

MWC Jaipur C40 Stage 2: Project Overview & Construction Timeline

As a pioneer of the concept of an Integrated Business City in India, the Mahindra World City Jaipur (MWCJ) represents a unique ecosystem for working and living; aiming to create sustainable urban communities by establishing integrated business cities which enable the transformation of 'Life, Living and Livelihood'.

The Mahindra World City project in Jaipur is a development project of Mahindra World City Jaipur Limited, a subsidiary of Mahindra Life spaces. As a Participant in C40's Climate Positive Development Program, Mahindra World City Jaipur strives to be a model urban project, to implement climate change mitigation strategies for a large scale development project and do so in an economically and environmentally viable manner.

The project shall not only reduce its on-site greenhouse gas emissions but also improve the emission profile of the community at large.

Located just off National Highway 8 (Jaipur-Ajmer Highway) in the North-Western state of Rajasthan, the 3000-acre Mahindra World City in Jaipur (MWCJ) is a joint venture between Mahindra Group and Rajasthan State Industrial Development Corporation (RIICO), an agency of the Government of Rajasthan.

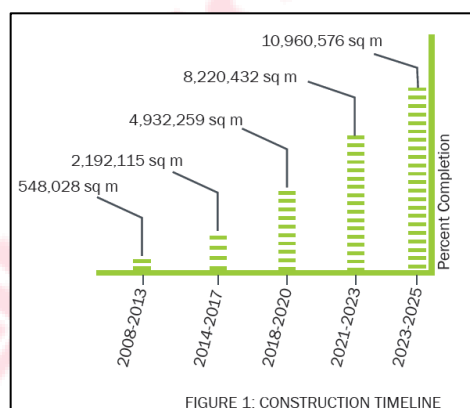

FIGURE 1: CONSTRUCTION TIMELINE

When completed, Mahindra World City Jaipur will house and employ nearly 300,000 people. The development is projected to be completed by 2025.
