	<p>A breast chek kit consists of two micro-thin layers of polyurethane with a non-toxic lubricant sealed in between. When the breast chek is placed on the breast, the bottom layer gently adheres to the skin and remains stable allowing the upper layer to slide freely underneath your fingertips. As the upper layer slides freely over the bottom layer, friction is greatly reduced. This results in what is called 'sensory touch magnification.' Or, in other words, your sense of touch is greatly improved, thereby improving the effectiveness of all breast self-exams you do as part of your breast health program. *</p>	<p>Retail Price: \$34.95 Preferred: NA Ambassador: \$25.00</p>
