PROFESSIONAL EXPERIENCE

MAXWELL COMPANY – SOMEWHERE, TN

10/2005 – Present

JOURNEYMAN ELECTRICIAN

Install, operate, and energize breakers, transformers, switchgears, disconnects, and other related substation construction equipment. Oversee all phases of construction work including erecting steel structures, bending of conduit, and installing aluminum tubing buss. Install control wiring, gas circuit breakers, switchgear, regulators, batteries, and rectifiers. Perform preventative measures to ensure a smooth-functioning electrical system. Estimate necessary materials and maintain inventory of used supplies. Accurately prepare cost estimates.

- Mentored an apprentice electrician; advised on proper safety procedures and methods for maximizing productivity, efficiency, and quality.

BOSS BROTHERS INC. – SOMEWHERE, TN

1/2001 – 9/2005

APPRENTICE ELECTRICIAN

Installed commercial and industrial electrical systems including manufacturing plants, restaurants, and offices. Performed testing, repairs, wiring, and regular maintenance in residences. Estimated tools and equipment needed for jobs. Ordered and picked up supplies from outside vendors. Assessed and solved client issues as they arose.

- Successfully collaborated with other electricians and sub-contractors to complete large projects ahead of schedule and under budget.
