Waste Corporation of Arkansas, Inc.  
Mr. Bill Linthicum  
1001 S Rockwell Avenue  
Oklahoma City, OK 73128

**RE: Receipt Acknowledgement of 2015 Annual Engineering Inspection Report  
Union County Recycling and Disposal Facility Class 1 Landfill  
Permit Number: 0248-S1-R4 AFIN: 70-00364  
Document Number: 69372 Cross Reference Number: 69288**

Dear Mr. Linthicum:

The Arkansas Department of Environmental Quality – Office of Land Resources (ADEQ) Regulated Waste Programs staff has received and reviewed the 2015 Annual Engineering Inspection Report (AEIR) for the Union County Recycling and Disposal Facility Class 1 Landfill. The Regulated Waste Programs has updated the database with information contained in the 2015 AEIR. This acknowledgement in no way authorizes a change to the facility's permit and does not represent an approval of any changes to the facility detailed within the 2015 AEIR.

The updated cost estimate provided for closure cost is \$3,909,426.00. The updated cost estimate provided for post-closure care is \$2,166,587.00. An 80% reduction in financial assurance for post-closure care is available to facilities that contribute to the post-closure trust fund (APC&EC Reg.22.1403(c)). Please be advised that Waste Corporation of Arkansas, Inc. is required to provide to Ms. Susan Speake, ADEQ Regulated Waste Programs Branch Manager, the updated financial assurance to cover the amounts noted within this letter no later than 30 calendar days of receiving this correspondence.

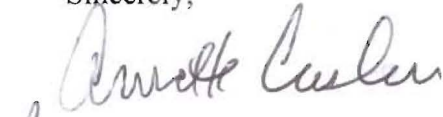

The Receipt Acknowledgement of 2014 AEIR (Document ID 67437), ADEQ indicated the following concern:

*"There is a noted concern after review of this year's AEIR. The AEIR indicates that your facility's Liquid Waste Management Plan was developed in 1997. In 2011, SWMD issued draft liquid management concerns for all facilities and initiated a stakeholder process. This process concluded with a list of Department recommended upgrades to these older liquid waste plans in order to meet regulations currently in place. Facilities followed through with this process by submittal of revised plans through minor modification permitting procedures. It is noted that the Union County Recycling and Disposal Facility Class 1 Landfill has not upgraded the liquid waste management plans on file for the facility. To ensure that regulations affecting your operation are currently being met, SWMD requests you to examine your current approved plans and submit updates as necessary".*

However, the facility has not taken any action to address the above concern. Waste Corp. of Arkansas, Inc. must submit a revised liquid waste management plan to incorporate the issues listed in the 2011 ADEQ liquid waste management concerns into the Union County Recycling and Disposal Facility Class 1 Landfill's Liquid Waste Management Plan no later than sixty (60) calendar days from the date of this correspondence.

If you have any questions or need additional information, please call me at (501) 683-3395 or email [arjmandi@adeq.state.ar.us](mailto:arjmandi@adeq.state.ar.us).

Sincerely,

for Masoud Arjmandi  
Engineer II
