

DevOps Engineer Cover Letter

536 Silvana Park
Errolmouth, WV 69566

Dear Zion Wiegand,

I would like to submit my application for the devops engineer opening. Please accept this letter and the attached resume.

In my previous role, I was responsible for daily Chef Automation Development through Scripting to ensure all system technical requirements are addressed.

My experience is an excellent fit for the list of requirements in this job:

- Automate common procedures used to resolve incidents and monitoring alerts
- Standardize and document common procedures that cant be easily automated for hand-off to other resources or teams for execution
- Participate in rotating 24x7 on call schedule of production systems
- Fluent in Perl or similar scripting languages for developing Linux applications
- Fluent in the Linux command line and adept with system administrative tasks on a Redhat Linux platform
- Experience in Puppet configuration management is preferred
- Able to work closely in a collaborative role with other team members
- Able to manage day to day tasks while fielding interruptions

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,

Gray Blick
