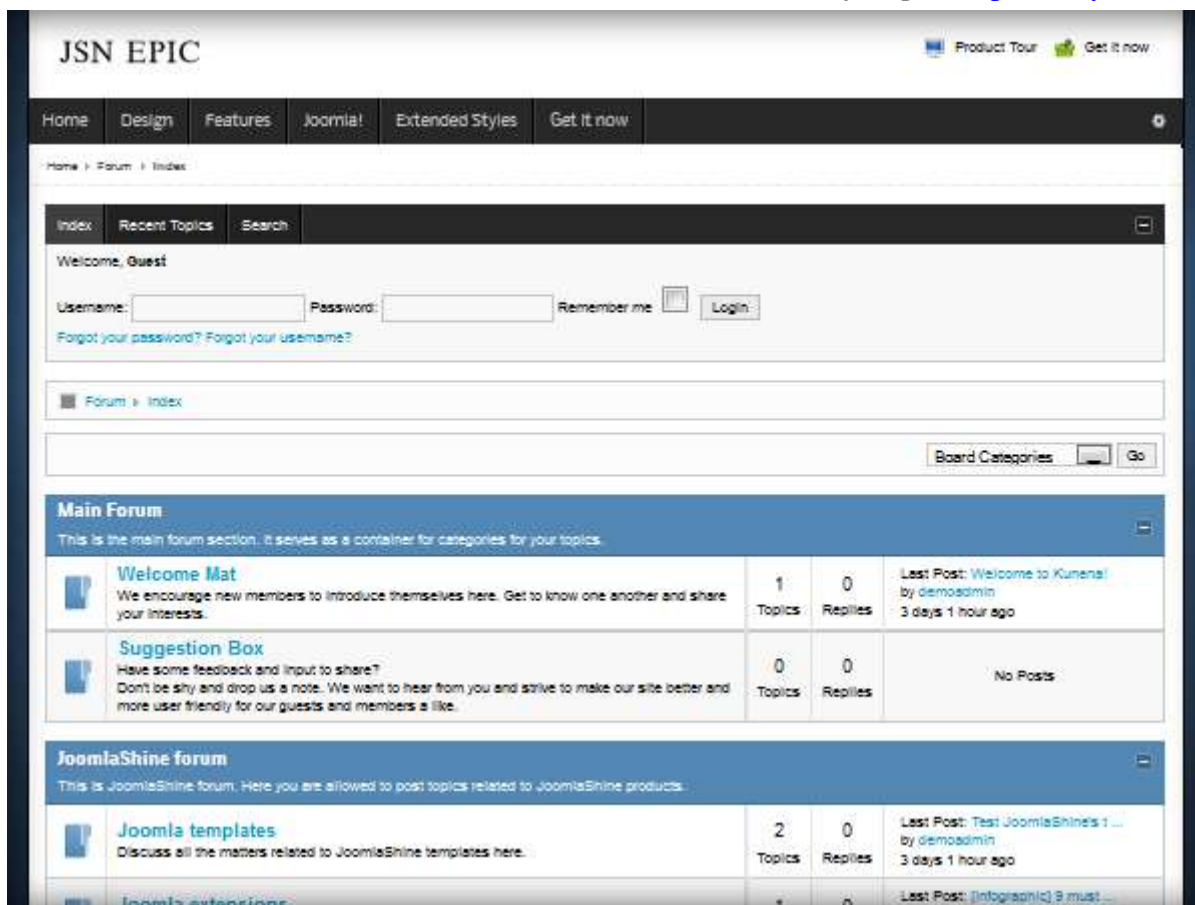

## Kunena PRO

Thanks to Kunena, you can create a forum easily. Now JSN Epic supports Kunena with a Kunena Theme. You can create a forum with enhanced designs, 6 color variations, RTL support and 4 modules styled.

*Kunena without JSN Epic theme*

*Kunena with JSN Epic theme*

## Styled modules

You can set 4 module designs - Latest module, Search module, Login module and Statistics module as Right-to-left layout.

The screenshot displays the Joomla! Advanced Search module interface, configured for a Right-to-left layout. The module is titled "Advanced Search" and is divided into two main sections: "Search by User Name" and "Search by Keyword".

**Search by User Name:** This section includes a text input field for the user name, a checkbox labeled "Exact Name", and a "Search" button.

**Search by Keyword:** This section includes a text input field for keywords, a dropdown menu for "Search entire posts", and a "Search" button.

**Search Options:** This section is further divided into "Search in Categories" and "Find Posts from".

**Search in Categories:** This section features a category selection dropdown menu. The dropdown is open, showing a list of categories: "All Categories", "Main Forum", "Welcome Mat -", "Suggestion Box -", "JoomlaShine forum", "Joomla templates -", "Joomla extensions -", and "Joomla ebooks -". Below the dropdown is a checkbox labeled "Also search in sub-categories" which is checked.

**Find Posts from:** This section includes two dropdown menus for selecting the time range for the search: "And newer" and "A year ago".

**Sort Results by:** This section includes two dropdown menus for selecting the sorting order: "Decreasing order" and "Posting date".

**Jump to Result Number:** This section includes a dropdown menu for "Show 15 Search Results" and a text input field for the result number, currently set to "0".

At the bottom of the module, there are "Cancel" and "Search" buttons.

*Search module in Right-to-left layout*

## Installation

1. You install [Kunena](#) via Joomla! administration.
2. Log in the [Customer Area](#), download JSN Epic theme for Kunena.
3. Unzip file **jsn\_epic\_kunena\_unzip\_me\_first.zip**, then copy the folder **jsn\_epic** to the path **joomla\_root\components\com\_kunena\template**
4. Go to **joomla\_root\components\com\_kunena\template\jsn\_epic \language**, copy the file **en-GB.com\_kunena.tpl\_jsn\_epic** and paste it in the folder **joomla\_root\components\com\_kunena\language\en-GB**
5. Go to the website backend -> **Component** -> **Kunena Forum** -> **Template Manager** -> Set **JSN Epic** as default.

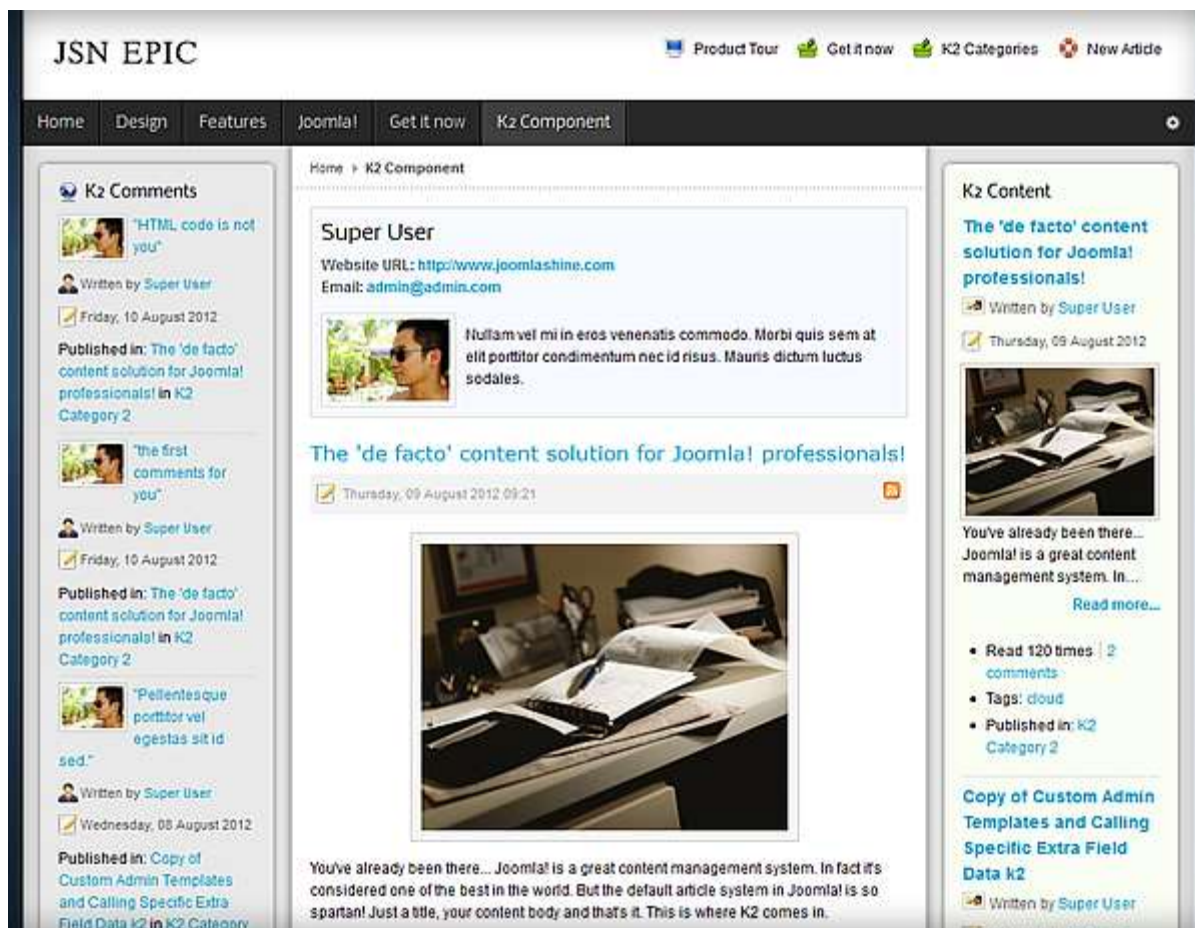

Now you have the JSN Epic theme on your website.

## Attention!

Kunena is not included in the JSN Epic template package. You can download Kunena freely at <http://www.kunena.org/>

## K2

Here is how K2 and JSN Epic combination looks like. You can see all **K2 components** such as K2 Comment, K2 Content, K2 Users, TagCloud, Article, etc work well with JSN Epic.

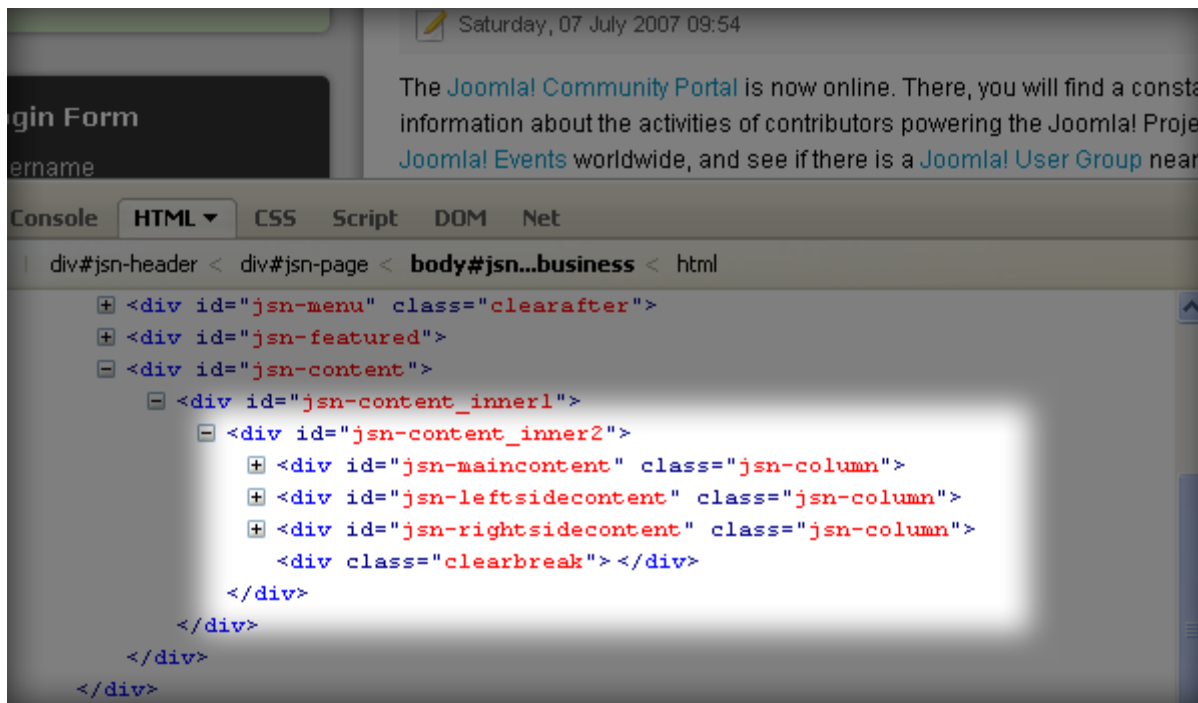

*JSN Epic is fully supported K2 style*

## Attention!

K2 is not included in the JSN Epic template package. You can download K2 freely at <http://getk2.org/>

## SEO &System

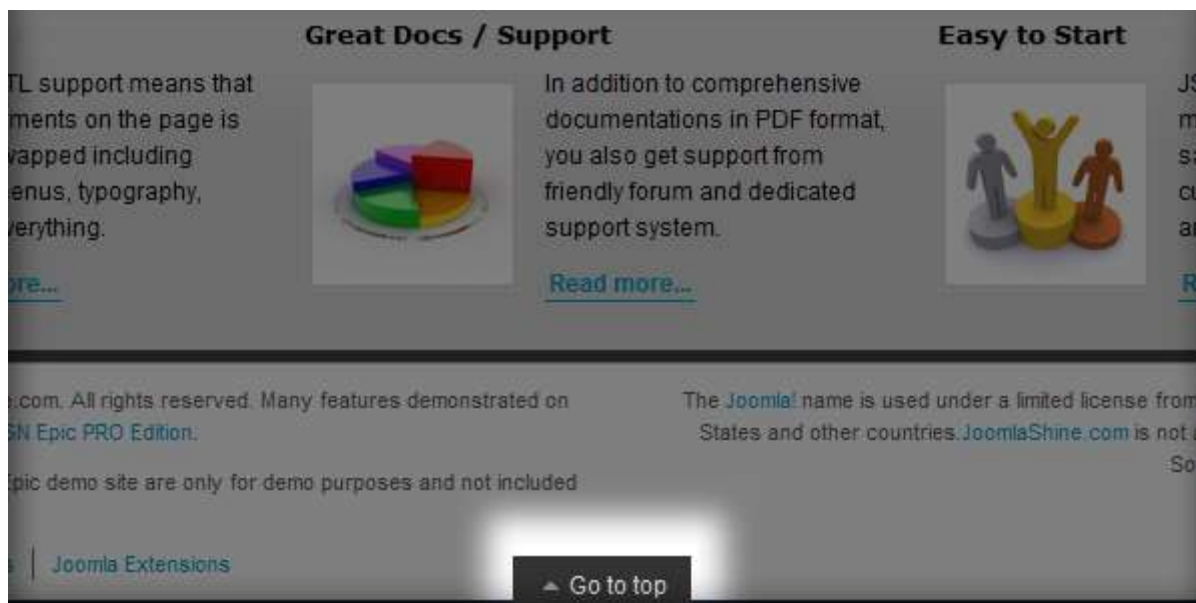

### Source ordering

One of the most important SEO techniques is to make sure that search engines can find your critical content before others. To make this possible, in our template code structure we generate the **“center”** part first and only after that **“left”** and **“right”** columns.

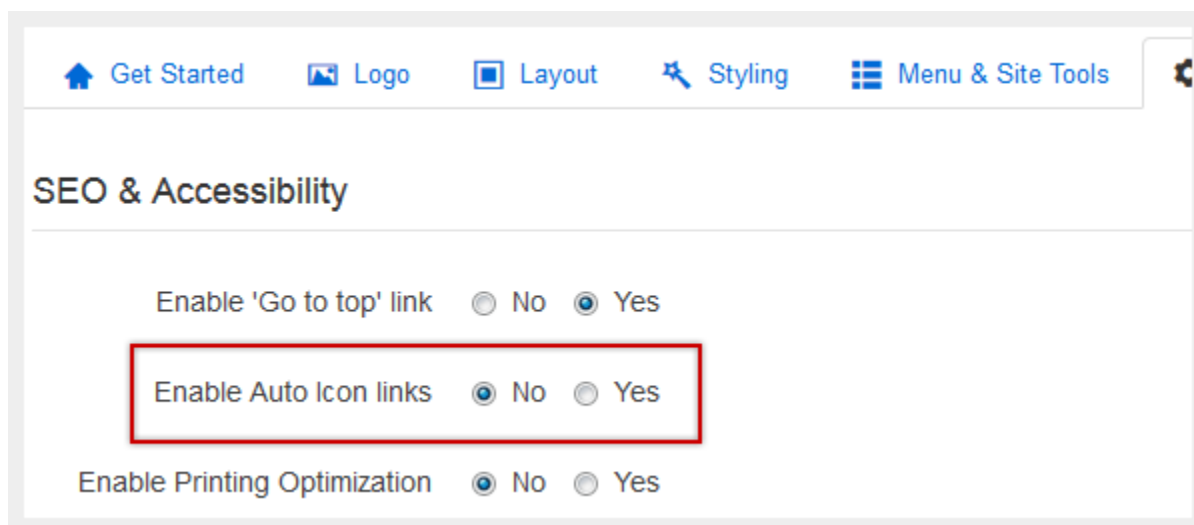

In this way, you can be sure that search engines will see your critical content first. You can use Lynx browser both [online](#) or [offline](#) to make sure of that.

## “Go to top” Link **PRO**

This feature allows you to put 'Go to top' link at the bottom of page. It will smoothly scroll your page to the top, which is nice and good for website usability.

## Auto Icon link **PRO**

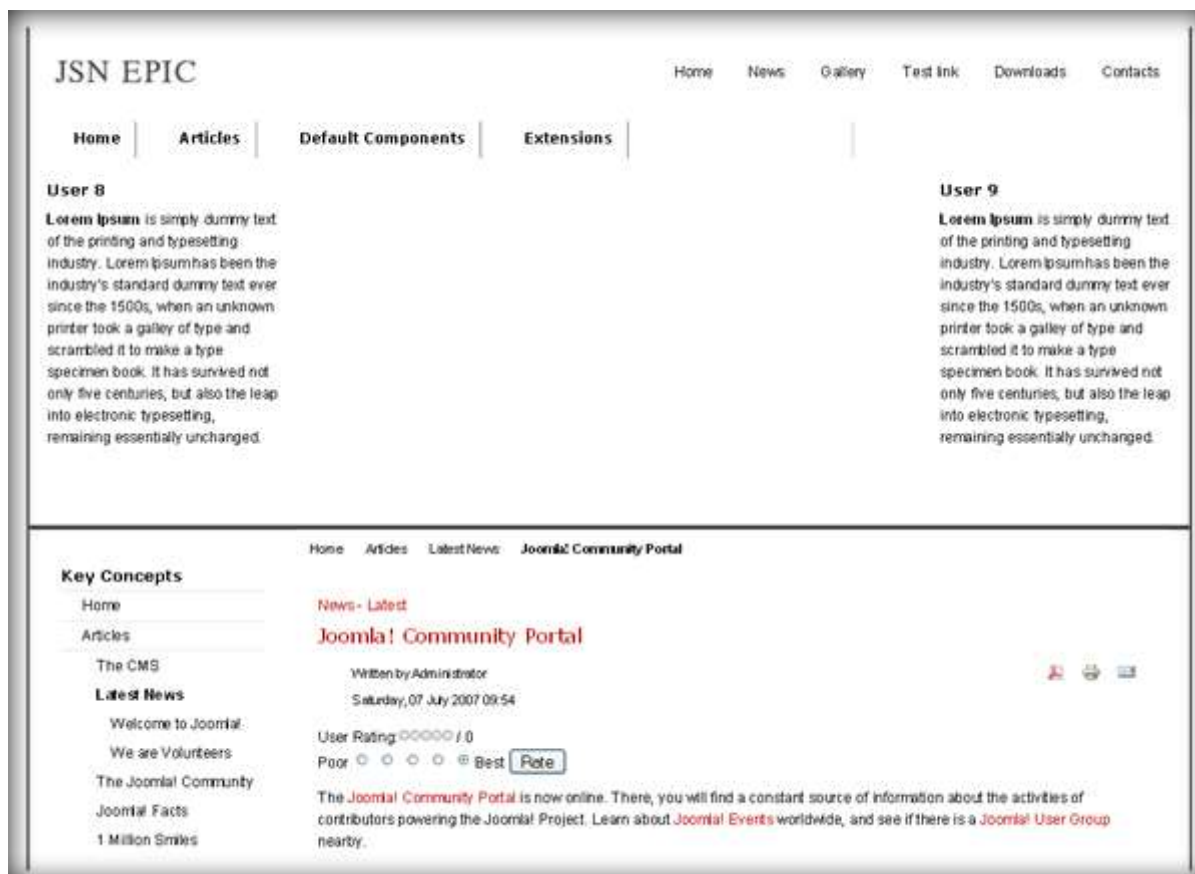

### *Enable Auto Icon Links*

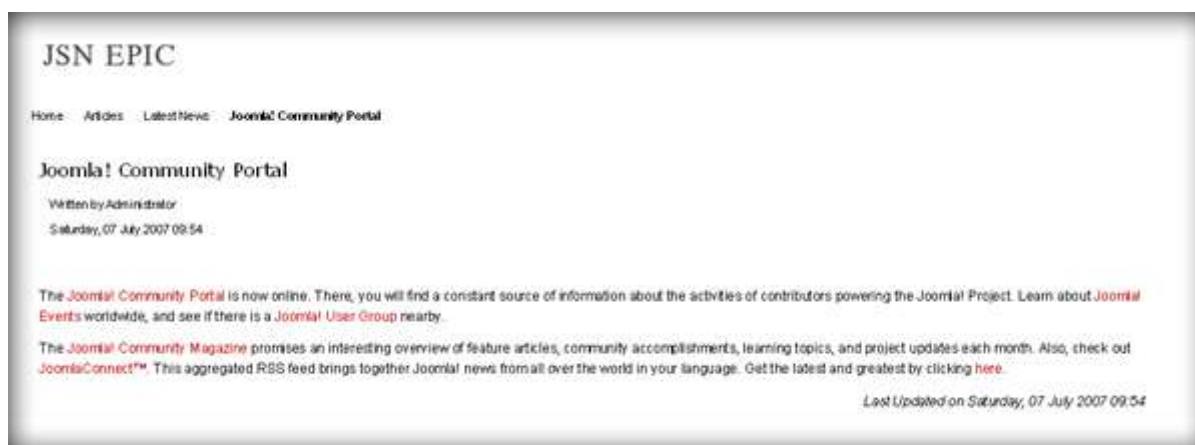

If you enable this feature, the icons will be automatically attached to links based on the link URL.

## Printing Optimization **PRO**

This feature will give your website visitors a totally optimized page for a printer with only the important content included. This is very useful when you want your website visitors to be able to print only the main content of the page and nothing else like the side-column content, etc.

Before printing optimization

After printing optimization

As you can see on screenshots, not only the content is simplified, but also the styling is optimized to get pure black on white ready for printing page.

At anytime, you can turn this feature off so the whole page will be output to a printer.

## CSS/JS Compression PRO

At JoomlaShine.com, we put great effort into optimizing our templates performance with multiple techniques like image sprites application, clean html code output and now one new step – **CSS/JS Compression**.

What it does is combining all continuous CSS/JS files into compressed files and deliver it in GZIP compressed state to browser. The order of CSS/JS files is the same before and after the compression.

URL	Size	Timeline
GET dev1	37 KB	2.41s
GET modal.css	433 B	563ms
GET template.css	10.5 KB	546ms
GET system.css	518 B	562ms
GET general.css	762 B	562ms
GET template_blue.css	1.1 KB	562ms
GET mootools.js	19.9 KB	781ms
GET caption.js	921 B	813ms
GET modal.js	3 KB	813ms
GET jsn_menu_1.1.js	1.2 KB	828ms
GET jsn_utils.js	4 KB	828ms
GET jsn_template.js	1013 B	891ms
GET swfobject.js	3.9 KB	1.03s
GET jsn_extutils.js	870 B	1.06s
GET jsn_imageshow.js	417 B	1.08s
GET style.css	258 B	1.08s
GET bg-master.jpg	7.5 KB	280ms
GET logo.png	1 KB	281ms
GET icons-uni.png	10.3 KB	281ms
GET bg-mainmenu.png	77 B	281ms

*Before enabling CSS/JS compression*

URL	Size	Timeline
GET dev1	33.9 KB	
GET jsn_epic_pro_css_baafb49d2ea28292a	10 KB	
GET jsn_epic_pro_javascript_3f9b65de243f	26.2 KB	
GET bg-master.jpg	7.5 KB	
GET logo.png	1 KB	
GET layout-banner.jpg	4.9 KB	
GET colors-banner.jpg	10.1 KB	
GET osmbanner2.png	4 KB	
GET k2-logo.png	1.6 KB	

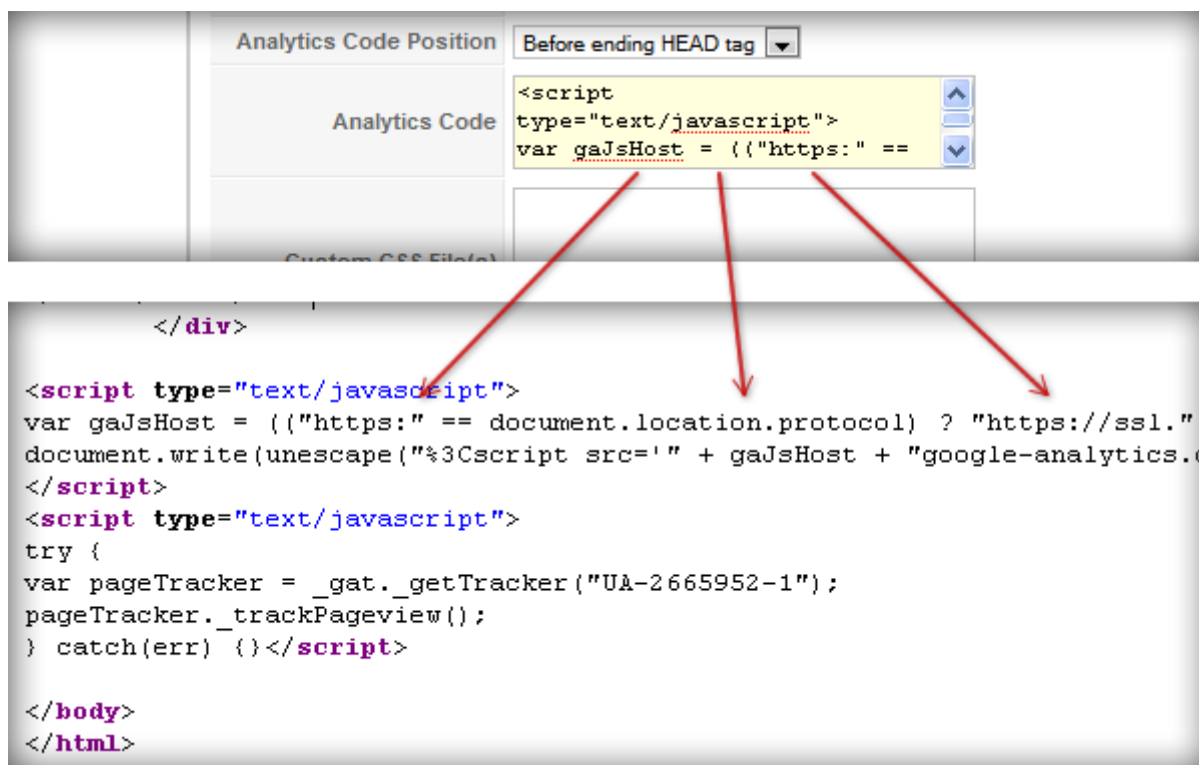

*After enabling CSS/JS compression*

This feature significantly reduces http request number to server as well as overall loading size, which results in 35% performance boost.

You can configure the compression settings in the section **“Assets Compression”**:

- **Compress CSS/JS:** Allows you to select to compress both CSS and JS, Only CSS, Only JS or nothing.
- **Max File Size:** Defines the maximum size a compressed file should be.
- **Exclude from compression:** Set a list of files you don't want to be compressed.
- **Cache Directory:** Specify the directory for storing compressed CSS/JS files.

## Analytics Code **PRO**

This feature allows you to present any analytical code on your website HTML code by template parameter without having to edit **index.php** file. For example: Google Analytics code, CrazyEgg code, etc.

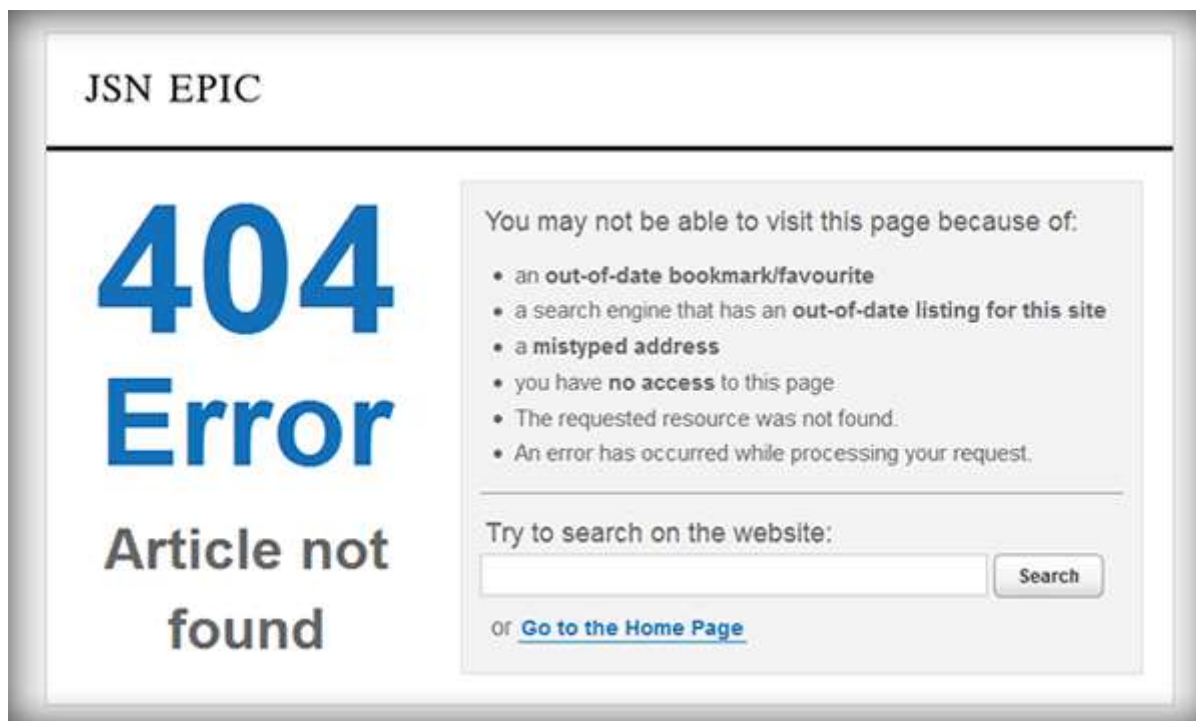

### Analytics Code Position

You can define where to insert the code by template parameter **Analytics Code Position**. There are two options to choose from:

- Before ending ...**</head>**tag
- Before ending ...**</body>** tag

## Custom 404 Error Page **PRO**

The default error page comes from Joomla! is super ugly and sure to scare people away from your site at first glance, so begin from JSN Epic 4.2.x we provide a clean and good looking **Custom 404 Error** page for your need.

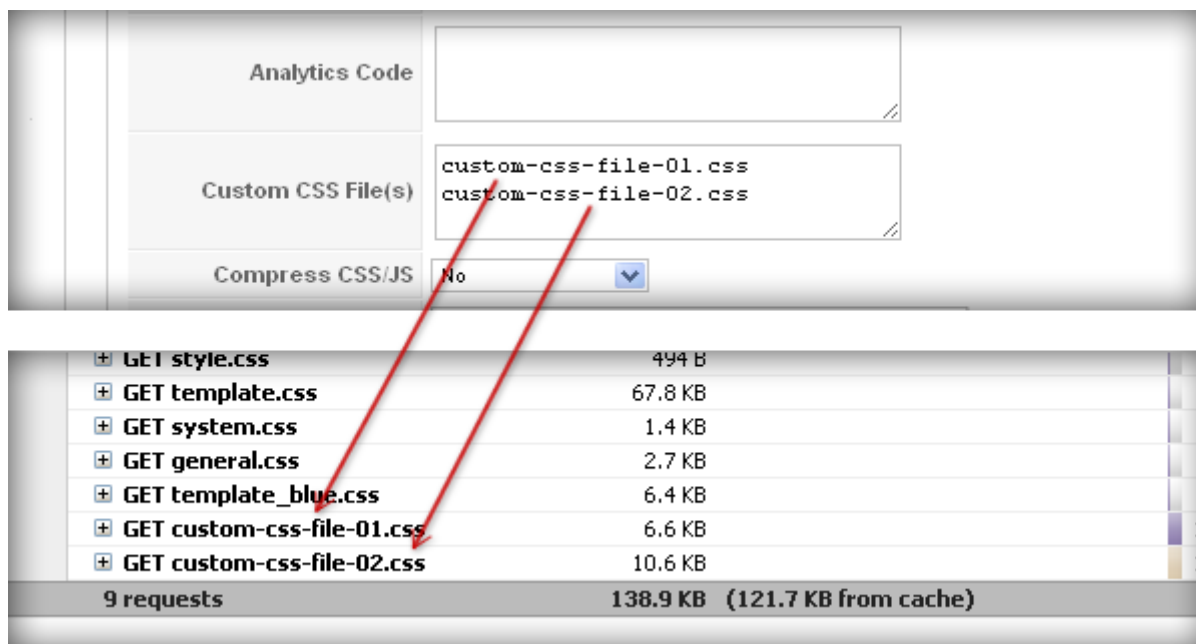

## Custom Offline Page **PRO**

The default Joomla! offline page hasn't changed much since the old days and doesn't really look good. Therefore, we provide a **Custom Offline** page with professional and easy to customize your own way.

## Custom CSS File(s) **PRO**

This feature allows you to load multiple custom CSS files among with template default files. If you enable **CSS/JS Compression** feature, all custom CSS files will be compressed as well. This feature is very useful, when you have special dedicated CSS file for content styling.

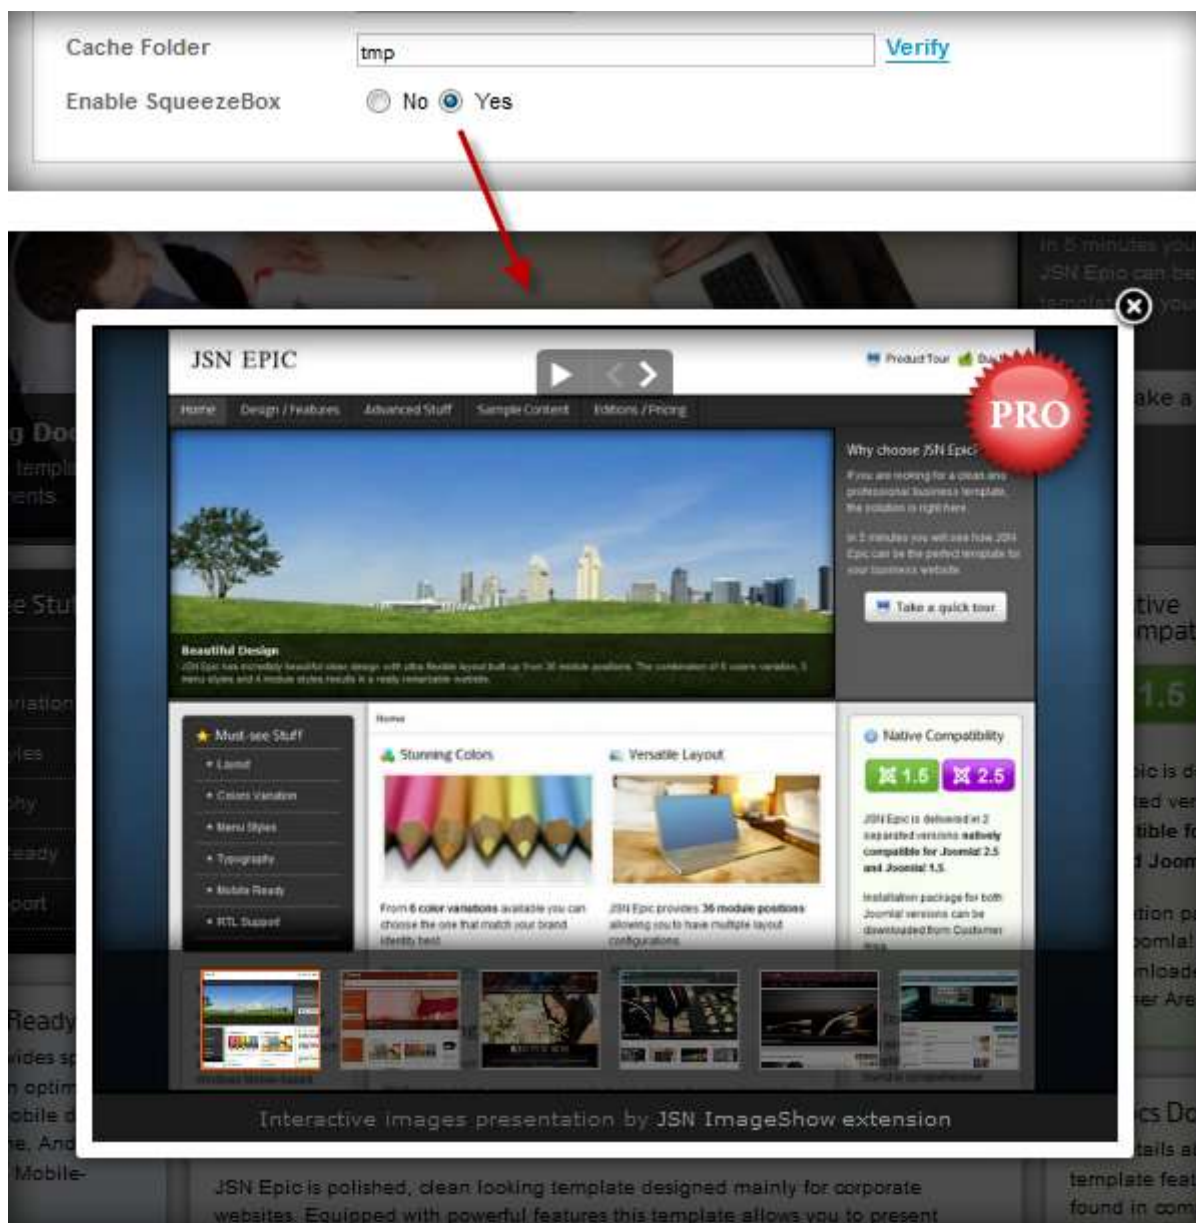

*Custom CSS files are loaded with other template CSS files*

Just put custom CSS files to template's CSS folder and define them in template parameter **Custom CSS File(s)** each file name at a line.

## SqueezeBox **PRO**

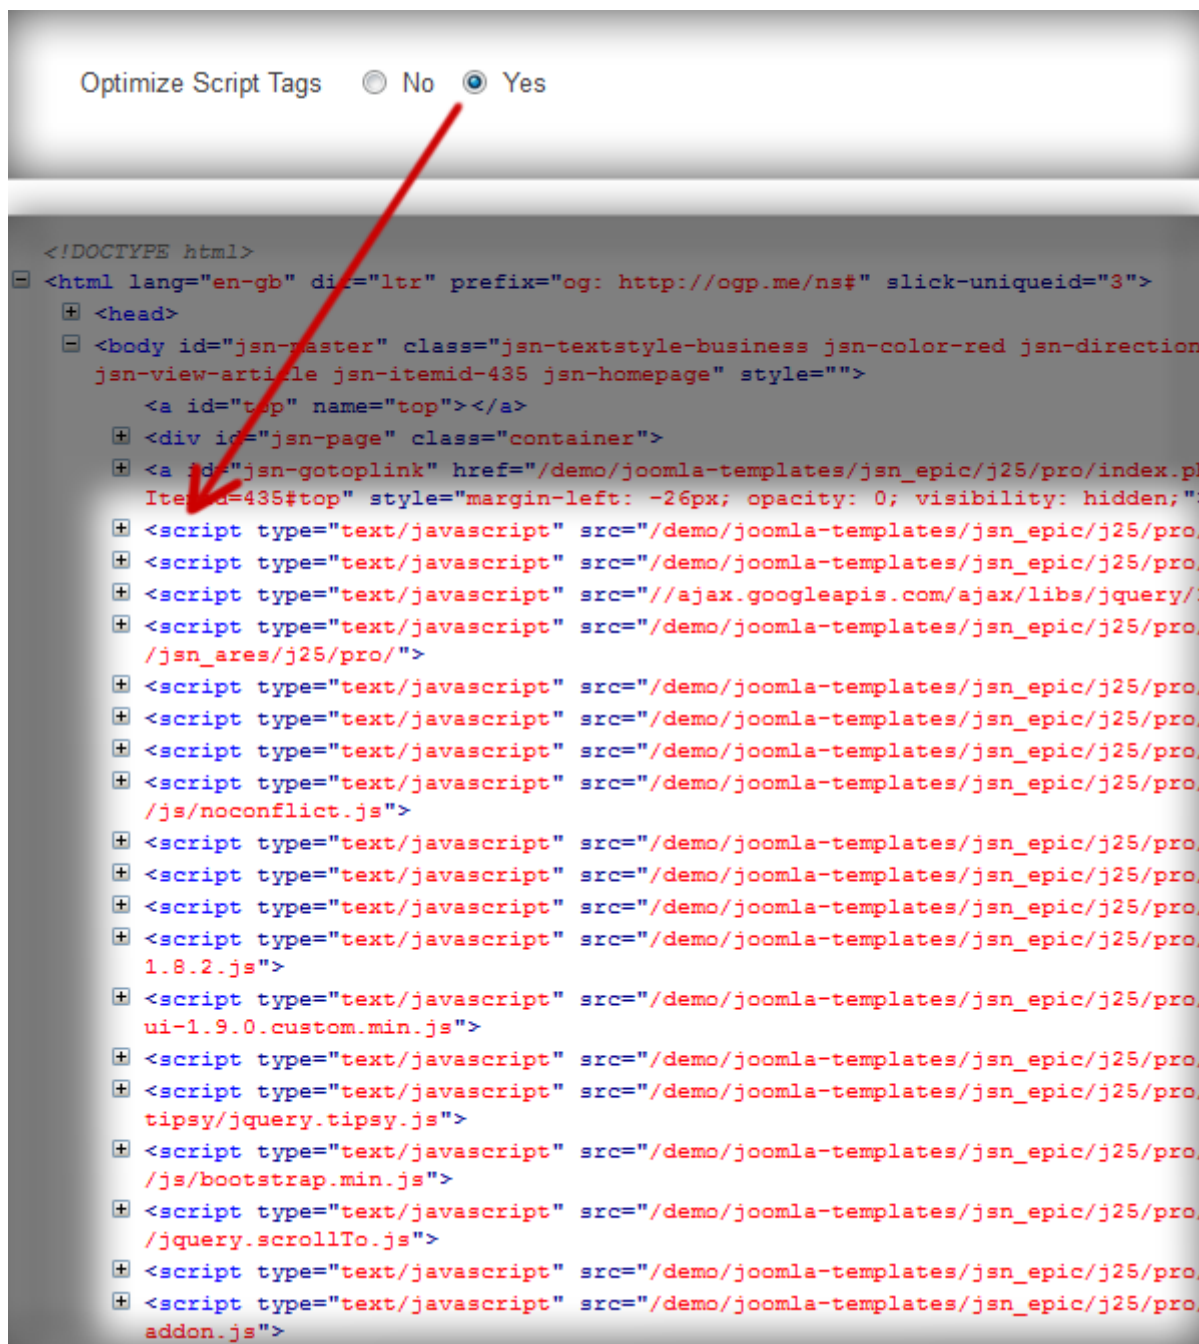

By default, Joomla supports pop-up modals. However, some Joomla versions don't support it. The parameter **Enable SqueezeBox** helps you display pop-up modals with all Joomla versions.

## Optimize Script Tags **PRO**

JSN Epic allows you to optimize script tags. When you enable the parameter **“Optimize Script Tags”** in the tab **SEO & System**, all script tags will be moved from head section to the end of body section.

## **Video tutorial**

It guides you how to configure SEO & System visually. Here are [video tutorials](#).

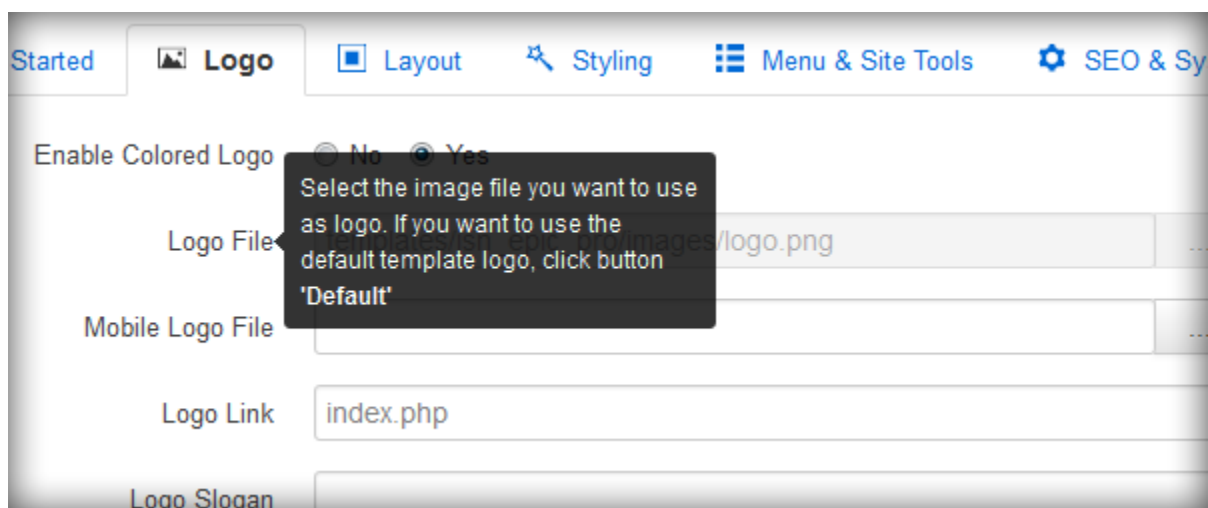

**JSN Epic** in the video is an example and these instructions can be applied to **JSN templates** template as well.

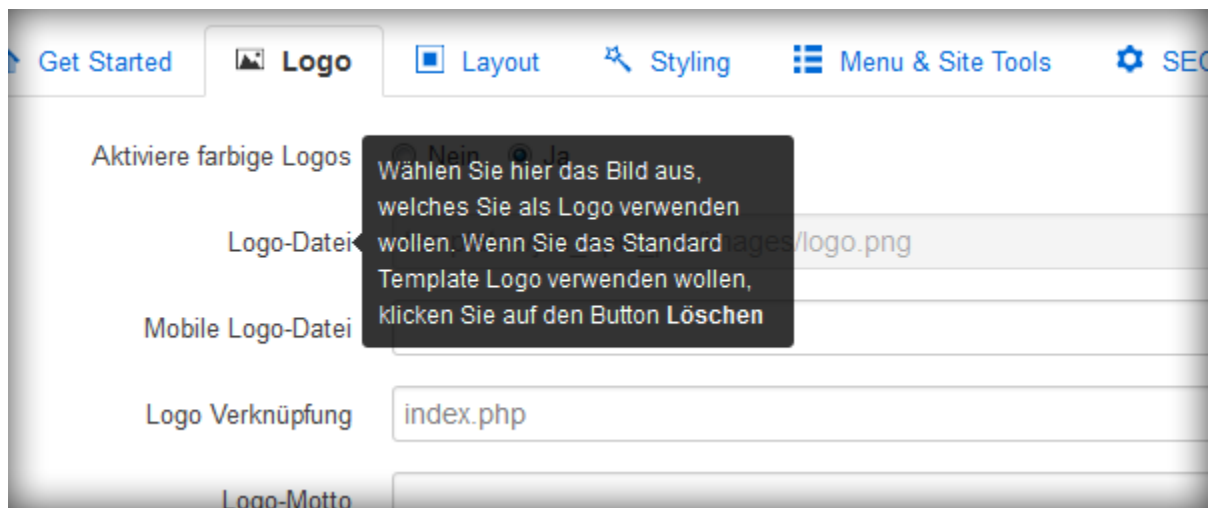

## Multilingual support

In our templates, all wordings of both back-end and front-end are moved to separated language files, so you can easily translate them into any language you want. More information about how to make your own translation can be found in **JSN Epic Customization Manual**.

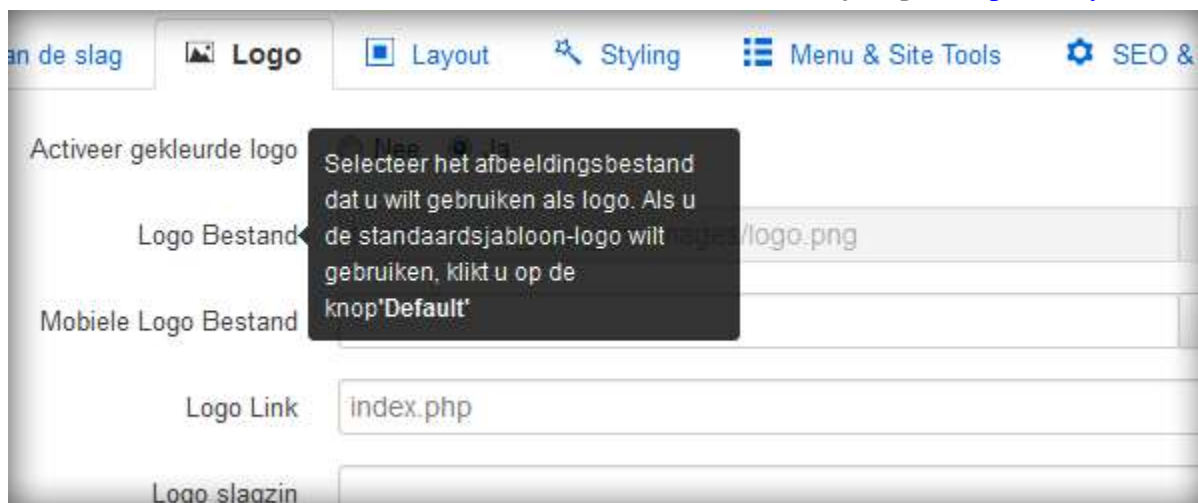

Currently our templates support **14 primary languages** with more to come in the future.

## Information about cookies

The [New EU cookie law](#) states that website visitors, subscribers or users **must be provided with clear and comprehensive information about the cookies**: Names, purposes, storage time and access permission.

So in this part, JoomlaShine provides you with the information about cookies that JSN Epic gets from customers.

<i>Type of cookie</i>	<i>Data collection</i>	<i>Purpose to use</i>	<i>Cookie session</i>
JSN_Epic_PRO-color	Color	Save color when users selector	Yes

*JSN Epic cookies*

These cookies are **used to store text value** for all the JSN Epic functions, to make sure that JSN Epic runs smoothly. Cookies will be **stored in a user's web browser directory** while a user browse a website and **only be removed when users clear cookies**.

## What's next?

Now as you have learnt every feature of the template, it's time to move on and customize it to your needs. Go ahead and open the next documentation coming with the JSN Epic package called **JSN Epic Customization Manual**. In this manual, you will find a detailed description about how to customize every bit of the template to make it suit your needs.

You can download the full documentation package and print for convenient reading.

[For newbies] Download free e-books to build Joomla! websites

*2 Free E-books, written by JoomlaShine Team*

Building a Joomla website is a challenge with a lot of Joomla! newbies. To help you do this task more easily and quickly, JoomlaShine team released 2 FREE e-books: **Joomla! 2.5 Made Easy** and **Joomla! 3.x Made Easy**. Thanks to them, you get useful manuals whatever Joomla! version you use: Joomla! 2.5 – in 3 languages: English, German or Danish or Joomla! 3.x, - in 5 languages: English, German, Danish, Spanish or Vietnamese.

Both of them include 7 chapters as following:

- Get to know about Joomla! CMS
- Install Joomla! on local host
- Create content for your site
- Customize website appearance with a Joomla! template
- Arrange modules in positions
- Extend your website functionality with Joomla! extension
- Manage your Joomla! websites with JSN PowerAdmin

**[GET E-BOOKS NOW FOR FREE](#)**

## Give feedback
