

Student Science Project Outline

Use this outline to guide your work. Do not hand this in as your project. Your completed board should include neatly handwritten or typed information that meet the criteria.

1. State the Problem - What do I want to find out? _____
_____.

2. Write the Hypothesis - What do I think will happen/what do I expect to observe?

_____.

3. Design the Experiment/Observational Study - How can I test what I think will happen? How can I organize a scientific observational study?

a. Materials _____

b. Procedure _____

4. Record Data - What happened? _____

5. Draw Conclusions - What did I find out and how does it compare with what I thought would happen?
