These unbuffered peels are exceptionally effective and can give superior results in:

## Eyelash Extensions

### Permanent

Eyelash Extensions is a revolutionary new product that lengthens and thickens eyelashes. Eyelash Extensions are single strands of synthetic eyelashes that are curved to replicate a natural eyelash. They are applied to individual eyelashes, one lash at a time, for a natural, elegant and luscious look. Eyelash Extensions are perfect for special occasions as well as for every day wear.

It's recommended getting a touch up every 2 to 4 weeks. A natural eyelash falls off every 60 to 90 days on average due to natural growth and is naturally replaced with the growth of a new eyelash. At any given moment, each of your natural eyelashes is at a different stage of its life cycle. A touch up is needed to replenish the lashes that have completed their life cycle.

The lashes are applied to your own natural lashes in clusters of grouped lashes, creating a much fuller and dramatic look. These lashes can be infilled and prices vary depending on how many need to be filled. With these eyelashes if you wish to keep them it is recommended you get them soaked off and a new set applied every so often.
