DBREEZE DIRECT - SALES ORDER

Sprint Consumer

Basic sprint data card is designed to work on one laptop and is a "customer self install " product. We can assist the customer in setting up thier data card on thier laptop at the standard shop rate (\$75.00/HR.) Card pricing varies and will be finalized when order is placed typically between \$30 - \$130 including the activation fee (after rebates).

Sprint has a 3 part service plan: The service plan runs \$59.99 and has unlimited data usage on a Sprint 4G network, 5G/mo. on a 3G Sprint Network, and 300M/mo. if roaming on another carriers data network. Pricing above the data caps is expensive so be sure the customer is aware of this.

If a customer wants to to use this product on more than one computer or would like to use this product on a regular PC than I would reccommend a router. We offer a few different choices depending on the customers needs. A basic home router will run around \$300 plus \$75/HR for setup Commercial units vary depending on the customers needs.

In some cases a customer may also need a booster antenna and this wont be known until the system is at the customers location.
