

# Magnetic Notebook Paper

The magnetic write-and-wipe notebook paper was designed to help save time with daily classroom activities. The preprinted writing lines allow teachers to move quickly from one lesson to another without having to redraw the lines on the board. The design reflects students wide rule notebook writing paper used in classrooms allowing for students to practice the lesson as it is being taught on the board.

The magnetic paper is made of a strong magnetic material and will affix to any magnetic board found in classrooms. It can also be used with any magnetic surface such as a metal chart stand or metal door. Classrooms that do not have a chalkboard or write-and-wipe board can use the magnetic notebook paper as a supplemental board. Clean the board surface before the magnetic paper is affixed to the board. This will help prevent dust build up behind the board. The paper should stay in place without slipping or moving on the board.

The notebook paper is versatile and can be customized to meet any classroom teaching need. There are multiple uses for the notebook paper. It can be used to track daily assignments and teach a variety of skills:

- how to set up a proper heading for assignments
- how to write a friendly letter or business letter
- how to set up an outline
- how to take notes

The magnetic notebook paper can be used with a dry erase or wet erase marker. It is best to test your marker on a corner of the magnetic paper to make sure your marker works with the paper. When erasing the wet erase marker use a damp cloth and do not saturate the page. Too much water will warp the paper.

When not in use, store the magnetic notebook paper flat to prevent it from warping or tearing. If the chart is bent or folded, the paper will wrinkle and not return to the original state. If the edge of the paper curls, gently roll it in the opposite direction to flatten it out.
