

## Storyboard for Multimedia Presentation Preparation

Each box represents a slide in your PowerPoint presentation. Prior to going to the computer to create the PowerPoint presentation, handwrite your ideas for each slide in the boxes of this storyboard. Ideas for slide content: titles, subtitles, bulleted list of main facts, paragraph text, pictures, chart, video clip, etc. Storyboarding allows you to store the sequence of your creativity, which gives your presentation a direction.

Slide 1	Slide 2	Slide 3
