Vaisala STRIKEnet® Strike Details

Vaisala STRIKEnet® is an online lightning location report that objectively and accurately reports individual cloud-to-ground lightning strikes at a specific location on the date of loss. Vaisala STRIKEnet is available 24 hours a day, seven days a week and within minutes, reports are viewable online.

Vaisala and a Top Insurance Company's Study of 14,000 Claims

Vaisala Provides The Most Comprehensive Archive Database in Northern America

Scientifically validated, the U.S. National Lightning Detection Network® (NLDN) and the Canadian Lightning Detection Network (CLDN) provide the most accurate lightning data information available.

Vaisala STRIKEnet® lightning investigation tool offers the most scientific and objective solution to understand the presence or absence of lightning at a specific location, date, and time.

Vaisala STRIKEnet® lightning verification reports help control costs by reducing on-site inspections and streamlining the claim verification process.

Investigation methods without lightning location reports are

Vaisala STRIKEnet reports:

- Street-detail lightning location map
- Detailed text printout of the lightning strikes
- Confidence ellipse map to illustrate lightning strike location accuracy

subjective because they are too general or rely on human interpretation. Generic weather reports or on-site physical inspection of a very complex weather event are best validated by Vaisala STRIKEnet®.

Vaisala STRIKEnet® reports provide:

- Objective, cost effective, accurate lightning location results
- More than 99 percent storm detection efficiency
- Determination of the presence or absence of lightning strikes
- Location and time-specific reports
