Re: Letter of Recommendation for Lauren Walker

As a Clinical Nurse Specialist for Critical Care, I have had the pleasure of precepting Lauren Walker during her clinical rotation in the Advanced Practice Nursing Program at Georgetown University. Lauren has a proven track record of valued accomplishments. During the relatively short time Lauren oriented with me she assisted in the development of policies, standards of practice, staff competencies and physician credentialing programs.

Lauren is a dynamic leader and is admired by all staff and administrators who work with her. She is able to rapidly analyze and think through complex scenarios and her patient assessment skills are complete and accurate. Lauren is extremely adept at evaluating the educational needs of staff and patients and follows through to develop and present appropriate education.

Lauren consistently demonstrates a sincere interest for professional development and is an action oriented professional. She is an expert communicator with exceptional interpersonal skills. Lauren involves others to help create solutions and is a team player. She is reliable, thorough and always professional. She would be a great asset to your team.

Sincerely,

A handwritten signature in cursive script that reads "Sonia Astle".
