DEC Remarks: 4/24/96 - Spill report from Cedric Hercules. Was making repairs to boilers and found overfill in tank vault of 50+ gallons. I checked the log book in the boiler room with Frank Ocello - found that the spill occurred on 4/22 but was never reported. Winston called to site to do clean up. Case no. R2-0020-96-05

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

NJ-NJEMS (New Jersey - New Jersey Environmental Management System). The Department of Environmental Protection (NJDEP) manages large databases of environmental information in this integrated system.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Remarks:	DEC Sigona) arranged an on-site meeting with tank owner. The tank may be ASTMounded 1300 gals. Inspection scheduled for 2/8/1999 at 1 P.M. DEC Sigona)inspected on 2/8/99 at 1 P.M. met with superintendent Mr. Seamons. Found 1500gallon aboveground tank in basement with jacket cement) along with 3 largeweep holes along the base. The top of the tank was removed by StateEnvironmental, exposing an opening which was secured with screws, an signs ofminor leakage. They plan to hire a contractor to re-weld the tank top after thetank is cleaned. DEC Sigona) recommended the closure of the extension for thefill fipec which can be disconnected at the side of the building to create a direct fill only. DEC Sigona) contacted Jack Aversato advise that theviolation for tank testing should be removed, and the tank will be revised onthe PBS data base. An application was sent to the owner on 2/9/99.
Spill Cause:	TANK TEST AT ABOVE LOCATION. PROPERTY OWNER ADVISED OF RESULTS AND TANK WILL BE PUMPED OUT AND FURTHER TESTING TO BE DONE.

DEC Memo: Start DECRemark - 0201769 Prior to Sept, 2004 data translation this spill Lead DEC Field was "SANGESLAND" 5/17/2002 Sangesland responded to the scene of a tank failure. Property manager Mr. Ram hired a welding company to make welded patch repairs to a 5,000 gal tank in a tankroom of an apartment building. After the welding was finished, the property manager ordered 3,000 gallons of #6 (?) fuel oil. Within 1 hour the tank let go and started pouring the oil into the tank vault room floor. Eventually it overflowed into the boiler room floor and filled up several inches thick. Petroleum Tank Cleaners was called to the scene with a vac truck and clean up crew. 5/28/2002 Ray Lara at PTC stated that his crew was back cleaning up on Saturday May 18th and then several times during the week of May 20 to 24th. Apparently the Boilerroom was cleaned by PTC 3 times, but oil keeps coming up through the cracks in the floor. 6/3/2002 Sangesland left a message with Mr. Ram (Property Manager) that the DEC needs to do a site inspection. Major question is how much (if any) oil is under the slab floor. 6/20/2002 Sangesland spoke with Mr. Ram and requested an appointment to do an inspection of the basement floor. As part of this inspection, several 1" diameter drill holes will be required to investigate the condition of the soil under the slab floor. DEC has reason to believe there continues to be oil rising up out of floor cracks in the boiler room. 7/2/2002 - Sangesland left a message for Mr. Ram 7/16/2002 - Sangesland left

a message for Mr. Ram requesting Mr. Ram to provide someone to drill the floor on Friday 7/19 at 9AM Sangesland will be at the site. 7/17/2002 - Sangesland left another message to findout if Mr. Ram received the message from 7/16. 7/17/2002 - Mr. Ram returned the call. The super is on vacation, Mr. Ram does not know if he can have someone on site for Friday morning. 7/17/2002 - Mr. Bernie Bauer (718-731-7011) - contractorfor Mr. Ram made an appointment to do borings on site Thurs Aug 1 -3PM 8/2/2002 - Sangesland met on site with Abraham Wachsler- employee of Mr. Bernie Bauer of New York City Tank Testing Inc. (1624 Webster Ave, Bronx) 718-731-7011. Upon arrival, Mr. Wachsler had already made several borings and a few open trenches around the basement (boiler room, tank room and connecting hallways). In each room there were locations with significant soil contamination under the cement slab floor. Sangesland prepared a letter to Mr. Ram outlining the need for contamination delineation, the preparation of a "Site Remediation Plan" and the review/approval process with the NYSDEC before work is done. The letter gives the following deadlines: 1)Owner must select an environmental contractor by Sept 5, 2002. 2)Submittal of a Delineation/Remediation Work Plan by Oct 20,2002 This letter was mailed registered to Mr. Gupta on 8/2/02. 8/7/2002 - Sangesland received the return receipt for the registered letter. 8/29/2002 - Sangesland spoke with Todd Sarett of Key Environmental (973-347-9430). Mr. Sarett is bidding on doing the environmental work on the site and asked for a description of what the DEC was looking for. Sangesland said a 2 phase project: Phase 1 - Delineation - several soil borings around the basement to determine the vertical and horizontal extent of the contamination. Phase 2 - Excavation with possible biological applications at the end. 3/17/2003 - Sangesland spoke with Dwayne Monaco of Northeast Environmental (914-777-1930). He said his company conducted a soil boring survey of the basement and determined that bedrock is very shallow and most of the contaminated soil is near the surface.He has a report ready for submittal as soon as Mr. Bernie Bauer pays for it. 5/12/2003 - Sangesland reviewed a "Sub-Surface Investigation Report". This report confirmed that there is contamination throughout the basement. The report also pointsout that bedrock is within 1 to 3 feet depth and excavation is probably the best way to address the contamination problem. Sangesland sent an e-mail response to Dwayne Monaco at: DM@northeastenvironmental.com confirming their results and requesting a "Remediation Plan". Now that the contamination is defined, a remediation plan is needed. 5/29/2003 - Sangesland forwarded a letter to Mr. Gupta stating that a Remediation Plan needs to be submitted to the DEC by July 15, 2003 7/29/2003 John Savatino from AB Environmental faxed a short work plan for the site. Sangesland reviewed it and said it looked OK. Work Plans says: 1) Remove standing product and water from floor drain and hole in boiler room via vacuum truck. 2) Break upall concrete that is located all over the contaminated areas and dispose the material. 3) Remove all contaminated sand and soil from the impacted areas, down to the bedrock and dispose the material. This will require removal of approximately 54 yards of impacted concrete, soils and sand. 4) The locations of where the impacted material will be removed from are in the tank room, the boiler room, and the hallways adjacent to the boiler room and the tank room. 5) Transport and dispose all impacted materials. 6/23/2004 Sangesland made a site visit and found that all of the rooms on that side of the basement had been dug down to bedrock outcropping. Eastmond submitted copies of the disposal manifests. Sangesland asked for 10-15 photos of all of these rooms for the file. 7/29/2004 Sangesland received the photographs requested of the site. All work required by the NYSDEC for this site has been completed. As much contaminated soil as possible has been removed and the siteis not impacting any off site neighbor. Once the excavations are properly backfilled and a new cement floor is poured, the environmental impacts of the remaining contamination will be minimal.

DEC Remarks: On 2/11/00 Spills Staff Saccacio) responded to a 80 gallon No. 2 fuel oil spill located at NYCHA s Polo Grounds Housing Project. It a appears that the spill was caused by a leaky ball valve which allowed oil to be sucked from one tank and returned into another. the latter tank eventually overflowed spilling the product onto the parking lot and into the storm sewer. Most of the spill was cleaned up that night by the NYCHA and the rest was cleaned up several days later by PTC who pressure washed the area and cleaned out the catch. Since ther was oil that could not be cleaned underneath the tank, the spill will remain open until the temp tanks are removed and the are is re-washed.
Spill Cause: FIRE DEPT ON SCENE OF SPILL-APPROX 20 GALLONS WENT INTO SEWER- DISPATCH IS TRYING TO CONTACT PERSON FROM NYC HOUSING TO FIND OUT WHO OIL DELIVERY COMPANY IS.

Recovered: 0.00
Resource Affected: Groundwater
Oxygenate: False
DEC Memo: Start DECRemark - 0206077 Prior to Sept, 2004 data translation this spill Lead DEC Field was "GRECO" This spill site has been transferred from DEC Sigona to Remedial Bureau B, on August 4, 2003. This spill site has been consolidated under SpillNo. 8910288 & 0109628. See also Spill Nos. 0109628, 0109955, 9009562, 8910288, 8903673 & 8801733. DEC Sigona requested through DEC Conlon on Friday September 6, 2002, ordering ExxonMobil to empty tanks and replace fill piping after receiving results of Tracer Tightness Testing conducted by DEC under PIN for 3750 Broadway. GSC and Fenely & Nicol removed the fill catch basins and found free product underneath the piping and overfill protection systems. MEG (Wilson) responded and collected two samples with DEC Sigona on September 12, 2002 at 2:30 to 3:30 P.M. One sample was collected under the fill boxes at 4 feet below grade, which consisted of gasoline saturated pea gravel mixed with sand. The second sample was collected at 4.5 feet below grade on the top of Tank No. 1, adjacent to the fill lines. The sample taken from the top of the Tank was gasoline saturated. Both samples will be sent to ECO test by MEG for fingerprint and BTEX and MTBE analysis. While at the station digital photos were taken by DEC Sigona of sampling locations. DEC Sigona observed natural gas vapors in the office and notified Con Edison CIG (212)580-6763. A gas operations crew is being dispatched to the site for investigation of the odors in the gas station office. On October 7, 2002, DEC Sigona issued Exxon-Mobil Corporation with an executed copy of a Stipulation Agreement to address pipeline replacement work, at the above referenced site. END DECRemark - 0206077

DEC Field was "SAWYER" 9/2/2004 Super- Thurman Burch 212-795-3258
Owner: Eugene Zacerous 410-459-7206 P.O. Box 518 New
York, NY 10031 *****No PBS Record
on file***** 9/3/2004 Sangesland
spoke to Mr. Burch. He said the subject tank has been taken out of service and
a temp tank has been setup in the courtyard. The tank is being cleaned out and
will be repaired/retested. 9/23/2004 Fire Dept called in a new spill
number 0406940 from the site. Tank is being removed and FD wants someone from
DEC on site. 9/23/04 - Sawyer - Responded to the site to find the FDNY and
contract workers for Atlas outside the building. The FDNY chief onsite showed
me to a tank grave in the basement. The tank grave was concrete but was
covered with #2 Fuel Oil. The work was immediately stopped and the building
manger was ordered to get an environmental clean up crew to the asap. PTC was
called at 12:15 they arrived about 13:45. Big Anthony at PTC will send clean
end-point samples, a diagram and disposal information. 10/18/04 - Sawyer -
Received a closure report from Petroleum Tank Cleaners that includes clean
end-point samples analysis, a diagram and disposal information. No further
action is required. Closed. END DECRemark - 0406051
Remarks: Start CallerRemark - 0406051 tank test failed. strong feeling that the owner is

DEC Memo: Start DECRemark - 0405153 Prior to Sept, 2004 data translation this spill Lead DEC Field was "KRIMGOLD" 8/11/04. Tanks were already full. Stuyvesant Fuel made the delivery. As a result one of two 125 gal tanks developed a leak from the bottom. Oil contained within a tank room. USA Environmental (718-981-5710) was retained by the the homeowner Estella Job (347-351-6695) to perform a clean up. J.Krimgold ordered the RP to pump out the tank and clean up tank room. YK. 7/22/05. J.Krimgold spoke to USA Env. This job was completed the next day. Tank was removed and replaced after spill been cleaned up. NFA. END DECRemark - 0405153
Remarks: Start CallerRemark - 0405153 WHEN MAKING AN OIL DELIVERY, DRIVER DISCOVERED THAT TANK WAS ALREADY FULL, CAUSING AN OVERFILL. TECHNICIAN IS USING A SPILL KIT TO CONTAIN, BUT IT APPEARS THAT SOME MAY HAVE ENTERED A DRAIN IN THE BASEMENT. END CallerRemark - 0405153

DEC Memo: Start DECRemark - 0303476 Prior to Sept, 2004 data translation this spill Lead DEC Field was "SAWYER" 7/3/2003-Vought-Received fax of subsurface investigation report on 7/2. Report summary: A subsurface boring investigation was conducted in Oct 2001 in response to an AST overfill in the basement of 601 W. 149th Street. Concrete floor was broken resulting in subsurface penetration of petroleum. Ten borings were hand dug to refusal (max boring depth was 4.5' due to construction debris under floor. Five soil samples analyzed for EPA Method 8260/8270 (analyticals provided). Fuel oil and solvent compounds detected in analyticals. 7/3/2003-Vought-NYSDEC requires the following before submittal to NYSDEC Haz Waste Unit (Vadiim Brevdo): 1) property owner information 2) clarification of address of both dry cleaners and fuel oil tank location (are they both on same property?) 3) site plan including streets and surrounding properties, scale, TCE tank and sump pit. Vought spoke with NYSDEC Rommel and oil delivery company will be responsible for cleanup until all fuel oil compounds are removed. The oil company can then bill the dry cleaners for the difference in disposal cost of the Haz waste versus non haz waste. If all petroleum compounds are removed and solvents remain then spill 0013456 will be closed and this spill referred to NYSDEC Brevdo. Vought called Carol Karp (Phoenix) and left message to return call to NYSDEC. 7/3/2003-Vought-Spoke with Carol Karp and management agency is Manhattan North Management-David DiSilva 212-662-1100x204. Owner of dry cleaning is Edward Kim (212-283-9227). Dry cleaners is on first floor and tank is in basement of the same property. Site plan not necessary after discussion with Carol because dry cleaning and oil spill at same site. Excavation will be continued until petroleum constituents are removed. Vought will fax Karp copy of spill report. Vought will contact Brevdo with regard to immediate response to ensure no continued source. 12/24/2003-Vought-See closed spill #0013476 at same location. 02/09/04 As per Austin's request, transferred from Vought to Sawyer (Rommel) 3/18/04 - Sawyer - Paul Sherwood of Phoenix Environmental called to notify the Department that his company has taken 17 borings for analysis. In addition to the hazardous problems, the new samples showed constituents that exceed RSCO in TAGM 4046 for Toluene, Ethyl Benzene, Isopropylbenzene, 1,3,5-Trimethylbenzene, 1,2,4-Trimethylbenzene, M&P Xylenes, Benzos and Chrysene. 4/12/04 - Sawyer - Paul is going to fax over a work plan to review so the work can be started asap. 7/8/04 - Sawyer - Paul sent result and location of samples taken from the end points of the excavation. There were some minor hits for semi volatiles, like the Benzo's and Chrysene in the sw sidewall sample and due to the position of this contamination (near foundation) it is not able to be recovered. No further action needed. Closed. END DECRemark - 0303476

Start DECRemark - 0013456 Prior to Sept, 2004 data translation this spill Lead DEC Field was "VOUGHT" 10/2/01: On this date K.Goertz inspected the site. Phoenix Environmental was on scene performing hand borings at 9 seperate locations. There was a large #6 oil stain on the basement wall and some staining in the soils but the odor exhibited more than just a six oil smell. There could have been a chlorinated solvent odor. K.Goertz directed Carrol Karp of Phoenix Environmental to analyze the two soil samples with the highest PID readings for both petroleum and chlorinated solvents. (KG)
7/3/2003-Vought-Spill transferred from Tibbe to Vought. 7/3/2003-Vought-See spill #0303476 at same location reported when solvents found in soil disposal sample. 7/3/2003-Vought-Received fax of subsurface investigation report on 7/2. Report summary: A subsurface boring investigation was conducted in Oct 2001 in response to an AST overfill in the basement of 601 W.149th Street. Concrete floor was broken resulting in subsurface penetration of petroleum. Ten borings were hand dug to refusal (max boring depth was 4.5' due to construction debris under floor. Five soil samples analyzed for EPA Method 8260/8270 (analyticals provided). Fuel oil and solvent compounds detected in analyticals. 7/3/2003-Vought- Vought spoke with NYSDEC Rommel and oil delivery company will be responsible for cleanup until all fuel oil compounds are removed. The oil company can then bill the dry cleaners for the difference in disposal cost of the Haz waste versus non haz waste. If all petroleum compounds are removed and solvents remain then spill 0013456 will be closed and this spill referred to NYSDEC Brevdo. Vought called Carol Karp (Phoenix) and left message to return call to NYSDEC. 7/16/2003-Vought-Spoke with Karp and faxed her a copy of this spill report. 12/24/2003-Vought-Spill closed due to open spill #0303476 at same location. END DECRemark - 0013456
Remarks: Start CallerRemark - 0013456 storage tank overfill - petroleum tank cleaners is responding for clean up END CallerRemark - 0013456

DEC Memo:

Start DECRemark - 0601264 Initial spill# is 0601179. DEC Piper received call after hours on 5/1/06. DEC Piper contacted Rene Lewis from Eastmond. As per conversation oil seeping up thorough the sumps (3) at 601 w. 149th St. 601 was already dealingwith a water issue which was coming up through these sumps. On Monday, oil appeared and Eastmond was hired to vac out. Upon furhter investigation the oil seems and is believed to be coming from adjecnt building -3609 Broadway. 3609 has a 5,000 gal#4 oil tank which is underlain by a steam line. The steam line has recently been discovered to be leaking. Unknown how long. Because of this steam line leak, the tank is believed to be rotted and comprimised. Eastmond to pump out tank and perform tightness test on 3609 Broadway on Wed. morning. 5/3/06- DEC Piper responded to site. Upon arrival it was noted that there was a recent overfill through the vent line. It appeared to be 50 gal. though in speaking with HESS (Eric Sutton- 908.392.0136), they were told 2 gal by driver and super(646.523.8506) cleaned it up. (Poor Job-

S107789312

evidence of spill, staining, contaminated soil still on ground). As per conversations w/ super, Eastmond and Job Super of 601, there was a delivery made on Friday Apr.28. 2700 gal was delivered to top off the tank. On monday morning the tank read 22 inches of oil which is 1200. These numbers do not add up. The tightness test revealed six (6) holes in the bottom of the tank. Due to the tanktest failure, Sp #0601179 was closed and this spill opened in lieu of these recent findings. DEC Piper initially told Managing agent to setup tempory tank for heating and hot water. HESS has contracted Eastmond to cleanup overfill on sidewalk and sewer. 5/31/06 -there is no GW or soil samples taken and no RI report to review. Will wait for additional information from RP. - KST OWNERSHIP- BNS Building LLC. C/O Nicholas Conway Alma Realty Corp. 28-18 31st St. Suite 201 Astoria, NY 11102 (718.267.0300) It is estimated by tank capacity and contents on Monday that approximately 3500-3800 gallons missing. This spill referred to Remediation. 5/9/06- As per Sharima of RND Services, they have been contracted to perform the subsurface investigation. 3/8/07- DEC Piper recieved tank closure report. From Fon Carlo. Tank was replaced and 15 drums of soil was removed. however the report mentions nothing about a subsurface investigation for the missing 2800 gallons of oil. Piper psoke with Danny at Don Carlo. Additional investigatin is warranted. This spill is referred to remediation. 4/27/07 - Received call from Ted Yen. I requested subsurface investigation work plan to be submitted to asceratin whether there are any impacts to groundwater. Mr. Yen agreed to prepare and submit work plan for subsurface investigation. V. Brevdo 5/22/07 The following e-mail was sent to Mr. Ted Yen. "May 22, 2007 Dear Mr. Yen, This is in response to your e-mail of 5/2/2007 and letter-report (letter with Don Carlo Environmental Services, undated, received in the DEC Region 2 office on May 7, 2007). In a letter-report you requested that groundwater sampling be waived and that the spill number be closed. Please be informedthat the Department can not close the aforementioned spill. The rationale for this determination is as follows. DEC staff inspected the site on May 21, 2007. DEC Staff performed an inspection of the downgradient building and met with that site's supervisor. Through observation of the sump pits, it was determined that oil is still entering the pits during rainfall events. There is currently oil soaked adsorbents and patches of free phase product in the nearest sump closest to the spill source. An additional sump located towards the back of the property also contained oil staining. Through conversation with the supervisor, the nearest pit is cleaned on a weekly basis as to not fowl up the pumps and discharge to sewer. The Department recommends that Don Carlo investigate this further and make the necessary arrangements to have this pit cleaned by the RP on a weekly basis. Additionally since this pit is not designed as the collection point and only some oil may have collected in it, there is reason to believe that an unknown amount may have passed this pit and is continuing downgradient. Space is very limited between buildings, therefore it is our recommendation that bedrock wells be installed along W 149th St. and Riverside Drive. The affected building's main address is 603 W. 148th St., however the back of property is 608 w 149th St. This latter address will be a church and the pits can be accessed through this "back" entrance. Contact info for the affected building is Greg Baron Riverview West Contracting ph. 212.722.3671 fax 212.534.5021. Please feel free to contact me at (718) 482-4928 or via e-mail if you have any questions. Respectfully, Vadim Brevdo" END DECRemark -0601264

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Start DECRemark - 9507159 This spill was reassigned from DEC Sigona to Rommel on January 7, 2004. This spill site cleanup has been consolidated under Spill No. 9507159. On December 22, 1995 met with Clayton Environmental representatives John Gavras, Benjamin Alter & Vishal Shah - (908) 225-6040 at 10:00 AM along with Brian McShane Senior Industrial Hygienist (212) 305-3127 Columbia-Presbyterian Medical Center to follow-up Closure Report for the In-Place Abandonment of Gasoline Tanks Presbyterian Hospital Parking Garage by Clayton Environmental Consultants report November 30, 1995. Inspection of the facility found the two abandoned gasoline tanks 1,000 gallon tanks located 2 levels below street in parking garage. Tanks were closed in response to pressure tests by fire department. Tanks are older than 15 years. Soil contamination may be a pocket around buried USTs. requesting that the consultant to drill with air rotor to bedrock and any water. need to develop some monitoring wells, and possibly vent the soil. The results of the investigation found the soil to be contaminated with volatile organic hydrocarbons. Informed the reps that I would send letter and stip in a week. Gave some info on the stipulation process. DEC's executed a Stipulation Agreement, dated January 2, 2000, for the cleanup of historic petroleum contamination at the above referenced site. 1/6/05 Received call from Robert Ferguson, Fenley and Nicol. A site visit is planned for 1/12/05. Planned work includes excavation of a 20 by 20' area in the lower level of the parking garage to address the hottest soil area identified during the installation of the mws. The upper level, where the tanks were, is assumed clean and will be confirmed through soil borings. Rommel 1/17/05 Received 1-page faxed workplan from F&N. 20 x 20 to 3 ft bg (wt). GW will be pumped to 55 gallon drums and properly disposed. excavation screened with pid and if all is removed, collect endpoint samples. 3/3/05 - reassigned to Alex Zhitomirsky. - KST 3/17/2005 conversation with Kristin Dillner of F&N. They excavated contaminated soil about 18 tons, took confirmation samples and are submitting report to my attention. There was an SVE and Air Sparging system operated by F&N. They requested NFA. A. Zhitomirsky 4/25/2005 A letter was issued by DEC to Gregory Camacho New York Presbyterian Medical Center 635 West 165th Street, El Room B37 New York, New York 10032. The letter said that a report submitted by Fenley and Nicol and received on March 24, 2005 was reviewed. The report stated that Fenley and Nicol excavated and removed 18 tons of hydrocarbon impacted soil from the lower parking garage area. An analysis of endpoint samples indicated that no significant hydrocarbon impact remains in the excavation area with the exception of the endpoint sample EP-9. Air sampling data from the existing on the site air sparging system show that the system is not extracting volatile contaminants from groundwater. Nevertheless, groundwater analyses showed very high concentrations of volatile organic compounds in wells FN-1 and FN-3. DEC letter stated that based on the above facts a No Further Action (NFA) letter cannot be issued for this site. The Department recommended that the existing air sparging system should be modified to better address the groundwater contamination, or another remedial approach should be developed for this site. AZ 5/26/2005 Kristine Dillner (F&N) proposed in a phone conversation to pump out wells weekly for one quarter and then sample. Based on the sampling results they will assess the plume. AZ 10/24/2005 Robert Ferguson (F&N) will fax lab data results. Data from October 13, 2005 in FN-3 benzene 1.3 ppb, toluene - 8 ppb and ethylbenzene - 248 ppb. This is the only well with exceedances. F&N shut air sparging system off in September 2005 with the DEC concurrence. They pumped FN-1 and FN-3 out weekly for one quarter. The last pumping event took place about mid September. They pumped the wells dry. I concurred with R. Ferguson proposal to sample for two more quarters and submit their conclusions to DEC. AZ 1/10/2006 I

contacted R. Fergusson (F&N). He will submit the latest monitoring report which was delayed since his client refused to pay. AZ 1/23/2006 Contacted Gregory Camacho(Presbyterian Hospital Industrial Hygenist). We discussed remedial progress. They will follow with Fenley @ Nicol on the siteremediation. AZ 4/4/2006 Left a message for Robert Fergusson (F&N 631-586-4900 Ext. 167). AZ 6/14/2006 Contacted Fenley & Nicol. Robert Fergusson left the company. Brian McCabe will handling the case. Hospital has some outstanding bills and they put the site on hold. He will submit an updated for the site. AZ 8/10/2006 Contacted Gregory Camacho (Presbyterian) @ 212-305-3127. He will try to resolve the issue and contact F& N. A report should be submitted to DEC. AZ 2/1/2007 Reviewed Quarterly Status Report submitted by Fenley & Nicol on October 5, 2006. The report showed that the latest round of gw sampling performed on August 31, 2006, exhibited a significant increase in BTEX concentrations. FN-2 exhibited 13,480 ppb of total VOCs, FN-3 exhibited 10,246 ppb of total VOCs (FN-3 had only 249 ppb in October 2005). FN-1 was not sampled. I left a message for Gregory Camacho (Presbyterian) @ 212-305-3127. I left a message for Brian McCabe (F&N)@631-586-4900. He called me back. He stated that the remedial systems were shot down for over a year, however, the report stated that it is running. He will check out why FN-1 was not sampled. The site was sampled again on December 20, 2006. F& N will forward the latest report to DEC. In December 2006 total BTEX ranged from ND to 11,626 ppb. I requested that F&N submit proposals for remedial strategy ASAP. AZ 2/2/2007 I contacted Gregory Camacho (Presbyterian).I told him that since the contaminat concentrations increased, the existing contaminant plume must be addressed. Their consultant should submit a remedial plan for the site. AZ 4/4/2007 I contacted Gregory Camacho (Presbyterian). I reiterated to him that since the contaminant concentrations increased, the existing contaminant plume must be addressed. Their consultant should submit a remedial plan for the site. AZ END

DEC Remarks: DEC Sigona) responded at 6/29/1999 at 2:00 P.M. met with Gregory Camacho and Project Manager for Parking lot rehabilitation project. Met with proposed consultant BEMK. Investigation of the spill revealed that the contamination is immediately downgradient of two abandoned in-place 550 gallon gasoline USTs identified under spill No. 9507159.) The previous spill report is under a Stipulation Agreement and a case was initiated because the facility owner failed to implement corrective actions. The site was investigated by Winston Contractors who submitted a report to DEC in Sept. 1998. DEC Sigona) requested that the excavation be expanded to expose the subsurface vault which was impacted by gasoline. The impacted area is on the next lower level approximated 25-30 downgradient of the abandoned USTs. It may be seepage or runoff drainage. End point samples should be collected in the area. Greg Camacho has agreed to expedite the investigation and cleanup proposed by Winston, but would not agree on who would be hired.
Remark: A contractor was excavating and repairing flow drains in the parking garage and identified gasoline contaminated soils. The soil is on the lower level. Contractors being interviewed for cleanup/investigation.

Site Description:

The site is located on the west side of Fifth Avenue between 141st Street and 142nd Street in Manhattan. The entire site is occupied by a building comprised of three connected sections. The site is at an elevation of about 10 feet or less above mean sea level. Surrounding the Site are multi-story residential buildings on the west, south and southeast; the Harlem River Drive and the Harlem River on the east, and the 369th Regiment Armory to the north. From

1970 to 1994 the Site was occupied by an industrial laundry with a dry cleaning operation utilizing tetrachloroethylene (PCE) as a cleaning solvent. A portion of the building was renovated for use as a public school, but such use was discontinued. Soil Vapor Extraction system (SVE) was installed as part of the Interim Remedial Measures (IRM) to remove PCE. The SVE has been operated continuously since 1997, and was renovated in 2002. April 2005, the SVE has been shut off to evaluate the performance of the remedy, during one of the indoor air quality monitoring TCE concentration was found to be above the DOH guidance value (5 microgram per cubic meter) The SVE system was re-activated on December 18, 2006. Remedial Investigation to delineate the full extent of contamination are underway.

Environmental Problems: From 1970 to 1994 the Site was occupied by an industrial laundry with a dry cleaning operation utilizing tetrachloroethylene (PCE) as a cleaning solvent. Soils beneath the Site, and on-site and off-site groundwater are contaminated with PCE. Additional investigation is necessary to fully delineate the contamination. Exceedances of NYSDOH indoor air guidance value for TCE and PCE in the former boiler room in the basement which is below Room 112.

Health Problems Assessment: During renovations to the building in 1996-1997, several rounds of indoor air testing were conducted and on one occasion the data indicated the presence of tetrachloroethene (PCE) above the NYSDOH residential indoor air guideline of 15 parts per billion (ppb). Interim remedial measures initiated during 1997 to address the source of the contamination included the installation and operation of a shallow soil vapor extraction system. These measures have generally resulted in reducing the levels of tetrachloroethene in indoor air to levels below the 15 ppb guideline. Indoor air sampling conducted in April 2002 only detected trace concentrations of PCE. Exposure to contaminated groundwater is unlikely as public drinking water is supplied to the entire community. Exposure to contaminated soils is unlikely as the affected areas are covered by buildings or pavement.

Other Pertinent Environmental Activity Identified at Site

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 07/18/2007	Source: EPA
Date Data Arrived at EDR: 08/03/2007	Telephone: N/A
Date Made Active in Reports: 08/29/2007	Last EDR Contact: 07/31/2007
Number of Days to Update: 26	Next Scheduled EDR Contact: 10/29/2007
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 08/09/2007	Source: EPA
Date Data Arrived at EDR: 09/05/2007	Telephone: N/A
Date Made Active in Reports: 10/11/2007	Last EDR Contact: 08/31/2007
Number of Days to Update: 36	Next Scheduled EDR Contact: 10/29/2007
	Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 08/27/2007	Source: EPA
Date Data Arrived at EDR: 08/29/2007	Telephone: N/A
Date Made Active in Reports: 10/11/2007	Last EDR Contact: 08/29/2007
Number of Days to Update: 43	Next Scheduled EDR Contact: 10/29/2007
	Data Release Frequency: Quarterly

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Date Data Arrived at EDR: 02/02/1994

Date Made Active in Reports: 03/30/1994

Number of Days to Update: 56

Source: EPA

Telephone: 202-564-4267

Last EDR Contact: 08/20/2007

Next Scheduled EDR Contact: 11/19/2007

Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/23/2007

Date Data Arrived at EDR: 06/20/2007

Date Made Active in Reports: 08/29/2007

Number of Days to Update: 70

Source: EPA

Telephone: 703-412-9810

Last EDR Contact: 09/19/2007

Next Scheduled EDR Contact: 12/17/2007

Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 06/21/2007

Date Data Arrived at EDR: 07/23/2007

Data Release Frequency: Quarterly

RCRA: Resource Conservation and Recovery Act Information

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/13/2006	Source: EPA
Date Data Arrived at EDR: 06/28/2006	Telephone: (212) 637-3660
Date Made Active in Reports: 08/23/2006	Last EDR Contact: 10/16/2007
Number of Days to Update: 56	Next Scheduled EDR Contact: 01/14/2008

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 07/16/2007	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/03/2007	Telephone: 703-603-8905
Date Made Active in Reports: 10/11/2007	Last EDR Contact: 10/01/2007
Number of Days to Update: 69	Next Scheduled EDR Contact: 12/31/2007
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 07/16/2007	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/03/2007	Telephone: 703-603-8905
Date Made Active in Reports: 10/11/2007	Last EDR Contact: 10/01/2007
Number of Days to Update: 69	Next Scheduled EDR Contact: 12/31/2007
	Data Release Frequency: Varies

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

DOD: Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2005	Source: USGS
Date Data Arrived at EDR: 11/10/2006	Telephone: 703-692-8801
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 11/09/2007
Number of Days to Update: 62	Next Scheduled EDR Contact: 02/04/2008
	Data Release Frequency: Semi-Annually

FUDS: Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 12/31/2006	Source: U.S. Army Corps of Engineers
Date Data Arrived at EDR: 08/31/2007	Telephone: 202-528-4285
Date Made Active in Reports: 10/11/2007	Last EDR Contact: 10/01/2007
Number of Days to Update: 41	Next Scheduled EDR Contact: 12/31/2007
	Data Release Frequency: Varies

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Date of Government Version: 06/20/2007	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/09/2007	Telephone: 202-566-2777
Date Made Active in Reports: 08/29/2007	Last EDR Contact: 09/10/2007
Number of Days to Update: 51	Next Scheduled EDR Contact: 12/10/2007
	Data Release Frequency: Semi-Annually

CONSENT: Superfund (CERCLA) Consent Decrees

Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

Date of Government Version: 04/13/2007	Source: Department of Justice, Consent Decree Library
Date Data Arrived at EDR: 07/16/2007	Telephone: Varies
Date Made Active in Reports: 08/29/2007	Last EDR Contact: 09/21/2007
Number of Days to Update: 44	Next Scheduled EDR Contact: 01/21/2008
	Data Release Frequency: Varies

ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 06/08/2007	Source: EPA
Date Data Arrived at EDR: 07/03/2007	Telephone: 703-416-0223
Date Made Active in Reports: 08/29/2007	Last EDR Contact: 11/08/2007
Number of Days to Update: 57	Next Scheduled EDR Contact: 12/31/2007

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2005	Source: EPA
Date Data Arrived at EDR: 03/13/2007	Telephone: 202-564-4203

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

STATE AND LOCAL RECORDS

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2005
Date Data Arrived at EDR: 06/15/2007
Date Made Active in Reports: 08/20/2007

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: PennWell Corporation

Telephone: (800) 823-6277

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Day Care Providers

Source: Department of Health

Telephone: 212-676-2444

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Elevation:	111 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	40073-G8 CENTRAL PARK, NY
Most Recent Revision:	1995

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION</u> <u>FROM TP</u>	<u>GENERAL DIRECTION</u> <u>GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Paleozoic
System: Ordovician
Series: Lower Ordovician and Cambrian carbonate rocks
Code: OC (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

EDR City Directory Abstract

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening report designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Thank you for your business.

Please contact EDR at 1-800-352-0050
with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report "AS IS". Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

SUMMARY

▪ ***City Directories:***

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2000. (These years are not necessarily inclusive.) A summary of the information obtained is provided in the text of this report.

This report compiles information by geocoding the subject properties (that is, plotting the latitude and longitude for such subject properties and obtaining data concerning properties within 100.32 Feet of the subject properties). There is no warranty or guarantee that geocoding will report or list all properties within the specified radius of the subject properties and any such warranty or guarantee is expressly disclaimed. Accordingly, some properties within the aforementioned radius and the information concerning those properties may not be referenced in this report.

APPENDIX H
PRIOR REPORTS
(NONE PROVIDED)

APPENDIX I
RESUMES

BEDIA SARAY

Project Manager

EDUCATION

- 1993, BS, Engineering, University of Cukurova, Turkey
- 2002, MS, Environmental Technology, NY Institute of Technology

PROFESSIONAL SUMMARY

Ms. Saray is a Project Manager at ATC's New York Environmental Division and has 5 years experience conducting Phase I Environmental Assessments and Transaction Screens, Indoor Air Quality Investigations, asbestos and lead abatement inspections and soil/groundwater testing. Ms. Saray has in-depth knowledge of regulatory guidelines and compliance requirements (ASTM, USEPA, NYDEC and local agencies). Prior to joining ATC, Ms. Saray provided engineering services regarding management of water, chemicals, and plant nutrition to the agricultural industry in Karaman, Turkey.

PROFESSIONAL CERTIFICATIONS

- NYS DOL Asbestos Inspector, Project Monitor and Air Technician (#02-040221)

PROFESSIONAL EXPERIENCE

- **Environmental Site Assessments / Jones Lang LaSalle / New York.** Project Manager. Managed the coordination and draft report preparation of Phase I environmental assessments for the sale and acquisition of commercial and residential properties. Project activities included asbestos and lead based paint surveys and Phase I ESA for each site performed according to ASTM 1527 and 40CFR.312 AAI screening and additional remedial investigation activities associated with volatile organic compounds in the soil and groundwater.
- **Environmental Site Assessments / Community Preservation Corporation / New York.** Project Manager. Managed the coordination and draft report preparation of Phase I environmental assessments for the sale and acquisition of commercial and residential properties. Project activities included asbestos and lead based paint surveys and Phase I ESA for each site performed according to ASTM 1527 and 40CFR.312 AAI screening and additional remedial investigation activities associated with volatile organic compounds in the soil and groundwater.
- **Environmental Site Assessments / LeFrak Organization / New York.** Project Manager. Managed the coordination and draft report preparation of Phase I environmental assessments for the sale and acquisition of commercial and residential properties. Project activities included asbestos and lead based paint surveys and Phase I ESA for each site performed according to ASTM 1527 and 40CFR.312 AAI screening and additional remedial investigation activities associated with volatile organic compounds in the soil and groundwater.
- **Indoor Air Quality Assessments / Jones Lang LaSalle / New York.** Project Manager. Managed the field operations for air quality investigations and

assessments in response to water intrusion and possible microbial contamination at financial institution's New York City headquarters. Project activities included sampling, survey, oversight of mold remediation contractor and post remediation sampling.

- **Indoor Air Quality Assessments / A.T. Kearney / New York.** Project Manager. Managed the field operations for air quality investigations and assessments in response to water intrusion and possible microbial contamination. Project activities included sampling, survey, managed contractor selection process, oversight of mold remediation contractor and post remediation sampling.
- **Indoor Air Quality Assessments / Murray Hill Properties / New York.** Project Manager. Managed the field operations for bi-annual pro-active air quality investigations and assessments as part of due diligence and building maintenance. Project activities include visual observations and reporting.

MATTHEW MANKOVICH

Senior Project Manager

EDUCATION

1999 B.S., Natural Science, University of Pittsburgh at Johnstown

PROFESSIONAL REGISTRATION

- Current OSHA Approved Hazardous Waste Operations Health and Safety Training (40 Hrs and 8 Hr Annual Refreshers)
- Long Island Rail Road (LIRR) Safety Training, 2004

PROFESSIONAL SUMMARY

Mr. Mankovich is a Senior Project Manager with more than six (6) years of broad-based professional experience in environmental services, including site assessments, investigations, and remediation for private and public sector clients. Technical experience includes site assessments and investigations, remedial investigation, environmental management and compliance, and due diligence support.

PROFESSIONAL EXPERIENCE

- **Environmental Services / NYC School Construction Authority / New York.** Senior Environmental Scientist – Responsible for project management and/or preparation of Phase I Environmental Site Assessments (ESAs), Phase II Environmental Site Investigations (ESIs) and other environmental assessments and investigations. The properties include industrial facilities, educational and commercial properties. The projects were conducted in accordance with current ASTM and NYCSCA standards to investigate the potential for on-site or off-site environmental concerns for liability and suitability for use as a school. Responsibilities include site reconnaissance, local and county agency interviews, geological and hydrological data review, historical data review, State and Federal database reviews, and report preparation, soil, groundwater, indoor air quality and soil gas investigations, UST/AST investigations, environmental oversight, and report preparation.
- **Phase I and II Environmental Site Assessments / NYC Transit Authority / New York -- Number 7 Subway Extension — Hudson Yards Rezoning and Development Program.** Environmental Scientist. Prepared Phase I ESAs and Phase II ESIs in accordance with current ASTM and client standards. Phase II ESI included collection of soil and groundwater samples for laboratory analysis. Results and interpretations were used to prepare EIS Chapter.
- **Phase I Environmental Site Assessments / NYC Department of Economic**

Development Corporation / New York. Environmental Scientist – Prepared Phase I ESAs in accordance with current ASTM and client standards. Results and interpretations were used to prepare EIS Chapter for the Stapleton Waterfront Development Plan EIS.

- **Phase I and II Environmental Site Assessments / NYC Department of Design and Construction / New York.** Senior Environmental Scientist – Phase I Environmental Site Assessments (ESAs), Phase II Environmental Site Investigations (ESIs) and other environmental assessments and investigations in accordance with current ASTM and client standards.
- **Phase I and II Environmental Site Assessments and NEPA Surveys, New York and New Jersey. Verizon, T-Mobile, Sprint and private clients.** Environmental Scientist. Performed Phase I ESAs and Phase II ESIs in accordance with current ASTM standards for industrial facilities, and commercial and residential properties and NEPA Surveys.
- **Construction Testing and Inspection Services, Pittsburgh, Pennsylvania. Public and Private clients.** Field Technician/Project Manager. Provided on-site inspection and construction documentation for commercial and residential development projects throughout Western Pennsylvania. Responsibilities include: coordination between contractor and client to ensure the project is on schedule; specification review for compliance enforcement; field testing of soil, concrete, asphalt, masonry, & steel; soil compaction and inspection; proofrolling inspection; data collection, field logs, data reduction and interpretation.

APPENDIX J
RECORDS OF COMMUNICATION

DEPARTMENT OF HOUSING AND BUILDINGS

BOROUGH OF **MANHATTAN**, CITY OF NEW YORKNo. **40818**Date **February 10, 1953**

CERTIFICATE OF OCCUPANCY

(Standard form adopted by the Board of Standards and Appeals and issued pursuant to Section 646 of the New York Charter, and Sections C.26-181.0 to C.26-187.0 inclusive Administrative Code 2.1.3.1. to 2.1.3.7. Building Code.)

This certificate supersedes C. O. No.

To the owner or owners of the building or premises:

THIS CERTIFIES that the ~~new~~-altered-~~existing~~-building—premises located at**91-99 St. Nicholas Place**Block **2069** Lot **20**

, conforms substantially to the approved plans and specifications, and to the requirements of the building code and all other laws and ordinances, and of the rules and regulations of the Board of Standards and Appeals, applicable to a building of its class and kind at the time the permit was issued; and

CERTIFIES FURTHER that, any provisions of Section 646F of the New York Charter have been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent.

~~NEW~~ Alt. No.— **797-1951**Construction classification— **Class 1 fireproof**Occupancy classification— **Commercial Bldg.** Height **1** stories, **15.5** feet.Date of completion— **February 10, 1953** Located in **Business & Residence** Use District.**B** Area **1½** Height Zone at time of issuance of permit **876-1952**

This certificate is issued subject to the limitations hereinafter specified and to the following resolutions of the Board of Standards and Appeals: (Calendar numbers to be inserted here)

1190-27-52

PERMISSIBLE USE AND OCCUPANCY

STORY	LIVE LOADS Lbs. per Sq. Ft.	PERSONS ACCOMMODATED			USE
		MALE	FEMALE	TOTAL	
1st story	on ground	2		2	Gasoline Service Station.
					Gasoline tank installed approved by Fire Department April 17, 1952.
					Fuel Oil installation approved by Fire Department February 4, 1953.

NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL
BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

HVC CERTIFICATE OF OCCUPANCY No. 15260 1929

New York May 16, 1929.

known as 91-99 St. Nicholas Place-404-414 West, 155th Street
154-34 front

CERTIFIES FURTHER that the building is of **fireproof** construction within the meaning of the building code and may be used and occupied as a **business** building as hereinafter qualified, in a **residence and business** district under the building zone resolution, subject to all the privileges, requirements, limitations, and conditions prescribed by law or as hereinafter specified.

STORY	LIVE LOADS Lbs. per Sq. Ft.	PERSONS ACCOMMODATED			USE
		MALE	FEMALE	TOTAL	
Cellar					Garage for more than 5 autos.

for the owner of property.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1305 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the superintendent of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing or gas shut off appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department (or by the Tenement House Department, in the case of a gas shut off in a tenement house) and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 3 (Building Code) of the Code of Ordinances of the City of New York.

Examined. *cb*

[Signature]
Superintendent of Buildings, Borough of Manhattan.

Additional copies of this certificate will be issued, upon written request, to persons having a proprietary interest in the building.

Dear Ms. Saray:

:
NYSDEC/Region 2 has reviewed your request for the above referenced records under New York State's Freedom of Information Law (FOIL). Please note that most of our records are filed by number under the names of individuals or corporations. We have no way of locating or retrieving records if they are filed under names or addresses other than those you have provided.

If no records have been located, this does not necessarily mean, and should not be interpreted to mean that there have never been any violations, complaints, claims, investigations or inquiries involving those names or addresses. We cannot make any representations as to whether there are or have been any such violations, complaints, claims, investigations or inquiries.

☒ Attached are (3) pages free copy of the records located for the names and/or addresses you provided.

Thank you for your request. If additional information is needed, please call Gloria Silva/FOIL Secretary at (718) 482-4507, or fax your response to me.

Sincerely yours,

Fawzy I Abdelsadek, Ph.D., P.E.

Re: Freedom of Information Law Request
414 West 155th Street
New York, NY
(Block 2069, Lot 21)

Dear Ms. Bryant:

Pursuant to the Freedom of Information Act, please forward available non-identifying records regarding cases of reported lead poisoning, any information regarding USTs, spill records, remediation sites, dump sites, storage of hazardous material, and hazardous material activities to us as soon as possible.

Please let me know if there are any costs associated with this request prior to processing same. Your response can either be faxed or mailed to us at the fax number and/or location identified above. If you have any questions, please call me at (212) 353-8280, extension 330.

Sincerely,

ATC Associates Inc.

party of the second part,

WITNESSETH, that the party of the first part, in consideration of ten dollars and other valuable consideration paid by the party of the second part, does hereby grant and release unto the party of the second part, the heirs or successors and assigns of the party of the second part forever,

ALL that certain plot, piece or parcel of land, with the buildings and improvements thereon erected, situate, lying and being in the Borough of Manhattan, City and State of New York, bounded and described as follows:

BEGINNING at a point on the Southerly side of 155th Street distant 45 feet Westerly from the corner formed by the intersection of the Southerly side of 155th Street with the Westerly side of St. Nicholas Place; thence Westerly along the Southerly side of 155th Street 154 feet 3-3/4 inches to the Easterly line of the land of the Mayor, Alderman and Commonalty of the City of New York, commonly known as land of the Croton Aqueduct; thence Southerly along said line belonging to the City of New York, 144 feet 3 inches; thence Easterly 154 feet 3-3/4 inches; thence Northerly and forming a line at right angles with the Southerly side of 155th Street, approximately 137 feet to the point or place of BEGINNING; being the said several dimensions more or less.

Said premises being known and designated as Nos. 404-414 West 155th Street New York City and being the same premises as were conveyed by H. Casabianca, Inc. to Garage Estates, Inc. by deed dated February 28, 1956 and recorded on March 6, 1956 in the Office of the City Register, County of New York in Liber 4956 of Conveyances, Pages 267 and 268.

SUBJECT to any state of facts an accurate survey may show provided the same does not render the title unmarketable.

SUBJECT to existing leases and tenancies.

SUBJECT to covenants, restrictions and easements, if any, contained in prior instruments of record, provided they do not prohibit erection, maintenance and present use of existing structure.

TOGETHER with all right, title and interest, if any, of the party of the first part in and to any streets and roads abutting the above described premises to the center lines thereof; TOGETHER with the appurtenances and all the estate and rights of the party of the first part in and to said premises; TO HAVE AND TO HOLD the premises herein granted unto the party of the second part, the heirs or successors and assigns of the party of the second part forever.

AND the party of the first part, in compliance with Section 13 of the Lien Law, covenants that the party of the first part will receive the consideration for this conveyance and will hold the right to receive such consideration as a trust fund to be applied first for the purpose of paying the cost of the improvement and will apply the same first to the payment of the cost of the improvement before using any part of the total of the same for any other purpose.

The word "party" shall be construed as if it read "parties" whenever the sense of this indenture so requires.

IN WITNESS WHEREOF, the party of the first part has duly executed this deed the day and year first above written.

APPENDIX M
TERMINOLOGY

TERMINOLOGY

The following provides definitions and descriptions of certain terms that may be used in this report. Italics indicate terms that are defined by ASTM Standard Practice E 1527-05. The Standard Practice should be referenced for further detail (such as the precise wording), related definitions or additional explanation regarding the meaning of terms.

recognized environmental condition(s) (REC) - the presence or likely presence of any *hazardous substances* or *petroleum products* on a *property* under conditions that indicate an existing release, a past release, or a *material threat* of a release of any *hazardous substances* or *petroleum products* into structures on the *property* or into the ground, ground water, or surface water of the *property*. The term includes *hazardous substances* or *petroleum products* even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions.

de minimis conditions – are conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not *recognized environmental conditions*.

historical recognized environmental condition(s) (HREC) - environmental condition which in the past would have been considered a *recognized environmental condition*, but which may or may not be considered a *recognized environmental condition* currently. The final decision rests with the *environmental professional* and will be influenced by the current impact of the *historical recognized environmental condition* on the *property*. If a past release of any *hazardous substances* or *petroleum products* has occurred in connection with the property and has been remediated, with such remediation accepted by the responsible regulatory agency (for example, as evidenced by the issuance of a no further action letter or equivalent), this condition shall be considered a *historical recognized environmental condition*.

material threat – a physically observable or *obvious* threat which is reasonably likely to lead to a release that, in the opinion of the *environmental professional*, is threatening and might result in impact to public health or the environment. An example might include an aboveground storage tank system that contains a *hazardous substance* and which shows evidence of damage such that it may cause or contribute to tank integrity failure with a release of contents to the environment.

threat to human health or the environment – a substantial risk of harm to public health or the environment resulting from the presence or likely presence of an existing release, a past release, or a *material threat* of a release of any *hazardous substances* or *petroleum products* into structures on the *property* or into the ground, ground water, or surface water of the *property*. An example might include a release of a *hazardous substance* in concentrations exceeding applicable governmental agency standards under conditions that could reasonably and foreseeably result in substantial exposure to humans or substantial damage to natural resources. The risk of that exposure or damage would represent a threat to human health or the environment.

generally would not be the subject of an enforcement action – the likelihood that an environmental condition would not be subject to enforcement action if brought to the attention of appropriate governmental agencies. If the circumstances suggest an enforcement action would be less likely than not, then the condition is considered to be generally not the likely the subject of an enforcement action.

Re: Proposal for Phase II Environmental Site Investigation
Parking Garage
414 West 155th Street
New York, NY 10032

Dear Ms. Villari:

INTRODUCTION

ATC Associates Inc. (ATC) appreciates the opportunity to submit this proposal to Broadway Housing Communities to perform a Phase II Environmental Site Investigation (ESI) of the three-story parking garage with a cellar located at 414 West 155th Street between St. Nicholas Avenue and St. Nicholas Place in New York, New York (hereinafter referred to as the "Site"). A Site location map is shown on Figure 1. This proposal has been prepared in general accordance with New York City Department of Environmental Protection (NYCDEP) guidelines.

A Phase I Environmental Site Assessment (ESA) conducted at the Site in November 2007 identified the following recognized environmental conditions (RECs):

1. The historical Site use for garage and repair purposes;
2. The potential presence of four historical gasoline tanks, two lube oil tanks and a potential tank associated with an observed apparent fill port;
3. Petroleum staining (approximately 12' x 18') observed on the floor in the east-northeastern portion of the cellar along the eastern wall by the door; and
4. The presence of a historical gasoline filling and service station adjacent to the east of the Site with documented soil and groundwater contamination that is reportedly being remediated under the supervision of the New York State Department of Environmental Conservation (NYSDEC) and a garage adjacent to the southwest of the Site.
5. Subsequent site visit identified the presence of vent pipes located on the roof which are assumed to be consistent with fuel oil tanks.

Based on the results of the November 2007 Phase I ESA, ATC recommended that a Phase II ESI be conducted to assess potential impacts to the soil and groundwater as a result of potential releases from the identified RECs.

SITE BACKGROUND

The Site consists of a 65,070 square foot lot currently developed with a rectangular three-story parking garage. The elevation of the Site is approximately 110 feet above mean sea level (MSL). The Harlem

River is located approximately 1,800 feet east of the Site. Groundwater is anticipated to flow in an easterly direction. Groundwater was identified at an adjacent property at 14 to 16 feet below grade (ftbg).

PROPOSED SCOPE OF SERVICES

Task 1 – Preliminary Work

Preliminary work includes:

- Coordinating with Broadway Housing Communities for access to the Site;
- Contacting the “One-Call” for a subsurface utility mark-out service;
- Scheduling a drilling subcontractor and geophysical survey subcontractor;
- Coordinating with a laboratory for sampling containers, sample pick-ups and drop-offs; and
- Preparing a Site-Specific Health and Safety Plan (HASP).

Task 2 – Geophysical Survey

A geophysical survey subcontractor will be utilized to: (1) assess whether historic gasoline tanks, the historic lube oil tanks and the suspect tank associated with the suspect fill port are still present at the Site; and (2) investigate subsurface structures, utilities and anomalies in the areas of the proposed soil boring locations so that they can be avoided during drilling activities. Geophysical methods may include the use of radio-frequency equipment, magnetometer, and/or ground penetrating radar (GPR).

Task 3 – Soil Boring and Groundwater Sampling Activities

Soil Boring and Soil Sampling Activities

ATC is proposing to advance six soil borings using a Geoprobe® truck mounted drilling rig to facilitate the collection of soil and groundwater samples. Proposed soil boring locations are shown on Figure 1. Soil borings will be advanced to groundwater or bedrock/refusal, whichever is encountered first. It is estimated that groundwater will be encountered at a depth of about 14 to 16 ftbg. The soil boring locations are proposed on the following rationale:

- SB-01 to assess the area of the suspect fill port;
- SB-02 and SB-03 to assess potential impacts from the adjacent gasoline station to the east and the adjacent garage to the south;
- SB-03 to assess the area of observed staining;
- SB-04 and SB-05 to assess the area of the historic gasoline tanks; and,
- SB-06 to assess the area of the historic lube oil tanks.

Continuous soil quality field screening will be performed at all boring locations. Visual and olfactory methods of screening will be used during the field efforts to identify evidence of contamination. Additionally, a portable photo ionization detector (PID) will be used to obtain qualitative measurements of volatile organic vapors. Soil samples will be collected from each boring as follows:

- One soil sample will be collected from the ground surface to a depth of two ftbg to assess the presence of historic fill material, if any;
- One soil sample will be collected from the soil/groundwater interface or the soil/bedrock interface;

- One soil sample will be collected from impacted soils, if any, based on field screening (e.g., staining, odor, and/or PID readings).

Soil samples will be preserved as necessary and submitted via overnight courier to a New York State Department of Health (NYSDOH) ELAP-approved analytical laboratory. Standard chain of custody procedures will be followed. Soil samples will be analyzed for volatile organic compounds (VOCs) and methyl tertiary butyl ether (MTBE) using EPA method 8260 (full list), target compounds list (TCL) semi-volatile organic compounds, target analyte list (TAL) metals, polychlorinated biphenyls (PCBs) and pesticides.

Groundwater Sampling

If groundwater is encountered in the soil borings, a temporary well point (TWP) will be installed in each of the six borings and one groundwater sample will be collected from each TWP.

The groundwater samples will be collected utilizing a peristaltic pump or check valve and dedicated high-density polyethylene (HDPE) tubing and analyzed for VOCs+MTBE, TCL SVOCs, TAL metals (filtered and unfiltered), PCBs and pesticides.

Upon completion of sampling, each boring will be filled to the near grade with the drill cuttings and a cement/bentonite grout mixture or bentonite pellets. The borings will be patched with the appropriate materials (asphalt or concrete patch).

Task 4 - Report Preparation

ATC will prepare a Phase II ESI Report, which will document the findings of the investigation. If requested, the report will be electronically submitted in draft form for review and comment prior to issuance of a final report. Two hard copies and one electronic copy of the report will be submitted.

PROJECT SCHEDULE

Provided the Site is accessible, ATC anticipates initiation of field work within one week of notice to proceed. It is expected that all the work described in this proposal can be completed within approximately five to six weeks following receipt of written authorization to proceed.

FEE ESTIMATE

The total estimated fee for the Phase II ESI is **\$XXXX**. Changes to the scope of work may necessitate the re-evaluation of the total cost for the project.

Our services will be provided on a time-and-materials basis in accordance with the attached Client Service Agreement. ATC will be authorized to proceed with the proposed services when you indicate your acceptance by signing the Agreement.

Should you have any questions regarding our proposal or require additional information, please do not hesitate to contact us at (212) 353-8280.

Sincerely,

ATC ASSOCIATES INC.

EXECUTIVE SUMMARY

ATC Associates Inc. (ATC) was retained by Broadway Housing Development Fund Company to perform a Phase II Environmental Site Investigation (ESI) of The Bradford, located at 414 West 155th Street, New York, New York (hereinafter referred to as the "Site").

ATC prepared a Final Phase I Environmental Site Assessment (ESA) report for the Site dated March 21, 2008 that identified the following recognized environmental conditions:

1. The historical Site use for garage and repair purposes;
2. The potential presence of four historical gasoline tanks, two lube oil tanks and a potential tank associated with an observed apparent fill port;
3. Petroleum staining (approximately 12' x 18') observed on the floor in the southeastern portion of the cellar along the eastern wall; and
4. The presence of: (a) a historical gasoline filling and service station adjacent to the east of the Site with documented soil and groundwater contamination that is reportedly being remediated under the supervision of the New York State Department of Environmental Conservation (NYSDEC); and (b) a former garage adjacent to the southwest of the Site.

A subsequent site visit identified the presence of vent pipes located on the roof, which appeared to be consistent with fuel oil tanks.

The Phase II ESI was performed in accordance with ATC's Draft Proposal for Phase II ESI dated January 20, 2009, which has been reviewed and approved by the New York City Department of Environmental Protection (DEP) (DEP approval letter dated July 9, 2010). The objective of this Phase II ESI is to assess whether there are hazardous materials impacts to the subsurface (soil and groundwater).

The scope of this Phase II ESI consisted of the following:

1. A geophysical survey; and
2. The advancement of six (6) soil borings and the collection of eight (8) soil samples.

The Draft Proposal for Phase II ESI proposed the advancement of six (6) soil borings, the collection of 16 soil samples (one (1) sample from 0-2 feet below ground surface (bgs) and one (1) sample from the soil/groundwater interface or soil/bedrock interface, the installation of six (6) temporary well points (TWPs) and the collection of six (6) groundwater samples. Shallow bedrock was encountered in each of the six (6) soil borings, thus resulting in the collection of eight (8) soil samples as follows: one (1) soil sample (consisting of one (1) grab sample and one (1) composite sample) was collected from Borings SB-01, SB-04, SB-05, and SB-06 where bedrock was encountered from 1 to 2 feet bgs and two (2) soil samples (each consisting of one (1) grab sample and one (1) composite sample) were collected from SB-02 and SB-03 where bedrock was encountered at 5.5 and 9 feet bgs, respectively. In addition, since groundwater was not encountered, TWPs were not installed and groundwater samples were not collected.

The Phase II ESI identified the following:

1. The subsurface soils consist of brown coarse to fine sand with trace gravel, underlain by rock fragments. Weathered bedrock (schist) was encountered at depths ranging from one (1) foot below ground surface (bgs) in the western portion of the basement to nine (9) feet bgs in the

southeastern portion of the basement. A prior geotechnical investigation (Tectonic, May 2010) reported fill material from ground surface to approximately 7.5 feet bgs consisting of sand with varying gradations and amounts of silt and gravel and minor amounts of debris including brick and concrete. The Tectonic geotechnical investigation reported bedrock ranging in depth from 2 feet bgs in the western portion of the basement to 14.5 feet bgs in the southeastern portion of the basement.

2. Groundwater was not encountered in any of the borings advanced during the ATC Phase II investigation. The Tectonic geotechnical investigation reported groundwater at 3.5 feet bgs in the northwestern portion of the basement and 5.2 feet bgs in the southeastern portion of the basement.
3. The geophysical survey found no evidence to suggest the presence of USTs in the areas of the Site investigated.
4. Semi-volatile organic compounds (SVOCs) were detected at concentrations exceeding the New York State Department of Environmental Conservation (NYSDEC) Technical and Administrative Guidance Memorandum #4046 (TAGM) Recommended Soil Cleanup Objectives (RSCOs), the NYSDEC Subpart 375-6: Remedial Program Unrestricted Use Soil Cleanup Objectives (SCOs) and Restricted Use-Protection of Public Health-Residential (Restricted-Residential) SCOs. The presence of SVOCs may be reflective of fill material.
5. Metals were detected at concentrations exceeding the TAGM RSCOs, Unrestricted Use SCOs, and/or Eastern USA Soil Background Levels. Their presence is attributed to natural (background) levels.
6. VOCs were not detected above applicable cleanup standards. PCBs and pesticides were not detected in the soil samples collected.

Based upon the presence of fill materials at the Site, concentrations of SVOCs that exceed TAGM RSCOs and Unrestricted Use Soil Cleanup Objectives SCOs in soil samples, ATC recommends the preparation of a Remedial Action Plan (RAP) and Construction Health and Safety Plan (CHASP).

1.0 INTRODUCTION

ATC Associates Inc. (ATC) was retained by Broadway Housing Development Fund Company to perform a Phase II Environmental Site Investigation (ESI) of The Bradford, located at 414 West 155th Street, New York, New York (hereinafter referred to as the "Site").

The Site consists of an approximately 21,685-square foot lot (Block 2069, Lot 21) and is developed with an approximately 65,070-square foot, two-story building with a cellar that is utilized as a parking garage. Based on historical research, the building was constructed in 1929.

The Site, is part of the Sugar Hill Rezoning, which consists of three additional lots (14, 26, and 28), which are not addressed as part of this Phase II ESI. According to the New York City Department of Environmental Protection (DEP) approval letter dated July 9, 2010, the Site is planned to undergo a zoning change from C8-3 to R8A. The proposed actions would facilitate the development of an approximately 169,333-square foot 13-story mixed-use building with 124 residential units on Lot 21. As currently proposed, the building will consist of: (1) an approximately 18,036-square foot Faith Ringgold Children's Museum of Art and Storytelling; (2) a 12,196-square foot day care facility and early childcare center; (3) a 2,350-square foot non-profit program and office space; and (4) a 114-space below grade accessory parking garage. The existing on-Site building will be demolished to facilitate the construction of the proposed building. Reportedly, there will be no development on Lots 14 and 28. Improvements to Lot 26, which is reportedly City-owned, would be limited to landscaping and paving to provide access to the proposed development on Lot 21. The DEP approval letter stated that in order to insure that the comments/recommendations are implemented for Lot 21, a Restrictive Declaration should be recorded to ensure that the potential hazardous materials issues are adequately addressed prior to and during construction activities. The institutional control would bind the property owners and their successors or assigns to address the recommendations prior to construction. It is ATC's understanding that a Restrictive Declaration would involve the New York City Office of Environmental Remediation (OER) and this Phase II ESI may need to be submitted to OER for review and approval.

The Phase II ESI was performed in accordance with ATC's Draft Proposal for Phase II ESI dated January 20, 2009, which has been reviewed and approved by the DEP. ATC prepared a Final Phase I Environmental Site Assessment (ESA) for the Site dated March 21, 2008 that identified the following recognized environmental conditions:

1. The historical Site use for garage and repair purposes;
2. The potential presence of four historical gasoline tanks, two lube oil tanks and a potential tank associated with an observed apparent fill port;
3. Petroleum staining (approximately 12' x 18') observed on the floor in the southeastern portion of the cellar along the eastern wall; and
4. The presence of: (a) a historical gasoline filling and service station adjacent to the east of the Site with documented soil and groundwater contamination that is reportedly being remediated under the supervision of the New York State Department of Environmental Conservation (NYSDEC); and (b) a former garage adjacent to the southwest of the Site.

A subsequent site visit identified the presence of vent pipes located on the roof, which appeared to be consistent with fuel oil tanks.

The objective of this Phase II ESI is to assess whether there are hazardous materials impacts to the subsurface (soil and groundwater).

2.0 SCOPE OF WORK

The project scope of work included the following:

- Preparation of a Site-Specific Health and Safety Plan (HASP);
- Performance of a geophysical survey;
- The advancement of six (6) soil borings;
- The collection of eight (8) soil samples for laboratory analysis; and
- An evaluation of the field and laboratory data and preparation of this report.

3.0 PHYSICAL SITE SETTING

3.1 Topography

According to the United States Geological Survey (USGS) 7.5 Minute Series *Central Park, NY-NJ*, Topographic Quadrangle, dated 1995, the elevation of the Site is approximately 110 feet above mean sea level. The area surrounding the Site indicates topography that slopes downward to the east.

3.2 Geology

According to the New York Department of Environmental Conservation, Water Power and Control Commission report titled *Ground Water in Bronx, New York, and Richmond Counties, with Summary Data on Kings and Queens Counties, New York City, New York*, the Project Area is located in a southern extension of an upland area that covers a large part of New England. Manhattan has been extensively eroded by pre-glacial stream action, modified by later glacial erosion and deposition. A layer of unconsolidated glacial and glaciofluvial deposits is present beneath the section of Manhattan in which the site is located. The sediments are underlain by high-grade metamorphic schist.

During the Phase II ESI, bedrock (schist) was encountered at depths ranging from one (1) foot bgs in the western portion of the basement to nine (9) feet bgs in the southeastern portion of the basement.

A report titled *Geotechnical Investigation, Proposed Sugar Hill Residences, 404-414 West 155th Street, New York, NY*, dated May 13, 2010 and prepared by Tectonic Engineering & Surveying Consultants, P.C., indicated that bedrock (schist) was reported in each of the boring ranging in depth from 2 feet bgs in the western portion of the basement to 14.5 feet bgs in the southeastern portion of the basement. The Tectonic geotechnical investigation is included in Appendix B.

3.3 Soils

The results of the Phase II ESI identified the subsurface consisting of brown coarse to fine sand with trace gravel and rock fragments. Soil boring logs are provided in Appendix A.

The Tectonic geotechnical investigation reported fill material in six (6) borings from below the basement concrete floor to approximately 7.5 feet bgs. The fill material consisted of sand with varying gradations and amounts of silt and gravel and minor amounts of debris, including brick and concrete. Native soils were encountered in three (3) borings and consisted of coarse to fine sand with varying amounts of gravel and silt.

3.4 Hydrogeology

The Phase II ESI did not encounter groundwater in any the borings advanced. The Tectonic geotechnical investigation reported groundwater at 3.5 feet bgs in the northwestern portion of the basement and 5.2 feet bgs in the southeastern portion of the basement. It is believed that the groundwater encountered in the Tectonic geotechnical investigation represents a seasonal perched groundwater table.

Based on the surface topography at the Site, groundwater flow is assumed to be to the east towards the Harlem River, which is located approximately 1,600 feet east of the Site. Estimated groundwater levels and/or flow direction may vary due to seasonal fluctuations in precipitation, local usage

demands, geology, underground structures, or dewatering operations.

4.0 GEOPHYSICAL INVESTIGATION

On November 3, 2010, Enviroprobe Service, Inc., under the observation of ATC, performed a geophysical survey of the Site. The purpose of this investigation was to identify possible USTs and underground conduits/utilities. The investigation utilized a Sensors & Software Inc. cart-mounted Ground Penetrating Radar (GPR) unit with a 250 MHz antenna, a Radiodetection RD4000T10 multi-frequency transmitter, a Radiodetection RD4000 receiver, and a Fisher TW-6 metallic locator.

The results of the geophysical survey found no evidence to suggest the presence of USTs in the areas of the Site investigated. An anomaly was identified in the northwest corner of the basement. This area was surveyed with the GPR and the TW-6. The investigation with the TW-6 identified a metallic anomaly that measured approximately 6 feet by 8 feet. The investigation with the GPR did not identify the area to be consistent with a UST. The GPR signal penetrated two (2) feet in this area due to subsurface conditions and content. The geophysical survey cleared all soil borings in a 10 foot radius from subsurface structures and utilities so they may be avoided during drilling activities. A copy of the geophysical report is provided in Appendix C.

5.0 SOIL SAMPLING ACTIVITIES

On November 4, 2010, Enviroprobe Service, Inc., under the observation of ATC, advanced six (6) soil borings (SB-01 through SB-06) throughout the Site using a Geoprobe drilling rig. The soil boring locations were advanced based on the following rationale:

- SB-01 to assess the area of the suspect fill port;
- SB-02 and SB-03 to assess potential impacts from the adjacent garage to the south and the adjacent gasoline station to the east;
- SB-03 to assess the area of observed staining;
- SB-04 and SB-05 to assess the area of the historic gasoline tanks; and,
- SB-06 to assess the area of the historic lube oil tanks and the area of the anomaly identified during the geotechnical investigation.

Boring locations are shown on Figure 2. Soil borings were advanced to bedrock.

Continuous soil quality field screening was performed to the deepest interval attained at all boring locations. Visual and olfactory methods of screening were used during the field efforts to identify evidence of contamination. Additionally, a portable photo ionization detector (PID) was used to obtain qualitative measurements of volatile organic vapors. Soil boring logs are included in Appendix A.

Bedrock ranged in depth from 1 to 2 feet bgs in borings SB-01, SB-04, SB-05, and SB-06. One (1) grab soil sample and one (1) composite soil sample was collected from each of these four borings as follows.

- From ground surface to a depth of two (2) feet bgs or the soil/bedrock interface to assess the presence of historic fill material. The grab sample was collected from 0.5-1 foot bgs in SB-01 and SB-05 and 1.5-2.0 feet bgs in SB-04 and SB-06 and the composite sample was collected from 0-1 foot bgs in SB-01 and SB-05 and 0-2.0 feet bgs in SB-03, SB-04 and SB-06.

Bedrock ranged in depth from 5.5 to 9 feet bgs in borings SB-02 and SB-03. One (1) grab soil sample and one (1) composite soil sample was collected from these two borings as follows:

- From ground surface to a depth of two (2) feet bgs to assess the presence of historic fill material. The grab sample was collected from 1.5-2.0 feet bgs and the composite sample was collected from 0-2.0 feet bgs.
- From the soil/bedrock interface (since no elevated PID readings or visual/olfactory observations of impacted soils were noted from the subsurface soil intervals). The grab sample was collected 5-5.5 feet bgs in SB-02 and 8.5-9 feet bgs in SB-03 and the composite sample was collected from 4.5-5.5 feet in SB-02 and 8-9 feet bgs in SB-03.

Soil samples were placed in laboratory supplied containers and cooled to 4 degrees centigrade (wet ice) during shipment to the laboratory. ATC completed all chain of custody documents prior to sample shipment. Samples were submitted to AmeriSci in Weymouth, Massachusetts and analyzed for target compounds list (TCL) volatile organic compounds (VOCs) via EPA Method 8260B, TCL semi-volatile organic compounds (SVOCs) via EPA Method 8270C, Target Analyte List (TAL) metals via EPA Method 6010B, Pesticides via EPA Method 8081A, and PCBs via EPA Method 8082. The soil sampling results were tabulated and compared to NYSDEC Subpart 375-6: Remedial Program

Unrestricted Use Soil Cleanup Objectives (SCOs) and Restricted Use-Protection of Public Health-Residential (Restricted-Residential) SCOs, NYSDEC Technical and Administrative Guidance Memorandum #4046 (TAGM) Recommended Soil Cleanup Objectives (RSCOs), and Eastern USA (EUS) Soil Background Concentrations for metals included in TAGM. A copy of the laboratory analytical report is provided in Appendix E.

Drilling equipment was decontaminated by scrubbing with a non-phosphate detergent (i.e., Alconox) and rinsing with fresh water prior to use at each sample location. Upon completion of drilling, each boring was filled to near grade with drill cuttings (since no PID measurements were recorded). The boring was patched at grade with the appropriate materials (on-site soils).

6.0 SOIL ANALYTICAL RESULTS

6.1 Target Compound List (TCL) Volatile Organic Compounds (VOCs)

Only toluene was detected in one soil sample SB-05 (0-1) below all applicable criteria. The remaining soil samples did not indicate any VOCs above laboratory method detection limits (MDLs). Refer to Table 2 for a summary of TCL VOC detections.

6.2 Target Compound List (TCL) Semi-Volatile Organic Compounds (SVOCs)

Only two of the six soil samples [SB-03 (0-2) and SB-06 (0-2)] indicated SVOCs above the laboratory MDLs. Benzo(a)anthracene and benzo(a)pyrene were detected in soil sample SB-03 (0-2) above their corresponding TAGM RSCOs but below their Unrestricted Use and Restricted-Residential Use SCOs. Benzo(a)anthracene, benzo(a)pyrene, and benzo(b)fluoranthene were detected in soil sample SB-06 (0-2) above their corresponding TAGM RSCOs, Unrestricted Use and Restricted-Residential Use SCOs; benzo(k)fluoranthene and chrysene were detected above their corresponding TAGM RSCOs and Unrestricted Use SCO but below its Restricted-Residential Use SCO; dibenzo(a,h)anthracene was detected above its corresponding TAGM RSCO but below its Unrestricted Use and Restricted-Residential Use SCOs; and indeno(1,2,3-cd)pyrene was detected above its Unrestricted Use and Restricted-Residential Use SCOs but below its TAGM RSCO. The detected concentrations are attributed to the presence of fill material. Refer to Table 2 for a summary of TCL SVOC detections.

6.3 Target Analyte List (TAL) Metals

The laboratory results indicate that concentrations of one or more of the following metals were detected above TAGM RSCOs and/or Eastern USA Soil Background Levels in each of the soil samples analyzed: beryllium, chromium, copper, iron, magnesium, mercury, nickel, potassium, and zinc. Mercury was also detected above its Unrestricted Use SCO and below its Restricted-Residential Use SCO in soil sample SB-06 (0-2). Lead was detected above its Unrestricted Use SCO and below its Restricted-Residential Use SCO in soil samples SB-03 (0-2) and SB-06 (0-2). The laboratory results did not indicate any of the remaining concentrations of metals in soil samples above their corresponding TAGM RSCOs, Unrestricted Use SCOs, Restricted-Residential Use SCOs and/or not detected. The detected concentrations are attributed to natural (background) levels or the presence of fill material. Refer to Table 3 for a summary of TAL Metals detections.

6.4 Polychlorinated Biphenyls (PCBs)

PCBs were not detected in the soil samples collected. A copy of the laboratory analytical report is provided in Appendix E.

6.5 Pesticides

Pesticides were not detected in the soil samples collected. A copy of the laboratory analytical report is provided in Appendix E.

7.0 CONCLUSIONS AND RECOMMENDATIONS

The Phase II ESI identified the following:

1. The subsurface soils consist of brown coarse to fine sand with trace gravel, underlain by rock fragments. Weathered bedrock (schist) was encountered at depths ranging from one (1) foot bgs in the western portion of the basement to nine (9) feet bgs in the southeastern portion of the basement. A prior geotechnical investigation (Tectonic, May 2010) reported fill material from ground surface to approximately 7.5 feet bgs consisting of sand with varying gradations and amounts of silt and gravel and minor amounts of debris including brick and concrete. The Tectonic geotechnical investigation reported bedrock ranging in depth from 2 feet bgs in the western portion of the basement to 14.5 feet bgs in the southeastern portion of the basement.
2. Groundwater was not encountered in any of the borings advanced during the ATC Phase II investigation. The Tectonic geotechnical investigation reported groundwater at 3.5 feet bgs in the northwestern portion of the basement and 5.2 feet bgs in the southeastern portion of the basement.
3. The geophysical survey found no evidence to suggest the presence of USTs in the areas of the Site investigated.
4. SVOCs were detected at concentrations exceeding the NYSDEC TAGM RSCOs, the NYSDEC Unrestricted Use SCOs and Restricted-Residential SCOs. The presence of SVOCs may be reflective of fill material.
5. Metals were detected at concentrations exceeding the TAGM RSCOs, Unrestricted Use SCOs, and/or Eastern USA Soil Background Levels. Their presence is attributed to natural (background) levels.
6. VOCs were not detected above applicable cleanup standards. PCBs and pesticides were not detected in the soil samples collected.

Based upon the presence of fill materials at the Site, concentrations of SVOCs that exceed TAGM RSCOs and Unrestricted Use Soil Cleanup Objectives SCOs in soil samples, ATC recommends the preparation of a Remedial Action Plan (RAP) and Construction Health and Safety Plan (CHASP).

1.0 INTRODUCTION

Tectonic Engineering & Surveying Consultants P.C. has completed a subsurface investigation and geotechnical engineering evaluation for the proposed Sugarhill Residences project located at 414 W 155th Street in New York, New York. The purpose of the investigation was to evaluate the subsurface conditions in the area of the proposed building and to develop geotechnical recommendations for the design and construction of the proposed foundations. This report presents our findings and recommendations.

2.0 SCOPE OF SERVICES

The following services were performed for Broadway Housing Development Fund Company, Inc., herein referred to as Client:

- Performance of eight (8) test borings and the installation of two groundwater monitoring wells at locations near those requested on the boring plan included with the Request for Proposals.
- Field inspection services and oversight of the boring operations by an engineering geologist working under the direction of a Professional Engineer. Field inspection services included field locating the borings, preparing logs of encountered soil, rock, and groundwater conditions, and obtaining soil and rock samples for laboratory testing.
- Performance of laboratory testing of selected soil samples as deemed necessary to evaluate the engineering properties of the materials and to confirm field identification of the soil and bedrock.
- Performance of a geotechnical engineering evaluation of the subsurface conditions as related to the design and construction of the proposed building.
- Preparation of this geotechnical report describing the investigation and testing and their results, discussing the impact of the subsurface conditions on the proposed construction, and providing our geotechnical recommendations for the design and construction of the proposed building.

3.0 PROJECT AND SITE DESCRIPTION

The project site is located at 414 W 155th Street in New York, New York. The property is on the south side of W 155th Street and consists of a parking garage building which appears to have three floors and occupies the entire property. The building footprint measures about 155 feet along W 155th Street and is 137 to 144 feet deep, for a total area of 21,692 square feet (sf), and is centrally located along W 155th Street between St. Nicholas Avenue and St.

Nicholas Place. The building is bordered by open space to the west, an existing building to the south, and a gas station to the east. The building consists of a parking garage on the lower and middle levels. The lower floor level consists of a concrete slab supported at grade. Several areas of standing water were observed within the lower level. The lower level was accessed from an entrance on the north-facing side of the building near the northeast corner. Based on the site survey prepared by Erlandsen-Crowell & Shaw dated May 17, 2009, the elevation at the lowest floor level is +106.69 feet. Surface elevations outside the building range from +133.5 feet on the northwest corner to +108 feet on the southwest corner. The topography within the general area slopes down towards the east. An immediately west of the site is designated as "Land of the Old Croton Aqueduct" on the site survey.

The proposed construction will consist of a 13-story building containing residential space, a children's museum, a day care facility, and parking. The lower level will primarily be used for parking, with interior stair and elevator access to the upper levels. The lower level Finish Floor Elevation (FFE) is shown as El. +100 feet on the drawing titled "Cellar Floor Plan" dated February 3, 2010 by SLCE Architects. The cellar level will span the entire property footprint and contain 37 car stackers, and the first floor will contain the children's museum and office space. The footprint area of both the cellar and first floor will be approximately 21,680 sf. The upper floors will contain a day care facility and residential space, and will have smaller footprints than the lower levels.

4.0 SUBSURFACE INVESTIGATION

The subsurface investigation was performed on March 26, 29, and 30, 2010, and consisted of the drilling of eight (8) test borings and the installation of groundwater monitoring wells within two of the borings. The borings, which were designated B-1 through B-7 with B-4A as the additional boring, were performed as close as possible to locations selected by the Client as identified on the boring plan provided with the original Request for Proposals. Several borings were relocated due to access obstructions. A plan showing the as-drilled locations of the borings is attached as Figure 1.

The borings were performed by Craig Test Boring Co., Inc. utilizing one rubber tired ATV-mounted drill rig and one skid-mounted drill rig. The borings were advanced using rotary bit and casing methods through soil and highly decomposed bedrock, and an NX double-tube core barrel in more competent bedrock. The borings ranged in depth from 7.5 to 29.5 feet, with the deepest boring, B-4A, being performed near the southeast portion of the site. Typically, bedrock was cored for a length of 10 feet at each boring location. Bedrock was cored for greater lengths at boring B-4A and B-7, where rock was cored for lengths of 15 feet. Another exception is that no coring was performed at boring B-4, which was terminated at roller-bit refusal on bedrock. Standard Penetration Testing (SPT) was typically performed continuously to a depth of 12 feet or to lesser depths where refusal was encountered within weathered bedrock.

Groundwater observation wells were installed within borings B-1 and B-4A to depths of 13.75 feet and 29.5 feet, respectively. The wells consist of either a 5 or 10-foot length of 2-inch diameter PVC slotted well casing placed at the bottom of the borehole. The upper portion of the well consists of solid 2-inch diameter PVC pipe. Filter sand was used to fill the annulus between the PVC and the borehole to allow water infiltration. A bentonite plug was placed over the sand to minimize infiltration of surface water into the well. The remaining annular space was backfilled with drill cuttings. A man-hole type well covering was installed to protect the top of each well.

All drilling and testing operations were observed on a full-time basis by an engineering geologist to verify conformance to appropriate ASTM Standards. The engineering geologist also obtained soil and rock samples for laboratory testing and prepared logs of the encountered subsurface conditions. Copies of the boring logs and monitoring well installation logs are included in Appendix I.

5.0 LABORATORY TESTING

The laboratory testing of soils included three particle-size analysis tests and two tests for soil pH, sulfate, and chloride content. The particle-size analysis tests were conducted in accordance with ASTM Standard D422. The results of the laboratory testing are included in Appendix II and discussed in Section 6.

6.0 SUBSURFACE CONDITIONS

The subsurface conditions beneath the ground floor concrete slab generally consist of fill materials that either directly overlie weathered bedrock or is separated from the bedrock by a layer of native soil. The following subsections provide a general summary of the subsurface conditions. Detailed descriptions of the subsurface conditions are provided on the boring logs contained in Appendix II.

6.1 Concrete Slab & Existing Fill

A 3 to 6-inch thick concrete slab was encountered within each boring, comprising the floor of the lower level of the parking garage. Existing fill materials were encountered at all boring locations except borings B-1 and B-2. Fill was encountered to depths varying from as shallow as 2 feet to as deep as 7.5 feet in the southeast area of the site (B-4). The thickness of the fill is expected to vary across the site and could be deeper than 7.5 feet at some locations. The fill generally consists of sands of varying gradations with varying amounts of silt and gravel. The fill often contains minor amounts of debris including brick and concrete. Based on the results of Standard Penetration Testing (SPT), the fill is generally in a loose condition and occasionally in a medium dense condition. The higher SPT N values within the fill are attributed to the presence of coarser gravel and debris. The fill classifies as Class 7 material per the New York City Building Code (Code).

6.2 Native Soils and Weathered Bedrock

Native soils were encountered underlying the floor slab or fill within borings B-2, B-4A, and B-7. The native soils typically consist of coarse to fine sand with varying amounts of gravel and little silt. The native soils are micaceous and transition to residual (derived from bedrock) soils within some borings. Based on the SPT results, the native soils are typically in a medium dense to very dense condition, especially where deeper and are residual in origin. The native soils classify as Class 3a or 3b per the Code.

Weathered bedrock was encountered within all borings, ranging between 0.5 and 3 feet in thickness. The weathered bedrock, when sampled using the split-spoon sampler, consisted of gravel-sized fragments with lesser amounts of sand and silt. SPT N-values indicate the weathered bedrock to be in a very dense condition. Split-spoon sampler refusal, which is defined as more than 50 blows for less than 6 inches of sampler penetration, was encountered within many of the samples attempted within the weathered rock. The weathered rock classifies as Class 3a per the Code.

6.3 Bedrock

The bedrock consists of Manhattan schist. The schist is fresh to slightly weathered, slightly to moderately fractured, coarse to fine grained, and hard. The fracturing of the schist was generally near horizontal; however, some fractures were observed to be dipping as steep as 85 degrees from horizontal. The degree of weathering generally decreased with the depth of each core. The top of the competent bedrock was generally encountered at depths ranging from 2 to 7 feet below grade within the borings except at boring B-4A where it was at a depth of 14.5 feet. These depths correspond to elevations ranging from +100 to +105 feet except at boring B-4A which corresponds to +92.5 feet. The bedrock surface is deepest near the southeast portion of the site. The bedrock is expected to vary throughout the building area and may be deeper than 14.5 feet at some locations.

The Rock Quality Designation (RQD) of the cored intervals, which is the cumulative sum of the lengths of the recovered core pieces having lengths greater than 4 inches divided by the length of the cored interval, expressed as a percentage, ranges from 55 to 100 percent in the upper 5 feet of rock core. This range in RQDs indicates rock mass qualities varying from fair to good. The RQDs from the second 5 feet of core within most borings ranges from 60 to 100 percent; however, the RQD of the second core was generally less than the upper core samples. In accordance with the Code, the rock varies from Class 1a to Class 1c, depending on fracture spacing and frequency.

6.4 Groundwater

Groundwater was measured within the monitoring wells installed at borings B-1 and B-4A at depths of 3.5 and 5.2 feet below grade. Due to the introduction of drilling fluids during rock core drilling, accurate groundwater readings could not be made after the borings were advanced into bedrock. It is noted that groundwater levels fluctuate seasonally and with changing weather conditions. The fluctuations may be substantial due to the relatively low permeability of the deeper, less weathered, bedrock at the site. The standing water observed within the lower level of the parking garage is likely groundwater which infiltrated the building.

7.0 SEISMIC SITE COEFFICIENTS AND LIQUEFACTION POTENTIAL

As part of our investigation, we have evaluated an appropriate site coefficient for use in seismic design. In accordance with Section 1615.1.1 of the Code, as the design professional preparing this report, we recommend that Site Class B be assumed based on the results of the subsurface investigations performed at the site. Site Class B results in maximum spectral response acceleration at short periods (S_{m_s}) equal to 0.365g and at 1-second periods (S_{m_1}) equal to 0.071g.

Liquefaction of soils can be caused by a strong vibratory motion due to earthquakes. Both research and historical data indicate that loose, granular soils saturated by a shallow groundwater table are most susceptible to liquefaction. Liquefaction occurs when an earthquake and associated ground shaking of sufficient duration results in the loss of grain-to-grain contact due to a rapid increase in pore water pressure, causing the soil to behave as a fluid for short periods. The potential for liquefaction at this site is low due to the shallow bedrock conditions.

8.0 DISCUSSION AND CONCLUSIONS

Based on the results of the subsurface investigation, the primary geotechnical issues impacting the design and construction of the proposed building is the presence of shallow bedrock and shallow groundwater. As summarized in Section 6, competent bedrock was encountered at elevations ranging from +92.5 feet to +105 feet across the building footprint. Bedrock was encountered at or above the proposed Finish Floor Elevation (FFE) of +100

feet at all but one boring location. Based on the cellar level having an FFE of +100 feet, more than 5 feet of rock removal will be required in some locations. Additionally, the depth to bedrock and the location of the foundations for the adjacent building might make excavation for shallow foundations difficult. If excavations are to proceed, the proper shoring and dewatering would be required and should be in place prior to excavation, especially in the southeast portion of the building area where bedrock is deeper than the planned excavation depth. An alternative to shoring and dewatering where rock is deep would be to utilize deep foundations such as drilled piers, or drilled micropiles, to extend from the foundation down to the bedrock.

The bedrock at the site classifies as Class 1a, 1b or 1c rock per the Code. These classifications allow for relatively high allowable bearing pressure and pile foundation loading. The foundation bearing pressure should be adequate to support the loads for the proposed building. Based on the typical RQDs of the cored intervals, it is anticipated that all rock except that characterized as highly to completely weathered will require the use of drilling and splitting or hydraulic hoe-rams to remove in a timely, cost efficient, manner. Other means of rock splitting such as expansive grouts or other non-high explosive means are impractical due to the volume of rock that needs to be excavated. Blasting of the rock would be the most efficient method of rock removal, however, blasting may be impractical given the urban setting of the project site.

The basement walls of the existing building currently serve as retaining walls resisting the lateral loading imposed by the retained earth on the western portions of the property. During demolition of the existing building, those walls may become less stable due to a reduction of vertical load. Care should be exercised when performing demolitions of the upper floors not to weaken the foundation or the basement walls. Excavation should be sequenced and designed to maintain stability of the adjacent properties at all times. Excavation support will also be required to retain the soils within the courtyard area west of the existing building during construction. If possible, the temporary excavation support measures should be in-place prior to building demolition. It is possible that the existing basement was constructed by excavating bedrock, and that the sidewalls of some of the excavations will consist of bedrock. Exposed bedrock sidewalls should be evaluated during

construction by a geotechnical engineer specializing in geology for potential instability concerns associated with the strike and dip of joints and the measures necessary to ensure stability of the rock cut.

Groundwater levels were measured at elevations ranging from approximately +101.8 to +103.5 feet at the monitoring wells installed at the site. In addition, several areas of standing water were observed within the basement level of the parking garage at the time of the subsurface investigation. Based on the above findings, the building will need to be designed to be water tight and to resist hydrostatic pressure. A less desirable alternative would be the incorporation of a permanent dewatering system. This approach would require redundancy in pumps as well as the power supply since failure of the dewatering system could result in substantial damage to the building. This type of system would also require a legally permitted point of discharge for the pumped groundwater. Groundwater is anticipated to be present at a higher elevation in the western portion of the site.

Other conclusions that can be drawn from the performed investigation are as follows:

- The subsurface conditions are favorable with respect to building support. The proposed building can be supported on conventional shallow spread footings and continuous wall footings founded on bedrock. Based on the performed borings, bedrock will be at or in close proximity to the minimum bearing depth based on the proposed lower level finish floor elevation. An exception is the southeast portion of the site, where bedrock was found approximately 7.5 feet below the finish floor elevation. In these areas, construction of shallow foundations may not be cost-effective.
- The proposed basement wall within the western and northern portion of the building will retain approximately 30 feet of soil within the proposed plaza area.
- The depth and dimension of the foundations for the neighboring buildings should be investigated prior to proceeding with demolition. Neighboring building foundations, below-grade utilities within the sidewalks adjacent to the site, pavements, sidewalks, and any other permanent feature which may be partially undermined by the excavation should be properly underpinned or excavation support systems should be in place prior to excavation.
- The existing fill and native soils are generally not suitable for use as controlled fill due to their high silt contents. It is also noted that the existing fill contains demolition debris such as brick and asphalt. Oversize debris as well as cobbles and boulders should be anticipated within the overburden soils.

- Additional subsurface investigation could be performed to identify the depth to bedrock within the southeast portion of the building (area of B-4A) which would provide a better understanding of the effort required to construct the foundations in this area and the excavation support measures necessary for construction.

9.0 RECOMMENDATIONS

The following sections outline our recommendations for foundation design, design of slabs-on-grade floors, and design for lateral loading.

9.1 Building Foundations

The majority of the borings encountered bedrock at or above the proposed cellar floor elevation. The foundations for the building are anticipated to consist of shallow foundations bearing directly on the bedrock. Within one of the borings, the bedrock surface was found approximately 7.5 feet below the proposed cellar floor elevation. The depth to the top of bedrock in this area may require the use of deeper foundations, due to the significant excavation and dewatering effort that would be required. The following sections provide design criteria for shallow and deep foundations.

9.1.1 Shallow Foundations

The bedrock at the site varies in classification per the Code from 1c to 1a. Although some of the bedrock at the site classifies as 1a, the majority of the rock was found to be 1 b, and some was found to be 1c. It is recommended that the building foundations be designed assuming the foundation will bear on Class 1c rock. If the building were designed to bear on Class 1a or 1b rock, and Class 1c rock was found during excavation, the 1c rock would need to be over-excavated to expose the more competent rock. The excavation of Class 1c rock is anticipated to require significant effort and will likely be time consuming and costly. If the building is designed to bear on Class 1c rock, the potential need for over-excavation of bedrock to achieve the desired rock class is reduced. Foundations designed to bear on Class 1c rock should assume a net allowable bearing pressure of 20 tons per square foot (tsf).

Spread footing foundation should have a minimum width of 2 feet. Continuous footings should have a minimum width of 12 inches. Using the above design criteria, total settlement is estimated to be less than 0.5 inch and differential settlements are estimated to be less than 1/4 inch. The differential settlement is estimated over a distance of about 30 feet along continuous footings or between adjacent column footings. Footing subgrade preparation should be performed in accordance with Section 10.2 of this report.

9.1.2 Deep Foundations

The top of the Class 1c rock surface was found at 7.5 feet below the FFE of the cellar within the southeast portion of the building (boring B-4A). At all other locations, bedrock was encountered above the FFE. If excavation to this depth is not practical, or if the bedrock surface is highly variable and becomes deeper in some areas, short drilled piles or drilled shafts can be used to extend from the foundation level to the competent bedrock. It is recommended that drilled foundations (caisson piles or micropiles) be used in this case instead of driven piles due to the uncertainty associated with the depth to bedrock. Drilled foundations will be more easily altered in the field than pre-determined pile sections or lengths. The Code provides no limit to the maximum allowable load for caisson piles. If selected, caisson piles should consist of a minimum 7-inch diameter drilled pile with a socket extending into the rock the minimum depth required by the Code. Caisson piles should be designed assuming a net allowable bearing pressure of 20 tsf at the base of the caisson, and should ignore side friction for support. It should be noted that the Code requires load testing if pile loads exceed 40 tons.

9.1.3 Design for Lateral Loading

The following soil parameters are provided for designing to resist lateral movement and for analyzing lateral deflection and lateral stability. Lateral deflection at the top of the pile should be checked using a computer program such as LPILE.

TABLE 9.1.3 LATERAL SOIL PARAMETERS						
Elevation ⁽¹⁾ (feet)	γ (pcf)	ϕ	C_u (psf)	K_l (pci)	K_p	ϵ_{50} (inch / inch)
Above +102.5	60	34°	NA	60	3.53	NA
Below +102.5	80	NA	6,000	2,000	NA	0.004

Note:

- 1) Elevations estimated based on the surface elevations.
- 2) The soil parameters provided above reflect the long-term high groundwater elevation of +108 feet.

Where,

- γ = design unit weight of soil (pounds per cubic foot).
 ϕ = angle of internal friction (degrees).
 C_u = undrained shear strength (pounds per square foot).
 K_l = coefficient of lateral subgrade reaction (pounds per cubic inch) required for p-y curve methods of analysis.
 K_p = passive earth pressure coefficient.
 ϵ_{50} = axial strain of soil corresponding to one-half of the maximum principal stress difference.
 NA = not applicable

When installed as a group, the appropriate reduction factors should be applied to individual piles based on the pile group configuration.

9.1.4 Pile Installation

Any obstructions present within the fill soils encountered at the site should be removed prior to pile installation. Drilled piles may encounter debris, cobbles, or boulders which might make installation difficult. The appropriate methodologies should be employed by the contractor to ensure successful installation of the piles.

A pre-condition survey of the neighboring buildings should be performed prior to installing any piles, any excavation support systems or rock excavation. Additionally, monitoring points should be established on neighboring structures to evaluate the vibrations or movements which may be experienced at those

structures as a result of the pile installation and rock excavation operations. A peak particle velocity vibration limit should be established prior to commencing operations. If this limit is exceeded, construction should stop and construction methods should be re-evaluated. It should be noted that the tolerable limits for vibration and peak particle velocity may be dictated more by the composition and condition of the structure being monitored than the distance of the structure from the site.

9.1.5 Pile Load Testing

The Code requires a minimum of one load test per 5,000 square feet of new foundation area for piles having a design capacity greater than 40 tons. If required by the Code, pile load testing should consist of static load tests. All static load tests should be performed in accordance with Code requirements.

9.2 Cellar Floor Slab

The cellar floor slab should bear on a 6-inch thick layer of free-draining crushed stone placed over a subgrade consisting of medium dense to dense native soil, bedrock, or controlled fill. Backfill around foundations below floor slabs should consist of compacted controlled fill. The crushed stone and other subgrade preparations should conform to the requirements of Section 11 of this report.

A subgrade modulus of 175 pci is recommended for the design of slab-on-grade floors. The subgrade modulus is suitable for estimating distributions of bearing pressure beneath the slab and for estimating bending moments and shear within the slab. It is not intended for the purpose of calculating total or differential settlements. Proofrolling, subgrade preparation and controlled fill material and placement recommendations are provided in Section 11 of this report.

Unless a permanent dewatering system is incorporated into building design, design of the ground floor slab will be governed by the hydrostatic pressure resulting from a high groundwater level. We recommend that a design groundwater elevation of +108 feet be used to evaluate the uplift pressure resulting from shallow groundwater.

Recommendations for rock anchor design and installation, if necessary to resist hydrostatic forces, can be provided upon request.

9.3 Design for Lateral Loading

The borings were performed within the lower level of the existing building; however, the building walls will retain soils up to El. +130 feet on the west and north sides of the building. If these soils are removed and replaced with compacted controlled fill, then the lateral loading on the wall will be different than if the existing soils remain in-place and the wall is constructed with the aid of temporary supports. The table below provides lateral earth pressure parameters for both the existing soils for design of temporary or permanent earth retaining systems without removal of existing soils and replacement with controlled fill, and for controlled fill in the event that these removals are performed:

Soil Parameter	Existing Soil	Controlled Fill
Angle of internal friction	30°	34°
Active earth pressure coefficient (K_a) for horizontal backfill surface ⁽¹⁾	0.33	0.28
At rest earth pressure coefficient (K_o) for horizontal backfill surface ⁽²⁾	0.50	0.44
Passive earth pressure coefficient (K_p) ⁽³⁾	3.00	3.54
Coefficient of base friction ⁽⁴⁾	0.6	0.6
Total unit weight of soil (pounds per cubic foot) ⁽⁵⁾	120	120

- 1) Use for free standing walls where movement of up to $0.0025 \times$ height of wall is both possible and tolerable. Otherwise, use at-rest coefficient.
- 2) Use for walls restrained against outward lateral movement
- 3) Assume passive pressure below a depth of 4 feet only.
- 4) Coefficient of base friction applies to mass concrete placed directly against bedrock.
- 5) Subtract unit weight of water (62.4 pcf) to obtain buoyant unit weight below the groundwater level.

Unless a permanent dewatering system is incorporated into building design, building walls should be designed to resist the hydrostatic pressure resulting from shallow groundwater and the backfill soils. As previously noted, we recommend that the design groundwater be taken as +108 feet unless a more detailed hydrologic evaluation is performed.

Additional loading due to temporary and permanent surcharges, such as automobiles and construction traffic, should be added to the lateral loading exerted by the backfill. Loads due to supported structures should be applied in appropriate combinations with the lateral loads.

Walls should be backfilled in accordance with Section 10.4 of this report. Placement and compaction of backfill should be observed and tested by a geotechnical engineer to monitor that proper compaction of the fill soils is achieved.

Below grade walls should be waterproofed below El. +108 feet, and dampproofed above El. +108 feet. Dampproofing should include a layer of free draining crushed stone with a collector pipe draining to a positive outlet. The use of a fabricated composite drainage board is also acceptable. A perimeter drainage system may be needed to minimize the potential for the accumulation of subsurface seepage against the up-gradient side of the building.

10.0 EARTHWORK CONSTRUCTION CRITERIA

The following sections provide our recommendations for earthwork construction.

10.1 Subgrade Preparations

All subgrades should be inspected by a geotechnical engineer to verify the acceptability of the subgrades. Rock subgrades should be prepared approximately level and they should be cleaned of all soil materials. If lean concrete is used to provide a level subgrade, the geotechnical engineer should evaluate the degree and direction of the slope of the rock surface and their variation over the area of the leveling pad to determine the stability of the leveling pad relative to sliding failure along the concrete-bedrock interface. If it is determined that the leveling pad is unstable due to shear forces resulting from a sloping rock surface, the bedrock surface should be stepped or dowels should be installed to resist the sliding forces.

10.2 Groundwater Control

Groundwater seepage should be anticipated, and dewatering should be performed as required. The dewatering of soil areas, such as during fill placement, should be performed in a manner that will prevent loosening or migration of soil materials. Water should be removed from subgrades prior to concrete placement to prevent concrete segregation.

Consideration should be given to installing a groundwater cut-off system within the upslope side of the site to intercept groundwater from flowing into the excavation. Any significant dewatering should be designed by a Professional Engineer licensed in New York State, and reviewed by a geotechnical engineer to evaluate the potential impacts of the dewatering on neighboring structures.

10.3 Fill Materials, Placement and Compaction

As indicated in the Code, controlled fill should consist of clean sand, gravel, crushed stone, crushed gravel, or a mixture of these, and should contain no organic matter. The fill materials should contain no particles exceeding 4 inches in largest dimension. No more than 30 percent of the material should be retained on the 3/4 inch sieve.

The material passing the 3/4 inch sieve should contain, by weight, no more than 40 percent passing the No. 100 sieve and no more than 12 percent passing the No. 200 sieve. Fill and backfill material, both on-site and soils imported to the site, should be free of trash, debris, roots, vegetation or other deleterious materials.

Based on the results of our subsurface investigation and laboratory testing, the on-site soils are not suitable for use as controlled fill due to their high silt and/or clay contents.

All controlled fill should be compacted to at least 95 percent of the maximum dry density at near optimum moisture contents as determined by ASTM D1557. The lift thickness for the fill soils will vary depending on the type of compaction equipment used. Fills should generally be placed in uniform horizontal lifts not exceeding 8 inches in loose thickness in open areas. In confined areas, the loose lift thickness should be reduced to 4 inches or less and each lift should be compacted with sufficient passes of hand operated vibratory or impact compaction equipment. Compaction within 5 feet of building walls should be done with hand-operated equipment.

A geotechnical engineer with appropriate field and laboratory support should inspect all footing and floor subgrades, approve materials for use as fill, and test backfill materials for compliance with the recommended compaction.

Free draining crushed stone placed below floor slabs and as drainage materials behind retaining walls should be Underdrain Filter Type I materials as specified in the New York State Department of Transportation Standard Specifications as follows:

<u>Sieve Size</u>	<u>Percent Finer by Weight</u>
1 inch	100
1/2 inch	30 - 100
1/4 inch	0 - 30
No. 4	0 - 10
No. 8	0 - 5

10.4 Rock Excavation and Subgrade Preparation

Based the results of our subsurface investigation, it appears that conventional heavy ripping techniques will only be feasible through the upper highly weathered bedrock. Otherwise, more extensive rock removal techniques, such as drilling and splitting or controlled blasting, will be required to further excavate the bedrock. Code requirements for noise and vibrations should be considered when selecting the method of rock removal.

If proposed, blasting techniques should be employed that minimize over-breakage at the foundation subgrades. Blasting operations should also be conducted in a manner that will minimize ground vibrations at adjacent structures and also limit the amount of air pressure (blast noise).

We recommend that a blast monitoring program be implemented to control blasting through limitations on charges per round, charges per delay, peak particle velocities, and maximum level of air overblast pressures at adjacent structures. In addition, blasting mats should be utilized to minimize the hazard of fly-rock to adjacent structures and to personnel on-site. A qualified contractor licensed and insured for use of explosives should perform rock excavations using drill and blast techniques. If there is to be a separate payment for soil and rock excavation, specific criteria should be established. We recommend that the bid documents be clear regarding the definition of rock and methods of measurement of rock.

A preblast condition survey should also be performed on all structures located within a minimum distance of 300 feet of the area of proposed blasting. This will assist in evaluating safe blast-included vibration limits and assist in mitigating false vibration induced damage claims.

Subgrades consisting of highly weathered bedrock should be protected from the effects of weather. Adequate protection can usually be obtained by placing a layer of lean concrete over the subgrade after approval of the subgrade by the geotechnical

engineer. Lean concrete should have a minimum unconfined compressive strength of 1,500 pounds per square inch at 28 days.

10.5 Trench Excavations

Utility trenches and any vertical cut in soil above 4 feet in height should be sloped back for safety unless sheeting or a bracing system is used. OSHA and other applicable agency requirements pertaining to worker safety should be met during excavation, dewatering, and backfilling activities. Design of all shoring and bracing should be performed by a licensed Professional Engineer. Bedding and backfill for all utility piping should be clean granular fill conforming to the pipe manufacture's specifications and/or local building codes.

11.0 CONSTRUCTION MONITORING

A geotechnical engineer familiar with the existing subsurface conditions and having the appropriate laboratory and field testing support should be engaged by the owner to observe that all earthwork is performed in accordance with the specifications and the design criteria provided in this report.

The following work should be performed under the observation of the geotechnical engineer:

- Excavation of bedrock/blast monitoring
- Placement and compaction of structural fill
- Footing and floor slab subgrade preparation
- Pile installation and load testing, if required
- Rock anchor installation, if required

All materials proposed for use as soil fill should be tested and approved prior to delivery to the site. All fill materials should be tested as they are being placed to verify that the required degree of compaction is being achieved.

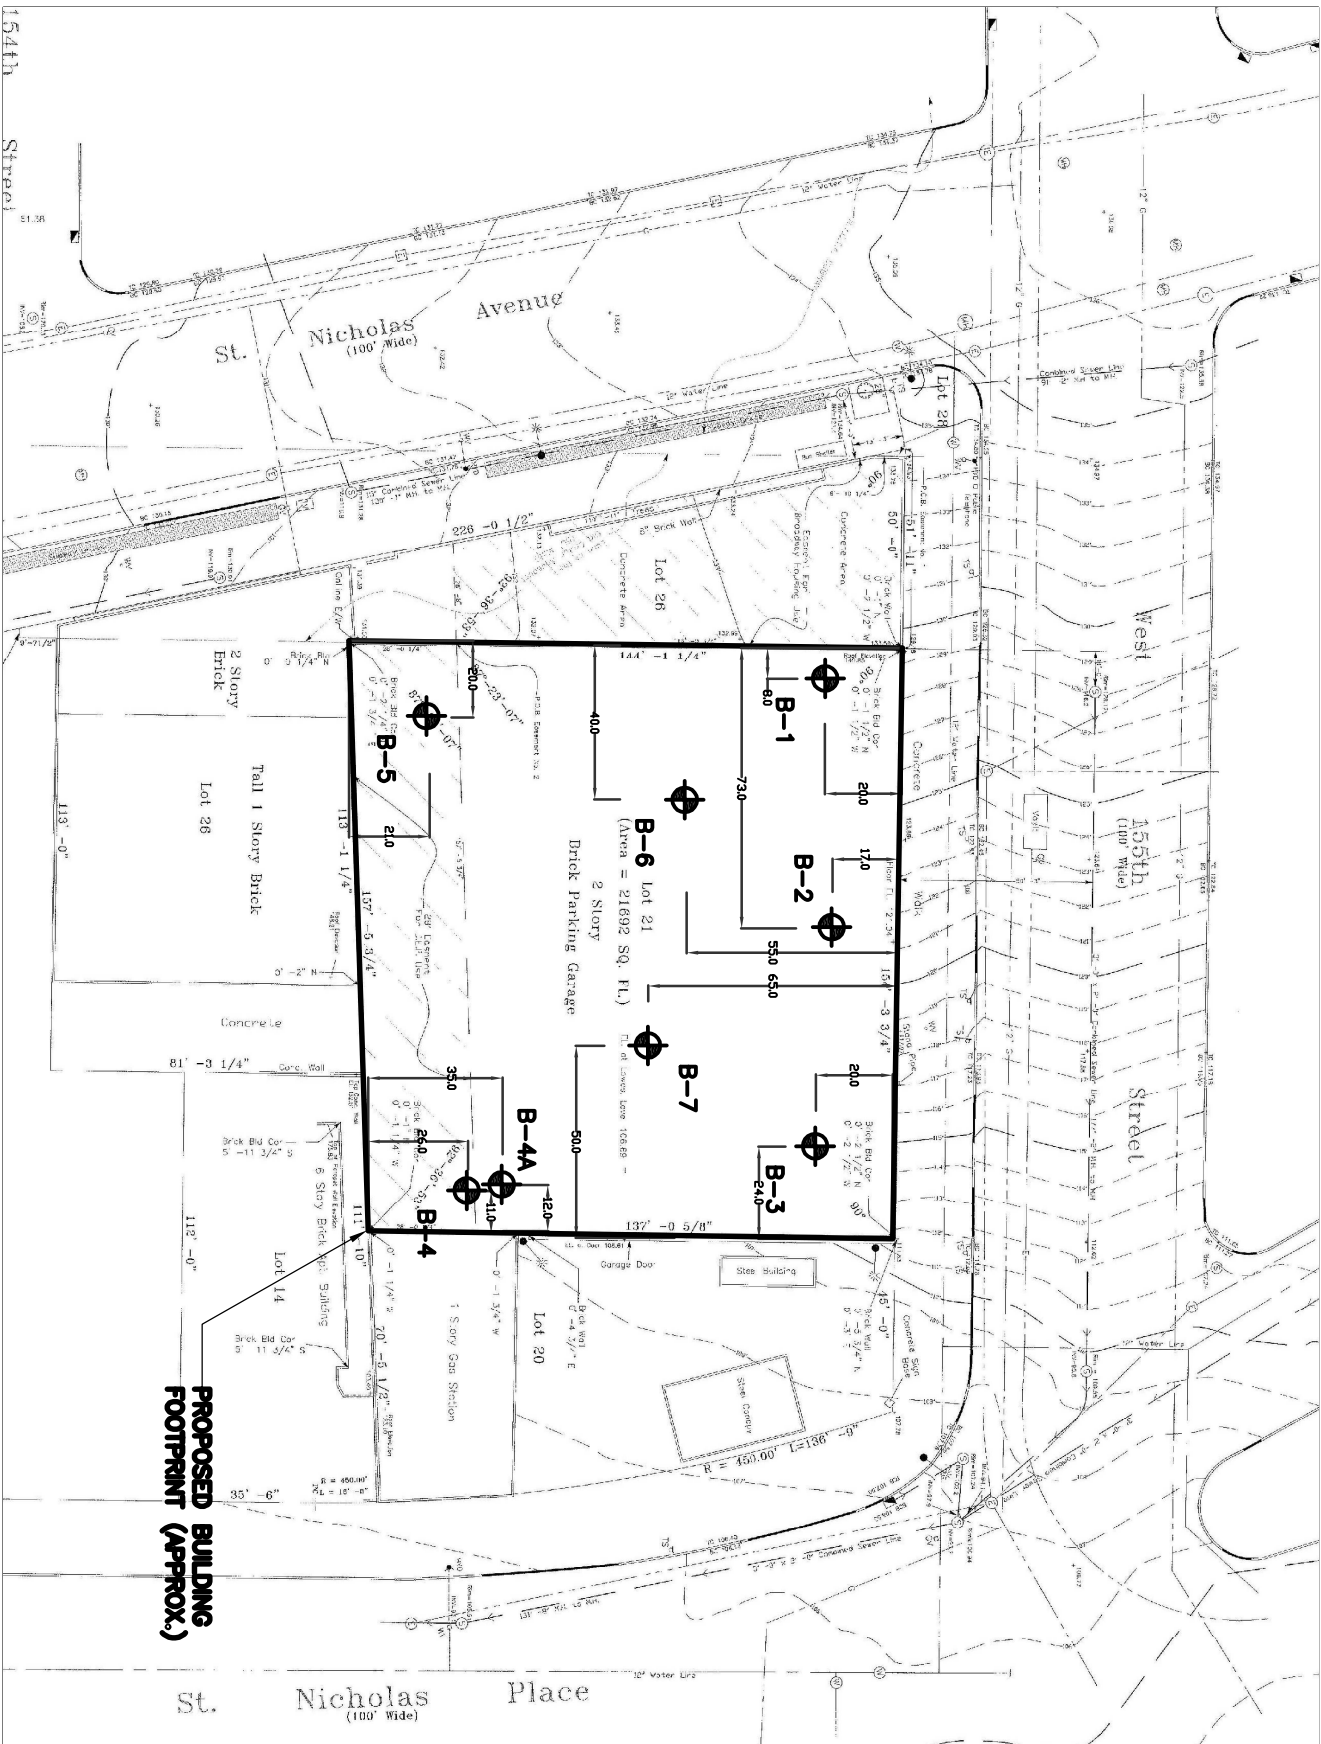

12.0 LIMITATIONS

Our professional services have been performed using that degree of care and skill ordinarily exercised under similar circumstances by reputable geotechnical engineers and geologists practicing in this or similar situations. The interpretation of the field data is based on good judgment and experience. However, no matter how qualified the geotechnical engineer or detailed the investigation, subsurface conditions cannot always be predicted beyond the points of actual sampling and testing. No other warranty, expressed or implied, is made as to the professional advice included in this report.

The recommendations contained in this report are intended for design purposes only. Contractors and others involved in the construction of this project are advised to make an independent assessment of the rock, subsoil and groundwater conditions for the purpose of establishing quantities, schedules and construction techniques.

This report has been prepared for the exclusive use of Broadway Housing Development Fund Company and their agents, for the specific application to the proposed construction detailed in this report. In the event that any changes are made to the location or layout of the proposed construction, this report will not be considered valid unless reviewed and verified in writing by Tectonic Engineering & Surveying Consultants, P.C. We recommended that Tectonic be retained to provide construction monitoring and inspection services to ensure proper implementation of the recommendations contained herein, which would otherwise limit our professional liability.

1.0 INTRODUCTION

Enviroprobe Service, Inc. (Enviroprobe) is an environmental investigation services firm which provides monitoring well installation (HSA), Geoprobe (DPT) drilling services and Environmental & Engineering Geophysics (EEG) services to the environmental consulting and engineering community.

Enviroprobe conducted a subsurface geophysical investigation at the subject property within client-specified areas of concern. Due to conditions and objectives, the investigation utilized a Sensors & Software Inc. cart-mounted Ground Penetrating Radar (GPR) unit with a 250 MHz antenna, a Radiodetection RD4000T10 multi-frequency transmitter, a Radiodetection RD4000 receiver, and a Fisher TW-6 metallic locator.

Ground penetrating radar (commonly called GPR) is a geophysical method that has been developed over the past thirty years for shallow, high-resolution, subsurface investigations of the earth. GPR uses high frequency pulsed electromagnetic waves (generally 10 MHz to 2,000 MHz) to acquire subsurface information. An EM wave is propagated downward into the ground by a transmitting antenna. Where abrupt changes in electrical properties occur in the subsurface, a portion of the energy is reflected back to the surface. This reflected wave is detected by a receiver antenna and transmitted to a control unit for real time processing and display. The penetration depth of the unit varies from several inches to tens of feet according to site-specific conditions. The penetration depth decreases with increased soil conductivity. The penetration depth is the greatest in ice, dry sands, and fine gravels. Clayey, highly saline or saturated soils, areas covered by concrete, foundry slag, or other highly conductive materials greatly reduce GPR penetration. GPR is a method that is commonly used for environmental, engineering, archaeological, and other shallow investigations.

The Radiodetection (RD) transmitter and receiver are commonly used for pipe and cable locating. The multi-frequency transmitter can be directly connected, clamped, or used to induce a signal in a target line while the multi-frequency receiver is used to measure the signal from energized lines.

The Fisher TW-6 metallic locator is designed to find pipes, cables and other metallic objects such as underground storage tanks (USTs). The TW-6 transmitter generates an electromagnetic field that induces electrical currents in the subsurface. These currents produce a secondary electromagnetic field that is measured by the TW-6 receiver. One surveyor can carry both the transmitter and receiver together to search for underground metallic objects, although the TW-6 response can also be affected by the electrical properties of non-metallic materials in the subsurface.

2.0 SCOPE OF WORK

On November 3, 2010, a geophysical technician from Enviroprobe Service Inc. was mobilized to the subject property to perform a geophysical investigation. The purpose of this investigation was to detect possible USTs, designate underground conduits/utilities, and investigate proposed boring locations within client-specified portions of the subject property. The survey included areas around (7) proposed boring locations which were located on the basement level of the parking structure. The ground surface of the survey area consisted of concrete surfaces.

3.0 SURVEY RESULTS

The survey was conducted using a cart-mounted GPR unit, a Fisher TW-6 metallic locator, and a RD unit. The RD unit was used to trace common utilities from sources in and around the survey area. The RD receiver was also used in the passive mode to search for live underground electrical power cables and other utilities emitting 60Hz electromagnetic signals. When possible, the locations of utilities were confirmed with the GPR. Whenever possible and necessary, the manhole covers in and around the survey area were opened and the manholes were visually inspected for underground utilities. A GPR survey was also performed in a grid pattern in at least two orthogonal directions to search for underground utilities. Designated utilities were marked on-site with spray paint using the following colors; green – storm drain and sanitary sewer, and pink – unknown utility.

The GPR and TW-6 were used in a grid pattern over all client-specified areas of the property. Based on the results of the TW-6 survey, there was one area of concern (AOC) designated and marked as AOC #1. This AOC measured approximately 6 ft by 8 ft and was located on the northwest corner of the site. Due to near surface signal loss, it could not be determined with the GPR whether the area were consistent with an UST. When performing an investigation with the TW-6, this area produced positive metallic results. The approximate extent of this anomaly was designated on-site with pink spray paint.

Seven proposed boring locations were investigated with the GPR, TW-6, and RD receiver. When possible, an area of approximately 10 ft by 10 ft surrounding each boring location was scanned. In some cases, obstructions prevented an investigation of the entire 10 ft by 10 ft area. All designated anomalies were marked on-site with spray paint.

4.0 LIMITATIONS

Due to surface conditions and subsurface content, the GPR signal penetration was estimated at 2 feet in the majority of the survey area.

The TW-6 survey was kept up to 6 feet away from aboveground objects containing metals depending on the sizes, shapes and positions of the metal objects. The TW-6 survey was not effective in areas with reinforced concrete.

Due to the dielectric properties of the subsurface, plastic polymer and fiberglass utilities may not have been detected.

All field services were conducted in compliance with the industry standard of care guidelines found in ASCE 38-02 (Level B).

5.0 WARRANTIES

The field observations and measurements reported herein are considered sufficient in detail and scope for this project. Enviroprobe Service, Inc. warrants that the findings and conclusions contained herein have been promulgated in accordance with generally accepted environmental engineering methods. There is a possibility that conditions may exist which could not be identified within the scope of this project and were not apparent during the site activities performed for this project.

Enviroprobe represents that the services were performed in a manner consistent with that level of care and skill ordinarily exercised by environmental consultants under similar circumstances. No other representations to Client, express or implied, and no warranty or guarantee is included or intended in this agreement, or in any report, document, or otherwise.

Enviroprobe Service, Inc. believes that the information provided in this report is reliable. However, Enviroprobe cannot warrant or guarantee that the information provided by others is complete or accurate. No other warranties or guarantees are implied or expressed.

GPR data is subject to signal anomalies and operator interpretation. The GPR data is intended to provide the locations of areas of concern requiring additional investigation or the approximate location of underground structures and utilities. Great care must be utilized when excavating and/or drilling around underground structures and utilities since GPR data can only be used for estimation purposes and GPR data is subject to misinterpretation. Enviroprobe can not guarantee that utilities, post-tension cables, and/or rebar will not be incurred during drilling, cutting, coring, or excavating activities.

This report was prepared pursuant to the contract Enviroprobe has with the Client. That contractual relationship included an exchange of information about the property that was unique and between Enviroprobe and its client and serves as the basis upon which this report was prepared. Because of the importance of the communication between Enviroprobe and its client, reliance or any use of this report by anyone other than the Client, for whom it was prepared, is prohibited and therefore not foreseeable to Enviroprobe.

Reliance or use by any such third party without explicit authorization in the report does not make said third party a third party beneficiary to Enviroprobe contract with the Client. Any such unauthorized reliance on or use of this report, including any of its information or conclusions, will be at the third party's risk. For the same reasons, no warranties or representations, expressed or implied in this report, are made to any such third party.

CLIENT: <u>ATC ASSOCIATES, INC.</u>	WORKORDER: <u>1011-078</u>
CLIENTS JOB: <u>Parking Garage</u>	RECEIVED BY: <u>MP</u>
RECEIVED DATE: <u>11/5/10</u>	SHIPPING METHOD: <u>EASTLIN</u>
TEMP UPON RECEIPT: <u>5.4°C</u>	<u>CONNECTION</u>

"No" responses must be explained in the comment section below.

Checklist

YES NO NA

Were custody seals on shipping container(s) intact? Check "NA" if no seals, or if containers were hand delivered.			X
Were Chain of Custody Forms included with the samples?	X		
Were Chain of Custody Forms properly filled out (ink, signed, etc.)	X		
Were all containers received in good condition (Check for breakage/leaks)?	X		
Were all containers labeled with required information (Sample Id, date, signed, analysis, preservation)?	X		
Were the correct containers used for the tests indicated?	X		
Were proper preservation techniques indicated?			X
Were samples received within holding times? If "NO" nonconformance form is required.	X		
Were all VOA bottles checked for the presence of air bubbles? If bubbles were found please note in the comment section.			X
Were samples in direct contact with wet ice?			
If "NO" check one: <input type="checkbox"/> Blue Ice <input type="checkbox"/> No Ice	X		
Is sample temperature recorded?	X		
If "NO" check one: <input type="checkbox"/> Unable to record <input type="checkbox"/> Temp taken near samples	X		
Were pHs of samples checked and recorded on the COC forms?			X
Did the laboratory accept samples?	X		
Will samples be subcontracted? If "yes" list subcontractor and tests in specified sections below.	X

This Health and Safety Plan (Plan) has been written for the use of ATC Associates Inc. (ATC) and its employees. It may also be used as a guidance document by properly trained and experienced ATC subcontractors. However, ATC does not guarantee the health or safety of any person entering this Site.

Due to the potential hazardous nature of this Site and the activity occurring thereon, it is not possible to discover, evaluate, and provide protection for all possible hazards which may be encountered. Strict adherence to the health and safety guidelines set forth herein will reduce, but not eliminate, the potential for injury at this Site. The health and safety guidelines in this Plan were prepared specifically for this Site and should not be used on any other Site without prior research by trained health and safety specialists.

ATC claims no responsibility for use of this Plan by others. The Plan is written for the specific Site conditions, purposes, dates, and personnel specified and must be amended if these conditions change.

4. Turn left at Haven Ave and Arrive at New York Presbyterian Hospital

Approximate distance: 1.4 mile
Approximate travel time: 4 minutes

EMERGENCY ASSEMBLY LOCATION: Parking lot along St. Nicholas Avenue adjacent to P.S. 28.

FIRST-AID MEASURES

The following contaminants may be present in the soil and/or groundwater at the site: Petroleum and non-petroleum related VOCs, SVOCs, metals, PCBs, and pesticides.

The following procedures will be used:

Eye Contact: Flush eye immediately with copious amount of water for a minimum of 15 minutes. Repeat until irritation is eliminated and seek medical attention.

Skin Contact: Wash exposed area with soap and water for at least 15 minutes. If dermatitis or severe reddening occurs, seek medical attention.

Inhalation: Move the person into fresh air. If symptoms persist, seek medical attention.

Ingestion: Do not induce vomiting. Seek immediate medical attention.

1.0 - INTRODUCTION

1.1 Scope and Applicability of the Site Health and Safety Plan

This Health and Safety Plan (HASP) has been prepared by ATC Associates, Inc. (ATC) for the activities associated with the soil and groundwater investigation that will include, drilling and sampling of soils and groundwater at 414 West 155th Street, New York, NY (hereinafter referred to as the “Site”).

The health and safety protocols established in this Plan are based on the ATC Employee Health and Safety Policy Manual, the Occupational Safety and Health Administration (OSHA) Regulations, past field experiences, specific Site conditions, and chemical hazards known or anticipated to be present from available Site data. The following Site Health and Safety Plan (HASP) are intended solely for use during the proposed activities described in the project documents and technical specifications. Specifications herein are subject to review and revision based on actual conditions encountered in the field during Site characterization activities. Such changes may be instituted by using the HASP List of Approved Amendments and/or Changes (see Appendix C).

Before Site operations begin, all employees, including subcontractors for ATC covered by this plan, involved in these operations will have read and understood this HASP and all revisions. All Site personnel have the authority to “Stop Work” if unsafe conditions are present or discovered during Site activities. Before work begins, all affected workers will sign the Health and Safety Plan Acknowledgment Form (see Appendix C). By signing this form, all individuals recognize the requirements of the HASP, known or suspected hazards, and will adhere to the protocols required for the project Site.

1.2 Historical Overview

The Site is developed with a two-story building with a cellar that is utilized as a parking garage. The Site consists of an approximately 21,685 square feet lot. The Site building encompasses approximately 65,070 square feet, and based on the review of historical records, the Site building was constructed in 1929.

1.3 Visitors

All visitors to the Site must be instructed about the hazards of the activities that ATC or its subcontractors are performing. All visitors must sign the ATC Visitors Log (see Appendix C).

1.4 Subcontractor Activities

All subcontractors used at the Site have been Pre-Approved in the ATC Subcontractor Prequalification System.

The proposed drilling method is with a Geoprobe. Petroleum and non-petroleum related VOCs and SVOCs and metals impacted soil and may be encountered. Decontaminated water will be contained/discharged on-site. Investigation derived waste (IDW) is not anticipated. Drill cuttings will be placed back into the borehole. If IDW is generated, it will be containerized in appropriate storage vessels. Transportation and disposal of IDW may be arranged by ATC and performed by a designated subcontractor.

2.0 - PROJECT ORGANIZATION

All personnel and visitors who may enter work areas on this Site must comply with the requirements of this HASP. All Site personnel have the authority to “Stop Work” if unsafe conditions are present. The specific responsibilities and authority of management, safety and health, and other personnel on this Site are detailed in the following sections.

2.1 Site Safety and Health Officer (SSHO)

The Site Safety and Health Officer (SSHO) has the responsibility and authority to develop and implement this HASP and to verify compliance. The SSHO reports to the Project Manager; both must be designated prior to commencement of work. The SSHO is on-site during all work operations and has the responsibility to halt Site work if unsafe conditions are detected. The responsibilities of the SSHO at the Site include the following:

- Managing the health and safety functions on the Site;
- Ensuring Site monitoring, worker training, and effective selection and use of PPE;
- Conducting daily Tailgate Safety Meetings for Site personnel and subcontractors and summarize the training on the Tailgate Meeting Form (see Appendix C). The following topics should be covered during safety meetings:
 - Hazard Communication (i.e., MSDS location, and container labeling, chemical hazards of non-routine tasks)
 - Determine applicability of Standard Operating Procedures (SOP) in Section 8 and communicate procedures
 - Review Site safety requirements
 - Give refresher training on heat or cold stress (Section 5.2 and 5.3) when appropriate
 - Review Site emergency procedures
 - Discuss location and use of a rig kill switch for drilling/boring operations
- Conducting daily safety inspections of the Site looking for unsafe acts or conditions and providing corrective action as appropriate.

2.2 Site Supervisor

The Site Supervisor is responsible for field operations and reports to the Project Manager. The Site Supervisor is the On-site Coordinator and overseer of operations; both must be designated prior to commencement of work. It is the Site Supervisor's duty to maintain Site security, supervise the personnel on the Site, coordinate the activities of the subcontractor personnel, and check that the HASP is followed and modified when necessary. The Site Supervisor's specific responsibilities include:

- Executing the work plan and schedule as detailed by the Project Manager
- Coordination with the SSHO on health and safety issues
- Ensuring Site work compliance with the requirements of the HASP
- Before Site activities, contact the hospital emergency room, local fire department, and local police department, as applicable. If outside town, contact county officials and local emergency services.

2.3 Project Manager (PM)

The Project Manager (PM) has the primary responsibility for the fulfillment of the terms of the contract and overseeing operations for the purpose that includes meeting legal and safety requirements. It is the PM's responsibility to keep the project on schedule, within budget, and communicate with the Client regarding the progress toward specified goals.

The PM will inform the Regional Safety Coordinator of all HASP modifications, violations, injuries, exposures, and near-miss situations. The PM responsibilities include:

- Provide personnel time to read and understand the Site Health and Safety Plan (HASP) before fieldwork.
- Conduct project start-up health and safety briefing for: Field personnel, the Site Supervisor, the project team.
- Check that each subcontractor is pre-approved and that each subcontractor's Site workers have appropriate HAZWOPER Training Certificates.
- Check that Site personnel, if required, have received Respiratory Protection Training, Fit testing, and physician's approval to wear a respirator.
- That hazards identified during any Site audits are corrected. If necessary for immediate hazards, shut down field operations if hazards can not be corrected or the hazards present an immediate threat to life and health.

2.4 Regional Safety Coordinator (RSC)

The Regional Safety Coordinator (RSC) is responsible for providing professional health and safety advice and oversight management to the project. The RSC will review and provide support for concerns regarding the health and safety of field personnel assigned to this project, including:

- If requested by the Project Manager, approval of Routine HASP;
- Approval of all Non-Routine HASP;
- Review of incident reports, inspections, and air monitoring results;
- When required, the RSC will conduct a field audit of the Site to evaluate the adequacy of the program and implement the necessary changes through the HASP.

2.5 Project Field Team

The Project Team includes technicians, engineers, scientists, geologists, and possibly subcontractors who perform field activities. Each individual team member will be responsible for understanding and personally complying with the HASP and Site health and safety requirements. Project Team members will report health and safety violations to either the Site Supervisor or the SSHO. Health and safety responsibilities, as discussed in this Plan, which are shared by all Site personnel include:

- Complying with the requirements of the HASP.
- Reporting unsafe acts or conditions
- Retain copies at the Site of the following health and safety records:
 - Current HAZWOPER Training Certificate.
 - Respiratory Protection Training Certificate and current fit test record for potential respirator users.
 - Physician's approval for hazardous-waste fieldwork and/or respirator use.
 - First-aid/CPR and bloodborne pathogens training certificate.

3.0 – TASK/OPERATION HEALTH AND SAFETY RISK ANALYSIS SUMMARY

This chapter of the HASP describes the safety and health hazards associated with the Site work and control measures selected to protect workers. The purpose of the Job Safety Analysis (JSA) is to identify the routine safety and health hazards associated with the routine Site tasks and operations. Using this information, appropriate control methods are selected to eliminate the identified risks or effectively control them.

3.1 Job Safety Analysis (JSA)

Each specific JSA appears on a separate copy of the spreadsheets in Appendix A. A single JSA may be used for a task/operation performed in multiple locations if the hazards, potential exposures, and controls are the same at each location.

3.2 Health Analysis and Chemical Risk Assessment

Chemicals may be purchased and transported to the Site to support Site characterization and remediation operations. The principal chemical contaminants at the Site are expected to be VOCs, SVOCs, Pesticides, PCBs, and metals. Appendix B contains information from the National Institute for Occupational Safety and Health (NIOSH) Pocket Guide to Chemical Hazards about each of these chemicals. Additionally, the Hazard Communication Program (Policy No. 21) requires ATC to provide employees, contractors, subcontractors, and visitors with information on the health effects of these chemicals and necessary actions to protect against exposure. This information is transmitted through Material Safety Data Sheets (MSDS), the NIOSH Pocket Guide, container labels, training, and a written Hazard Communication program.

Site activities will adhere to the ATC Hazard Communication Program as described in the Policy. All Site personnel, including subcontractors, will be briefed on this Program as part of the Site orientation training before starting work. In accordance with this Program, the PM and Site Supervisor will check that each chemical brought to the Site is accompanied by its MSDS. A copy of each MSDS will be made available to each Site employee who may be potentially exposed to the chemical. In addition, the Site Supervisor will check that all subcontractors bring at least one copy of MSDS for each chemical they bring onto the Site. The Site Supervisor will also check that all chemical containers brought to the Site to determine if they are labeled as to its contents and appropriate hazard warnings.

3.3 Risks Associated With Drilling Activities

Drilling operations will conform to the Job Safety Analysis and Subsurface Investigation (ATC (Policy No. 33). Contaminated soil may be brought to the surface, creating a potential for exposure through skin contact and inhalation of vapors. The open borings also creates a conduit for vapors to be released to the atmosphere. However, the amount of vapors released to the atmosphere is relatively small and vapors are usually quickly diluted and dispersed in air. Air monitoring is required to determine if protective equipment is necessary, as described in Section 4.0 of this HASP.

In addition to these chemical risks, the risk of excavating a buried utility, such as a gas, water, electric line, or underground storage tank or other structures, is always present. Complete the Checklist for Subsurface Clearance prior to any subsurface work (see Appendix C) and follow the procedures in Table 3-1 for at least the first 5 feet of penetration:

**TABLE 3-1
DRILLING PROCEDURES**

Step 1 - Site Walk	Conduct Site walk. Verify that the Checklist for Subsurface Clearance has been fully completed.
Step 2 - Locate Markouts	Locate all utility markouts and borehole locations. Start intrusive activities at least five (5) feet away and perpendicular to all marked utility lines. A sub-surface utility markout will be performed by a certified subcontractor prior to the commencement of drilling activities. The markout will identify locations of existing sub-surface utilities so that they may be avoided during the drilling activities.
Step 3 - Drilling	All borings will be drilled using a Geoprobe® drilling rig. Soil borings to be advanced on the sidewalk or within vacant lots. For each boring, a description of soils encountered will be logged by a qualified scientist. Continuous soil quality field screening will be performed at all boring locations. Visual and olfactory methods of screening will be used during the field efforts to identify evidence of contamination. Additionally, a portable photo ionization detector (PID) will be used to obtain qualitative measurements of volatile organic vapors.
Step 5 - Soil Sampling	Soil and groundwater samples will be collected by a qualified environmental professional. The samples will be analyzed for VOCs, SVOCs, metals, PCBs, and pesticides.

Risks of injury associated with the drilling operation itself also exist. The risks of working near overhead electrical lines may also present a safety hazard. The SSHO will check for the presence of overhead lines and other obstructions. No drilling operations will be performed within 10 feet of overhead lines with voltages 0-50 kV. For other voltages refer to ATC Electrical Safety Policy (No. 12) and Equipment (Drill Rigs, Mobile Equipment) Policy (No. 15).

Whenever possible, stay at least two feet from machinery. This includes excavators, drilling rigs, dump trucks and front end loaders. Learn where the rig kill switch is to shut the rig off in case of an emergency. A discussion should be held with the operator at the startup of the field work to discuss the location and use of the kill switch and for documentation of a Safety Inspection such as the Monthly Heavy Equipment Safety Inspection Checklist found in Appendix C.

3.4 Noise Hazards and Controls

Exposure to high levels of noise may occur when working near heavy equipment. Also, depending upon where the work is being performed, local equipment (e.g., airports, factory machines, etc.) may produce high levels of noise. Employees exposed to noise levels in excess of the action level of 85 decibels (A-weighted, Slow Response) will be included into the ATC Policy on Hearing Conservation (Policy No. 34). The SSHO may evaluate employee noise exposures using a Noise Survey Meter or a Noise Dosimeter. The RSC may conduct additional noise monitoring to determine the appropriate response to be taken. Employees will be provided with ear plugs and/or earmuffs when exposed to noise levels in excess of the 8-hour Permissible Exposure Limit (PEL) of 90 decibel (A-weighted, Slow Response). This hearing protection shall have a Noise Reduction Rating (NRR) to protect hearing in accordance with Policy No. 34, including the NRR de-rating factor of $[(NRR-7)/2]$.

3.5 Biological Hazards

Site activities on this Site may expose workers to other hazards such as poisonous plants, insects, animals, and indigenous pathogens. Protective clothing and respiratory protection equipment, and being capable of identifying poisonous plants, animals, and insects, can greatly reduce the chances of exposure. Thoroughly washing any exposed body parts, clothing, and equipment will also protect against infections. If working in wooded/grassy areas, use appropriate insect repellants (containing DEET and/or Permethrin) and apply them per the manufacturers' directions.

3.6 Other Hazards

The demolition of the building will be completed in December 2010. As part of the demolition, asbestos abatement may be occurring within the building under contained conditions. All ATC employees working on this task should not enter the containment(s) under any circumstances, unless otherwise expressly authorized, and should follow all signs and posted precautions in the area.

4.0 - AIR MONITORING AND PERSONAL PROTECTIVE EQUIPMENT

4.1 Site Air Monitoring Requirements

To prevent exposure to hazardous conditions and aid in the selection of personal protective equipment, monitoring for the presence of airborne contaminants will occur when knowledge of the Site indicates their potential presence. One or more of the following direct-reading instruments may be used to aid in this determination. Photoionization Detectors (PID) and Flame Ionization Detectors (FID) measures non-specific organic gases and vapors. Combustible Gas Indicators (CGI) will detect explosive atmospheres. Oxygen (O₂) meters will detect fluctuations in oxygen concentrations. These instruments should be calibrated or bump tested daily and whenever the readings may be erratic. All readings should be recorded in the field log books.

Colorimetric detector tubes supplement PID and/or FID readings to measure specific gases and vapors. Other direct-reading instruments are available for use to monitor for the presence of specific airborne Site contaminants.

The breathing zone of the employee(s) anticipated to have the highest potential for exposure for each task will be monitored using an appropriate combination of some or all of these direct-reading instruments. Air monitoring should occur every 15 minutes during non-intrusive activities, or every 5 feet of penetration during intrusive activities. Site tasks and air monitoring requirements are shown in Table 4-1. Additional Site monitoring may occur at the discretion of the SSHO, Site Supervisor, or RSC.

NOTE: All air monitoring equipment must be calibrated as per manufacturer's instructions.

**Table 4-1
Site Air Monitoring Requirements**

Site Activity	Instrument	Frequency	Location	Caution
Soil sampling	PID	Every 15 minutes (during drilling activities)	In breathing zone of person nearest activity	Communicate with equipment operator before sampling (if sampling is deemed necessary)

Air monitoring will be performed during the periodic Site visits. Air monitoring results obtained from the breathing zone during field activities will be recorded in field logbooks and the Air Quality Monitoring Record (see Appendix C). All such records will also include the location, date/time, weather conditions, person monitored, background concentration, and identification of specific contaminant whenever possible. Air monitoring information will be utilized to evaluate personnel exposure and assess the appropriateness of PPE for Site conditions. The PPE for the Site are discussed in Section 4.2. Photoionization detector (PID) readings measured in the employees breathing zone will be used to determine the level of protection required. PID readings refer to readings above background, which are sustained for at least 5 minutes and are measured during the performance of field tasks. PID readings are used for general screening.

4.2 Action Levels for Personal Protection Equipment

The first and foremost means of protecting employees from injuries or exposures is to eliminate the exposure. The general hierarchy for controlling potential exposures is: (1) Engineering Controls; (2) Administrative Controls; and (3) the use of PPE. PPE is a means of preventing injury or exposure when exposure elimination and/or other control means are not feasible.

The initial level of protection and the Action Levels at which the PPE will be upgraded are determined based on the identification of specific chemicals expected to be present at a Site and the established OSHA Permissible Exposure Levels (PEL) or ACGIH Threshold Limit Values (TLVs), whichever is lower. In the event more than one chemical is expected or exists at a Site, the most hazardous chemical will dictate the level of personal protection required. Table 4-2 shows the action levels for levels of personal protection equipment.

Table 4-2
Action Levels for Personal Protection Equipment

Monitoring Equipment	Hazard	Action Level Above Background	Action
PID	Organic gas/vapor	< 10 ppm	Level D.
		10 to 50 ppm	Level C. Move upwind and continue air monitoring, cease operations, or use detector tube(s) for <u>(contaminant)</u> and reference Table 4-3 below.
		> 50 ppm	Immediate Withdrawal. Contact the PM and RSC for further instructions to proceed.

Detector tubes to be used are indicated for given ranges based upon the PID readings (Table 4-2). As appropriate, PID readings in conjunction with detector tubes will be utilized during the field activity and location anticipated having the highest level of contamination. This location will be selected by the Site Supervisor. If these measurements indicate exposure levels appropriate for Level D work, the use of detector tubes will be limited to situations where field conditions or activities have changed. Detector tubes will be available for use at the discretion of the Site Supervisor and the SSHO.

Any upgrading to higher levels of protection may require additional personal sampling using National Institute for Occupational Safety and Health (NIOSH) or Occupational Safety and Health Administration (OSHA) methods for the collection and analysis of airborne contaminants.

Air monitoring equipment used on the Site should be calibrated with the following:

Calibration/Response
Check

<u>Types</u>	<u>Frequency</u>	<u>Gas Standard</u>
PID	Daily	100 ppm isobutylene in air

Field personnel, in conjunction with the Site Supervisor and SSHO, may choose to allow ventilation of vapors before resuming work (rather than using higher levels of PPE). If ventilation is conducted, additional air monitoring will be performed prior to the resumption of work to determine the level of PPE required.

4.3 Levels of Protection

Levels of protection for Site activities are described on the Site Air Monitoring Summary. The protection levels may include all or some of the following, based on work scope.

Level D:

- Work uniform – Long pants and shirt with sleeves (no tank tops) – refer to Policy No. 25 Personal Protective Equipment (Section 5.5)
- Disposable, inner nitrile gloves
- Chemical-resistant boots with steel toe
- Safety glasses with side shields
- High Visibility Reflective Vest Class 1, Class 2, or Class 3 (select based on Traffic speed)
- Hard hat
- Disposable, chemical-resistant outer boot covers*
- Hearing protection*

LEVEL C:

- Half-face or full-face, air purifying respirator (NIOSH approved)
- Disposable, hooded, chemical-resistant clothing
- Disposable, chemical-resistant outer gloves
- Disposable, inner nitrile gloves
- Chemical-resistant boots with steel toe
- Disposable boot covers
- Hard hat
- Safety Glasses with side shields
- High Visibility Reflective Vest Class 1, Class 2, or Class 3 (select based on Traffic speed)
- Coveralls*
- Hearing protection*

(* Optional Equipment, depending on conditions/exposures)

4.4 Respiratory Protection

Respiratory protection requirements are described in detail in the ATC Respiratory Protection Program. Basic rules of respiratory usage are listed below:

- Facial hair that interferes with a satisfactory fit of the mask-to-face seal is not allowed on personnel required to wear respirators.
- Respirator cartridges should be replaced after approximately 8-hours of continuous or intermittent usage, unless otherwise noted. Cartridges should also be replaced if they become damaged, after the expiration date is exceeded, if vapor smell breakthrough occurs, or if filters become clogged causing resistance to breathing.
- Contact lenses may be worn when respiratory protection is required, in conjunction with additional eye protection to protect against particles or splashes, provided there is no interference with the respirator seal.
- Respirators shall be cleaned and disinfected after each day's use or more often, if necessary.
- Prior to donning, respirators will be inspected for worn or deteriorated parts. Emergency respirators or self-contained devices will be inspected at least once a month and after each use.
- After donning, personnel should perform a positive and negative user fit-check to determine if a good seal has been achieved.
- Each employee shall make sure that they have an annual respirator fit test and respiratory protection training.

5.0 - HEALTH SURVEILLANCE PROGRAM

5.1 Employee Medical Examinations

All ATC employees involved in work at the Site will participate in ATC's Medical Surveillance Program administered by Health Resources. Additionally, when respirators are required (as determined by the SSHO and project manager), each employee will also have current respirator clearance.

A post project, follow-up exam may be required if an exposure incident is reported or an employee shows specific symptoms associated with the known or suspected hazardous chemicals. The RSC and the Project Manager will determine when post project exams are required.

5.2 Heat Stress Program

This procedure applies to all employees when heat stress conditions exist at project sites.

5.2.1 Training

The SSHO will have received acceptable training in first-aid and Cardiopulmonary Resuscitation (CPR), including training in heat-related illnesses. The SSHO shall also be trained on the requirements of the ATC Policy for Industrial Hygiene (Policy No. 23), which contains the requirement for Heat Stress monitoring. All workers should be capable of recognizing and treating the signs and symptoms of heat stress conditions. During potential heat stress conditions, ice should be readily available to rapidly cool victims.

5.2.2 Fluid Replacement

Water will be made available at the Site for employee fluid replacement. When heat stress is determined to be a problem by the SSHO, employees will be provided with balanced, electrolyte solutions to replace fluid and electrolyte loss. Employees will be provided with replacement fluids at a minimum rate of 8 ounces every 15 to 20 minutes per person.

5.2.3 Acclimatization

Acclimatization is a gradual physiological adaptation that improves an individual's ability to tolerate heat stress. Full-heat acclimatization requires up to 3 weeks of continued physical activity under heat-stress conditions similar to those anticipated for the work. Its loss begins when the work activity in the heat stress conditions is discontinued. A noticeable loss usually occurs within 3 – 4 days.

5.2.4 Rest Breaks

When heat stress conditions are applicable, all rest breaks should be taken out of the zone of exclusion into a cooler, shaded, rest area. If these conditions are not available, more frequent rest breaks will be taken.

5.2.5 Heat Stress Monitoring

Heat Stress and heat strain are conditions resulting from environmental factors including temperature, relative humidity, radiant heat transfer, and air movement, as they are affected by clothing. The primary objective of the heat stress management program is to prevent heat stroke which is life threatening and the most serious of the heat-induced disabilities. Extra caution should be taken for workers who are not acclimated to working in the heat.

The following Heat Stress Index (refer to ATC Policy No. 23) should be used as a guide to evaluate heat stress situations. If the Heat Stress exceeds 105° F, contact the RSC prior to work for detailed guidance.

Heat Stress Index										
Temp. °F	Relative Humidity									
	10%	20%	30%	40%	50%	60%	70%	80%	90%	
105	98	104	110	120	132					
102	97	101	108	117	125					
100	95	99	105	110	120					
98	93	97	101	106	110	125				
96	91	95	98	104	108	120				128
94	89	93	95	100	105	111				122
92	87	90	92	96	100	106	114	122		
90	85	88	90	92	96	100	106	114		122
88	82	86	87	89	93	95	100	106		115
86	80	84	85	87	90	92	96	100	109	
84	78	81	83	85	86	89	91	95	99	
82	77	79	80	81	84	86	89	91	95	
80	75	77	78	79	81	83	85	86	89	
78	72	75	77	78	79	80	81	83	85	
76	70	72	75	76	77	77	77	78	79	
74	68	70	73	74	75	75	75	76	77	
NOTES: Add 10° F when protective clothing is being used; Add 10° F when in direct sunlight										

HSI Temp	Category	Injury Threat
Above 130° F	Extreme Danger	No work unless emergency exists. Contact ATC RSC and Corporate Risk Management Department prior to proceeding. Heat cramps or exhaustion likely, heat stroke possible if exposure is prolonged and there is physical activity.
105° to 130° F	Danger	Contact RSC prior to proceeding. Requires strict adherence to ACGIH Heat Stress Guidelines, including use of on-site WBGT equipment. Heat cramps or exhaustion likely, heat stroke possible if exposure is prolonged and there is physical activity.
90° to 105° F	Extreme Caution	Heat cramps or exhaustion likely, heat stroke possible if exposure is prolonged and there is physical activity.
80° to 90° F	Caution	Heat cramps or exhaustion likely, heat stroke possible if exposure is prolonged and there is physical activity.
Below 80° F	Normal Range	Typical conditions for time of year. Little or no danger under normal circumstances. As always, anticipate problems and work safely.

5.3 Cold Stress Program

This procedure applies to all employees who perform field work in cold environments at risk of cold stress injury and intended to protect workers from the most severe effects of cold stress.

5.3.1 Training

ATC Site employees have been trained in cold stress as part of their HAZWOPER 40-hour initial training. Site workers will receive refresher training by the SSHO in cold stress safety and health procedures. The training program will include, as a minimum, instruction in the following areas:

- Proper first-aid treatment
- Proper clothing practices
- Proper eating and drinking habits
- Recognition of impending frostbite
- Recognition of the signs and symptoms of impending hypothermia or excessive cooling of the body when shivering does not occur
- Safe working practices

The SSHO will be trained in first-aid, CPR, and cold stress conditions.

5.3.2 Environmental Monitoring

Frostbite and hypothermia are two types of cold injury that personnel must be protected against during the performance of field duties. The objective is to prevent the deep body temperature from falling below 96.8° F and to prevent cold injury to body extremities. Two factors influence the development of a cold injury the ambient temperature, and wind velocity.

The SSHO will monitor environmental conditions by recording ambient temperature and estimated wind-speed. Information contained in Tables 5-1 and 5-2 will be used to evaluate the possibility of hypothermia among workers on-site.

5.3.3 Protective Clothing and Rest Breaks

Use appropriate cold weather clothing when temperatures are at or below 40°F as exposed skin surfaces must be protected. These protective items can include facemask, hand wear, and foot wear. Workers handling evaporative solvents during cold stress conditions will take special precautions to avoid soaking gloves and clothing because of the added danger of prolonged skin contact and evaporative cooling. Personnel will wear protective clothing appropriate for the level of cold and planned physical activity. The objective is to protect all parts of the body, with emphasis on the hands and feet. Eye protection against glare and ultraviolet light should be worn in snowy and icy conditions.

The work rate should not be so great as to cause heavy sweating that could result in wet clothing. If heavy work must be done, opportunities for rest breaks will be provided where workers have the opportunity to change into dry clothing. Conversely, plan work activities to minimize time spent sitting or standing still. Rest breaks should be taken in a warm, dry area. Windbreaks can also be used to shield the work area from the cooling effects of wind.

5.3.4 Identification and Treatment of Cold Stress

When frostbite, hypothermia, or other cold stress symptoms are suspected, treat the patient to relieve symptoms or transport them to the medical facility identified on page TC-4.

TABLE 5-1
Threshold Limit Values Work/Warm-up Schedule
for Four-Hour Shift*

Air-Temperature--Sunny Sky		No Noticeable Wind		5 mph Wind		10 mph Wind		15 mph Wind		20 mph Wind	
°C (approx.)	°F (approx.)	Max. Work Period	No. of Breaks	Max. Work Period	No. of Breaks	Max. Work Period	No. of Breaks	Max. Work Period	No. of Breaks	Max. Work Period	No. of Breaks
-26° to -28°	-15° to -19°	(Norm. Breaks) 1		(Norm. Breaks) 1		75 min	2	55 min	3	40 min	4
-29° to -31°	-20° to -24°	(Norm. Breaks) 1		75 min	2	55 min	3	40 min	4	30 min	5
-32° to -34°	-25° to -29°	75 min	2	55 min	3	40 min	4	30 min	5	Non-emergency work should cease	
-35° to -37°	-30° to -34°	55 min	3	40 min	4	30 min	5	Non-emergency work should cease		Non-emergency work should cease	
-38° to -39°	-35° to -39°	40 min	4	30 min	5	Non-emergency work should cease		Non-emergency work should cease		Non-emergency work should cease	
-40° to -42°	-40° to -44°	30 min	5	Non-emergency work should cease		Non-emergency work should cease		Non-emergency work should cease		Non-emergency work should cease	
-43° & below	-45° & below	Non-emergency work should cease		Non-emergency work should cease		Non-emergency work should cease		Non-emergency work should cease		Non-emergency work should cease	

- *1. Schedule applies to any 4-hour work period with moderate to heavy work activity, with warm-up periods of ten. (10) Minutes in a warm location and with an extended break (e.g., lunch) at the end of the 4-hour work period in a warm location. For Light-to-Moderate Work (limited physical movement): apply the schedule on step lower. For example, at -35°C (-30°F) with no noticeable wind (Step 4), a worker at a job with little physical movement should have a maximum work period of 40 minutes with 4 breaks in a 4-hour period (Step 5).
2. The following is suggested as a guide for estimating wind velocity if accurate information is not available: 5 mph: light flag moves; 10 mph: light flag fully extended; 15 mph: raises a newspaper sheet; 20 mph: blowing and drifting snow.
3. If only the wind chill cooling rate is available, a rough rule of thumb for applying it rather than the temperature and wind velocity factors given above would be 1) special warm-up breaks should be initiated at a wind chill cooling rate of about 1750 watts per square meter (W/m^2); 2) all non-emergency work should have ceased at or before a wind chill of 2250 W/m^2 . In general, the warm-up schedule provided above slightly under-compensates for the wind at the warmer temperatures, assuming acclimatization and clothing appropriate for winter work. On the other hand, the chart slightly overcompensates for the actual temperatures in the cooler ranges because windy conditions rarely prevail at extremely low temperatures.
4. TLVs apply only for workers in dry clothing.

* Adapted from Occupational Health & Safety Division, Saskatchewan Department of Labor.

TABLE 5-2
Cooling Power of Wind on Exposed Flesh Expressed as
Equivalent Temperature (under calm conditions)*

Estimated Wind Speed (mph)	Actual Temperature Reading (degrees F)											
	50	40	30	20	10	0	-10	-20	-30	-40	-50	-60
	Equivalent chill Temperature (degrees F)											
calm	50	40	30	20	10	0	-10	-20	-30	-40	-50	-60
5	48	37	27	16	6	-5	-15	-26	-36	-47	-57	-68
10	40	28	16	4	-9	-24	-33	-46	-58	-70	-83	-95
15	36	22	9	-5	-18	-32	-45	-58	-72	-85	-99	-112
20	32	18	4	-10	-25	-39	-53	-67	-82	-96	-110	-121
25	30	16	0	-15	-29	-44	-59	-74	-88	-104	-118	-133
30	28	13	-2	-18	-33	-48	-63	-79	-94	-109	-125	-140
35	27	11	-4	-20	-35	-51	-67	-82	-98	-113	-129	-145
40	26	10	-6	-21	-37	-53	-69	-85	-100	-116	-132	-148
(Wind speeds > 40 mph have little additional effect)	LITTLE DANGER If < hr with dry skin. Maximum danger of false sense of security				INCREASING DANGER Danger from freezing of exposed flesh within one minute.			GREAT DANGER Flesh may freeze within 30 seconds.				
	Trench foot and immersion foot may occur at any point on this chart.											

* Developed by U.S. Army Research Institute of Environmental Medicine, Natick, MA

6.0 - SITE SECURITY AND CONTROL

6.1 Work Zones

Restricted Site areas will include, but not necessarily be limited to, the following zones:

- **Exclusion Zone or Hot Zone** - any area where contamination is either known or likely to be present in concentrations that could pose a threat to human health and safety or that potential for harm to personnel exists because of the type of work activities being conducted. Appropriate PPE and warning signs should be utilized in this area.
- **Contamination Reduction Zone** - any area where workers conduct personal and equipment decontamination.
- **Support Zone** - areas where access is controlled, but the chance to encounter hazardous materials or conditions are minimal.

Access to the work zones will be controlled by work zone delineators (e.g. traffic cones, flags, vehicles, DOT approved devices, temporary or permanent fencing, and/or safety barrier tape). Figure 6-1 is an example of a work zone. Additionally ATC employees should follow the requirements of the Employee Health and Safety Policy Manual, Policy No. 36, Work Zones in Traffic Areas for additional information.

In the event on-site personnel must upgrade their personal protective equipment, the work zones may require substantial modification in order to provide for the safety of nearby personnel not associated with this work. Any upgrade level will be communicated by the Site Supervisor to the PM. The PM will then inform the RSC of this occurrence.

<u>Work Zone</u>	<u>Level of Protection</u>	<u>Required Protective Equipment</u> (specify exact type, e.g. nitrile gloves)	
Exclusion Zone	<hr/>	Respirator:	Yes
		Filters/Cartridges:	Organic – N/A
		Boots:	Yes
		Inner Gloves:	Nitrile
		Outer Gloves:	Nitrile
		Protective Coverall:	Tyvek
		Hard Hat:	Yes
		Eye Protection:	Yes
		Other:	Reflective Vests, Hearing Protection where needed

Contamination	_____	Respirator:	_____
Reduction Zone	_____	Filters/Cartridges:	_____
		Boots:	Yes
		Inner Gloves:	_____
		Outer Gloves:	_____
		Protective Coverall:	_____
		Hard Hat:	Yes
		Eye Protection:	Yes
		Other:	_____

Exceptions and Modifications:

6.2 Buddy System

The Buddy System will be used at all times by field personnel in the Exclusion Zones. The Buddy System means that personnel work in pairs and stay in close visual contact to be able to observe one another and summon rapid assistance in case of emergency. No one is to perform fieldwork without the approval of the Branch Safety Officer and/or the Regional Safety Officer.

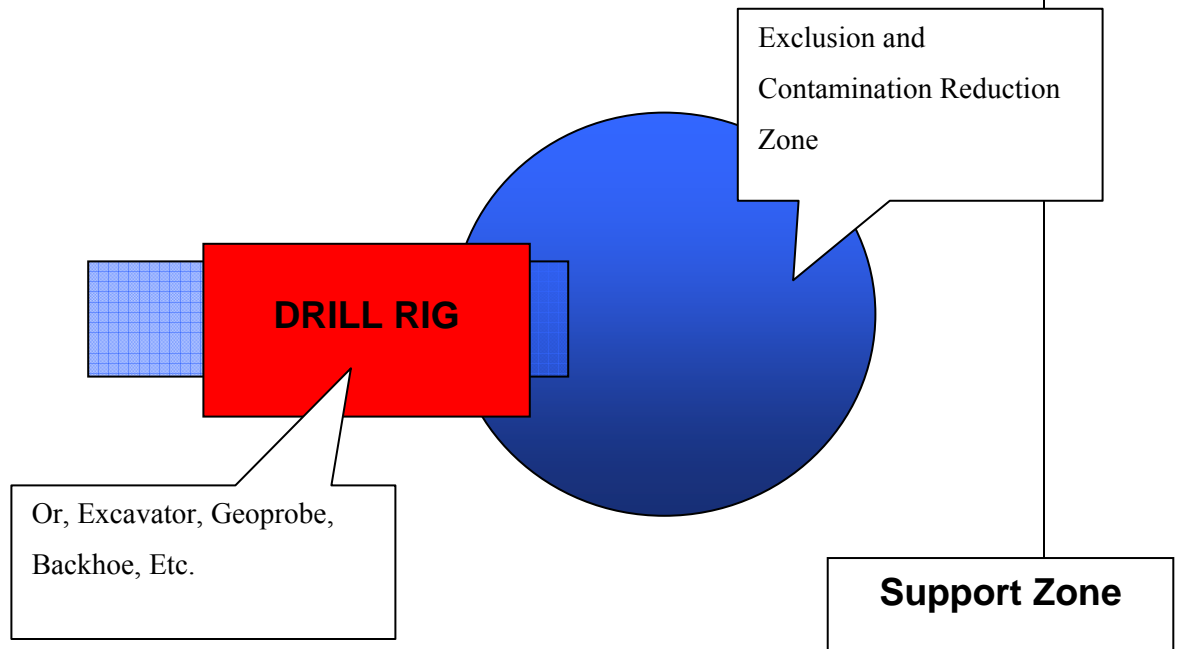

6.3 Site Communication

A loud and clear form of communication should be made available for Site personnel entering the work zones. Site communication may be in the form of hand signals, voice, or other communication devices. All forms of communication should be understood by all workers on the Site prior to starting work.

6.4 Roadway Work Zones

When ATC employee and subcontractors are required to perform Site operation in a city street or public right-of-way, a Traffic Control Plan may be required and included with this HASP. Check with the State or local government Department of Transportation for when a traffic control plan is required. Traffic Control Plans will include Transition Areas, Activity Areas, and Termination Areas.

FIGURE 6-1
TYPICAL EXCLUSION ZONE

7.0 - DECONTAMINATION PROCEDURES

7.1 Personnel Decontamination

All personnel must complete appropriate decontamination procedures in a way that is responsive to actual Site conditions before leaving the Site. The decontamination of personnel and equipment will be performed within the exclusion and contamination reduction zones. Wash tubs containing an appropriate decon solution and soft bristle brushes will be used to decontaminate personal protective clothing and boots. Deionized water will be used for the final rinse. The SSHO will visually inspect all PPE and other equipment once decontamination procedures are completed. In general, the four types of decontamination solutions to be considered for PPE include:

- Water for removal of low-molecular weight hydrocarbons, inorganic compounds, salts, some organic acids, and other polar compounds.
- Dilute acids (vinegar) for removal of basic (caustic) compounds, amines, and hydrazines.
- Dilute bases (soaps and detergents) for removal of acidic compounds, phenols, thiols, and some nitro and sulfonic compounds.
- Organic solvents for removal of nonpolar compounds (organic).

LEVEL D/LEVEL C

- Establish a segregated equipment drop
- Remove disposable, outer boot covers, if applicable
- Remove chemical resistant, outer gloves, if applicable
- Remove hard hat and goggles, safety glasses, or face shield
- Remove disposable, inner gloves
- Remove full-face air purifying respirator (Level C only)

Each individual will be responsible for inspecting and decontaminating their own respirator in accordance with the ATC Respiratory Protection Program (Policy No. 27).

At a minimum the hands and face of each employee must be thoroughly washed upon leaving the work area. Trash receptacles will be provided for all disposable clothing. Commercial laundries or cleaning establishments that decontaminate clothing or equipment will be informed of the potentially harmful effects of exposure.

Decontamination Solution: Soap and water, fresh rinse

STATION #1: Wash hands, dispose of outer gloves and coveralls

Equipment Required: Wash basin

Equipment Required: NAEquipment Required: NAEquipment Required: NA

X	Decon solution (specify)	ALCONOX
---	--------------------------	---------

7.3 Disposition of Decontamination Wastes

All materials and equipment used for decontamination should be disposed of in accordance with local, State, and/or Federal Regulations. Clothing, tools, buckets, brushes, and all other equipment that is contaminated must be properly packaged and stored on the Site until disposal arrangements are finalized. Clothing not completely decontaminated on-site should be secured in plastic bags before being removed from the Site.

Decontamination Waste Water

Collection (specify how): Wash basin

Direct Discharge (specify how and where): 55-gallon drum

Pre-Treatment (specify): None

Disposal (specify how and where): Contractor

8.0 - STANDARD OPERATING PROCEDURES

The following Standard Operating Procedures (SOPs) will be applied to each location and activity where work is performed on a hazardous chemical site. As hazards increase or decrease on the Site, the applicability of each SOP must be determined by the SSHO with the approval of any changes by the Project Manager or the RSC.

8.1 Personnel Precautions

1. Eating, drinking, chewing gum or tobacco, smoking, and any practice that increases the probability of hand-to-mouth transfer and ingestion of material is prohibited in the exclusion and contamination reduction zone or in any area known to be contaminated.
2. When decontamination procedures for outer garments are in effect, the entire body should be thoroughly washed as soon as possible after the protective garment is removed.
3. Contact with contaminated or suspected contaminated surfaces should be avoided. When possible, do not walk through puddles, leachate, or discolored surfaces; kneel on the ground; or lean, sit, or place equipment on drums, containers, or the ground.
4. Medicines and alcohol can increase the effects from exposure to toxic chemicals. Personnel should not take prescribed drugs at hazardous waste operations where the potential for absorption, inhalation, or ingestion of toxic substances exists unless specifically approved by a qualified physician. Alcoholic beverage intake should be minimized or avoided.
5. All personnel must be familiar with Standard Operating Procedures and any additional instructions and information contained in this HASP. All visitors and subcontractors will read the HASP before entering the Site.
6. All personnel will be aware of symptoms for heat or cold stress.
7. All personnel will be familiar with the chemicals used on-site and the associated hazards as described in each respective MSDS. The MSDS for the chemicals on-site will be available and located in the company vehicle.

8.2 Operations

1. All personnel going to the Site must be adequately trained and thoroughly briefed on anticipated hazards, equipment, safety practices, emergency procedures, and communications.
2. Personnel on the Site must use the Buddy System when engaged in Level C work as specified in ATC Policy No. 35 (Hazwoper). The purpose of the Buddy System is to provide rapid assistance to employees in the event of an emergency.
3. Visual contact must be maintained between pairs of Site and safety personnel. Entry team members should remain close to assist each other during emergencies.
4. Personnel should practice unfamiliar operations before the actual procedure.

5. Entrance and exit locations must be designated, and emergency escape routes delineated. Warning signals for Site evacuation must be established by the SSHO before field activities.
6. Communications using radios, hand signals, or other means, must be maintained between initial entry members at all times. Emergency communications should be prearranged in case of radio failure, the necessity for evacuating the Site, or other reasons.
7. Wind indicators visible to all personnel should be strategically located throughout the Site.
8. Personnel and equipment in the contaminated area should be minimized, consistent with effective Site operations.
9. Work areas for various operational activities will be established.
10. Procedures for leaving a contaminated area will be planned and implemented before going to the Site. Work areas and decontamination procedures will be established based on expected Site conditions.
11. Frequent and regular inspections of Site operations will be conducted by the SSHO to check compliance with this HASP. If changes in operation occur, the HASP must be modified to reflect these changes.
12. All electrical equipment (power tools, extension cords, instruments, radios, etc.) will conform with ATC Policy No. 12 (Electrical) The SSHO will ensure that electrical equipment is free from recognized hazards that may cause physical harm to employees.
13. Fire prevention and protection (appropriate signs for flammable liquids, smoking areas, storage areas of combustible or flammable materials, etc.) will be according to ATC Policy No. 18, Fire Protection.
14. Site Tailgate Safety Meetings will be held daily to discuss anticipated Site conditions and daily activities. This meeting will be summarized in field logbooks and the Tailgate Safety Meeting Form (see Appendix C).

9.0 - CONTINGENCY PLAN

This chapter of the HASP describes potential emergencies at this Site and the procedures for responding to those emergencies.

9.1 Medical Emergencies

1. The name, address, telephone number, travel distance, and travel time to the nearest medical treatment facility are found in the Emergency Information section (see Page TC-4) of this HASP. A map and direction for locating the facility is available in the Emergency Information section (see Page TC-6) of this HASP.
2. Emergency routes will be verified and driven before any Site activities. It may be quicker to transport a person with minor injuries than to wait for Emergency Medical Services (EMS) to respond. Check with the local authorities for response times. Life threatening emergency situations will only be handled by emergency medical services.
3. Before mobilization on-site, the Site Supervisor will contact the local hospital emergency room personnel, local fire department, and local police department to brief them regarding the scope and hazards associated with the scheduled fieldwork. If the Site is outside an established town, contact will be made with county officials and local emergency services.
4. An emergency first-aid kit with contents per ATC Policy No. 20 (First-Aid) will be readily available (if corrosive materials are present) on the Site, and personnel will have first-aid training. The first-aid kit also contains equipment necessary to protect first-aid providers against exposure to bloodborne pathogens. All first-aid providers will have received Bloodborne Pathogens training and can receive Hepatitis B vaccinations according to the ATC Policy No. 09 (Bloodborne Pathogens) if exposed to bodily fluids.
5. Any person who becomes ill or injured in the exclusion zone must be decontaminated as well as possible with consideration to which risk will be greater, the spread of contamination or the health of the individual. If the injury or illness is minor, full decontamination (remove contaminated clothing and wash hands and face with soap and water, See Section 7.0) should be completed and first-aid administered before transport. If the patient's condition is serious, at least partial decontamination should be completed (i.e., complete disrobing of the victim and redressing in clean coveralls or wrapping in a blanket). First-aid should be administered while awaiting an ambulance or paramedics.
6. The following steps should be followed if an injury or illness case occurs:
 - Check the Scene.
 - If safe to do so, check the condition of the injured.
 - Call 911 if the victim is unconscious or your training dictates to do so.
 - Care for the injured. Always use "Universal Precautions".
 - Call COMP-CARE (800) 756-1130, if the injury is non-life threatening. COMP-CARE will assist you with the location of the nearest clinic, if referral is needed.
7. Provisions must be made to identify the substance to which the worker has been exposed. This information must be given to medical personnel.

9.2 Emergency Equipment

1. A personal eyewash unit that meets ANSI Z358.1-1998, Section 6 will be available in each ATC field vehicle at the Site if corrosive chemicals (chemicals with a pH of <3 or >11) will be on-site.
2. An emergency first-aid kit with contents as per ATC Policy No. 20 (First-Aid). The Site Supervisor shall be trained and certified in first-aid and CPR.
3. An emergency spill cleanup kit will be available at the Site at all times. Unplanned releases will be reported to the SSHO and/or Site Supervisor as soon as possible.
4. Sufficient water and/or multipurpose dry chemical (Class A, B, and C) fire extinguishers, rated not less than 2A:10B:C, will be maintained on the Site to cope with any situation until emergency services arrive.

9.3 Flammable Conditions

In the event that combustible vapors exceed 10 percent of the LEL or strong odors are detected in the borehole, the following actions should be taken:

- Continue investigation using extreme caution. Personal protective equipment may need to be upgraded.
- Allow vapors to dissipate or use intrinsically-safe mechanical ventilation.
- If atmospheric conditions do not change, call in the listed sequence:
 - Project Manager
 - Regional Safety Coordinator
 - Fire Department
- Provide answering personnel with the call back numbers, locations, directions, and situation assessment.

9.4 Site Evacuation Conditions

The following conditions will necessitate the cessation of field work in the area of concern, withdrawal from the work area, and revisions to this HASP:

- Fires and/or explosions
- Unexploded ordnance is detected
- A major incident or injury occurs
- Flammable atmosphere readings above 10 percent LEL
- Oxygen readings above 23.5 percent oxygen concentration
- Oxygen readings at or below 19.5 percent oxygen concentration
- PID readings over 50 ppm sustained for more than 5 minutes

9.5 Emergency Communication System

Emergency contacts and telephone numbers are provided at the beginning of this HASP. Field crews will have some communication device at each active work location. These may include radios, mobile telephones, or walkie-talkies. Such communication devices will have sufficient range to contact the field office and/or emergency services. If an emergency occurs on-site, the Site Supervisor is responsible for checking that appropriate emergency contact has been notified. At the time of the emergency response, the Site Supervisor or designee will brief the emergency personnel on the status of the emergency, including Site conditions.

Field personnel will use hand signals if there are noisy working conditions on the Site. The hand signals that will be used are shown below and will be reviewed by the SSHO during the on-site safety briefing.

Signal	Meaning
Hands on top of head	Need assistance
Grip partner's wrist or place both hands around partner's arm	Leave area immediately
Thumbs up	OK; I am all right
Thumbs down	No; Negative
Hand gripping throat	Cannot breathe; Out of air

9.6 Emergency Response Follow-Up

If there is an incident, near-miss, or emergency response, the SSHO will notify the Project Manager and Regional Safety Coordinator. The Project Manager or the Branch Safety Officer will complete a Supervisor's Investigation Report (SIR) (Policy No. 51; Appendix 51-1) and submit to the appropriate Regional distribution list. Prior to resuming work, a Site safety meeting should be held to discuss the circumstances surrounding the incident and what should be done to prevent a re-occurrence.

10.0 - EMPLOYEE TRAINING

10.1 Pre-Assignment and Annual Refresher Training

All ATC Employees and Subcontractors will participate in routine health and safety education and training programs. These programs are designed to provide employees with a thorough knowledge of hazardous materials, health and safety hazard potential, and Federal Occupational Safety and Health Administration (OSHA) requirements published in 29 Code of Federal Regulations (CFR) Part 1910. According to 29 CFR 1910.120(e), Site employees will have received 40 hours of initial Hazardous Waste Operations & Emergency Response (HAZWOPER) instruction and 24 hours of supervised field experience. Attending an annual 8-hour HAZWOPER refresher training session maintains this initial training. It is the responsibility of the Project Manager and each subcontractor's supervising manager to determine if the subcontractor staff meets these training requirements.

10.2 Site Supervisor's Training

On-site Managers and Supervisors on hazardous waste sites who are directly responsible for or who supervise workers engaged in hazardous wastes operations receive, in addition to the initial 40 HAZWOPER training, 8 additional hours of specialized supervisory training in compliance with the OSHA regulations. This training includes training on the employer's safety and health program and the associated employee training program, personal protective equipment program, spill containment program, and health hazards monitoring procedure and techniques.

10.3 Site Safety Training and Briefing Topics

The SSHO will conduct Site-specific health and safety briefing for field personnel before the start of all field work. Briefing attendees will include the Site Supervisor, the Project Team, and Subcontractor personnel. At the conclusion of the meeting, personnel are to sign the HASP Agreement and Acknowledgement Form in the Appendices. As additional people are assigned to the Site, it is the responsibility of the SHSO to ensure that new personnel are briefed on health and safety protocols and ensure that they have reviewed and signed the HASP Agreement and Acknowledgement Form. Items to be covered include:

- Site-specific health and safety rules
- Client-specific health and safety rules
- Health effects of various chemicals used on the Site
- Emergency response actions pertaining to operations on-Site

Additionally, daily Site Tailgate Safety Meetings will be conducted to review past activities, plan ahead for new or changed operations, to understand any near-miss and "lessons learned, establish safe working procedures for anticipated hazards, and provide pertinent safety and health training and motivation. The SSHO will complete the Tailgate Safety Meeting Form located in the Appendices.

10.4 Visitors

All visitors entering the designated work zones will be subject to all applicable health and safety requirements during field operations at the Site. All visitors to a work Site will be given the opportunity to review the HASP, will be escorted at all times, and will be required to stay a safe distance from Site activities. The Site Supervisor and/or the SSHO will be responsible for briefing all visitors on the Site hazards, Site safety precautions, and the Site emergency response plan.

APPENDIX A
Job Safety Analysis (JSA)

Job Safety Analysis (JSA)

Date of Analysis: 9/10/2010 JSA Conducted By: Matthew Mankovich JSA No. 1

Job Title: Senior Project Manager Department: Environmental

Job Description: Drilling of borings and soil and groundwater sample collection

Job Location: 414 West 155th Street, New York, NY

(1) Job Segments & Steps	(2) Potential Hazards	(3) Safe Procedures & Preventive Measures
Walking around job site	<ul style="list-style-type: none"> Vehicles 	<ul style="list-style-type: none"> Wear reflective vest Don't assume the operator sees you
	<ul style="list-style-type: none"> Tripping hazards 	<ul style="list-style-type: none"> Maintain a clear path between the sample location and the preparation area. Walk pathway prior to collecting samples. Limit the amount of tools or supplies that are carried so that you can still see the ground.
	<ul style="list-style-type: none"> Heavy equipment 	<ul style="list-style-type: none"> Only approach after the spotter indicates it is safe to do so. Wear a reflective vest Don't assume that the operator sees you.
Working near Geoprobe operator	<ul style="list-style-type: none"> Being hit by equipment 	<ul style="list-style-type: none"> Only approach after the spotter indicates it is safe to do so. Wear a reflective vest
Soil Sampling	<ul style="list-style-type: none"> Heavy Equipment 	<ul style="list-style-type: none"> Only approach after the spotter indicates it is safe to do so. Wear a reflective vest Only sample when the operator has removed their hands from the controls.
	<ul style="list-style-type: none"> Excavation – falls and collapse 	<ul style="list-style-type: none"> Do not enter the excavation Stay back at least 2 feet from the edge of the excavation.
	<ul style="list-style-type: none"> All utilities will be marked out prior to drilling activities using NYC one call 	<ul style="list-style-type: none"> All soil borings will be cleared by a geophysical survey.
	<ul style="list-style-type: none"> Hand injuries 	<ul style="list-style-type: none"> Always watch hand placement – do not place your hand in direct path of a tool.
	<ul style="list-style-type: none"> Back injuries 	<ul style="list-style-type: none"> Follow safe lifting procedures of lifting with the legs not the back. Avoid setting tools and other equipment on the ground. Set at waist level. If over 50 pounds or awkward ask for assistance.
	<ul style="list-style-type: none"> Tripping hazards 	<ul style="list-style-type: none"> Housekeeping.

Job Safety Analysis (JSA)

(1) Job Segments & Steps	(2) Potential Hazards	(3) Safe Procedures & Preventive Measures
		<ul style="list-style-type: none">• Maintain a clear path between the sample location and the preparation area.
	<ul style="list-style-type: none">• Chemical contact	<ul style="list-style-type: none">• Wear nitrile gloves.

APPENDIX B
Chemical Hazard Information

CHEMICAL LISTING

Acetaldehyde		Formula: CH ₃ CHO	CAS#: 75-07-0	RTECS#: AB1925000	IDLH: Ca [2000 ppm]
Conversion: 1 ppm = 1.80 mg/m ³		DOT: 1089 129			
Synonyms/Trade Names: Acetic aldehyde, Ethanal, Ethyl aldehyde					
Exposure Limits: NIOSH REL: Ca See Appendix A See Appendix C (Aldehydes)				Measurement Methods (see Table 1): NIOSH 2018, 2538, 3507 OSHA 68	
Physical Description: Colorless liquid or gas (above 69°F) with a pungent, fruity odor.					
Chemical & Physical Properties: MW: 44.1 BP: 69°F Sol: Miscible F.I.P.: -36°F IP: 10.22 eV Sp.Gr: 0.79 VP: 740 mmHg FRZ: -190°F UEL: 60% LEL: 4.0% Class IA Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R. Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH ¥: ScbaF: Pd,Pp/SaF: Pd,Pp: AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers, acids, bases, alcohols, ammonia & amines, phenols, ketones, HCN, H ₂ S [Note: Prolonged contact with air may cause formation of peroxides that may explode and burst containers; easily undergoes polymerization.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, nose, throat; eye, skin burns; derm; conj; cough; CNS depres; delayed pulm edema; in animals: kidney, repro, terato effects; [carc] TO: Eyes, skin, resp sys, kidneys, CNS, repro sys [in animals: nasal cancer]				First Aid (see Table 6): Eye: Irr immed Skin: Water flush prompt Breath: Resp support Swallow: Medical attention immed	

Acetic acid		Formula: CH ₃ COOH	CAS#: 64-19-7	RTECS#: AF1225000	IDLH: 50 ppm
Conversion: 1 ppm = 2.46 mg/m ³		DOT: 2790 153 (10-80% acid); 2789 132 (>80% acid)			
Synonyms/Trade Names: Acetic acid (aqueous), Ethanoic acid, Glacial acetic acid (pure compound), Methanecarboxylic acid [Note: Can be found in concentrations of 5-8% in vinegar.]					
Exposure Limits: NIOSH REL: TWA 10 ppm (25 mg/m ³) ST 15 ppm (37 mg/m ³)			OSHA PEL: TWA 10 ppm (25 mg/m ³)		Measurement Methods (see Table 1): NIOSH 1603 OSHA ID186SG
Physical Description: Colorless liquid or crystals with a sour, vinegar-like odor. [Note: Pure compound is a solid below 62°F. Often used in an aqueous solution.]					
Chemical & Physical Properties: MW: 60.1 BP: 244°F Sol: Miscible F.I.P.: 103°F IP: 10.66 eV Sp.Gr: 1.05 VP: 11 mmHg FRZ: 62°F UEL(200°F): 19.9% LEL: 4.0% Class II Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact (>10%) Eyes: Prevent eye contact Wash skin: When contam (>10%) Remove: When wet or contam (>10%) Change: N.R. Provide: Eyewash (>5%) Quick drench (>50%)		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 50 ppm: Sa:CfE/Pap/OvE/CcrFOv/ GmFOv/ScbaF/SaF §: ScbaF: Pd,Pp/SaF: Pd,Pp:AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers (especially chromic acid, sodium peroxide & nitric acid), strong caustics [Note: Corrosive to metals.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Irrit eyes, skin, nose, throat; eye, skin burns; skin sens; dental erosion; black skin, hyperkeratosis; conj, lac; phar edema, chronic bron TO: Eyes, skin, resp sys, teeth				First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed	

Acetic anhydride		Formula: (CH ₃ CO) ₂ O	CAS#: 108-24-7	RTECS#: AK1925000	IDLH: 200 ppm
Conversion: 1 ppm = 4.18 mg/m ³			DOT: 1715 137		
Synonyms/Trade Names: Acetic acid anhydride, Acetic oxide, Acetyl oxide, Ethanoic anhydride					
Exposure Limits: NIOSH REL: C 5 ppm (20 mg/m ³) OSHA PEL†: TWA 5 ppm (20 mg/m ³)				Measurement Methods (see Table 1): NIOSH 3506 OSHA 82, 102	
Physical Description: Colorless liquid with a strong, pungent, vinegar-like odor.					
Chemical & Physical Properties: MW: 102.1 BP: 282°F Sol: 12% F.I.P: 120°F IP: 10.00 eV Sp.Gr: 1.08 VP: 4 mmHg FRZ: -99°F UEL: 10.3% LEL: 2.7% Class II Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 125 ppm: Sa:CfE/PapRovE 200 ppm: CcrFOv/GmFOv/PapRTOvE/ ScaF/SaF §: ScaF:Pd,Pp/SaF:Pd,Pp:ASca Escape: GmFOv/ScaE	
Incompatibilities and Reactivities: Water, alcohols, strong oxidizers (especially chromic acid), amines, strong caustics [Note: Corrosive to iron, steel & other metals. Reacts with water to form acetic acid.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Conj, lac, corn edema, opac, photo; nasal, phar irrit; cough, dysp, bron; skin burns, vesic, sens derm TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed		

Acetone		Formula: (CH ₃) ₂ CO	CAS#: 67-64-1	RTECS#: AL3150000	IDLH: 2500 ppm [10%LEL]
Conversion: 1 ppm = 2.38 mg/m ³			DOT: 1090 127		
Synonyms/Trade Names: Dimethyl ketone, Ketone propane, 2-Propanone					
Exposure Limits: NIOSH REL: TWA 250 ppm (590 mg/m ³) OSHA PEL†: TWA 1000 ppm (2400 mg/m ³)				Measurement Methods (see Table 1): NIOSH 1300, 2555, 3800 OSHA 69	
Physical Description: Colorless liquid with a fragrant, mint-like odor.					
Chemical & Physical Properties: MW: 58.1 BP: 133°F Sol: Miscible FLP: 0°F IP: 9.69 eV Sp.Gr: 0.79 VP: 180 mmHg FRZ: -140°F UEL: 12.8% LEL: 2.5% Class IB Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R.		Respirator Recommendations (see Tables 3 and 4): NIOSH 2500 ppm: CcrOv*/PapRov*/GmFOv/ Sa*/ScbaF §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Oxidizers, acids					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, nose, throat; head, dizz, CNS depres; derm TO: Eyes, skin, resp sys, CNS			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed		

Acetone cyanohydrin		Formula: CH ₃ C(OH)CNCH ₃	CAS#: 75-86-5	RTECS#: OD9275000	IDLH: N.D.
Conversion: 1 ppm = 3.48 mg/m ³		DOT: 1541 155 (stabilized)			
Synonyms/Trade Names: Cyanohydrin-2-propanone, 2-Cyano-2-propanol, α-Hydroxyisobutyronitrile, 2-Hydroxy-2-methyl-propionitrile, 2-Methylactonitrile					
Exposure Limits: NIOSH REL: C 1 ppm (4 mg/m ³) [15-minute] OSHA PEL: none				Measurement Methods (see Table 1): NIOSH 2506	
Physical Description: Colorless liquid with a faint odor of bitter almond. [Note: Forms cyanide in the body.]					
Chemical & Physical Properties: MW: 85.1 BP: 203°F Sol: Miscible FLP: 165°F IP: ? Sp.Gr(77°F): 0.93 VP: 0.8 mmHg FRZ: -4°F UEL: 12.0% LEL: 2.2% Class IIIA Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH 10 ppm: Sa 25 ppm: Sa:Cf 50 ppm: ScbaF/SaF 250 ppm: SaF:Pd,Pp §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Sulfuric acid, caustics [Note: Slowly decomposes to acetone & HCN at room temperatures; rate is accelerated by an increase in pH, water content, or temperature.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, resp sys; dizz, lass, head, conf, convuls; liver, kidney inj; pulm edema, asphy TO: Eyes, skin, resp sys, CNS, CVS, liver, kidneys, GI tract				First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed	

Acetonitrile		Formula: CH ₃ CN	CAS#: 75-05-8	RTECS#: AL7700000	IDLH: 500 ppm
Conversion: 1 ppm = 1.68 mg/m ³			DOT: 1648 127		
Synonyms/Trade Names: Cyanomethane, Ethyl nitrile, Methyl cyanide [Note: Forms cyanide in the body.]					
Exposure Limits: NIOSH REL: TWA 20 ppm (34 mg/m ³) OSHA PEL†: TWA 40 ppm (70 mg/m ³)				Measurement Methods (see Table 1): NIOSH 1606	
Physical Description: Colorless liquid with an aromatic odor.					
Chemical & Physical Properties: MW: 41.1 BP: 179°F Sol: Miscible Fl.P(oc): 42°F IP: 12.20 eV Sp.Gr: 0.78 VP: 73 mmHg FRZ: -49°F UEL: 16.0% LEL: 3.0% Class IB Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R. Provide: Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH 200 ppm: CcrOv/Sa 500 ppm: Sa:Cf/PapRov/CcrFOv/GmFOv/ ScbaF/SaF §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit nose, throat; asphy; nau, vomit; chest pain; lass; stupor, convuls; in animals: liver, kidney damage TO: Resp sys, CVS, CNS, liver, kidneys				First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed	

2-Acetylaminofluorene		Formula: C ₁₅ H ₁₃ NO	CAS#: 53-96-3	RTECS#: AB9450000	IDLH: Ca [N.D.]
Conversion:		DOT:			
Synonyms/Trade Names: AAF, 2-AAF, 2-Acetaminofluorene, N-Acetyl-2-aminofluorene, FAA, 2-FAA, 2-Fluorenylacetamide					
Exposure Limits: NIOSH REL: Ca See Appendix A OSHA PEL: [1910.1014] See Appendix B				Measurement Methods (see Table 1): None available	
Physical Description: Tan, crystalline powder.					
Chemical & Physical Properties: MW: 223.3 BP: ? Sol: Insoluble Fl.P: ? IP: ? Sp.Gr: ? VP: ? MLT: 381°F UEL: ? LEL: ? Combustible Solid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam/Daily Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH ✱: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: 100F/ScbaE See Appendix E (page 351)	
Incompatibilities and Reactivities: None reported					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Reduced function of liver, kidneys, bladder, pancreas; [carc] TO: Liver, bladder, kidneys, pancreas, skin [in animals: tumors of the liver, bladder, lungs, skin & pancreas]			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed		

Acetylene		Formula: HC≡CH	CAS#: 74-86-2	RTECS#: AO9600000	IDLH: N.D.
Conversion: 1 ppm = 1.06 mg/m ³		DOT: 1001 116			
Synonyms/Trade Names: Ethine, Ethyne [Note: A compressed gas used in the welding & cutting of metals.]					
Exposure Limits: NIOSH REL: C 2500 ppm (2662 mg/m ³) OSHA PEL: none				Measurement Methods (see Table 1): NIOSH Acetylene Criteria Document	
Physical Description: Colorless gas with a faint, ethereal odor. [Note: Commercial grade has a garlic-like odor. Shipped under pressure dissolved in acetone.]					
Chemical & Physical Properties: MW: 26.0 BP: Sublimes Sol: 2% F.L.P: NA (Gas) IP: 11.40 eV R.GasD: 0.91 VP: 44.2 atm FRZ: -119°F (Sublimes) UEL: 100% LEL: 2.5% Flammable Gas		Personal Protection/Sanitation (see Table 2): Skin: Frostbite Eyes: Frostbite Wash skin: N.R. Remove: When wet (flamm) Change: N.R. Provide: Frostbite wash		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Zinc; oxygen & other oxidizing agents such as halogens [Note: Forms explosive acetylide compounds with copper, mercury, silver & brasses (containing more than 66% copper).]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con (liquid) SY: Head, dizzy; asphy; liquid: frostbite TO: CNS, resp sys			First Aid (see Table 6): Eye: Frostbite Skin: Frostbite Breath: Fresh air		

Acetylene tetrabromide	Formula: CHBr ₂ CHBr ₂	CAS#: 79-27-6	RTECS#: K18225000	IDLH: 8 ppm
Conversion: 1 ppm = 14.14 mg/m ³		DOT: 2504 159		
Synonyms/Trade Names: Symmetrical tetrabromoethane, TBE, Tetrabromoacetylene, Tetrabromoethane, 1,1,2,2-Tetrabromoethane				
Exposure Limits: NIOSH REL: See Appendix D OSHA PEL: TWA 1 ppm (14 mg/m ³)			Measurement Methods (see Table 1): NIOSH 2003	
Physical Description: Pale-yellow liquid with a pungent odor similar to camphor or iodoform. [Note: A solid below 32°F.]				
Chemical & Physical Properties: MW: 345.7 BP: 474°F (Decomposes) Sol: 0.07% F.L.P: NA IP: ? Sp.Gr: 2.97 VP: 0.02 mmHg FRZ: 32°F UEL: NA LEL: NA Noncombustible Liquid	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R.	Respirator Recommendations (see Tables 3 and 4): OSHA 8 ppm: Sa/ScbaF §: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFOv/ScbaE		
Incompatibilities and Reactivities: Strong caustics; hot iron; reducing metals such as aluminum, magnesium, and zinc				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, nose; anor, nau; head; abdom pain; jaun; leucyt; CNS depres TO: Eyes, resp sys, liver, CNS		First Aid (see Table 6): Eye: Irr immed Skin: Water flush prompt Breath: Resp support Swallow: Medical attention immed		

Acetylsalicylic acid	Formula: CH ₃ COOC ₆ H ₄ COOH	CAS#: 50-78-2	RTECS#: VO0700000	IDLH: N.D.
Conversion:	DOT:			
Synonyms/Trade Names: o-Acetoxybenzoic acid, 2-Acetoxybenzoic acid, Aspirin				
Exposure Limits: NIOSH REL: TWA 5 mg/m ³ OSHA PEL†: none			Measurement Methods (see Table 1): NIOSH 0500	
Physical Description: Odorless, colorless to white, crystal-line powder. [aspirin] [Note: Develops the vinegar-like odor of acetic acid on contact with moisture.]				
Chemical & Physical Properties: MW: 180.2 BP: 284°F (Decomposes) Sol(77°F): 0.3% F.L.P: NA IP: NA Sp.Gr: 1.35 VP: 0 mmHg (approx) MLT: 275°F UEL: NA LEL: NA MEC: 40 g/m ³ Combustible Powder; explosion hazard if dispersed in air.		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: N.R. Change: Daily Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): Not available.
		Incompatibilities and Reactivities: Solutions of alkali hydroxides or carbonates, strong oxidizers, moisture [Note: Slowly hydrolyzes in moist air to salicylic & acetic acids.]		
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, upper resp sys; incr blood clotting time; nau, vomit; liver, kidney inj TO: Eyes, skin, resp sys, blood, liver, kidneys			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash Breath: Resp support Swallow: Medical attention immed	

Acrolein	Formula: CH ₂ =CHCHO	CAS#: 107-02-8	RTECS#: AS1050000	IDLH: 2 ppm
Conversion: 1 ppm = 2.29 mg/m ³		DOT: 1092 131P (inhibited)		
Synonyms/Trade Names: Acraldehyde, Acrylaldehyde, Acrylic aldehyde, Allyl aldehyde, Propenal, 2-Propenal				
Exposure Limits: NIOSH REL: TWA 0.1 ppm (0.25 mg/m ³) ST 0.3 ppm (0.8 mg/m ³) See Appendix C (Aldehydes) OSHA PEL†: TWA 0.1 ppm (0.25 mg/m ³)			Measurement Methods (see Table 1): NIOSH 2501 OSHA 52	
Physical Description: Colorless or yellow liquid with a piercing, disagreeable odor.				
Chemical & Physical Properties: MW: 56.1 BP: 127°F Sol: 40% Fl.P: -15°F IP: 10.13 eV Sp.Gr: 0.84 VP: 210 mmHg FRZ: -126°F UEL: 31% LEL: 2.8% Class IB Flammable Liquid	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R. Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 2 ppm: Sa:C*/Pap/Ov*/CcrFOv/ GmFOv/ScbaF/SaF §: ScbaF: Pd,Pp/SaF: Pd,Pp/AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Oxidizers, acids, alkalis, ammonia, amines [Note: Polymerizes readily unless inhibited—usually with hydroquinone. May form shock-sensitive peroxides over time.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, muc memb; decr pulm func; delayed pulm edema; chronic resp disease TO: Eyes, skin, resp sys, heart			First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed	

Acrylamide	Formula: CH ₂ =CHCONH ₂	CAS#: 79-06-1	RTECS#: AS3325000	IDLH: Ca [60 mg/m ³]
Conversion:		DOT: 2074 153P		
Synonyms/Trade Names: Acrylamide monomer, Acrylic amide, Propenamide, 2-Propenamide				
Exposure Limits: NIOSH REL: Ca TWA 0.03 mg/m ³ [skin] See Appendix A OSHA PEL†: TWA 0.3 mg/m ³ [skin]			Measurement Methods (see Table 1): OSHA 21, PV2004	
Physical Description: White crystalline, odorless solid.				
Chemical & Physical Properties: MW: 71.1 BP: 347-572°F (Decomposes) Sol(86°F): 216% Fl.P: 280°F IP: 9.50 eV Sp.Gr: 1.12 VP: 0.007 mmHg MLT: 184°F UEL: ? LEL: ? Combustible Solid (may also be dissolved in flammable liquids).		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam/Daily Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench	Respirator Recommendations (see Tables 3 and 4): NIOSH §: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFOv/ScbaE	
		Incompatibilities and Reactivities: Strong oxidizers [Note: May polymerize violently upon melting.]		
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin; ataxia, numb limbs, pares; musc weak; absent deep tendon reflex; hand sweat; lass, drow; repro effects; [carc] TO: Eyes, skin, CNS, PNS, repro sys [in animals: tumors of the lungs, testes, thyroid & adrenal glands]		First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed		

Acrylic acid	Formula: CH ₂ =CHCOOH	CAS#: 79-10-7	RTECS#: AS4375000	IDLH: N.D.
Conversion: 1 ppm = 2.95 mg/m ³		DOT: 2218 132P (inhibited)		
Synonyms/Trade Names: Acroleic acid, Aqueous acrylic acid (technical grade is 94%), Ethylenecarboxylic acid, Glacial acrylic acid (98% in aqueous solution), 2-Propenoic acid				
Exposure Limits: NIOSH REL: TWA 2 ppm (6 mg/m ³) [skin] OSHA PEL†: none			Measurement Methods (see Table 1): OSHA 28, PV2005	
Physical Description: Colorless liquid or solid (below 55°F) with a distinctive, acid odor. [Note: Shipped with an inhibitor (e.g., hydroquinone) since it readily polymerizes.]				
Chemical & Physical Properties: MW: 72.1 BP: 286°F Sol: Miscible F.P.: 121°F IP: ? Sp.Gr: 1.05 VP: 3 mmHg FRZ: 55°F UEL: 8.02% LEL: 2.4% Class II Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): Not available.
		Incompatibilities and Reactivities: Oxidizers, amines, alkalis, ammonium hydroxide, chloro-sulfonic acid, oleum, ethylene diamine, ethylenimine, 2-aminoethanol [Note: Corrosive to many metals.]		
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, resp sys; eye, skin burns; skin sens; in animals: lung, liver, kidney inj TO: Eyes, skin, resp sys		First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed		

Acrylonitrile	Formula: CH ₂ =CHCN	CAS#: 107-13-1	RTECS#: AT5250000	IDLH: Ca [85 ppm]
Conversion: 1 ppm = 2.17 mg/m ³		DOT: 1093 131P (inhibited)		
Synonyms/Trade Names: Acrylonitrile monomer, AN, Cyanoethylene, Propenenitrile, 2-Propenenitrile, VCN, Vinyl cyanide				
Exposure Limits: NIOSH REL: Ca TWA 1 ppm C 10 ppm [15-minute] [skin] See Appendix A OSHA PEL: [1910.1045] TWA 2 ppm C 10 ppm [15-minute] [skin]			Measurement Methods (see Table 1): NIOSH 1604 OSHA 37	
Physical Description: Colorless to pale-yellow liquid with an unpleasant odor. [Note: Odor can only be detected above the PEL.]				
Chemical & Physical Properties: MW: 53.1 BP: 171°F Sol: 7% F.L.P.: 30°F IP: 10.91 eV Sp.Gr: 0.81 VP: 83 mmHg FRZ: -116°F UEL: 17% LEL: 3.0% Class IB Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R. Provide: Eyewash Quick drench	Respirator Recommendations (see Tables 3 and 4): NIOSH ¥: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFOv/ScbaE See Appendix E (page 351)	
		Incompatibilities and Reactivities: Strong oxidizers, acids & alkalis; bromine; amines [Note: Unless inhibited (usually with methylhydroquinone), may polymerize spontaneously or when heated or in presence of strong alkali. Attacks copper.]		
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin; asphy; head; sneez; nau, vomit; lass, dizz; skin vesic; scaling derm; [carc] TO: Eyes, skin, CVS, liver, kidneys, CNS [brain tumors, lung & bowel cancer]			First Aid (see Table 6): Eye: Irr immed Skin: Water wash immed Breath: Resp support Swallow: Medical attention immed	

Adiponitrile	Formula: NC(CH ₂) ₄ CN	CAS#: 111-69-3	RTECS#: AV2625000	IDLH: N.D.
Conversion: 1 ppm = 4.43 mg/m ³		DOT: 2205 153		
Synonyms/Trade Names: 1,4-Dicyanobutane, Hexanedinitrile, Tetramethylene cyanide				
Exposure Limits: NIOSH REL: TWA 4 ppm (18 mg/m ³) OSHA PEL: none			Measurement Methods (see Table 1): NIOSH Nitriles Criteria Document	
Physical Description: Water-white, practically odorless, oily liquid. [Note: A solid below 34°F. Forms cyanide in the body.]				
Chemical & Physical Properties: MW: 108.2 BP: 563°F Sol: 4.5% Fl.P(oc): 199°F IP: ? Sp.Gr: 0.97 VP: 0.002 mmHg FRZ: 34°F UEL: 5.0% LEL: 1.7% Class IIIA Combustible Liquid	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily	Respirator Recommendations (see Tables 3 and 4): NIOSH 40 ppm: Sa 100 ppm: Sa:Cf 200 ppm: ScbaF/SaF 250 ppm: SaF:Pd,Pp §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFOWScbaE		
Incompatibilities and Reactivities: Oxidizers (e.g., perchlorates, nitrates), strong acids (e.g., sulfuric acid) [Note: Decomposes above 194°F, forming hydrogen cyanide.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, resp sys; head, dizz, lass, conf, convuls; blurred vision; dysp; abdom pain, nau, vomit TO: Eyes, skin, resp sys, CNS, CVS		First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed		

Aldrin	Formula: C ₁₂ H ₈ Cl ₆	CAS#: 309-00-2	RTECS#: IO2100000	IDLH: Ca [25 mg/m ³]
Conversion:		DOT: 2761 151		
Synonyms/Trade Names: HHDN, Octalene, 1,2,3,4,10,10-Hexachloro-1,4,4a,5,8,8a-hexahydro-endo-1,4-exo-5,8-dimethanonaphthalene				
Exposure Limits: NIOSH REL: Ca TWA 0.25 mg/m ³ [skin] See Appendix A OSHA PEL: TWA 0.25 mg/m ³ [skin]			Measurement Methods (see Table 1): NIOSH 5502	
Physical Description: Colorless to dark-brown crystalline solid with a mild chemical odor. [Note: Formerly used as an insecticide.]				
Chemical & Physical Properties: MW: 364.9 BP: Decomposes Sol: 0.003% Fl.P: NA IP: ? Sp.Gr: 1.60 VP: 0.00008 mmHg MLT: 219°F UEL: NA LEL: NA Noncombustible Solid, but may be dissolved in flammable liquids. Incompatibilities and Reactivities: Strong oxidizers, acids, amines, iron & aluminum chlorides, magnesium, zinc					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, nose, muc memb; pulm edema; in animals: liver, kidney inj TO: Eyes, skin, resp sys, liver, kidneys				First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed	

Allyl glycidyl ether		Formula: C ₆ H ₁₀ O ₂	CAS#: 106-92-3	RTECS#: RR0875000	IDLH: 50 ppm
Conversion: 1 ppm = 4.67 mg/m ³		DOT: 2219 129			
Synonyms/Trade Names: AGE, 1-Allyloxy-2,3-epoxypropane, Glycidyl allyl ether, [(2-Propenyloxy)methyl] oxirane					
Exposure Limits: NIOSH REL: TWA 5 ppm (22 mg/m ³) [skin] ST 10 ppm (44 mg/m ³) OSHA PEL†: C 10 ppm (45 mg/m ³)				Measurement Methods (see Table 1): NIOSH 2545	
Physical Description: Colorless liquid with a pleasant odor.					
Chemical & Physical Properties: MW: 114.2 BP: 309°F Sol: 14% FLP: 135°F IP: ? Sp.Gr: 0.97 VP: 2 mmHg FRZ: -148°F [forms glass] UEL: ? LEL: ? Class II Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Provide: Eyewash		Respirator Recommendations (see Tables 3 and 4): NIOSH 50 ppm: CcrOv/PapRov/ GmFOv/Sa/ScbaF §: ScbaF: Pd,Pp/SaF: Pd,Pp: AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, nose, resp sys; derm; pulm edema; narco; possible hemato, repro effects TO: Eyes, skin, resp sys, blood, repro sys			First Aid (see Table 6): Eye: Irr immed Skin: Water flush prompt Breath: Resp support Swallow: Medical attention immed		

Allyl propyl disulfide	Formula: H ₂ C=CHCH ₂ S ₂ CH ₂ CH ₂ CH ₃	CAS#: 2179-59-1	RTECS#: JO0350000	IDLH: N.D.
Conversion: 1 ppm = 6.07 mg/m ³		DOT:		
Synonyms/Trade Names: 4,5-Dithia-1-octene, Onion oil, 2-Propenyl propyl disulfide, Propyl allyl disulfide				
Exposure Limits: NIOSH REL: TWA 2 ppm (12 mg/m ³) ST 3 ppm (18 mg/m ³) OSHA PEL†: TWA 2 ppm (12 mg/m ³)			Measurement Methods (see Table 1): OSHA PV2086	
Physical Description: Pale-yellow liquid with a strong & irritating onion-like odor. [Note: The chief volatile component of onion oil.]			Respirator Recommendations (see Tables 3 and 4): Not available.	
Chemical & Physical Properties: MW: 148.3 BP: ? Sol: Insoluble FLP: ? IP: ? Sp.Gr(59°F): 0.93 VP: ? FRZ: 5°F UEL: ? LEL: ? Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: Prevent eye contact Wash skin: N.R. Remove: When wet or contam Change: N.R.		
Incompatibilities and Reactivities: Oxidizers				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, nose, resp sys; lac TO: Eyes, resp sys		First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed		

α -Alumina	Formula: Al ₂ O ₃	CAS#: 1344-28-1	RTECS#: BD1200000	IDLH: N.D.
Conversion:	DOT:			
Synonyms/Trade Names: Alumina, Aluminum oxide, Aluminum trioxide [Note: α -Alumina is the main component of technical grade alumina. Corundum is natural Al ₂ O ₃ . Emery is an impure crystalline variety of Al ₂ O ₃ .]				
Exposure Limits: NIOSH REL: See Appendix D OSHA PEL†: TWA 15 mg/m ³ (total) TWA 5 mg/m ³ (resp)			Measurement Methods (see Table 1): NIOSH 0500, 0600 OSHA ID109SG, ID198SG	
Physical Description: White, odorless, crystalline powder.				
Chemical & Physical Properties: MW: 101.9 BP: 5396°F Sol: Insoluble F.P: NA IP: NA Sp.Gr: 4.0 VP: 0 mmHg (approx) MLT: 3632°F UEL: NA LEL: NA Noncombustible solid, but dusts may form explosive mixtures in air.	Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: N.R. Remove: N.R. Change: N.R.		Respirator Recommendations (see Tables 3 and 4): Not available.	
	Incompatibilities and Reactivities: Chlorine trifluoride, hot chlorinated rubber, acids, oxidizers [Note: Hydrogen gas may be formed when finely divided iron contacts moisture during crushing & milling operations.]			
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, resp sys TO: Eyes, skin, resp sys		First Aid (see Table 6): Eye: Irr immed Skin: Blot/brush away Breath: Fresh air Swallow: Medical attention immed		

Aluminum	Formula: Al	CAS#: 7429-90-5	RTECS#: BD0330000	IDLH: N.D.
Conversion:	DOT: 1309 170 (powder, coated); 1396 138 (powder, uncoated); 9260 169 (molten)			
Synonyms/Trade Names: Aluminium, Aluminum metal, Aluminum powder, Elemental aluminum				
Exposure Limits: NIOSH REL: TWA 10 mg/m ³ (total) TWA 5 mg/m ³ (resp) OSHA PEL: TWA 15 mg/m ³ (total) TWA 5 mg/m ³ (resp)			Measurement Methods (see Table 1): NIOSH 7013, 7300, 7301, 7303 OSHA ID121	
Physical Description: Silvery-white, malleable, ductile, odorless metal.				
Chemical & Physical Properties: MW: 27.0 BP: 4221°F Sol: Insoluble F.P: NA IP: NA Sp.Gr: 2.70 VP: 0 mmHg (approx) MLT: 1220°F UEL: NA LEL: NA Combustible Solid, finely divided dust is easily ignited; may cause explosions.		Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: N.R. Remove: N.R. Change: N.R.		Respirator Recommendations (see Tables 3 and 4): Not available.
Incompatibilities and Reactivities: Strong oxidizers & acids, halogenated hydrocarbons [Note: Corrodes in contact with acids & other metals. Ignition may occur if powders are mixed with halogens, carbon disulfide, or methyl chloride.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Irrit eyes, skin, resp sys TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Breath: Fresh air	

Aluminum (pyro powders and welding fumes, as Al)	Formula:	CAS#:	RTECS#:	IDLH: N.D.
Conversion:		DOT: 1383 135 (powder, pyrophoric)		
Synonyms/Trade Names: Synonyms vary depending upon the specific aluminum compound.				
Exposure Limits: NIOSH REL: TWA 5 mg/m ³ OSHA PEL†: none			Measurement Methods (see Table 1): NIOSH 7300, 7301, 7303	
Physical Description: Appearance and odor vary depending upon the specific aluminum compound.				
Chemical & Physical Properties: Properties vary depending upon the specific aluminum compound.	Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: N.R. Remove: N.R. Change: N.R.		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Varies				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit skin, resp sys; pulm fib TO: Skin, resp sys			First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed	

Aluminum (soluble salts and alkyls, as Al)	Formula:	CAS#:	RTECS#:	IDLH: N.D.
Conversion:		DOT: 3051 135 (Aluminum alkyls)		
Synonyms/Trade Names: Synonyms vary depending upon the specific aluminum compound.				
Exposure Limits: NIOSH REL: TWA 2 mg/m ³ OSHA PEL†: none			Measurement Methods (see Table 1): NIOSH 7013, 7300, 7301, 7303 OSHA ID121	
Physical Description: Appearance and odor vary depending upon the specific aluminum compound.				
Chemical & Physical Properties: Properties vary depending upon the specific aluminum compound.	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Varies				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit skin, resp sys; skin burns TO: Skin, resp sys			First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed	

4-Aminodiphenyl		Formula: C ₆ H ₅ C ₆ H ₄ NH ₂	CAS#: 92-67-1	RTECS#: DU8925000	IDLH: Ca [N.D.]
Conversion:		DOT:			
Synonyms/Trade Names: 4-Aminobiphenyl, p-Aminobiphenyl, p-Aminodiphenyl, 4-Phenylaniline					
Exposure Limits: NIOSH REL: Ca See Appendix A OSHA PEL: [1910.1011] See Appendix B				Measurement Methods (see Table 1): NIOSH P&CAM269 (II-4) OSHA 93	
Physical Description: Colorless crystals with a floral odor. [Note: Turns purple on contact with air.]					
Chemical & Physical Properties: MW: 169.2 BP: 576°F Sol: Slight FLP: ? IP: ? Sp.Gr: 1.16 VP(227°F): 1 mmHg MLT: 127°F UEL: ? LEL: ? Combustible Solid, but must be preheated before ignition possible. Incompatibilities and Reactivities: Strong oxidizers, silver nitrate					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing SY: After ingestion of large doses: vomit, dysp, cyan, coarse pulm rales; liver damage TO: Resp sys, blood, liver				First Aid (see Table 6): Eye: Irr immed Skin: Soap wash prompt Breath: Resp support Swallow: Medical attention immed	

Arsenic (inorganic compounds, as As)		Formula: As (metal)	CAS#: 7440-38-2 (metal)	RTECS#: CG0525000 (metal)	IDLH: Ca [5 mg/m ³ (as As)]
Conversion:		DOT: 1558 152 (metal); 1562 152 (dust)			
Synonyms/Trade Names: Arsenic metal: Arsenia Other synonyms vary depending upon the specific As compound. [Note: OSHA considers "Inorganic Arsenic" to mean copper acetoarsenite & all inorganic compounds containing arsenic except ARSINE.]					
Exposure Limits: NIOSH REL: Ca C 0.002 mg/m ³ [15-minute] See Appendix A OSHA PEL: [1910.1018] TWA 0.010 mg/m ³				Measurement Methods (see Table 1): NIOSH 7300, 7301, 7303, 9102, 7900 OSHA ID105	
Physical Description: Metal: Silver-gray or tin-white, brittle, odorless solid.					
Chemical & Physical Properties: MW: 74.9 BP: Sublimes So: Insoluble Fl.P: NA IP: NA Sp.Gr: 5.73 (metal) VP: 0 mmHg (approx) MLT: 1135°F (Sublimes) UEL: NA LEL: NA		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam/Daily Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH *: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFAg100/ScbaE See Appendix E (page 351)	
Metal: Noncombustible Solid in bulk form, but a slight explosion hazard in the form of dust when exposed to flame.					
Incompatibilities and Reactivities: Strong oxidizers, bromine azide [Note: Hydrogen gas can react with inorganic arsenic to form the highly toxic gas arsine.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Con, Ing SY: Ulceration of nasal septum, derm, GI disturbances, peri neur, resp irrit, hyperpig of skin, [carc] TO: Liver, kidneys, skin, lungs, lymphatic sys [lung & lymphatic cancer]				First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed	

Arsenic (organic compounds, as As)		Formula:	CAS#:	RTECS#:	IDLH: N.D.
Conversion:		DOT:			
Synonyms/Trade Names: Synonyms vary depending upon the specific organic arsenic compound.					
Exposure Limits: NIOSH REL: none OSHA PEL: TWA 0.5 mg/m ³				Measurement Methods (see Table 1): NIOSH 5022	
Physical Description: Appearance and odor vary depending upon the specific organic arsenic compound.					
Chemical & Physical Properties: Properties vary depending upon the specific organic arsenic compound.		Personal Protection/Sanitation (see Table 2): Recommendations regarding personal protective clothing vary depending upon the specific compound.		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Varies					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: In animals: irrit skin, possible derm; resp distress; diarr; kidney damage; musc tremor, convuls; possible GI tract, repro effects; possible liver damage TO: Skin, resp sys, kidneys, CNS, liver, GI tract, repro sys				First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed	

Arsine		Formula: AsH ₃	CAS#: 7784-42-1	RTECS#: CG6475000	IDLH: Ca [3 ppm]
Conversion: 1 ppm = 3.19 mg/m ³		DOT: 2188 119			
Synonyms/Trade Names: Arsenic hydride, Arsenic trihydride, Arseniuretted hydrogen, Arsenous hydride, Hydrogen arsenide					
Exposure Limits: NIOSH REL: Ca C 0.002 mg/m ³ [15-minute] See Appendix A OSHA PEL: TWA 0.05 ppm (0.2 mg/m ³)				Measurement Methods (see Table 1): NIOSH 6001 OSHA ID105	
Physical Description: Colorless gas with a mild, garlic-like odor. [Note: Shipped as a liquefied compressed gas.]					
Chemical & Physical Properties: MW: 78.0 BP: -81°F Sol: 20% FLP: NA (Gas) IP: 9.89 eV RGasD: 2.69 VP(70°F): 14.9 atm FRZ: -179°F UEL: 78% LEL: 5.1% Flammable Gas		Personal Protection/Sanitation (see Table 2): Skin: Frostbite Eyes: Frostbite Wash skin: N.R. Remove: When wet (flamm) Change: N.R. Provide: Frostbite wash			
		Respirator Recommendations (see Tables 3 and 4): NIOSH ✱: ScbaF: Pd, Pp/ SaF: Pd, Pp: AScba Escape: GmFS/ScbaE			
Incompatibilities and Reactivities: Strong oxidizers, chlorine, nitric acid [Note: Decomposes above 446°F. There is a high potential for the generation of arsine gas when inorganic arsenic is exposed to nascent (freshly formed) hydrogen.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con (liquid) SY: Head, mal, lass, dizz; dysp; abdom, back pain; nau, vomit; bronze skin; hema; jaun; peri neur; liquid: frostbite; [carc] TO: Blood, kidneys, liver [lung & lymphatic cancer]			First Aid (see Table 6): Eye: Frostbite Skin: Frostbite Breath: Resp support		

Asbestos	Formula: Hydrated mineral silicates	CAS#: 1332-21-4	RTECS#: Cl6475000	IDLH: Ca [N.D.]
Conversion:		DOT: 2212 171 (blue, brown); 2590 171 (white)		
Synonyms/Trade Names: Actinolite, Actinolite asbestos, Amosite (cummingtonite-grunerite), Anthophyllite, Anthophyllite asbestos, Chrysotile, Crocidolite (Riebeckite), Tremolite, Tremolite asbestos				
Exposure Limits: NIOSH REL: Ca See Appendix A See Appendix C OSHA PEL: [1910.1001] [1926.1101] See Appendix C			Measurement Methods (see Table 1): NIOSH 7400, 7402 OSHA ID160, ID191	
Physical Description: White or greenish (chrysotile), blue (crocidolite), or gray-green (amosite) fibrous, odorless solids.				
Chemical & Physical Properties: MW: Varies BP: Decomposes Sol: Insoluble Fl.P: NA IP: NA Sp.Gr: ? Incompatibilities and Reactivities: Oxidizers, acids, copper, aluminum, magnesium, iron, zinc, tin [Note: Can polymerize when in contact with all common metals except nickel & lead. Hydrolyzes in H ₂ O to benzyl alcohol.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, nose; lass; irrity; head; skin eruption; pulm edema TO: Eyes, skin, resp sys, CNS		First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed		

Beryllium & beryllium compounds (as Be)	Formula: Be (metal)	CAS#: 7440-41-7 (metal)	RTECS#: DS1750000 (metal)	IDLH: Ca [4 mg/m ³ (as Be)]
Conversion:		DOT: 1566 154 (compounds); 1567 134 (powder)		
Synonyms/Trade Names: Beryllium metal: Beryllium Other synonyms vary depending upon the specific beryllium compound.				
Exposure Limits: NIOSH REL: Ca Not to exceed 0.0005 mg/m ³ See Appendix A OSHA PEL: TWA 0.002 mg/m ³ C 0.005 mg/m ³ 0.025 mg/m ³ [30-minute maximum peak]				Measurement Methods (see Table 1): NIOSH 7102, 7300, 7301, 7303, 9102 OSHA ID125G, ID206
Physical Description: Metal: A hard, brittle, gray-white solid.				
Chemical & Physical Properties: MW: 9.0 BP: 4532°F Sol: Insoluble Fl.P: NA IP: NA Sp.Gr: 1.85 (metal) VP: 0 mmHg (approx) MLT: 2349°F UEL: NA LEL: NA	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: Daily Remove: When wet or contam Change: Daily Provide: Eyewash		Respirator Recommendations (see Tables 3 and 4): NIOSH ¥: ScbaF: Pd, Pp/ SaF: Pd, Pp: AScba Escape: 100F/ScbaE	
Metal: Noncombustible Solid in bulk form, but a slight explosion hazard in the form of a powder or dust.				
Incompatibilities and Reactivities: Acids, caustics, chlorinated hydrocarbons, oxidizers, molten lithium				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Berylliosis (chronic exposure): anor, low-wgt, lass, chest pain, cough, clubbing of fingers, cyan, pulm insufficiency; irrit eyes; derm; [carc] TO: Eyes, skin, resp sys [lung cancer]			First Aid (see Table 6): Eye: Irr immed Breath: Fresh air	

Bismuth telluride, doped with Selenium sulfide (as Bi ₂ Te ₃)		Formula:	CAS#:	RTECS#:	IDLH: N.D.
Conversion:		DOT:			
Synonyms/Trade Names: Doped bismuth sesqu telluride, Doped bismuth telluride, Doped bismuth tritelluride, Doped tellurobismuthite [Note: Doped with selenium sulfide. Commercial mix may contain 80% Bi ₂ Te ₃ , 20% stannous telluride, plus some tellurium.]					
Exposure Limits: NIOSH REL: TWA 5 mg/m ³ OSHA PEL†: none				Measurement Methods (see Table 1): NIOSH 0500 OSHA ID121	
Physical Description: Gray, crystalline solid that has been enhanced (doped) with a small amount of selenium sulfide (SeS). [Note: Doping alters the conductivity of a semiconductor.]					
Chemical & Physical Properties: Properties are unavailable but should be similar to Bismuth telluride, undoped. Sp.Gr: ? Noncombustible Solid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Strong oxidizers, moisture					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Irrit eyes, skin, upper resp sys; garlic breath; in animals: pulm lesions (nonfibrotic) TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed		

Bismuth telluride, undoped		Formula: Bi ₂ Te ₃	CAS#: 1304-82-1	RTECS#: EB3110000	IDLH: N.D.
Conversion:		DOT:			
Synonyms/Trade Names: Bismuth sesquitelluride, Bismuth telluride, Bismuth tritelluride, Tellurobismuthite					
Exposure Limits: NIOSH REL: TWA 10 mg/m ³ (total) TWA 5 mg/m ³ (resp) OSHA PEL: TWA 15 mg/m ³ (total) TWA 5 mg/m ³ (resp)				Measurement Methods (see Table 1): NIOSH 0500, 0600 OSHA ID121	
Physical Description: Gray, crystalline solid.					
Chemical & Physical Properties: MW: 800.8 BP: ? Sol: Insoluble FLP: NA IP: NA Sp.Gr: 7.7 VP: 0 mmHg (approx) MLT: 1063°F UEL: NA LEL: NA Noncombustible Solid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Strong oxidizers (e.g., bromine, chlorine, or fluorine), moisture, nitric acid (decomposes)					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Irrit eyes, skin, upper resp sys; garlic breath TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed		

B

Borates, tetra, sodium salts (Anhydrous)	Formula: Na ₂ B ₄ O ₇	CAS#: 1330-43-4	RTECS#: ED4588000	IDLH: N.D.
Conversion:	DOT:			
Synonyms/Trade Names: Anhydrous borax, Borax dehydrated, Disodium salt of boric acid, Disodium tetraborate, Fused borax, Sodium borate (anhydrous), Sodium tetraborate				
Exposure Limits: NIOSH REL: TWA 1 mg/m ³ OSHA PEL†: none			Measurement Methods (see Table 1): NIOSH 0500 OSHA ID125G	
Physical Description: White to gray, odorless powder. [herbicide] [Note: Becomes opaque on exposure to air.]				
Chemical & Physical Properties: MW: 201.2 BP: 2867°F (Decomposes) Sol: 4% Fl.P: NA IP: NA Sp.Gr: 2.37 VP: 0 mmHg (approx) MLT: 1366°F UEL: NA LEL: NA Noncombustible Solid		Personal Protection/Sanitation (see Table 2): Skin: N.R. Incompatibilities and Reactivities: Alkali metals, calcium oxide [Note: Hydrolyzes in moist air or hot water to form boric acid, hydrogen fluoride & fluoboric acid.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Irrit eyes, skin, nose, resp sys; epis; eye, skin burns; in animals: pneu; kidney damage TO: Eyes, skin, resp sys, kidneys			First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support	

Bromacil	Formula: C ₉ H ₁₃ BrN ₂ O ₂	CAS#: 314-40-9	RTECS#: YQ9100000	IDLH: N.D.
Conversion: 1 ppm = 10.68 mg/m ³	DOT:			
Synonyms/Trade Names: 5-Bromo-3-sec-butyl-6-methyluracil, 5-Bromo-6-methyl-3-(1-methylpropyl)uracil				
Exposure Limits: NIOSH REL: TWA 1 ppm (10 mg/m ³) OSHA PEL†: none			Measurement Methods (see Table 1): NIOSH 0500	
Physical Description: Odorless, colorless to white, crystalline solid. [herbicide] [Note: Commercially available as a wettable powder or in liquid formulations.]				
Chemical & Physical Properties: MW: 261.2 BP: Sublimes Sol(77°F): 0.08% FLP: NA IP: ? Sp.Gr: 1.55 VP(212°F): 0.0008 mmHg MLT: 317°F (Sublimes) UEL: NA LEL: NA Noncombustible Solid, but may be dissolved in flammable liquids.	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Strong acids (decomposes slowly), oxidizers, heat, sparks, open flames				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, upper resp sys; in animals: thyroid inj TO: Eyes, skin, resp sys, thyroid			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed	

B

Bromine	Formula: Br ₂	CAS#: 7726-95-6	RTECS#: EF9100000	IDLH: 3 ppm
Conversion: 1 ppm = 6.54 mg/m ³	DOT: 1744 154			
Synonyms/Trade Names: Molecular bromine				
Exposure Limits: NIOSH REL: TWA 0.1 ppm (0.7 mg/m ³) ST 0.3 ppm (2 mg/m ³) OSHA PEL†: TWA 0.1 ppm (0.7 mg/m ³)			Measurement Methods (see Table 1): NIOSH 6011 OSHA ID108	
Physical Description: Dark reddish-brown, fuming liquid with suffocating, irritating fumes.				
Chemical & Physical Properties: MW: 159.8 BP: 139°F Sol: 4% FLP: NA IP: 10.55 eV Sp.Gr: 3.12 VP: 172 mmHg FRZ: 19°F UEL: NA LEL: NA Noncombustible Liquid, but accelerates the burning of combustibles.	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Provide: Eyewash Quick drench	Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 2.5 ppm: Sa:CfE/PapRS ₂ E 3 ppm: CorFS ₂ /GmFS ₂ /PapTrS ₂ E/ ScbaF/SaF S: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFS ₂ /ScbaE		
Incompatibilities and Reactivities: Combustible organics (sawdust, wood, cotton, straw, etc.), aluminum, readily oxidizable materials, ammonia, hydrogen, acetylene, phosphorus, potassium, sodium [Note: Corrodes iron, steel, stainless steel & copper.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Dizz, head; lac, epis; cough, feeling of oppression, pulm edema, pneu; abdom pain, diarr; measles-like eruptions; eye, skin burns TO: Resp sys, eyes, CNS, skin		First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed		

B

Bromine pentafluoride		Formula: BrF ₅	CAS#: 7789-30-2	RTECS#: EF9350000	IDLH: N.D.
Conversion: 1 ppm = 7.15 mg/m ³		DOT: 1745 144			
Synonyms/Trade Names: Bromine fluoride					
Exposure Limits: NIOSH REL: TWA 0.1 ppm (0.7 mg/m ³) OSHA PEL†: none				Measurement Methods (see Table 1): None available	
Physical Description: Colorless to pale-yellow, fuming liquid with a pungent odor. [Note: A colorless gas above 105°F. Shipped as a compressed gas.]					
Chemical & Physical Properties: MW: 174.9 BP: 105°F Sol: Reacts violently Fl.P: NA IP: ? Sp.Gr: 2.48 VP: 328 mmHg FRZ: -77°F UEL: NA LEL: NA Noncombustible Liquid, but a very powerful oxidizer.		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Acids, halogens, arsenic, selenium, sulfur, glass, organic materials, water [Note: Reacts with all elements except inert gases, nitrogen & oxygen.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, resp sys; corn nec; skin burns; cough, dysp, pulm edema; liver, kidney inj TO: Eyes, skin, resp sys, liver, kidneys			First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed		

Bromoform		Formula: CHBr ₃	CAS#: 75-25-2	RTECS#: PB5600000	IDLH: 850 ppm
Conversion: 1 ppm = 10.34 mg/m ³		DOT: 2515 159			
Synonyms/Trade Names: Methyl tribromide, Tribromomethane					
Exposure Limits: NIOSH REL: TWA 0.5 ppm (5 mg/m ³) [skin] OSHA PEL: TWA 0.5 ppm (5 mg/m ³) [skin]				Measurement Methods (see Table 1): NIOSH 1003 OSHA 7	
Physical Description: Colorless to yellow liquid with a chloroform-like odor. [Note: A solid below 47°F.]					
Chemical & Physical Properties: MW: 252.8 BP: 301°F Sol: 0.1% Fl.P: NA IP: 10.48 eV Sp.Gr: 2.89 VP: 5 mmHg FRZ: 47°F UEL: NA LEL: NA Noncombustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R.		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 12.5 ppm: Sa:CfE/PapRovE 25 ppm: CcFOv/GmFOv/PapRTOvE/ ScbaF/SaF 850 ppm: SaF:Pd,Pp S: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Lithium, sodium, potassium, calcium, aluminum, zinc, magnesium, strong caustics, acetone [Note: Gradually decomposes, acquiring yellow color; air & light accelerate decomposition.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, resp sys; CNS depres; liver, kidney damage TO: Eyes, skin, resp sys, CNS, liver, kidneys			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash prompt Breath: Resp support Swallow: Medical attention immed		

1,3-Butadiene	Formula: CH ₂ =CHCH=CH ₂	CAS#: 106-99-0	RTECS#: EI9275000	IDLH: Ca [2000 ppm] [10%LEL]
Conversion: 1 ppm = 2.21 mg/m ³		DOT: 1010 116P (inhibited)		
Synonyms/Trade Names: Biethylene, Bivinyll, Butadiene, Divinyll, Erythrene, Vinylyethylene				
Exposure Limits: NIOSH REL: Ca See Appendix A OSHA PEL: [1910.1051] TWA 1 ppm ST 5 ppm				Measurement Methods (see Table 1): NIOSH 1024 OSHA 56
Physical Description: Colorless gas with a mild aromatic or gasoline-like odor. [Note: A liquid below 24°F. Shipped as a liquefied compressed gas.]				
Chemical & Physical Properties: MW: 54.1 BP: 24°F Sol: Insoluble Fl.P: NA (Gas) -105°F (Liquid) IP: 9.07 eV RGasD: 1.88 Sp.Gr: 0.65 (Liquid at 24°F) VP: 2.4 atm FRZ: -164°F UEL: 12.0% LEL: 2.0% Flammable Gas		Personal Protection/Sanitation (see Table 2): Skin: Frostbite Eyes: Frostbite Wash skin: N.R. Remove: When wet (flamm) Change: N.R. Provide: Frostbite wash		Respirator Recommendations (see Tables 3 and 4): NIOSH ✱: ScbaF: Pd, Pp/ SaF: Pd, Pp: AScba Escape: GmFS/ScbaE See Appendix E (page 351)
Incompatibilities and Reactivities: Phenol, chlorine dioxide, copper, crotonaldehyde [Note: May contain inhibitors (e.g., tributylcatechol) to prevent self-polymerization. May form explosive peroxides upon exposure to air.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con (liquid) SY: Irrit eyes, nose, throat; drow, dizz; liquid: frostbite; terato, repro effects; [carc] TO: Eyes, resp sys, CNS, repro sys [hemato cancer]			First Aid (see Table 6): Eye: Frostbite Skin: Frostbite Breath: Resp support	

n-Butane	Formula: CH ₃ CH ₂ CH ₂ CH ₃	CAS#: 106-97-8	RTECS#: EJ4200000	IDLH: N.D.
Conversion: 1 ppm = 2.38 mg/m ³		DOT: 1011 115; 1075 115		
Synonyms/Trade Names: normal-Butane, Butyl hydride, Diethyl, Methylenehydramethane [Note: Also see specific listing for Isobutane.]				
Exposure Limits: NIOSH REL: TWA 800 ppm (1900 mg/m ³) OSHA PEL†: none			Measurement Methods (see Table 1): OSHA 56	
Physical Description: Colorless gas with a gasoline-like or natural gas odor. [Note: Shipped as a liquefied compressed gas. A liquid below 31°F.]				
Chemical & Physical Properties: MW: 58.1 BP: 31°F Sol: Slight Fl.P: NA (Gas) IP: 10.63 eV RGasD: 2.11 Sp.Gr: 0.6 (Liquid at 31°F) VP: 2.05 atm FRZ: -217°F UEL: 8.4% LEL: 1.6% Flammable Gas		Personal Protection/Sanitation (see Table 2): Skin: Frostbite Eyes: Frostbite Wash skin: N.R. Remove: When wet (flamm) Change: N.R. Provide: Frostbite wash		Respirator Recommendations (see Tables 3 and 4): Not available.
		Incompatibilities and Reactivities: Strong oxidizers (e.g., nitrates and perchlorates), chlorine, fluorine, (nickel carbonyl + oxygen)		
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con (liquid) SY: Drow, narco, asphy; liquid: frostbite TO: CNS		First Aid (see Table 6): Eye: Frostbite Skin: Frostbite Breath: Resp support		

B	2-Butanone	Formula: CH ₃ COCH ₂ CH ₃	CAS#: 78-93-3	RTECS#: EL6475000	IDLH: 3000 ppm
	Conversion: 1 ppm = 2.95 mg/m ³		DOT: 1193 127		
	Synonyms/Trade Names: Ethyl methyl ketone, MEK, Methyl acetone, Methyl ethyl ketone				
	Exposure Limits: NIOSH REL: TWA 200 ppm (590 mg/m ³) ST 300 ppm (885 mg/m ³) OSHA PEL†: TWA 200 ppm (590 mg/m ³)			Measurement Methods (see Table 1): NIOSH 2500, 2555, 3800 OSHA 16, 84, 1004	
	Physical Description: Colorless liquid with a moderately sharp, fragrant, mint- or acetone-like odor.				
Chemical & Physical Properties: MW: 72.1 BP: 175°F Sol: 28% FLP: 16°F IP: 9.54 eV Sp.Gr: 0.81 VP: 78 mmHg FRZ: -123°F UEL(200°F): 11.4% LEL(200°F): 1.4% Class IB Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R. Provide: Eyewash		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 3000 ppm: Sa:CfE/PapOvE/CcrFOv/ GmFOv/ScbaF/SaF §: ScbaF: Pd,Pp/SaF: Pd,Pp: AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers, amines, ammonia, inorganic acids, caustics, isocyanates, pyridines					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, nose; head; dizz; vomit; derm TO: Eyes, skin, resp sys, CNS			First Aid (see Table 6): Eye: Irr immed Skin: Water wash immed Breath: Fresh air Swallow: Medical attention immed		

2-Butoxyethanol		Formula: C ₄ H ₉ OCH ₂ CH ₂ OH	CAS#: 111-76-2	RTECS#: KJ8575000	IDLH: 700 ppm
Conversion: 1 ppm = 4.83 mg/m ³		DOT: 2369 152			
Synonyms/Trade Names: Butyl Cellosolve®, Butyl oxitol, Dowanol® EB, EGBE, Ektasolve EB®, Ethylene glycol monobutyl ether, Jeffersol EB					
Exposure Limits: NIOSH REL: TWA 5 ppm (24 mg/m ³) [skin] OSHA PEL†: TWA 50 ppm (240 mg/m ³) [skin]				Measurement Methods (see Table 1): NIOSH 1403 OSHA 83	
Physical Description: Colorless liquid with a mild, ether-like odor.					
Chemical & Physical Properties: MW: 118.2 BP: 339°F Sol: Miscible F.L.P: 143°F IP: 10.00 eV Sp.Gr: 0.90 VP: 0.8 mmHg FRZ: -107°F UEL(275°F): 12.7% LEL(200°F): 1.1% Class IIIA Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Incompatibilities and Reactivities: Strong oxidizers & reducing agents, strong acids & bases					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, resp sys; head, dizz, lass, conf, convuls; dysp; abdom pain, nau, vomit TO: Eyes, skin, resp sys, CNS, CVS				First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed	

Cadmium dust (as Cd)	Formula: Cd (metal)	CAS#: 7440-43-9 (metal)	RTECS#: EU9800000 (metal)	IDLH: Ca [9 mg/m³ (as Cd)]
Conversion:	DOT: 2570 154 (cadmium compound)			
Synonyms/Trade Names: Cadmium metal: Cadmium Other synonyms vary depending upon the specific cadmium compound.				
Exposure Limits: NIOSH REL*: Ca See Appendix A OSHA PEL*: [1910.1027] TWA 0.005 mg/m³ [*Note: The REL and PEL apply to all Cadmium compounds (as Cd).]			Measurement Methods (see Table 1): NIOSH 7048, 7300, 7301, 7303, 9102 OSHA ID121, ID125G, ID189, ID206	
Physical Description: Metal: Silver-white, blue-tinged lustrous, odorless solid.				
Chemical & Physical Properties: MW: 112.4 BP: 1409°F Sol: Insoluble Fl.P: NA IP: NA Sp.Gr: 8.65 (metal) VP: 0 mmHg (approx) MLT: 610°F UEL: NA LEL: NA Metal: Noncombustible Solid in bulk form, but will burn in powder form.		Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: Daily Remove: N.R. Change: Daily		Respirator Recommendations (see Tables 3 and 4): NIOSH ☒: ScbaF: Pd, Pp/ SaF: Pd, Pp: AScba Escape: 100F/ScbaE See Appendix E (page 351)
		Incompatibilities and Reactivities: Strong oxidizers; elemental sulfur, selenium & tellurium		
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing SY: Pulm edema, dysp, cough, chest tight, subs pain; head; chills, musc aches; nau, vomit, diarr; anos, emphy, prot, mild anemia; [carc] TO: Resp sys, kidneys, prostate, blood [prostatic & lung cancer]			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash Breath: Resp support Swallow: Medical attention immed	

C

Cadmium fume (as Cd)	Formula: CdO/Cd	CAS#: 1306-19-0 (CdO)	RTECS#: EV1930000 (CdO)	IDLH: Ca [9 mg/m³ (as Cd)]
Conversion:	DOT:			
Synonyms/Trade Names: CdO: Cadmium monoxide, Cadmium oxide fume Cd: Cadmium				
Exposure Limits: NIOSH REL*: Ca See Appendix A OSHA PEL*: [1910.1027] TWA 0.005 mg/m³ [*Note: The REL and PEL apply to all Cadmium compounds (as Cd).]			Measurement Methods (see Table 1): NIOSH 7048, 7300, 7301, 7303 OSHA ID121, ID125G, ID189, ID206	
Physical Description: Odorless, yellow-brown, finely divided particulate dispersed in air. [Note: See listing for Cadmium dust for properties of Cd.]				
Chemical & Physical Properties: MW: 128.4 BP: Decomposes Sol: Insoluble Fl.P: NA IP: NA Sp.Gr: 8.15 (crystalline form) 6.95 (amorphous form) VP: 0 mmHg (approx) MLT: 2599°F UEL: NA LEL: NA Noncombustible Solid			Respirator Recommendations (see Tables 3 and 4): NIOSH ☒: ScbaF: Pd, Pp/ SaF: Pd, Pp: AScba Escape: 100F/ScbaE See Appendix E (page 351)	
Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: Daily Remove: N.R. Change: Daily				
Incompatibilities and Reactivities: Not applicable				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh SY: Pulm edema, dysp, cough, chest tight, subs pain; head; chills, musc aches; nau, vomit, diarr; emphy, prot, anos, mild anemia; [carc] TO: Resp sys, kidneys, blood [prostatic & lung cancer]			First Aid (see Table 6): Breath: Resp support	

Calcium arsenate (as As)		Formula: Ca ₃ (AsO ₄) ₂	CAS#: 7778-44-1	RTECS#: CG0830000	IDLH: Ca [5 mg/m ³ (as As)]
Conversion:		DOT: 1573 151			
Synonyms/Trade Names: Calcium salt (2:3) of arsenic acid, Cucumber dust, Tricalcium arsenate, Tricalcium ortho-arsenate [Note: Also see specific listing for Arsenic (inorganic compounds, as As).]					
Exposure Limits: NIOSH REL: Ca C 0.002 mg/m ³ [15-minute] See Appendix A OSHA PEL: [1910.1018] TWA 0.010 mg/m ³					Measurement Methods (see Table 1): NIOSH 7900 OSHA ID105
Physical Description: Colorless to white, odorless solid. [insecticide/herbicide]					
Chemical & Physical Properties: MW: 398.1 BP: Decomposes Sol(77°F): 0.01% Fl.P: NA IP: NA Sp.Gr: 3.62 VP: 0 mmHg (approx) MLT: ? UEL: NA LEL: NA Noncombustible Solid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam/Daily Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH ¥: ScbaF: Pd, Pp/ SaF: Pd, Pp: AScba Escape: 100F/ScbaE	
Incompatibilities and Reactivities: None reported [Note: Produces toxic fumes of arsenic when heated to decomposition.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Lass; GI dist; peri neur; skin hyperpig, palmar planter hyperkeratoses; derm; [carc]; in animals: liver damage TO: Eyes, resp sys, liver, skin, CNS, lymphatic sys [lymphatic & lung cancer]			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash prompt Breath: Resp support Swallow: Medical attention immed		

Calcium carbonate		Formula: CaCO ₃	CAS#: 1317-65-3	RTECS#: EV9580000	IDLH: N.D.
Conversion:		DOT:			
Synonyms/Trade Names: Calcium salt of carbonic acid [Note: Occurs in nature as as limestone, chalk, marble, dolomite, aragonite, calcite & oyster shells.]					
Exposure Limits: NIOSH REL: TWA 10 mg/m ³ (total) TWA 5 mg/m ³ (resp) OSHA PEL: TWA 15 mg/m ³ (total) TWA 5 mg/m ³ (resp)				Measurement Methods (see Table 1): NIOSH 7020, 7303 OSHA ID121	
Physical Description: White, odorless powder or colorless crystals.					
Chemical & Physical Properties: MW: 100.1 BP: Decomposes Sol: 0.001% Fl.P: NA IP: NA Sp.Gr: 2.7-2.95 VP: 0 mmHg (approx) MLT: 1517-2442°F (Decomposes) UEL: NA LEL: NA Noncombustible Solid		Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: N.R. Remove: N.R. Change: N.R.		Respirator Recommendations (see Tables 3 and 4): Not available.	
		Incompatibilities and Reactivities: Acids, alum, ammonium salts, mercury & hydrogen, fluorine, magnesium			
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Irrit eyes, skin, resp sys; cough TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash Breath: Fresh air		

Calcium cyanamide		Formula: CaCN ₂	CAS#: 156-62-7	RTECS#: GS6000000	IDLH: N.D.
Conversion:		DOT: 1403 138 (with >0.1% calcium carbide)			
Synonyms/Trade Names: Calcium carbimide, Cyanamide, Lime nitrogen, Nitrogen lime [Note: Cyanamide is also a synonym for Hydrogen cyanamide, NH ₂ CN.]					
Exposure Limits: NIOSH REL: TWA 0.5 mg/m ³ OSHA PEL†: none				Measurement Methods (see Table 1): NIOSH 0500	
Physical Description: Colorless, gray, or black crystals or powder. [fertilizer] [Note: Commercial grades may contain calcium carbide.]					
Chemical & Physical Properties: MW: 80.1 BP: Sublimes Sol: Insoluble Fl.P: NA IP: NA Sp.Gr: 2.29 VP: 0 mmHg (approx) MLT: 2444°F UEL: NA LEL: NA Noncombustible Solid, but a fire risk if it contains calcium carbide.		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): Not available.	
		Incompatibilities and Reactivities: Water [Note: May polymerize in water or alkaline solutions to dicyanamide. Decomposes in water to form acetylene & ammonia.]			
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, resp sys; head, dizz, rapid breath, low BP, nau, vomit; skin burns, sens; cough; Antabuse-like effects TO: Eyes, skin, resp sys, vasomotor sys			First Aid (see Table 6): Eye: Irr immed Skin: Soap flush immed Breath: Resp support Swallow: Medical attention immed		

C

Calcium hydroxide		Formula: Ca(OH) ₂	CAS#: 1305-62-0	RTECS#: EW2800000	IDLH: N.D.
Conversion:		DOT:			
Synonyms/Trade Names: Calcium hydrate, Caustic lime, Hydrated lime, Slaked lime					
Exposure Limits: NIOSH REL: TWA 5 mg/m ³ OSHA PEL: TWA 15 mg/m ³ (total) TWA 5 mg/m ³ (resp)				Measurement Methods (see Table 1): NIOSH 7020 OSHA ID121	
Physical Description: White, odorless powder. [Note: Readily absorbs CO ₂ from the air to form calcium carbonate.]					
Chemical & Physical Properties: MW: 74.1 BP: Decomposes Sol(32°F): 0.2% FLP: NA IP: NA Sp.Gr: 2.24 VP: 0 mmHg (approx) MLT: 1076°F (Decomposes) (Loses H ₂ O) UEL: NA LEL: NA Noncombustible Solid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam/Daily Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Maleic anhydride, phosphorus, nitroethane, nitromethane, nitroparaffins, nitropropane [Note: Attacks some metals.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, upper resp sys; eye, skin burns; skin vesic; cough, bron, pneu TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Skin: Soap flush immed Breath: Resp support Swallow: Medical attention immed		

Calcium oxide	Formula: CaO	CAS#: 1305-78-8	RTECS#: EW3100000	IDLH: 25 mg/m ³
Conversion:	DOT: 1910 157			
Synonyms/Trade Names: Burned lime, Burnt lime, Lime, Pebble lime, Quick lime, Unslaked lime				
Exposure Limits: NIOSH REL: TWA 2 mg/m ³ OSHA PEL: TWA 5 mg/m ³			Measurement Methods (see Table 1): NIOSH 7020, 7303 OSHA ID121	
Physical Description: White or gray, odorless lumps or granular powder.				
Chemical & Physical Properties: MW: 56.1 BP: 5162°F Sol: Reacts F.L.P: NA IP: NA Sp.Gr: 3.34 VP: 0 mmHg (approx) MLT: 4662°F UEL: NA LEL: NA Noncombustible Solid, but will support combustion by liberation of oxygen.	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam/Daily Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH 10 mg/m ³ : Qm 20 mg/m ³ : 95XQ/Sa 25 mg/m ³ : Sa:Cf/PapHie/100F/ ScbaF/SaF §: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: 100F/ScbaE	
Incompatibilities and Reactivities: Water (liberates heat), fluorine, ethanol [Note: Reacts with water to form calcium hydroxide.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, upper resp tract; ulcer, perf nasal septum; pneu; derm TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed	

Calcium silicate	Formula: CaSiO ₃	CAS#: 1344-95-2	RTECS#: VV9150000	IDLH: N.D.
Conversion:	DOT:			
Synonyms/Trade Names: Calcium hydrosilicate, Calcium metasilicate, Calcium monosilicate, Calcium salt of silicic acid, Wollastonite (mineral)				
Exposure Limits: NIOSH REL: TWA 10 mg/m ³ (total) TWA 5 mg/m ³ (resp) OSHA PEL: TWA 15 mg/m ³ (total) TWA 5 mg/m ³ (resp)			Measurement Methods (see Table 1): NIOSH 7020 OSHA ID121	
Physical Description: White or cream-colored, free-flowing powder. [Note: The commercial product is prepared from diatomaceous earth & lime.]				
Chemical & Physical Properties: MW: 116.2 BP: ? Sol: 0.01% FLP: NA IP: NA Sp.Gr: 2.9 VP: 0 mmHg (approx) MLT: 2804°F UEL: NA LEL: NA Noncombustible Solid				
Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: N.R. Remove: N.R. Change: N.R.			Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: None reported [Note: After prolonged contact with water, solution reverts to soluble calcium salts & amorphous silica.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Irrit eyes, skin, upper resp sys TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash Breath: Fresh air	

Calcium sulfate	Formula: CaSO ₄	CAS#: 7778-18-9	RTECS#: WS6920000	IDLH: N.D.
Conversion:	DOT:			
Synonyms/Trade Names: Anhydrous calcium sulfate, Anhydrous gypsum, Anhydrous sulfate of lime, Calcium salt of sulfuric acid [Note: Gypsum is the dihydrate form & Plaster of Paris is the hemihydrate form.]				
Exposure Limits: NIOSH REL: TWA 10 mg/m ³ (total) TWA 5 mg/m ³ (resp) OSHA PEL: TWA 15 mg/m ³ (total) TWA 5 mg/m ³ (resp)			Measurement Methods (see Table 1): NIOSH 0500, 0600	
Physical Description: Odorless, white powder or colorless, crystalline solid. [Note: May have blue, gray, or reddish tinge.]				
Chemical & Physical Properties: MW: 136.1 BP: Decomposes Sol: 0.3% Fl.P: NA IP: NA Sp.Gr: 2.96 VP: 0 mmHg (approx) MLT: 2840°F (Decomposes) UEL: NA LEL: NA Noncombustible Solid	Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: N.R. Remove: N.R. Change: N.R.	Respirator Recommendations (see Tables 3 and 4): Not available.		
Incompatibilities and Reactivities: Diazomethane, aluminum, phosphorus, water [Note: Hygroscopic (i.e., absorbs moisture from the air). Reacts with water to form Gypsum & Plaster of Paris.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Irrit eyes, skin, upper resp sys; conj; rhinitis, epis TO: Eyes, skin, resp sys		First Aid (see Table 6): Eye: Irr immed Skin: Soap wash Breath: Fresh air		

C

Camphor (synthetic)		Formula: C ₁₀ H ₁₆ O	CAS#: 76-22-2	RTECS#: EX1225000	IDLH: 200 mg/m ³
Conversion:		DOT: 2717 133			
Synonyms/Trade Names: 2-Camphonone, Gum camphor, Laurel camphor, Synthetic camphor					
Exposure Limits: NIOSH REL: TWA 2 mg/m ³ OSHA PEL: TWA 2 mg/m ³				Measurement Methods (see Table 1): NIOSH 1301, 2553 OSHA 7	
Physical Description: Colorless or white crystals with a penetrating, aromatic odor.					
Chemical & Physical Properties: MW: 152.3 BP: 399°F Sol: Insoluble Fl.P: 150°F IP: 8.76 eV Sp.Gr: 0.99 VP: 0.2 mmHg MLT: 345°F UEL: 3.5% LEL: 0.6% Combustible Solid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 50 mg/m³: Sa:CfE/PapRvHieE 100 mg/m³: CcrFOv100/GmFOv100/ PapRTOvHieE/ScbaF/SaF 200 mg/m³: SaF:Pd,Pp S: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFOv100/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers (especially chromic anhydride & potassium permanganate)					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, muc memb; nau, vomit, diarr; head, dizz, excitement, epilep convuls TO: Eyes, skin, resp sys, CNS				First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed	

Caprolactam		Formula: C ₂ H ₁₁ NO	CAS#: 105-60-2	RTECS#: CM3675000	IDLH: N.D.
Conversion: 1 ppm = 4.63 mg/m ³		DOT:			
Synonyms/Trade Names: Aminocaproic lactam, epsilon-Caprolactam, Hexahydro-2H-azepin-2-one, 2-Oxohexamethyleneimine					
Exposure Limits: NIOSH REL: Dust: TWA 1 mg/m ³ ST 3 mg/m ³ Vapor: TWA 0.22 ppm (1 mg/m ³) ST 0.66 ppm (3 mg/m ³) OSHA PEL†: none				Measurement Methods (see Table 1): OSHA PV2012	
Physical Description: White, crystalline solid or flakes with an unpleasant odor. [Note: Significant vapor concentrations would be expected only at elevated temperatures.]					
Chemical & Physical Properties: MW: 113.2 BP: 515°F Sol: 53% F.L.P: 282°F IP: ? Sp.Gr: 1.01 VP: 0.00000008 mmHg MLT: 156°F UEL: 8.0% LEL: 1.4% Combustible Solid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily		Respirator Recommendations (see Tables 3 and 4): Not available.	
		Incompatibilities and Reactivities: Strong oxidizers, (acetic acid + dinitrogen trioxide)			
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit skin, eyes, resp sys; epis; derm, skin sens; asthma; irrity, conf, dizz, head; abdom cramps, diarr, nau, vomit; liver, kidney inj TO: Eyes, skin, resp sys, CNS, CVS, liver, kidneys				First Aid (see Table 6): Eye: Irr immed Skin: Water wash immed Breath: Resp support Swallow: Medical attention immed	

Captafol		Formula: C ₁₀ H ₂ Cl ₁₄ NO ₂ S	CAS#: 2425-06-1	RTECS#: GW4900000	IDLH: Ca [N.D.]
Conversion:		DOT:			
Synonyms/Trade Names: Captofol; Difolatan®; N-((1,1,2,2-Tetrachloroethyl)thio)-4-cyclohexene-1,2-dicarboximide					
Exposure Limits: NIOSH REL: Ca TWA 0.1 mg/m ³ [skin] See Appendix A			OSHA PEL†: none		Measurement Methods (see Table 1): NIOSH 0500
Physical Description: White, crystalline solid with a slight, characteristic pungent odor. [fungicide] [Note: Available commercially as a wettable powder or in liquid form.]					
Chemical & Physical Properties: MW: 349.1 BP: Decomposes Sol: 0.0001% F.L.P: NA IP: NA Sp.Gr: ? VP: 0.000008 mmHg MLT: 321°F (Decomposes) UEL: NA LEL: NA Noncombustible Solid, but may be dissolved in flammable liquids.		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam/Daily Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH ✕: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFOv/ScbaE	
		Incompatibilities and Reactivities: Acids, acid vapors, strong oxidizers			
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, resp sys; derm, skin sens; conj; bron, wheez; diarr, vomit; liver, kidney inj; high BP; in animals: terato effects; [carc] TO: Eyes, skin, resp sys, CNS, liver, kidneys, CVS [in animals: tumors at many sites]			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed		

Captan	Formula: C ₉ H ₈ Cl ₃ NO ₂ S	CAS#: 133-06-2	RTECS#: GW5075000	IDLH: Ca [N.D.]
Conversion:	DOT:			
Synonyms/Trade Names: Captane; N-Trichloromethylmercapto-4-cyclohexene-1,2-dicarboximide				
Exposure Limits: NIOSH REL: Ca TWA 5 mg/m ³ See Appendix A			Measurement Methods (see Table 1): NIOSH 5601, 9202, 9205	
Physical Description: Odorless, white, crystalline powder. [fungicide] [Note: Commercial product is a yellow powder with a pungent odor.]				
Chemical & Physical Properties: MW: 300.6 BP: Decomposes Sol(77°F): 0.0003% Fl.P: ? IP: NA Sp.Gr: 1.74 VP: 0 mmHg (approx) MLT: 352°F (Decomposes) UEL: ? LEL: ? Combustible Solid; may be dissolved in flammable liquids.				
Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam/Daily Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench				
Respirator Recommendations (see Tables 3 and 4): NIOSH ✶: ScbaF: Pd, Pp/ SaF: Pd, Pp: AScba Escape: GmFOv/ScbaE				
Incompatibilities and Reactivities: Strong alkaline materials (e.g., hydrated lime) [Note: Corrosive to metals.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, upper resp sys; blurred vision; derm, skin sens; dysp; diarr, vomit; [carc] TO: Eyes, skin, resp sys, GI tract, liver, kidneys [in animals: duodenal tumors]			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed	

Carbaryl	Formula: CH ₃ NHCOOC ₁₀ H ₇	CAS#: 63-25-2	RTECS#: EC5950000	IDLH: 100 mg/m ³
Conversion:		DOT: 2757 151		
Synonyms/Trade Names: α-Naphthyl N-methyl-carbamate, 1-Naphthyl N-Methyl-carbamate, Sevin®				
Exposure Limits: NIOSH REL: TWA 5 mg/m ³ OSHA PEL: TWA 5 mg/m ³			Measurement Methods (see Table 1): NIOSH 5006, 5601 OSHA 63	
Physical Description: White or gray, odorless solid. [pesticide]				
Chemical & Physical Properties: MW: 201.2 BP: Decomposes Sol: 0.01% Fl.P: NA IP: ? Sp.Gr: 1.23 VP(77°F): <0.00004 mmHg MLT: 293°F UEL: NA LEL: NA Noncombustible Solid, but may be dissolved in flammable liquids. Incompatibilities and Reactivities: Strong oxidizers, strongly alkaline pesticides				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Miosis, blurred vision, tear; rhin, saliv; sweat; abdom cramps, nau, vomit, diarr; tremor; cyan; convuls; irrit skin; possible repro effects TO: Resp sys, CNS, CVS, skin, blood chol, repro sys			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash prompt Breath: Resp support Swallow: Medical attention immed	

Carbofuran	Formula: C ₁₂ H ₁₅ NO ₃	CAS#: 1563-66-2	RTECS#: FB9450000	IDLH: N.D.
Conversion:	DOT: 2757 151			
Synonyms/Trade Names: 2,3-Dihydro-2,2-dimethyl-7-benzofuranyl methylcarbamate; Furacarb®; Furadan®				
Exposure Limits: NIOSH REL: TWA 0.1 mg/m ³ OSHA PEL†: none			Measurement Methods (see Table 1): NIOSH 5601	
Physical Description: Odorless, white or grayish, crystalline solid. [insecticide] [Note: May be dissolved in a liquid carrier.]				
Chemical & Physical Properties: MW: 221.3 BP: ? Sol(77°F): 0.07% F.I.P: NA IP: NA Sp.Gr: 1.18 VP(77°F): 0.000003 mmHg MLT: 304°F UEL: NA LEL: NA Noncombustible Solid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): Not available.
		Incompatibilities and Reactivities: Alkaline substances, acid, strong oxidizers (e.g., perchlorates, peroxides, chlorates, nitrates, permanganates)		
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Miosis, blurred vision; sweat, salv, abdom cramps, diarr, head, nau, vomit; lass, musc twitch, inco, convuls TO: CNS, PNS, blood chol			First Aid (see Table 6): Eye: Irr immed Skin: Soap flush immed Breath: Fresh air Swallow: Medical attention immed	

Carbon black	Formula: C	CAS#: 1333-86-4	RTECS#: FF5800000	IDLH: 1750 mg/m ³
Conversion:		DOT:		
Synonyms/Trade Names: Acetylene black, Channel black, Furnace black, Lamp black, Thermal black				
Exposure Limits: NIOSH REL: TWA 3.5 mg/m ³ Carbon black in presence of polycyclic aromatic hydrocarbons (PAHs): Ca TWA 0.1 mg PAHs/m ³ See Appendix A See Appendix C OSHA PEL: TWA 3.5 mg/m ³			Measurement Methods (see Table 1): NIOSH 5000 OSHA ID196	
Physical Description: Black, odorless solid.				
Chemical & Physical Properties: MW: 12.0 BP: Sublimes Sol: Insoluble F.I.P: NA IP: NA Sp.Gr: 1.8-2.1 VP: 0 mmHg (approx) MLT: Sublimes UEL: NA LEL: NA Combustible Solid that may contain flammable hydrocarbons.	Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: Prevent eye contact Wash skin: Daily Remove: N.R. Change: N.R.	Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 17.5 mg/m³: Qm 35 mg/m³: 95XQ/Sa 87.5 mg/m³: Sa:Cf/Pap/Hie 175 mg/m³: 100F/Pap/Hie/ScbaF/SaF 1750 mg/m³: Sa:Pd,Pp §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: 100F/ScbaE In presence of polycyclic aromatic hydrocarbons: NIOSH ¥: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: 100F/ScbaE		
Incompatibilities and Reactivities: Strong oxidizers such as chlorates, bromates & nitrates				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Cough; irrit eyes; in presence of polycyclic aromatic hydrocarbons: [carc] TO: Resp sys, eyes [lymphatic cancer (in presence of PAHs)]			First Aid (see Table 6): Eye: Irr prompt Breath: Fresh air	

Carbon dioxide	Formula: CO ₂	CAS#: 124-38-9	RTECS#: FF6400000	IDLH: 40,000 ppm
Conversion: 1 ppm = 1.80 mg/m ³		DOT: 1013 120; 1845 120 (dry ice); 2187 120 (liquid)		
Synonyms/Trade Names: Carbonic acid gas, Dry ice [Note: Normal constituent of air (about 300 ppm)].				
Exposure Limits: NIOSH REL: TWA 5000 ppm (9000 mg/m ³) ST 30,000 ppm (54,000 mg/m ³) OSHA PEL†: TWA 5000 ppm (9000 mg/m ³)			Measurement Methods (see Table 1): NIOSH 6603 OSHA ID172	
Physical Description: Colorless, odorless gas. [Note: Shipped as a liquefied compressed gas. Solid form is utilized as dry ice.]				
Chemical & Physical Properties: MW: 44.0 BP: Sublimes Sol(77°F): 0.2% F.I.P: NA IP: 13.77 eV RGasD: 1.53 VP: 56.5 atm MLT: -109°F (Sublimes) UEL: NA LEL: NA Nonflammable Gas		Personal Protection/Sanitation (see Table 2): Skin: Frostbite Eyes: Frostbite Wash skin: N.R. Remove: N.P. Change: N.R. Provide: Frostbite wash	Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 40,000 ppm: Sa/ScbaF §: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: ScbaE	
		Incompatibilities and Reactivities: Dusts of various metals, such as magnesium, zirconium, titanium, aluminum, chromium & manganese are ignitable and explosive when suspended in carbon dioxide. Forms carbonic acid in water.		
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con (liquid/solid) SY: Head, dizz, restless, pares; dysp; sweat, mal; incr heart rate, card output, BP; coma; asphy; convuls; frostbite (liq, dry ice) TO: Resp sys, CVS			First Aid (see Table 6): Eye: Frostbite Skin: Frostbite Breath: Resp support	

C

Carbon disulfide	Formula: CS ₂	CAS#: 75-15-0	RTECS#: FF6650000	IDLH: 500 ppm
Conversion: 1 ppm = 3.11 mg/m ³		DOT: 1131 131		
Synonyms/Trade Names: Carbon bisulfide				
Exposure Limits: NIOSH REL: TWA 1 ppm (3 mg/m ³) ST 10 ppm (30 mg/m ³) [skin] OSHA PEL†: TWA 20 ppm C 30 ppm 100 ppm (30-minute maximum peak)			Measurement Methods (see Table 1): NIOSH 1600, 3800	
Physical Description: Colorless to faint-yellow liquid with a sweet ether-like odor. [Note: Reagent grades are foul smelling.]				
Chemical & Physical Properties: MW: 76.1 BP: 116°F Sol: 0.3% Fl.P: -22°F IP: 10.08 eV Sp.Gr: 1.26 VP: 297 mmHg FRZ: -169°F UEL: 50.0% LEL: 1.3% Class IB Flammable Liquid	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R. Incompatibilities and Reactivities: Strong oxidizers, bromine trifluoride, chlorine trifluoride, lithium					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con (liquid) SY: Head, tachypnea, nau, lass, dizz, conf, halu; cyan; depres S-T segment of electrocardiogram, angina, syncope TO: CVS, lungs, blood, CNS				First Aid (see Table 6): Eye: Frostbite Skin: Frostbite Breath: Resp support	

Carbon tetrabromide		Formula: CBr ₄	CAS#: 558-13-4	RTECS#: FG4725000	IDLH: N.D.
Conversion: 1 ppm = 13.57 mg/m ³		DOT: 2516 151			
Synonyms/Trade Names: Carbon bromide, Methane tetrabromide, Tetrabromomethane					
Exposure Limits: NIOSH REL: TWA 0.1 ppm (1.4 mg/m ³) ST 0.3 ppm (4 mg/m ³) OSHA PEL†: none				Measurement Methods (see Table 1): None available	
Physical Description: Colorless to yellow-brown crystals with a slight odor.					
Chemical & Physical Properties: MW: 331.7 BP: 374°F Sol: 0.02% F.P: NA IP: 10.31 eV Sp.Gr: 3.42 VP(205°F): 40 mmHg MLT: 194°F UEL: NA LEL: NA Noncombustible Solid		Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: Prevent eye contact Wash skin: Daily Remove: N.R. Change: Daily Provide: Eyewash		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Strong oxidizers, hexacyclohexyldilead, lithium					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, resp sys; lac; lung, liver, kidney inj; in animals: corn damage TO: Eyes, skin, resp sys, liver, kidneys			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash prompt Breath: Resp support Swallow: Medical attention immed		

Carbon tetrachloride	Formula: CCl ₄	CAS#: 56-23-5	RTECS#: FG4900000	IDLH: Ca [200 ppm]
Conversion: 1 ppm = 6.29 mg/m ³		DOT: 1846 151		
Synonyms/Trade Names: Carbon chloride, Carbon tet, Freon® 10, Halon® 104, Tetrachloromethane				
Exposure Limits: NIOSH REL: Ca ST 2 ppm (12.6 mg/m ³) [60-minute] See Appendix A OSHA PEL†: TWA 10 ppm C 25 ppm 200 ppm (5-minute maximum peak in any 4 hours)			Measurement Methods (see Table 1): NIOSH 1003 OSHA 7	
Physical Description: Colorless liquid with a characteristic ether-like odor.				
Chemical & Physical Properties: MW: 153.8 BP: 170°F Sol: 0.05% Fl.P: NA IP: 11.47 eV Sp.Gr: 1.59 VP: 91 mmHg FRZ: -9°F UEL: NA LEL: NA Noncombustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Provide: Eyewash Quick drench	Respirator Recommendations (see Tables 3 and 4): NIOSH ✱: ScbaF:Pd,Pp/SaF:Pd,Pp:AScBa Escape: GmFOv/ScbaE	
		Incompatibilities and Reactivities: Chemically-active metals such as sodium, potassium & magnesium; fluorine; aluminum [Note: Forms highly toxic phosgene gas when exposed to flames or welding arcs.]		
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin; CNS depres; nau, vomit; liver, kidney inj; drow, dizz, inco; [carc] TO: CNS, eyes, lungs, liver, kidneys, skin [in animals: liver cancer]			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed	

Carbonyl fluoride	Formula: COF ₂	CAS#: 353-50-4	RTECS#: FG6125000	IDLH: N.D.
Conversion: 1 ppm = 2.70 mg/m ³		DOT: 2417 125		
Synonyms/Trade Names: Carbon difluoride oxide, Carbon fluoride oxide, Carbon oxyfluoride, Carbonyl difluoride, Fluoroformyl fluoride, Fluorophosgene				
Exposure Limits: NIOSH REL: TWA 2 ppm (5 mg/m ³) ST 5 ppm (15 mg/m ³) OSHA PEL†: none			Measurement Methods (see Table 1): None available	
Physical Description: Colorless gas with a pungent and very irritating odor. [Note: Shipped as a liquefied compressed gas.]				
Chemical & Physical Properties: MW: 66.0 BP: -118°F Sol: Reacts Fl.P: NA IP: 13.02 eV RGasD: 2.29 VP: 55.4 atm FRZ: -173°F UEL: NA LEL: NA Nonflammable Gas		Personal Protection/Sanitation (see Table 2): Skin: Frostbite Eyes: Frostbite Wash skin: N.R. Remove: N.R. Change: N.R. Provide: Frostbite wash		Respirator Recommendations (see Tables 3 and 4): Not available.
		Incompatibilities and Reactivities: Heat, moisture, hexafluoroisopropylideneamino-lithium [Note: Reacts with water to form hydrogen fluoride & carbon dioxide.]		
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Irrit eyes, skin, muc memb, resp sys; eye, skin burns; lac; cough, pulm edema, dysp; chronic exposure: GI pain, musc fib, skeletal fluorosis; liquid: frostbite TO: Eyes, skin, resp sys, bone			First Aid (see Table 6): Eye: Frostbite Skin: Frostbite Breath: Resp support	

Catechol	Formula: C ₆ H ₄ (OH) ₂	CAS#: 120-80-9	RTECS#: UX1050000	IDLH: N.D.
Conversion: 1 ppm = 4.50 mg/m ³	DOT:			
Synonyms/Trade Names: 1,2-Benzenediol; o-Benzenediol; 1,2-Dihydroxybenzene; o-Dihydroxybenzene; 2-Hydroxyphenol; Pyrocatechol				
Exposure Limits: NIOSH REL: TWA 5 ppm (20 mg/m ³) [skin] OSHA PEL†: none			Measurement Methods (see Table 1): OSHA PV2014	
Physical Description: Colorless, crystalline solid with a faint odor. [Note: Discolors to brown in air & light.]			Respirator Recommendations (see Tables 3 and 4): Not available.	
Chemical & Physical Properties: MW: 110.1 BP: 474°F Sol: 44% F.P.: 261°F IP: ? Sp.Gr: 1.34 VP(244°F): 10 mmHg MLT: 221°F UEL: ? LEL: 1.4% Combustible Solid				
Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily Provide: Eyewash				
Incompatibilities and Reactivities: Strong oxidizers, nitric acid				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, resp sys; skin sens, derm; lac, burns eyes; convuls, incr BP, kidney inj TO: Eyes, skin, resp sys, CNS, kidneys			First Aid (see Table 6): Eye: Irr immed Skin: Water wash immed Breath: Resp support Swallow: Medical attention immed	

Cellulose	Formula: (C ₆ H ₁₀ O ₅) _n	CAS#: 9004-34-6	RTECS#: FJ5691460	IDLH: N.D.
Conversion:	DOT:			
Synonyms/Trade Names: Hydroxycellulose, Pyrocellulose				
Exposure Limits: NIOSH REL: TWA 10 mg/m ³ (total) TWA 5 mg/m ³ (resp) OSHA PEL: TWA 15 mg/m ³ (total) TWA 5 mg/m ³ (resp)			Measurement Methods (see Table 1): NIOSH 0500, 0600, 7404	
Physical Description: Odorless, white substance. [Note: The principal fiber cell wall material of vegetable tissues (wood, cotton, flax, grass, etc.).]				
Chemical & Physical Properties: MW: 160,000-560,000 BP: Decomposes Sol: Insoluble F.P: NA IP: NA Sp.Gr: 1.27-1.61 VP: 0 mmHg (approx) MLT: 500-518°F (Decomposes) UEL: NA LEL: NA Combustible Solid		Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: N.R. Remove: N.R. Change: N.R.	Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Water, bromine pentafluoride, sodium nitrate, fluorine, strong oxidizers				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Irrit eyes, skin, muc memb TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash Breath: Fresh air	

Cesium hydroxide		Formula: CsOH	CAS#: 21351-79-1	RTECS#: FK9800000	IDLH: N.D.
Conversion:		DOT: 2682 157; 2681 154 (solution)			
Synonyms/Trade Names: Cesium hydrate, Cesium hydroxide dimer					
Exposure Limits: NIOSH REL: TWA 2 mg/m ³ OSHA PEL†: none				Measurement Methods (see Table 1): None available	
Physical Description: Colorless or yellowish, crystalline solid. [Note: Hygroscopic (i.e., absorbs moisture from the air).]					
Chemical & Physical Properties: MW: 149.9 BP: ? Sol(59°F): 395% F.I.P: NA IP: NA Sp.Gr: 3.68 VP: 0 mmHg (approx) MLT: 522°F UEL: NA LEL: NA Noncombustible Solid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Water, acids, CO ₂ , metals (e.g., Al, Pb, Sn, Zn), oxygen [Note: CsOH is a strong base, causing the generation of considerable heat in contact with water or moisture.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, upper resp sys; eye, skin burns TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed		

Chlordane		Formula: C ₁₀ H ₆ Cl ₈	CAS#: 57-74-9	RTECS#: PB9800000	IDLH: Ca [100 mg/m ³]
Conversion:		DOT: 2996 151			
Synonyms/Trade Names: Chlordan; Chlordano; 1,2,4,5,6,7,8,8-Octachloro-3a,4,7,7a-tetrahydro-4,7-methanoindane					
Exposure Limits: NIOSH REL: Ca TWA 0.5 mg/m ³ [skin] See Appendix A OSHA PEL: TWA 0.5 mg/m ³ [skin]				Measurement Methods (see Table 1): NIOSH 5510 OSHA 67	
Physical Description: Amber-colored, viscous liquid with a pungent, chlorine-like odor. [insecticide]					
Chemical & Physical Properties: MW: 409.8 BP: Decomposes Sol: 0.0001% F.I.P: NA IP: ? Sp.Gr(77°F): 1.6 VP: 0.00001 mmHg FRZ: 217-228°F UEL: NA LEL: NA Noncombustible Liquid, but may be utilized in flammable solutions.		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH ‡: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFOv100/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers, alkaline reagents					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Blurred vision; conf; ataxia, delirium; cough; abdom pain, nau, vomit, diarr; irrity, tremor, convuls; anuria; in animals: lung, liver, kidney damage; [carc] TO: CNS, eyes, lungs, liver, kidneys [in animals: liver cancer]				First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed	

Chlorinated camphene		Formula: C ₁₀ H ₁₀ Cl ₈	CAS#: 8001-35-2	RTECS#: XW5250000	IDLH: Ca [200 mg/m ³]
Conversion:		DOT: 2761 151			
Synonyms/Trade Names: Chlorocamphene, Octachlorocamphene, Polychlorocamphene, Toxaphene					
Exposure Limits: NIOSH REL: Ca [skin] See Appendix A OSHA PEL†: TWA 0.5 mg/m ³ [skin]				Measurement Methods (see Table 1): NIOSH 5039	
Physical Description: Amber, waxy solid with a mild, piney, chlorine- and camphor-like odor. [insecticide]					
Chemical & Physical Properties: MW: 413.8 BP: Decomposes Sol: 0.0003% Fl.P: NA IP: ? Sp.Gr: 1.65 VP(77°F): 0.4 mmHg MLT: 149-194°F UEL: NA LEL: NA Noncombustible Solid, but may be dissolved in flammable liquids.		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam/Daily Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH ☒: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFOv100/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers [Note: Slightly corrosive to metals under moist conditions.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Nau, conf, agitation, tremor, convuls, uncon; dry, red skin; [carc] TO: CNS, skin [in animals: liver cancer]				First Aid (see Table 6): Eye: Irr immed Skin: Soap wash prompt Breath: Resp support Swallow: Medical attention immed	

Chlorinated diphenyl oxide		Formula: C ₁₂ H _{10-n} Cl _n O	CAS#:	RTECS#:	IDLH: 5 mg/m ³
Conversion:		DOT:			
Synonyms/Trade Names: Synonyms depend on the degree of chlorination of diphenyl oxide [(C ₆ H ₅) ₂ O], ranging from monochlorodiphenyl oxide [(C ₆ H ₄ Cl)O(C ₆ H ₅)] to decachlorodiphenyl oxide [(C ₆ Cl ₅)O(C ₆ Cl ₅)].					
Exposure Limits: NIOSH REL: TWA 0.5 mg/m ³ OSHA PEL: TWA 0.5 mg/m ³					Measurement Methods (see Table 1): NIOSH 5025
Physical Description: Appearance and odor vary depending upon the specific compound.					
Chemical & Physical Properties: Properties vary depending upon the specific compound.		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 5 mg/m³: Sa/ScbaF §: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFOvAg100/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Acne-form derm, liver damage TO: Skin, liver				First Aid (see Table 6): Eye: Irr immed Skin: Soap wash prompt Breath: Resp support Swallow: Medical attention immed	

Chlorine	Formula: Cl ₂	CAS#: 7782-50-5	RTECS#: FO2100000	IDLH: 10 ppm
Conversion: 1 ppm = 2.90 mg/m ³		DOT: 1017 124		
Synonyms/Trade Names: Molecular chlorine				
Exposure Limits: NIOSH REL: C 0.5 ppm (1.45 mg/m ³) [15-minute] OSHA PEL†: C 1 ppm (3 mg/m ³)			Measurement Methods (see Table 1): NIOSH 6011 OSHA ID101, ID126SGX	
Physical Description: Greenish-yellow gas with a pungent, irritating odor. [Note: Shipped as a liquefied compressed gas.]				
Chemical & Physical Properties: MW: 70.9 BP: -29°F Sol: 0.7% FLP: NA IP: 11.48 eV RGasD: 2.47 VP: 6.8 atm FRZ: -150°F UEL: NA LEL: NA Nonflammable Gas, but a strong oxidizer.	Personal Protection/Sanitation (see Table 2): Skin: Frostbite Eyes: Frostbite Wash skin: N.R. Remove: N.R. Change: N.R. Provide: Frostbite wash	Respirator Recommendations (see Tables 3 and 4): NIOSH 5 ppm: CcrS*/Sa* 10 ppm: Sa:Cf*/PaprS*/CcrFS/GmFS/ ScbaF/SaF §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFS/ScbaE		
Incompatibilities and Reactivities: Reacts explosively or forms explosive compounds with many common substances such as acetylene, ether, turpentine, ammonia, fuel gas, hydrogen & finely divided metals.				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Burning of eyes, nose, mouth; lac, rhin; cough, choking, subs pain; nau, vomit; head, dizz; syncope; pulm edema; pneu; hypox; derm; liquid: frostbite TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Frostbite Skin: Frostbite Breath: Resp support	

Chlorine dioxide	Formula: ClO ₂	CAS#: 10049-04-4	RTECS#: FO3000000	IDLH: 5 ppm
Conversion: 1 ppm = 2.76 mg/m ³		DOT: 9191 143 (hydrate, frozen)		
Synonyms/Trade Names: Chlorine oxide, Chlorine peroxide				
Exposure Limits: NIOSH REL: TWA 0.1 ppm (0.3 mg/m ³) ST 0.3 ppm (0.9 mg/m ³) OSHA PEL†: TWA 0.1 ppm (0.3 mg/m ³)			Measurement Methods (see Table 1): OSHA ID126SGX, ID202	
Physical Description: Yellow to red gas or a red-brown liquid (below 52°F) with an unpleasant odor similar to chlorine and nitric acid.				
Chemical & Physical Properties: MW: 67.5 BP: 52°F Sol(77°F): 0.3% FLP: NA (Gas) ? (Liquid) IP: 10.36 eV RGasD: 2.33 Sp.Gr: 1.6 (Liquid at 32°F) VP: >1 atm FRZ: -74°F UEL: ? LEL: ? Flammable Gas, Combustible Liquid	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact (liquid) Eyes: Prevent eye contact (liquid) Wash skin: When contam (liquid) Remove: When wet (flamm) Change: N.R. Chromyl chloride	Formula: Cr(OCl) ₂	CAS#: 14977-61-8	RTECS#: GB5775000	IDLH: Ca [N.D.]
Conversion:	DOT: 1758 137			
Synonyms/Trade Names: Chlorochromic anhydride, Chromic oxychloride, Chromium chloride oxide, Chromium dichloride dioxide, Chromium dioxide dichloride, Chromium dioxychloride, Chromium oxychloride, Dichlorodioxochromium				
Exposure Limits: NIOSH REL: Ca 0.001 mg Cr(VI)/m ³ See Appendix A, See Appendix C			Measurement Methods (see Table 1): None available	
Physical Description: Deep-red liquid with a musty, burning, acrid odor. [Note: Fumes in moist air.]				
Chemical & Physical Properties: MW: 154.9 BP: 243°F Sol: Reacts Fl.P: NA IP: 12.60 eV Sp.Gr(77°F): 1.91 VP: 20 mmHg FRZ: -142°F UEL: NA LEL: NA Noncombustible Liquid, but a powerful oxidizer.	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH ☒: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFov/ScbaE	
	Incompatibilities and Reactivities: Water, combustible substances, halides, phosphorus, turpentine [Note: Reacts violently in water; forms chromic acid, chromic chloride, hydrochloric acid & chlorine. Corrodes common metals.]			
	Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, upper resp sys; eye, skin burns [carc] TO: Eyes, skin, resp sys [lung cancer]		First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed	

Clopidol	Formula: C ₇ H ₇ Cl ₂ NO	CAS#: 2971-90-6	RTECS#: UU7711500	IDLH: N.D.
Conversion:	DOT:			
Synonyms/Trade Names: Coyden®; 3,5-Dichloro-2,6-dimethyl-4-pyridinol				
Exposure Limits: NIOSH REL: TWA 10 mg/m ³ (total) ST 20 mg/m ³ (total) TWA 5 mg/m ³ (resp) OSHA PEL: TWA 15 mg/m ³ (total) TWA 5 mg/m ³ (resp)			Measurement Methods (see Table 1): NIOSH 0500, 0600	
Physical Description: White to light-brown, crystalline solid.				
Chemical & Physical Properties: MW: 192.1 BP: ? Sol: Insoluble Fl.P: NA IP: ? Sp.Gr: ? VP: ? MLT: >608°F UEL: NA LEL: NA Noncombustible Solid, but dust may explode in cloud form.		Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: N.R. Remove: N.R. Change: N.R.		Respirator Recommendations (see Tables 3 and 4): Not available.
Incompatibilities and Reactivities: None reported				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Irrit eyes, skin, nose, throat; cough TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash Breath: Fresh air	

Coal dust	Formula:	CAS#:	RTECS#: GF8281000	IDLH: N.D.
Conversion:		DOT: 1361 133		
Synonyms/Trade Names: Anthracite coal dust, Bituminous coal dust, Lignite coal dust				
Exposure Limits: NIOSH REL: See Appendix D OSHA PEL†: TWA 2.4 mg/m ³ [respirable, <5% SiO ₂] TWA (10 mg/m ³)/[(%SiO ₂ + 2) [respirable, ≥ 5% SiO ₂] See Appendix C (Mineral Dusts)			Measurement Methods (see Table 1): NIOSH 0600, 7500	
Physical Description: Dark-brown to black solid dispersed in air.				
Chemical & Physical Properties: Properties vary depending upon the specific coal type. Combustible Solid; slightly explosive when exposed to flame.		Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: N.R. Remove: N.R. Change: N.R.		Respirator Recommendations (see Tables 3 and 4): Not available.
Incompatibilities and Reactivities: None reported				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh SY: Chronic bron, decr pulm func, emphy TO: Resp sys			First Aid (see Table 6): Breath: Fresh air	

Coal tar pitch volatiles		Formula:	CAS#: 65996-93-2	RTECS#: GF8655000	IDLH: Ca [80 mg/m ³]
Conversion:		DOT: 2713 153 (acridine)			
Synonyms/Trade Names: Synonyms vary depending upon the specific compound (e.g., pyrene, phenanthrene, acridine, chrysene, anthracene & benzo(a)pyrene).					
[Note: NIOSH considers coal tar, coal tar pitch, and creosote to be coal tar products.]					
Exposure Limits: NIOSH REL: Ca TWA 0.1 mg/m ³ (cyclohexane-extractable fraction) See Appendix A See Appendix C OSHA PEL: TWA 0.2 mg/m ³ (benzene-soluble fraction) [1910.1002] See Appendix C				Measurement Methods (see Table 1): OSHA 58	
Physical Description: Black or dark-brown amorphous residue.					
Chemical & Physical Properties: Properties vary depending upon the specific compound. Combustible Solids		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: Daily Remove: N.R. Change: Daily		Respirator Recommendations (see Tables 3 and 4): NIOSH ☒: ScbaF;Pd,Pp/SaF;Pd,Pp:AScba Escape: GmFOv100/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Derm, bron, [carc] TO: Resp sys, skin, bladder, kidneys [lung, kidney & skin cancer]				First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed	

Cobalt carbonyl (as Co)		Formula: C ₈ Co ₂ O ₈	CAS#: 10210-68-1	RTECS#: GG0300000	IDLH: N.D.
Conversion:		DOT:			
Synonyms/Trade Names: di-mu-Carbonylhexacarbonyldicobalt, Cobalt octacarbonyl, Cobalt tetracarbonyl dimer, Dicobalt carbonyl, Dicobalt Octacarbonyl, Octacarbonyldicobalt					
Exposure Limits: NIOSH REL: TWA 0.1 mg/m ³ OSHA PEL†: none				Measurement Methods (see Table 1): None available	
Physical Description: Orange to dark-brown, crystalline solid. [Note: The pure substance is white.]				Respirator Recommendations (see Tables 3 and 4): Not available.	
Chemical & Physical Properties: MW: 341.9 BP: 126°F (Decomposes) Sol: Insoluble Fl.P: NA IP: ? Sp.Gr: 1.87 VP: 0.7 mmHg MLT: 124°F UEL: NA LEL: NA Noncombustible Solid, but flammable carbon monoxide is emitted during decomposition.		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily			
Incompatibilities and Reactivities: Air [Note: Decomposes on exposure to air or heat; stable in atmosphere of hydrogen & carbon monoxide.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, muc memb; cough, decr pulm func, wheez, dysp; in animals: liver, kidney inj, pulm edema TO: Eyes, skin, resp sys, blood, CNS		First Aid (see Table 6): Eye: Irr immed Skin: Soap wash Breath: Resp support Swallow: Medical attention immed			

Cobalt hydrocarbonyl (as Co)		Formula: HCo(CO) ₄	CAS#: 16842-03-8	RTECS#: GG0900000	IDLH: N.D.
Conversion:		DOT:			
Synonyms/Trade Names: Hydrocobalt tetracarbonyl, Tetracarbonylhydridocobalt, Tetracarbonylhydrocobalt					
Exposure Limits: NIOSH REL: TWA 0.1 mg/m ³ OSHA PEL†: none				Measurement Methods (see Table 1): None available	
Physical Description: Gas with an offensive odor.					
Chemical & Physical Properties: MW: 172.0 BP: ? Sol: 0.05% Fl.P: NA (Gas) IP: ? RGasD: 5.93 VP: >1 atm FRZ: -15°F UEL: ? LEL: ? Flammable Gas		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Air [Note: Unstable gas that decomposes rapidly in air at room temperature to cobalt carbonyl & hydrogen.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: In animals: irrit resp sys; dysp, cough, decr pulm func, pulm edema TO: Eyes, skin, resp svcs				First Aid (see Table 6): Eye: Irr immed Skin: Soap wash Breath: Resp support	

Cobalt metal dust and fume (as Co)		Formula: Co	CAS#: 7440-48-4	RTECS#: GF8750000	IDLH: 20 mg/m ³ (as Co)
Conversion:		DOT:			
Synonyms/Trade Names: Cobalt metal dust, Cobalt metal fume					
Exposure Limits: NIOSH REL: TWA 0.05 mg/m ³ OSHA PEL†: TWA 0.1 mg/m ³			Measurement Methods (see Table 1): NIOSH 7027, 7300, 7301, 7303, 9102 OSHA ID121, ID125G, ID213		
Physical Description: Odorless, silver-gray to black solid.					
Chemical & Physical Properties: MW: 58.9 BP: 5612°F Sol: Insoluble Fl.P: NA IP: NA Sp.Gr: 8.92 VP: 0 mmHg (approx) MLT: 2719°F UEL: NA LEL: NA Noncombustible Solid in bulk form, but finely divided dust will burn at high temperatures.		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: N.R. Wash skin: When contam Remove: When wet or contam Change: Daily		Respirator Recommendations (see Tables 3 and 4): NIOSH 0.25 mg/m³: Qm 0.5 mg/m³: 95XQ*/Sa* 1.25 mg/m³: Sa:C*/Pap/Hie* 2.5 mg/m³: 100F/ScbaF/SaF 20 mg/m³: SaF:Pd,Pp §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: 100F/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers, ammonium nitrate					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Cough, dysp, wheez, decr pulm func; low-wgt; derm; diffuse nodular fib; resp hypersensitivity, asthma TO: Skin, resp sys			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash Breath: Resp support Swallow: Medical attention immed		

Coke oven emissions		Formula:	CAS#:	RTECS#: GH0346000	IDLH: Ca [N.D.]
Conversion:		DOT:			
Synonyms/Trade Names: Synonyms vary depending upon the specific constituent.					
Exposure Limits: NIOSH REL: Ca TWA 0.2 mg/m ³ (benzene-soluble fraction) See Appendix A See Appendix C OSHA PEL: [1910.1029] TWA 0.150 mg/m ³ (benzene-soluble fraction)				Measurement Methods (see Table 1): OSHA 58	
Physical Description: Emissions released during the carbonization of bituminous coal for the production of coke. [Note: See Appendix C for more information.]					
Chemical & Physical Properties: Properties vary depending upon the constituent.		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: Daily Remove: N.R. Change: Daily		Respirator Recommendations (see Tables 3 and 4): NIOSH ✱: ScbaF: Pd,Pp/SaF: Pd,Pp:AScba Escape: GmFOv100/ScbaE See Appendix E (page 351)	
Incompatibilities and Reactivities: None reported					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Irrit eyes, resp sys; cough, dysp, wheez; [carc] TO: Skin, resp sys, urinary sys [skin, lung, kidney & bladder cancer]				First Aid (see Table 6): Eye: Irr immed Breath: Resp support	

Copper (dusts and mists, as Cu)		Formula: Cu	CAS#: 7440-50-8	RTECS#: GL5325000	IDLH: 100 mg/m³ (as Cu)
Conversion:			DOT:		
Synonyms/Trade Names: Copper metal dusts, Copper metal fumes					
Exposure Limits: NIOSH REL*: TWA 1 mg/m³ OSHA PEL*: TWA 1 mg/m³ [*Note: The REL and PEL also apply to other copper compounds (as Cu) except copper fume.]				Measurement Methods (see Table 1): NIOSH 7029, 7300, 7301, 7303, 9102 OSHA ID121, ID125G	
Physical Description: Reddish, lustrous, malleable, odorless solid.					
Chemical & Physical Properties: MW: 63.5 BP: 4703°F Sol: Insoluble Fl.P: NA IP: NA Sp.Gr: 8.94 VP: 0 mmHg (approx) MLT: 1981°F UEL: NA LEL: NA Noncombustible Solid in bulk form, but powdered form may ignite.		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 5 mg/m³: Qm* 10 mg/m³: 95XQ*/Sa* 25 mg/m³: Sa:Cf*/PaprHie* 50 mg/m³: 100F/PaprTHie*/ScbaF/SaF 100 mg/m³: SaF: Pd, Pp \$: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: 100F/ScbaE	
Incompatibilities and Reactivities: Oxidizers, alkalis, sodium azide, acetylene					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, nose, pharynx; nasal septum perf; metallic taste; derm; in animals: lung, liver, kidney damage; anemia TO: Eyes, skin, resp sys, liver, kidneys (incr risk with Wilson's disease)				First Aid (see Table 6): Eye: Irr immed Skin: Soap wash prompt Breath: Resp support Swallow: Medical attention immed	

Copper fume (as Cu)		Formula: CuO/Cu	CAS#: 1317-38-0 (CuO)	RTECS#: GL7900000 (CuO)	IDLH: 100 mg/m ³ (as Cu)
Conversion:			DOT:		
Synonyms/Trade Names: Cu: Copper fume CuO: Black copper oxide fume, Copper monoxide fume, Copper(II) oxide fume, Cupric oxide fume [Note: Also see specific listing for Copper (dusts and mists).]					
Exposure Limits: NIOSH REL: TWA 0.1 mg/m ³ OSHA PEL: TWA 0.1 mg/m ³				Measurement Methods (see Table 1): NIOSH 7029, 7300, 7301, 7303 OSHA ID121, ID125G, ID206	
Physical Description: Finely divided black particulate dispersed in air. [Note: Exposure may occur in copper & brass plants and during the welding of copper alloys.]					
Chemical & Physical Properties: MW: 79.5 BP: Decomposes Sol: Insoluble Fl.P: NA IP: NA Sp.Gr: 6.4 (CuO) VP: 0 mmHg (approx) MLT: 1879°F (Decomposes) UEL: NA LEL: NA CuO: Noncombustible Solid		Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: N.R. Remove: N.R. Change: N.R. Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, resp sys; in animals: dysp, pulm edema, irrit skin TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed		

Crufomate		Formula: C ₁₂ H ₁₉ ClNO ₃ P	CAS#: 299-86-5	RTECS#: TB3850000	IDLH: N.D.
Conversion:		DOT:			
Synonyms/Trade Names: 4-t-Butyl-2-chlorophenylmethyl methylphosphoramidate, Dowco® 132, Ruelene®					
Exposure Limits: NIOSH REL: TWA 5 mg/m ³ ST 20 mg/m ³ OSHA PEL†: none				Measurement Methods (see Table 1): NIOSH 0500 OSHA PV2015	
Physical Description: White, crystalline solid in pure form. [pesticide] [Note: Commercial product is a yellow oil.]					
Chemical & Physical Properties: MW: 291.7 BP: Decomposes Sol: Insoluble Fl.P: ? IP: ? Sp.Gr: 1.16 VP(243°F): 0.01 mmHg MLT: 140°F UEL: ? LEL: ? Combustible Solid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Strongly alkaline & strongly acidic media [Note: Unstable over long periods in aqueous preparations or above 140°F.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, resp sys; wheez, dysp; blurred vision, lac; sweat; abdom cramps, diarr, nau, anor TO: Eyes, skin, resp sys, blood chol			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed		

Cumene	Formula: C ₆ H ₅ CH(CH ₃) ₂	CAS#: 98-82-8	RTECS#: GR8575000	IDLH: 900 ppm [10%LEL]
Conversion: 1 ppm = 4.92 mg/m ³		DOT: 1918 130		
Synonyms/Trade Names: Cumol, Isopropyl benzene, 2-Phenyl propane				
Exposure Limits: NIOSH REL: TWA 50 ppm (245 mg/m ³) [skin] OSHA PEL: TWA 50 ppm (245 mg/m ³) [skin]				Measurement Methods (see Table 1): NIOSH 1501
Physical Description: Colorless liquid with a sharp, penetrating, aromatic odor.				
Chemical & Physical Properties: MW: 120.2 BP: 306°F Sol: Insoluble Fl.P: 96°F IP: 8.75 eV Sp.Gr: 0.86 VP: 8 mmHg FRZ: -141°F UEL: 6.5% LEL: 0.9% Class IC Flammable Liquid	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R.		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 500 ppm: CcrOv*/Sa* 900 ppm: Sa:Cf*/Paprov*/CcrFOv/ GmFOv/ScbaF/SaF §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Oxidizers, nitric acid, sulfur acid [Note: Forms cumene hydroperoxide upon long exposure to air.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, muc memb; derm; head, narco, coma TO: Eyes, skin, resp sys, CNS			First Aid (see Table 6): Eye: Irr immed Skin: Water flush prompt Breath: Resp support Swallow: Medical attention immed	

Cyanamide	Formula: NH ₂ CN	CAS#: 420-04-2	RTECS#: GS5950000	IDLH: N.D.
Conversion:	DOT:			
Synonyms/Trade Names: Amidocyanogen, Carbimide, Carbodiimide, Cyanogen nitride, Hydrogen cyanamide [Note: Cyanamide is also a synonym for Calcium cyanamide.]				
Exposure Limits: NIOSH REL: TWA 2 mg/m ³ OSHA PEL†: none			Measurement Methods (see Table 1): NIOSH 0500	
Physical Description: Crystalline solid.				
Chemical & Physical Properties: MW: 42.1 BP: 500°F (Decomposes) Sol(59°F): 78% Fl.P: 286°F IP: 10.65 eV Sp.Gr: 1.28 VP: ? MLT: 113°F UEL: ? LEL: ? Combustible Solid	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench	Respirator Recommendations (see Tables 3 and 4): Not available.		
Incompatibilities and Reactivities: Above 104°F: Moisture, acids, or alkalis; 1,2-phenylene diamine salts [Note: Polymerization may occur on evaporation of aqueous solutions.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, resp sys; eye, skin burns; miosis, salv, lac, twitch; Antabuse-like effects TO: Eyes, skin, resp sys, CNS		First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed		

Cyanogen		Formula: NCCN	CAS#: 460-19-5	RTECS#: GT1925000	IDLH: N.D.
Conversion: 1 ppm = 2.13 mg/m ³		DOT: 1026 119			
Synonyms/Trade Names: Carbon nitride, Dicyan, Dicyanogen, Ethanedinitrile, Oxalonitrile					
Exposure Limits: NIOSH REL: TWA 10 ppm (20 mg/m ³) OSHA PEL†: none				Measurement Methods (see Table 1): OSHA PV2104	
Physical Description: Colorless gas with a pungent, almond-like odor. [Note: Shipped as a liquefied compressed gas. Forms cyanide in the body.]					
Chemical & Physical Properties: MW: 52.0 BP: -6°F Sol: 1% F.I.P: NA (Gas) IP: 13.57 eV RGasD: 1.82 Sp.Gr: 0.95 (Liquid at -6°F) VP(70°F): 5.1 atm FRZ: -18°F UEL: 32% LEL: 6.6% Flammable Gas		Personal Protection/Sanitation (see Table 2): Skin: Frostbite Eyes: Prevent eye contact/Frostbite Wash skin: N.R. Remove: When wet (flamm) Change: N.R. Provide: Frostbite wash		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Acids, water, strong oxidizers (e.g., dichlorine oxide, fluorine) [Note: Slowly hydrolyzed in water to form hydrogen cyanide, oxalic acid, or ammonia.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Irrit eyes, nose, upper resp sys; lac; cherry red lips, tachypnea, hypernea, bradycardia; head, convuls; dizz, loss of appetite, low-wgt; liquid: frostbite TO: Eyes, resp sys, CNS, CVS				First Aid (see Table 6): Eye: Frostbite Skin: Frostbite Breath: Resp support	

Cyanogen chloride		Formula: ClCN	CAS#: 506-77-4	RTECS#: GT2275000	IDLH: N.D.
Conversion: 1 ppm = 2.52 mg/m ³		DOT: 1589 125 (inhibited)			
Synonyms/Trade Names: Chlorocyan, Chlorine cyanide, Chlorocyanide, Chlorocyanogen					
Exposure Limits: NIOSH REL: C 0.3 ppm (0.6 mg/m ³) OSHA PEL†: none				Measurement Methods (see Table 1): None available	
Physical Description: Colorless gas or liquid (below 55°F) with an irritating odor. [Note: Shipped as a liquefied gas. A solid below 20°F. Forms cyanide in the body.]					
Chemical & Physical Properties: MW: 61.5 BP: 55°F Sol: 7% F.I.P: NA IP: 12.49 eV RGasD: 2.16 Sp.Gr: 1.22 (Liquid at 32°F) VP: 1010 mmHg FRZ: 20°F UEL: NA LEL: NA Nonflammable Gas		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact (liquid) Eyes: Prevent eye contact (liquid) Wash skin: When contam (liquid) Remove: When wet or contam (liquid) Change: N.R. Provide: Eyewash (liquid) Quick drench (liquid)		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Water, acids, alkalis, ammonia, alcohols [Note: Can react very slowly with water to form hydrogen cyanide. May be stabilized to prevent polymerization.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs (liquid), Ing (liquid), Con (liquid) SY: Irrit eyes, upper resp sys; cough, delayed pulm edema; lass, head, dizz, conf, nau, vomit; irreg heartbeat; irrit skin (liquid) TO: Eyes, skin, resp sys, CNS, CVS			First Aid (see Table 6): Eye: Irr immed Skin: Water wash immed (liquid) Breath: Resp support Swallow: Medical attention immed (liquid)		

Cyclohexane	Formula: C ₆ H ₁₂	CAS#: 110-82-7	RTECS#: GU6300000	IDLH: 1300 ppm [10%LEL]
Conversion: 1 ppm = 3.44 mg/m ³		DOT: 1145 128		
Synonyms/Trade Names: Benzene hexahydride, Hexahydrobenzene, Hexamethylene, Hexanaphthene				
Exposure Limits: NIOSH REL: TWA 300 ppm (1050 mg/m ³) OSHA PEL: TWA 300 ppm (1050 mg/m ³)				Measurement Methods (see Table 1): NIOSH 1500 OSHA 7
Physical Description: Colorless liquid with a sweet, chloroform-like odor. [Note: A solid below 44°F.]				
Chemical & Physical Properties: MW: 84.2 BP: 177°F Sol: Insoluble Fl.P: 0°F IP: 9.88 eV Sp.Gr: 0.78 VP: 78 mmHg FRZ: 44°F UEL: 8% LEL: 1.3% Class IB Flammable Liquid	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R. Incompatibilities and Reactivities: Oxidizers				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, resp sys; drow; dermat; narco, coma TO: Eyes, skin, resp sys, CNS			First Aid (see Table 6): Eye: Irr immed Skin: Water flush prompt Breath: Resp support Swallow: Medical attention immed	

C

Cyclohexanethiol	Formula: C ₆ H ₁₁ SH	CAS#: 1569-69-3	RTECS#: GV7525000	IDLH: N.D.
Conversion: 1 ppm = 4.75 mg/m ³		DOT: 3054 129		
Synonyms/Trade Names: Cyclohexylmercaptan, Cyclohexylthiol				
Exposure Limits: NIOSH REL: C 0.5 ppm (2.4 mg/m ³) [15-minute] OSHA PEL: none			Measurement Methods (see Table 1): None available	
Physical Description: Colorless liquid with a strong, offensive odor.				
Chemical & Physical Properties: MW: 116.2 BP: 316°F Sol: Insoluble FLP: 110°F IP: ? Sp.Gr: 0.98 VP: 10 mmHg FRZ: -181°F UEL: ? LEL: ? Class II Combustible Liquid	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Provide: Eyewash Quick drench	Respirator Recommendations (see Tables 3 and 4): NIOSH 5 ppm: CcrOv/Sa 12.5 ppm: Sa:Cf/PapRov 25 ppm: CcrFOv/GmFOv/PapRTOv/ ScbaF/SaF §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFOv/ScbaE		
		Incompatibilities and Reactivities: Oxidizers, reducing agents, strong acids, alkali metals		
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, resp sys; head, dizz, lass, nau, vomit, convuls; cough, wheez, laryngitis, dysp TO: Eyes, skin, resp sys, CNS		First Aid (see Table 6): Eye: Irr immed Skin: Soap flush immed Breath: Resp support Swallow: Medical attention immed		

Cyclohexanol		Formula: C ₆ H ₁₁ OH	CAS#: 108-93-0	RTECS#: GV7875000	IDLH: 400 ppm
Conversion: 1 ppm = 4.10 mg/m ³		DOT: 1993 128 (combustible liquid, n.o.s.)			
Synonyms/Trade Names: Anol, Cyclohexyl alcohol, Hexahydrophenol, Hexalin, Hydralin, Hydroxycyclohexane					
Exposure Limits: NIOSH REL: TWA 50 ppm (200 mg/m ³) [skin] OSHA PEL†: TWA 50 ppm (200 mg/m ³)				Measurement Methods (see Table 1): NIOSH 1402, 1405 OSHA 7	
Physical Description: Sticky solid or colorless to light-yellow liquid (above 77°F) with a camphor-like odor.					
Chemical & Physical Properties: MW: 100.2 BP: 322°F Sol: 4% Fl.P: 154°F IP: 10.00 eV Sp.Gr: 0.96 VP: 1 mmHg MLT: 77°F UEL: ? LEL: ? Class IIIA Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 400 ppm: CcrOv*/PapRov*/GmFOv/Sa*/ScbaF §: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers (such as hydrogen peroxide & nitric acid)					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, nose, throat; narco TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Skin: Water wash prompt Breath: Resp support Swallow: Medical attention immed		

Cyclohexanone		Formula: C ₆ H ₁₀ O	CAS#: 108-94-1	RTECS#: GW1050000	IDLH: 700 ppm
Conversion: 1 ppm = 4.02 mg/m ³		DOT: 1915 127			
Synonyms/Trade Names: Anone, Cyclohexyl ketone, Pimelic ketone					
Exposure Limits: NIOSH REL: TWA 25 ppm (100 mg/m ³) [skin] OSHA PEL†: TWA 50 ppm (200 mg/m ³)				Measurement Methods (see Table 1): NIOSH 1300, 2555 OSHA 1	
Physical Description: Water-white to pale-yellow liquid with a peppermint- or acetone-like odor.					
Chemical & Physical Properties: MW: 98.2 BP: 312°F Sol: 15% Fl.P: 146°F IP: 9.14 eV Sp.Gr: 0.95 VP: 5 mmHg FRZ: -49°F UEL: 9.4% LEL(212°F): 1.1% Class IIIA Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R.		Respirator Recommendations (see Tables 3 and 4): NIOSH 625 ppm: Sa:CfE/PaprOVe 700 ppm: CcrFOv/GmFOv/PaprTOVe/ ScbaF/SaF §: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Oxidizers, nitric acid					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, muc memb; head; narco, coma; derm; in animals: liver, kidney damage TO: Eyes, skin, resp sys, CNS, liver, kidneys			First Aid (see Table 6): Eye: Irr immed Skin: Water flush prompt Breath: Resp support Swallow: Medical attention immed		

Cyclohexene		Formula: C ₆ H ₁₀	CAS#: 110-83-8	RTECS#: GW2500000	IDLH: 2000 ppm
Conversion: 1 ppm = 3.36 mg/m ³			DOT: 2256 130		
Synonyms/Trade Names: Benzene tetrahydride, Tetrahydrobenzene					
Exposure Limits: NIOSH REL: TWA 300 ppm (1015 mg/m ³) OSHA PEL: TWA 300 ppm (1015 mg/m ³)				Measurement Methods (see Table 1): NIOSH 1500 OSHA 7	
Physical Description: Colorless liquid with a sweet odor.					
Chemical & Physical Properties: MW: 82.2 BP: 181°F Sol: Insoluble FLP: 11°F IP: 8.95 eV Sp.Gr: 0.81 VP: 67 mmHg FRZ: -154°F UEL: ? LEL: ? Incompatibilities and Reactivities: None reported					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Possible urinary dist, neurological disorders; in animals: irrit eyes, skin TO: Eyes, skin, urinary tract, PNS				First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed	

Dimethylaminopropionitrile		Formula: (CH ₃) ₂ NCH ₂ CH ₂ CN	CAS#: 1738-25-6	RTECS#: UG1575000	IDLH: N.D.
Conversion:		DOT:			
Synonyms/Trade Names: 3-(Dimethylamino)propionitrile; N,N-Dimethylamino-3-propionitrile [Note: A component (95%) of NIAX® Catalyst ESN, along with bis(2-(dimethylamino)ethyl) ether (5%).]					
Exposure Limits: NIOSH REL: See Appendix C (NIAX® Catalyst ESN) OSHA PEL: See Appendix C (NIAX® Catalyst ESN)				Measurement Methods (see Table 1): None available	
Physical Description: Colorless liquid.					
Chemical & Physical Properties: MW: 98.2 BP: 342°F Sol: Miscible Fl.P: 147°F IP: ? Sp.Gr(86°F): 0.86 VP(135°F): 10 mmHg FRZ: -48°F UEL: ? LEL: ? Class IIIA Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH ⚠: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Oxidizers [Note: Emits toxic oxides of nitrogen and cyanide fumes when heated to decomposition.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin; urinary dist; neurological disorders; pins & needles in hands & feet; musc weak, lass, nau, vomit; decr nerve conduction in lower legs TO: Eyes, skin, CNS, urinary tract				First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed	

D

N,N-Dimethylaniline		Formula: C ₆ H ₅ N(CH ₃) ₂	CAS#: 121-69-7	RTECS#: BX4725000	IDLH: 100 ppm
Conversion: 1 ppm = 4.96 mg/m ³		DOT: 2253 153			
Synonyms/Trade Names: N,N-Dimethylbenzeneamine; N,N-Dimethylphenylamine [Note: Also known as Dimethylaniline which is a correct synonym for Xylidine.]					
Exposure Limits: NIOSH REL: TWA 5 ppm (25 mg/m ³) ST 10 ppm (50 mg/m ³) [skin] OSHA PEL†: TWA 5 ppm (25 mg/m ³) [skin]				Measurement Methods (see Table 1): NIOSH 2002 OSHA PV2064	
Physical Description: Pale yellow, oily liquid with an amine-like odor. [Note: A solid below 36°F.]					
Chemical & Physical Properties: MW: 121.2 BP: 378°F Sol: 2% F.L.P: 142°F IP: 7.14 eV Sp.Gr: 0.96 VP: 1 mmHg FRZ: 36°F UEL: ? LEL: ? Class IIIA Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Provide: Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH 50 ppm: Sa 100 ppm: Sa:Cf/ScbaF/SaF \$: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFov/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers, strong acids, benzoyl peroxide					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Anoxia symptoms: cyan, lass, dizz, ataxia; methemo TO: Blood, kidneys, liver, CVS			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed		

Dimethyl carbamoyl chloride		Formula: (CH ₃) ₂ NCOCl	CAS#: 79-44-7	RTECS#: FD4200000	IDLH: Ca [N.D.]
Conversion:		DOT: 2262 156			
Synonyms/Trade Names: Chloroformic acid dimethylamide; Dimethylcarbamic chloride; N,N-Dimethylcarbamoyl chloride; DMCC					
Exposure Limits: NIOSH REL: Ca See Appendix A OSHA PEL: none				Measurement Methods (see Table 1): None available	
Physical Description: Clear, colorless liquid.					
Chemical & Physical Properties: MW: 107.6 BP: 329°F Sol: Reacts Fl.P: 155°F IP: ? Sp.Gr: 1.17 VP: ? FRZ: -27°F UEL: ? LEL: ? Incompatibilities and Reactivities: Oxidizers				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin; CNS depres, dizz, drow, decr breath; in animals: liver inj; narco TO: Eves, skin, CNS, liver			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash Breath: Resp support Swallow: Medical attention immed	

D

Diquat (Diquat dibromide)		Formula: C ₁₂ H ₁₂ N ₂ Br ₂	CAS#: 85-00-7	RTECS#: JM5690000	IDLH: N.D.
Conversion:		DOT: 2781 151 (solid); 2782 131 (liquid)			
Synonyms/Trade Names: Diquat dibromide; 1,1'-Ethylene-2,2'-bipyridylium dibromide					
[Note: Diquat is a cation (C ₁₂ H ₁₂ N ₂ ⁺⁺ ; 1,1'-Ethylene-2,2-bipyridylium ion). Various diquat salts are commercially available.]					
Exposure Limits: NIOSH REL: TWA 0.5 mg/m ³ OSHA PEL†: none				Measurement Methods (see Table 1): None available	
Physical Description: Dibromide salt: Yellow crystals. [herbicide] [Note: Commercial product may be found in a liquid concentrate or a solution.]					
Chemical & Physical Properties: MW: 344.1 BP: Decomposes Sol: 70% Fl.P: ? IP: ? Sp.Gr: 1.22-1.27 VP: <0.00001 mmHg MLT: 635°F UEL: ? LEL: ? Combustible Solid, but does not readily ignite and burns with difficulty.		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily Provide: Quick drench		Respirator Recommendations (see Tables 3 and 4): Not available.	
		Incompatibilities and Reactivities: Alkalis, UV light, basic solutions [Note: Concentrated diquat solutions corrode aluminum.]			
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, muc memb, resp sys; rhin, epis; skin burns; nau, vomit, diarr, mal; kidney, liver inj; cough, chest pain, dysp, pulm edema; tremor, convuls; delayed healing of wounds TO: Eyes, skin, resp sys, kidneys, liver, CNS			First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed		

Disulfiram		Formula: [(C ₂ H ₅) ₂ NCS] ₂ S ₂	CAS#: 97-77-8	RTECS#: JO1225000	IDLH: N.D.
Conversion:		DOT:			
Synonyms/Trade Names: Antabuse®, bis(Diethylthiocarbamoyl) disulfide, Ro-Sulfiram®, TETD, Tetraethylthiuram disulfide					
Exposure Limits: NIOSH REL: TWA 2 mg/m ³ [Precautions should be taken to avoid concurrent exposure to ethylene dibromide.] OSHA PEL†: none				Measurement Methods (see Table 1): None available	
Physical Description: White, yellowish, or light-gray powder with a slight odor. [fungicide]					
Chemical & Physical Properties: MW: 296.6 BP: ? Sol: 0.02% F.L.P: NA IP: ? Sp.Gr: 1.30 VP: ? MLT: 158°F UEL: NA LEL: NA Noncombustible Solid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: None reported					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, resp sys; sens derm; lass, tremor, restless, head, dizz; metallic taste; peri neur; liver damage TO: Eyes, skin, resp sys, CNS, PNS, liver			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed		

Disulfoton	Formula: C ₈ H ₁₉ O ₂ PS ₃	CAS#: 298-04-4	RTECS#: TD9275000	IDLH: N.D.
Conversion:	DOT: 2783 152			
Synonyms/Trade Names: O, O-Diethyl S-2-(ethylthio)-ethyl phosphorodithioate; Di-Syston®; Thiodemeton				
Exposure Limits: NIOSH REL: TWA 0.1 mg/m ³ [skin] OSHA PEL†: none			Measurement Methods (see Table 1): NIOSH 5600	
Physical Description: Oily, colorless to yellow liquid with a characteristic, sulfur odor. [insecticide] [Note: Technical product is a brown liquid.]				
Chemical & Physical Properties: MW: 274.4 BP: ? Sol(73°F): 0.003% F.L.P: >180°F IP: ? Sp.Gr: 1.14 VP: 0.0002 mmHg FRZ: >-13°F UEL: ? LEL: ? Combustible Liquid, but will not ignite easily.		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): Not available.
Incompatibilities and Reactivities: Alkalies				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin; nau, vomit, abdom cramps, diarr, salv; head, dizz, lass; rhin, chest tight; blurred vision, miosis; card irreg; musc fasc; dysp; eye, skin burns TO: Eyes, skin, resp sys, CNS, CVS, blood chol			First Aid (see Table 6): Eye: Irr immed Skin: Soap flush immed Breath: Resp support Swallow: Medical attention immed	

Diuron	Formula: C ₆ H ₃ Cl ₂ NHCON(CH ₃) ₂	CAS#: 330-54-1	RTECS#: YS8925000	IDLH: N.D.
Conversion:		DOT:		
Synonyms/Trade Names: 3-(3,4-Dichlorophenyl)-1,1-dimethylurea; Direx®; Karmex®				
Exposure Limits: NIOSH REL: TWA 10 mg/m ³ OSHA PEL†: none			Measurement Methods (see Table 1): NIOSH 5601 OSHA PV2097	
Physical Description: White, odorless, crystalline solid. [herbicide]				
Chemical & Physical Properties: MW: 233.1 BP: 356°F (Decomposes) Sol: 0.004% Fl.P: NA IP: ? Sp.Gr: ? Incompatibilities and Reactivities: Strong oxidizers, strong acids, certain salts, caustics, zinc, aluminum, water [Note: May polymerize in presence of strong acids and bases, particularly when hot.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin with deep pain; nau, vomit; abdom pain; resp distress, cough; cyan; repro effects; [carc] TO: Eyes, skin, resp sys, kidneys, liver, repro sys [in animals: nasal cancer]				First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed	

EPN	Formula: C ₁₄ H ₁₄ O ₄ NSP	CAS#: 2104-64-5	RTECS#: TB1925000	IDLH: 5 mg/m ³
Conversion:		DOT:		
Synonyms/Trade Names: Ethyl p-nitrophenyl benzenethionophosphonate, O-Ethyl O-(4-nitrophenyl) phenylphosphonothioate				
Exposure Limits: NIOSH REL: TWA 0.5 mg/m ³ [skin] OSHA PEL: TWA 0.5 mg/m ³ [skin]			Measurement Methods (see Table 1): NIOSH 5012	
Physical Description: Yellow solid with an aromatic odor. [pesticide] [Note: A brown liquid above 97°F.]				
Chemical & Physical Properties: MW: 323.3 BP: ? Sol: Insoluble F.L.P: NA IP: ? Sp.Gr(77°F): 1.27 VP(212°F): 0.0003 mmHg MLT: 97°F UEL: NA LEL: NA Noncombustible Solid	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 5 mg/m ³ : Sa/ScbaF §: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFOV100/ScbaE	
	Incompatibilities and Reactivities: Strong oxidizers			
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin; miosis, lac; rhin; head; chest tight, wheez, lar spasm; salv; cyan; anor, nau, abdom cramps, diarr; para, convuls; low BP, card irreg TO: Eyes, skin, resp sys, CVS, CNS, blood chol			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed	

Ethanolamine	Formula: NH ₂ CH ₂ CH ₂ OH	CAS#: 141-43-5	RTECS#: KJ5775000	IDLH: 30 ppm
Conversion: 1 ppm = 2.50 mg/m ³		DOT: 2491 153		
Synonyms/Trade Names: 2-Aminoethanol, β-Aminoethyl alcohol, Ethylolamine, 2-Hydroxyethylamine, Monoethanolamine				
Exposure Limits: NIOSH REL: TWA 3 ppm (8 mg/m ³) ST 6 ppm (15 mg/m ³) OSHA PEL†: TWA 3 ppm (6 mg/m ³)			Measurement Methods (see Table 1): NIOSH 2007	
Physical Description: Colorless, viscous liquid or solid (below 51°F) with an unpleasant, ammonia-like odor.				
Chemical & Physical Properties: MW: 61.1 BP: 339°F Sol: Miscible Fl.P: 186°F IP: 8.96 eV Sp.Gr: 1.02 VP: 0.4 mmHg FRZ: 51°F UEL: 23.5% LEL(284°F): 3.0% Class IIIA Combustible Liquid	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily Provide: Eyewash		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 30 ppm: CcrS*/GmFS/PapR S*/Sa*/ScbaF §: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFS/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers, strong acids, iron [Note: May attack copper, brass, and rubber.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, resp sys; drow TO: Eyes, skin, resp sys, CNS			First Aid (see Table 6): Eye: Irr immed Skin: Water flush prompt Breath: Resp support Swallow: Medical attention immed	

Ethion		Formula: [(C ₂ H ₅ O) ₂ P(S)S] ₂ CH ₂	CAS#: 563-12-2	RTECS#: TE4550000	IDLH: N.D.
Conversion:		DOT:			
Synonyms/Trade Names: O,O,O',O'-Tetraethyl S,S'-methylene di(phosphorodithioate)					
Exposure Limits: NIOSH REL: 0.4 mg/m ³ [skin] OSHA PEL†: none				Measurement Methods (see Table 1): NIOSH 5600	
Physical Description: Colorless to amber-colored, odorless liquid. [insecticide] [Note: A solid below 10°F. The technical product has a very disagreeable odor.]					
Chemical & Physical Properties: MW: 384.5 BP: >302°F (Decomposes) Sol: 0.0001% F.I.P.: 349°F IP: ? Sp.Gr: 1.22 VP: 0.0000015 mmHg FRZ: 10°F UEL: ? LEL: ? Class IIIB Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Acids, alkalis					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin; nau, vomit, abdom cramps, diarr, salv; head, dizz, lass; rhin, chest tight; blurred vision, miosis; card irreg; musc fasc; dysp TO: Eyes, skin, resp sys, CNS, CVS, blood chol			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed		

2-Ethoxyethanol		Formula: C ₂ H ₅ OCH ₂ CH ₂ OH	CAS#: 110-80-5	RTECS#: KK8050000	IDLH: 500 ppm
Conversion: 1 ppm = 3.69 mg/m ³		DOT: 1171 127			
Synonyms/Trade Names: Cellosolve®, EGEE, Ethylene glycol monoethyl ether					
Exposure Limits: NIOSH REL: TWA 0.5 ppm (1.8 mg/m ³) [skin] OSHA PEL: TWA 200 ppm (740 mg/m ³) [skin]				Measurement Methods (see Table 1): NIOSH 1403 OSHA 53, 79	
Physical Description: Colorless liquid with a sweet, pleasant, ether-like odor.					
Chemical & Physical Properties: MW: 90.1 BP: 275°F Sol: Miscible F.I.P: 110°F IP: ? Sp.Gr: 0.93 VP: 4 mmHg FRZ: -130°F UEL(200°F): 15.6% LEL(200°F): 1.7% Class II Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Incompatibilities and Reactivities: Nitrates; strong oxidizers, alkalis & acids					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, nose, throat; narco; derm TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Skin: Water flush prompt Breath: Resp support Swallow: Medical attention immed		

Ethyl acrylate		Formula: CH ₂ =CHCOOC ₂ H ₅	CAS#: 140-88-5	RTECS#: AT0700000	IDLH: Ca [300 ppm]
Conversion: 1 ppm = 4.09 mg/m ³		DOT: 1917 129P (inhibited)			
Synonyms/Trade Names: Ethyl acrylate (inhibited), Ethyl ester of acrylic acid, Ethyl propenoate					
Exposure Limits: NIOSH REL: Ca See Appendix A OSHA PEL†: TWA 25 ppm (100 mg/m ³) [skin]				Measurement Methods (see Table 1): NIOSH 1450 OSHA 92	
Physical Description: Colorless liquid with an acid odor.					
Chemical & Physical Properties: MW: 100.1 BP: 211°F Sol: 2% F.L.P: 48°F IP: 10.30 eV Sp.Gr: 0.92 VP: 29 mmHg FRZ: -96°F UEL: 14% LEL: 1.4% Class IB Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R. Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH ☞: ScbaF: Pd, Pp/ SaF: Pd, Pp: AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Oxidizers, peroxides, polymerizers, strong alkalis, moisture, chlorosulfonic acid [Note: Polymerizes readily unless an inhibitor such as hydroquinone is added.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, resp sys; [carc] TO: Eyes, skin, resp sys [in animals: tumors of the forestomach]			First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed		

Ethyl alcohol		Formula: CH ₃ CH ₂ OH	CAS#: 64-17-5	RTECS#: KQ6300000	IDLH: 3300 ppm [10%LEL]
Conversion: 1 ppm = 1.89 mg/m ³		DOT: 1170 127			
Synonyms/Trade Names: Alcohol, Cologne spirit, Ethanol, EtOH, Grain alcohol					
Exposure Limits: NIOSH REL: TWA 1000 ppm (1900 mg/m ³) OSHA PEL: TWA 1000 ppm (1900 mg/m ³)				Measurement Methods (see Table 1): NIOSH 1400 OSHA 100	
Physical Description: Clear, colorless liquid with a weak, ethereal, vinous odor.					
Chemical & Physical Properties: MW: 46.1 BP: 173°F Sol: Miscible Fl.P: 55°F IP: 10.47 eV Sp.Gr: 0.79 VP: 44 mmHg FRZ: -173°F UEL: 19% LEL: 3.3% Class IB Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R.		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 3300 ppm: Sa/ScbaF §: ScbaF: Pd, Pp/ SaF: Pd, Pp: AScba Escape: ScbaE	
Incompatibilities and Reactivities: Strong oxidizers, potassium dioxide, bromine pentafluoride, acetyl bromide, acetyl chloride, platinum, sodium					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, nose; head, drow, lass, narco; cough; liver damage; anemia; repro, terato effects TO: Eyes, skin, resp sys, CNS, liver, blood, repro sys			First Aid (see Table 6): Eye: Irr immed Skin: Water flush prompt Breath: Fresh air Swallow: Medical attention immed		

Ethyl bromide		Formula: CH ₃ CH ₂ Br	CAS#: 74-96-4	RTECS#: KH6475000	IDLH: 2000 ppm
Conversion: 1 ppm = 4.46 mg/m ³		DOT: 1891 131			
Synonyms/Trade Names: Bromoethane, Monobromoethane					
Exposure Limits: NIOSH REL: See Appendix D OSHA PEL†: TWA 200 ppm (890 mg/m ³)				Measurement Methods (see Table 1): NIOSH 1011 OSHA 7	
Physical Description: Colorless to yellow liquid with an ether-like odor. [Note: A gas above 101°F.]					
Chemical & Physical Properties: MW: 109.0 BP: 101°F Sol: 0.9% Fl.P: <4°F IP: 10.29 eV Sp.Gr: 1.46 VP: 375 mmHg FRZ: -182°F UEL: 8.0% LEL: 6.8% Class IB Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R.		Respirator Recommendations (see Tables 3 and 4): OSHA 2000 ppm: Sa/ScbaF §: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Chemically-active metals such as sodium, potassium, calcium, powdered aluminum, zinc & magnesium					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, resp sys; CNS depres; pulm edema; liver, kidney disease; card arrhy, card arrest TO: Eyes, skin, resp sys, liver, kidneys, CVS, CNS			First Aid (see Table 6): Eye: Irr immed Skin: Soap flush prompt Breath: Resp support Swallow: Medical attention immed		

Ethyl butyl ketone		Formula: CH ₃ CH ₂ CO[CH ₂] ₃ CH ₃	CAS#: 106-35-4	RTECS#: MJ5250000	IDLH: 1000 ppm
Conversion: 1 ppm = 4.67 mg/m ³		DOT: 1224 127			
Synonyms/Trade Names: Butyl ethyl ketone, 3-Heptanone					
Exposure Limits: NIOSH REL: TWA 50 ppm (230 mg/m ³) OSHA PEL: TWA 50 ppm (230 mg/m ³)				Measurement Methods (see Table 1): NIOSH 1301, 2553 OSHA 7	
Physical Description: Colorless liquid with a powerful, fruity odor.					
Chemical & Physical Properties: MW: 114.2 BP: 298°F Sol: 1% FLP(oc): 115°F IP: 9.02 eV Sp.Gr: 0.82 VP: 4 mmHg FRZ: -38°F UEL: ? LEL: ? Incompatibilities and Reactivities: Strong oxidizers & caustics; chemically-active metals such as magnesium or aluminum powder, sodium & potassium; liquid ammonia [Note: Decomposes to vinyl chloride & HCl above 1112°F.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Abs, Con SY: Irrit eyes, corn opac; CNS depres; nau, vomit; dermat; liver, kidney, CVS damage; [carc] TO: Eyes, skin, kidneys, liver, CNS, CVS [in animals: forestomach, mammary gland & circulatory sys cancer]			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash prompt Breath: Resp support Swallow: Medical attention immed	

Ethylene glycol	Formula: HOCH ₂ CH ₂ OH	CAS#: 107-21-1	RTECS#: KW2975000	IDLH: N.D.
Conversion:	DOT:			
Synonyms/Trade Names: 1,2-Dihydroxyethane; 1,2-Ethanediol; Glycol; Glycol alcohol; Monoethylene glycol				
Exposure Limits: NIOSH REL: See Appendix D OSHA PEL†: none			Measurement Methods (see Table 1): NIOSH 5523 OSHA PV2024	
Physical Description: Clear, colorless, syrupy, odorless liquid. [antifreeze] [Note: A solid below 9°F.]				
Chemical & Physical Properties: MW: 62.1 BP: 388°F Sol: Miscible F.L.P: 232°F IP: ? Sp.Gr: 1.11 VP: 0.06 mmHg FRZ: 9°F UEL: 15.3% LEL: 3.2% Class IIIB Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily		Respirator Recommendations (see Tables 3 and 4): Not available.
		Incompatibilities and Reactivities: Strong oxidizers, chromium trioxide, potassium permanganate, sodium peroxide [Note: Hygroscopic (i.e., absorbs moisture from the air).]		
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, nose, throat; nau, vomit, abdom pain, lass; dizz, stupor, convuls, CNS depres; skin sens TO: Eyes, skin, resp sys, CNS			First Aid (see Table 6): Eye: Irr immed Skin: Water wash immed Breath: Resp support Swallow: Medical attention immed	

Ethylene glycol dinitrate		Formula: O ₂ NOCH ₂ CH ₂ ONO ₂	CAS#: 628-96-6	RTECS#: KW5600000	IDLH: 75 mg/m ³
Conversion: 1 ppm = 6.22 mg/m ³		DOT:			
Synonyms/Trade Names: EGDN; 1,2-Ethanediol dinitrate; Ethylene dinitrate; Ethylene nitrate; Glycol dinitrate; Nitroglycol					
Exposure Limits: NIOSH REL: ST 0.1 mg/m ³ [skin] OSHA PEL†: C 0.2 ppm (1 mg/m ³) [skin]				Measurement Methods (see Table 1): NIOSH 2507 OSHA 43	
Physical Description: Colorless to yellow, oily, odorless liquid. [Note: An explosive ingredient (60-80%) in dynamite along with nitroglycerine (40-20%).]					
Chemical & Physical Properties: MW: 152.1 BP: 387°F Sol: Insoluble F.P.: 419°F IP: ? Sp.Gr: 1.49 VP: 0.05 mmHg FRZ: -8°F UEL: ? LEL: ? Explosive Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: Daily Provide: Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH 1 mg/m³: Sa* 2.5 mg/m³: Sa:Cf* 5 mg/m³: Sa:T:Cf*/ScbaF/SaF 75 mg/m³: Sa:F: Pd,Pp §: ScbaF: Pd,Pp/SaF: Pd,Pp: AScba Escape: GmFOv100/ScbaE	
Incompatibilities and Reactivities: Acids, alkalis					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Throb head; dizz; nau, vomit, abdom pain; hypotension, flush, palp, angina; methemo; delirium, CNS depres; irrit skin; in animals: anemia; liver, kidney damage TO: Skin, CVS, blood, liver, kidneys				First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed	

Ethyleneimine		Formula: C ₂ H ₅ N	CAS#: 151-56-4	RTECS#: KX5075000	IDLH: Ca [100 ppm]
Conversion: 1 ppm = 1.76 mg/m ³		DOT: 1185 131P (inhibited)			
Synonyms/Trade Names: Aminoethylene, Azirane, Aziridine, Dimethyleneimine, Dimethylenimine, Ethylenimine, Ethylimine					
Exposure Limits: NIOSH REL: Ca See Appendix A OSHA PEL: [1910.1012] See Appendix B				Measurement Methods (see Table 1): NIOSH 3514	
Physical Description: Colorless liquid with an ammonia-like odor. [Note: Usually contains inhibitors to prevent polymerization.]					
Chemical & Physical Properties: MW: 43.1 BP: 133°F Sol: Miscible F.L.P: 12°F IP: 9.20 eV Sp.Gr: 0.83 VP: 160 mmHg FRZ: -97°F UEL: 54.8% LEL: 3.3% Class IB Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam/Daily Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH ¥: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFOv/ScbaE See Appendix E (page 351)	
		Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, nose, throat; nau, vomit; head, dizz; pulm edema; liver, kidney damage; eye burns; skin sens; [carc] TO: Eyes, skin, resp sys, liver, kidneys [in animals: lung & liver tumors]		First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed	

Ethylene oxide	Formula: C ₂ H ₄ O	CAS#: 75-21-8	RTECS#: KX2450000	IDLH: Ca [800 ppm]
Conversion: 1 ppm = 1.80 mg/m ³		DOT: 1040 119P		
Synonyms/Trade Names: Dimethylene oxide; 1,2-Epoxy ethane; Oxirane				
Exposure Limits: NIOSH REL: Ca TWA <0.1 ppm (0.18 mg/m ³) C 5 ppm (9 mg/m ³) [10-min/day] See Appendix A OSHA PEL: [1910.1047] TWA 1 ppm 5 ppm [15-minute Excursion]			Measurement Methods (see Table 1): NIOSH 1614, 3800 OSHA 30, 49, 50	
Physical Description: Colorless gas or liquid (below 51°F) with an ether-like odor.				
Chemical & Physical Properties: MW: 44.1 BP: 51°F Sol: Miscible Fl.P: NA (Gas) -20°F (Liquid) IP: 10.56 eV RGasD: 1.49 Sp.Gr: 0.82 (Liquid at 50°F) VP: 1.46 atm FRZ: -171°F UEL: 100% LEL: 3.0% Flammable Gas		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact (liquid) Eyes: Prevent eye contact (liquid) Wash skin: When contam (liquid) Remove: When wet (flamm) Change: N.R. Provide: Quick drench (liquid)		Respirator Recommendations (see Tables 3 and 4): NIOSH 5 ppm: GmFS†/ScbaF/SaF §: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFS†/ScbaE See Appendix E (page 351)
Incompatibilities and Reactivities: Strong acids, alkalis & oxidizers; chlorides of iron, aluminum & tin; oxides of iron & aluminum; water				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, (liquid), Con SY: Irrit eyes, skin, nose, throat; peculiar taste; head; nau, vomit, diarr; dysp, cyan, pulm edema; drow, lass, inco; EKG abnor; eye, skin burns (liq or high vap conc); liquid: frostbite; repro effects; [carc]; in animals: convuls; liver, kidney damage TO: Eyes, skin, resp sys, liver, CNS, blood, kidneys, repro sys [peritoneal cancer, leukemia]				First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed (liquid)

Ethylene thiourea	Formula: C ₃ H ₆ N ₂ S	CAS#: 96-45-7	RTECS#: NI9625000	IDLH: Ca [N.D.]
Conversion:		DOT:		
Synonyms/Trade Names: 1,3-Ethylene-2-thiourea; N,N-Ethylenethiourea; ETU; 2-Imidazolidine-2-thione				
Exposure Limits: NIOSH REL: Ca Use encapsulated form. See Appendix A OSHA PEL: none				Measurement Methods (see Table 1): NIOSH 5011 OSHA 95
Physical Description: White to pale-green, crystalline solid with a faint, amine odor. [Note: Used as an accelerator in the curing of polychloroprene & other elastomers.]				
Chemical & Physical Properties: MW: 102.2 BP: 446-595°F Sol(86°F): 2% Fl.P: 486°F IP: 8.15 eV Sp.Gr: ? VP: 16 mmHg MLT: 392°F UEL: ? LEL: ? Combustible Solid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam/Daily Remove: When wet or contam Change: Daily		Respirator Recommendations (see Tables 3 and 4): NIOSH §: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFOv100/ScbaE
Incompatibilities and Reactivities: Acrolein				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes; in animals: thickening of the skin; goiter; terato effects; [carc] TO: Eyes, skin, thyroid, repro sys [in animals: liver, thyroid & lymphatic sys tumors]				First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed

Ethyl ether		Formula: C ₂ H ₅ OC ₂ H ₅	CAS#: 60-29-7	RTECS#: KI5775000	IDLH: 1900 ppm [10%LEL]
Conversion: 1 ppm = 3.03 mg/m ³		DOT: 1155 127			
Synonyms/Trade Names: Diethyl ether, Diethyl oxide, Ethyl oxide, Ether, Solvent ether					
Exposure Limits: NIOSH REL: See Appendix D OSHA PEL†: TWA 400 ppm (1200 mg/m ³)				Measurement Methods (see Table 1): NIOSH 1610 OSHA 7	
Physical Description: Colorless liquid with a pungent, sweetish odor. [Note: A gas above 94°F.]					
Chemical & Physical Properties: MW: 74.1 BP: 94°F Sol: 8% F.I.P.: -49°F IP: 9.53 eV Sp.Gr: 0.71 VP: 440 mmHg FRZ: -177°F UEL: 36.0% LEL: 1.9% Class IA Flammable Liquid	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: N.R. Remove: When wet (flamm) Change: N.R.		Respirator Recommendations (see Tables 3 and 4): OSHA 1900 ppm: CcrOv*/GmFOv/PapRov*/ Sa*/ScbaF §: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFOv/ScbaE		
Incompatibilities and Reactivities: Strong oxidizers, halogens, sulfur, sulfur compounds [Note: Tends to form explosive peroxides under influence of air and light.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, upper resp sys; dizz, drow, head, excited, narco; nau, vomit TO: Eyes, skin, resp sys, CNS			First Aid (see Table 6): Eye: Irr immed Skin: Water wash prompt Breath: Resp support Swallow: Medical attention immed		

Ethyl formate		Formula: CH ₃ CH ₂ OCHO	CAS#: 109-94-4	RTECS#: LQ8400000	IDLH: 1500 ppm
Conversion: 1 ppm = 3.03 mg/m ³		DOT: 1190 129			
Synonyms/Trade Names: Ethyl ester of formic acid, Ethyl methanoate					
Exposure Limits: NIOSH REL: TWA 100 ppm (300 mg/m ³) OSHA PEL: TWA 100 ppm (300 mg/m ³)				Measurement Methods (see Table 1): NIOSH 1452 OSHA 7	
Physical Description: Colorless liquid with a fruity odor.					
Chemical & Physical Properties: MW: 74.1 BP: 130°F Sol(64°F): 9% F.I.P.: -4°F IP: 10.61 eV Sp.Gr: 0.92 VP: 200 mmHg FRZ: -113°F UEL: 16.0% LEL: 2.8% Class IB Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R.		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 1500 ppm: Sa:CfE/PapRovE/CcrFOv/GmFOv/ScbaF/SaF §: ScbaF: Pd,Pp/SaF: Pd,Pp:AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Nitrates; strong oxidizers, alkalis & acids [Note: Decomposes slowly in water to form ethyl alcohol and formic acid.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, upper resp sys; in animals: narco TO: Eyes, resp sys, CNS			First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed		

Ethylidene norbornene		Formula: C ₉ H ₁₂	CAS#: 16219-75-3	RTECS#: RB9450000	IDLH: N.D.
Conversion: 1 ppm = 4.92 mg/m ³		DOT:			
Synonyms/Trade Names: ENB, 5-Ethylidenebicyclo(2.2.1)hept-2-ene, 5-Ethylidene-2-norbornene [Note: Due to its reactivity, ENB may be stabilized with tert-butyl catechol.]					
Exposure Limits: NIOSH REL: C 5 ppm (25 mg/m ³) OSHA PEL†: none				Measurement Methods (see Table 1): None available	
Physical Description: Colorless to white liquid with a turpentine-like odor.					
Chemical & Physical Properties: MW: 120.2 BP: 298°F Sol: ? F.P(oc): 101°F IP: ? Sp.Gr: 0.90 VP: 4 mmHg FRZ: -112°F UEL: ? LEL: ? Class II Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: Daily Remove: When wet or contam Change: N.R.		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Oxygen [Note: ENB should be stored in a nitrogen atmosphere since it reacts with oxygen.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, nose, throat; head; cough, dysp; nau, vomit; olfactory, taste changes; chemical pneu (aspir liquid); in animals: liver, kidney, urogenital inj; bone marrow effects TO: Eyes, skin, resp sys, CNS, liver, kidneys, urogenital system, bone marrow			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed		

E

Ethyl mercaptan		Formula: CH ₃ CH ₂ SH	CAS#: 75-08-1	RTECS#: KI9625000	IDLH: 500 ppm
Conversion: 1 ppm = 2.54 mg/m ³		DOT: 2363 129			
Synonyms/Trade Names: Ethanethiol, Ethyl sulfhydrylate, Mercaptoethane					
Exposure Limits: NIOSH REL: C 0.5 ppm (1.3 mg/m ³) [15-minute] OSHA PEL†: C 10 ppm (25 mg/m ³)				Measurement Methods (see Table 1): NIOSH 2542	
Physical Description: Colorless liquid with a strong, skunk-like odor. [Note: A gas above 95°F.]					
Chemical & Physical Properties: MW: 62.1 BP: 95°F Sol: 0.7% Fl.P: -55°F IP: 9.29 eV Sp.Gr: 0.84 VP: 442 mmHg FRZ: -228°F UEL: 18.0% LEL: 2.8% Class IA Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R.		Respirator Recommendations (see Tables 3 and 4): NIOSH 5 ppm: CcrOv/Sa 12.5 ppm: Sa:Cf/PapOv 25 ppm: CcrFOv/GmFOv/SaT:Cf/PapTOv/ ScbaF/SaF 500 ppm: Sa:Pd,Pp §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers [Note: Reacts violently with calcium hypochlorite.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit muc memb; head, nau; in animals: inco, lass; liver, kidney damage; cyan; narco TO: Eyes, resp sys, liver, kidneys, blood			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed		

N-Ethylmorpholine		Formula: C ₄ H ₉ ONCH ₂ CH ₃	CAS#: 100-74-3	RTECS#: QE4025000	IDLH: 100 ppm
Conversion: 1 ppm = 4.71 mg/m ³		DOT:			
Synonyms/Trade Names: 4-Ethylmorpholine					
Exposure Limits: NIOSH REL: TWA 5 ppm (23 mg/m ³) [skin] OSHA PEL†: TWA 20 ppm (94 mg/m ³) [skin]				Measurement Methods (see Table 1): NIOSH S146 (II-3)	
Physical Description: Colorless liquid with an ammonia-like odor.					
Chemical & Physical Properties: MW: 115.2 BP: 281°F Sol: Miscible FLP(oc): 90°F IP: ? Sp.Gr: 0.90 VP: 6 mmHg FRZ: -81°F UEL: ? LEL: ? Class IC Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R. Provide: Eyewash (>15%) Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH 50 ppm: CcrOv*/Sa* 100 ppm: Sa:Cf*/PaprOv*/CcrFOv/ GmFOv/ScbaF/SaF §: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Strong acids, strong oxidizers					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, nose, throat; vis dist: corn edema, blue-gray vision, colored haloes TO: Eyes, resp sys				First Aid (see Table 6): Eye: Irr immed Skin: Water flush prompt Breath: Resp support Swallow: Medical attention immed	

Ethyl silicate		Formula: (C ₂ H ₅) ₂ SiO ₄	CAS#: 78-10-4	RTECS#: VV9450000	IDLH: 700 ppm
Conversion: 1 ppm = 8.52 mg/m ³		DOT: 1292 129			
Synonyms/Trade Names: Ethyl orthosilicate, Ethyl silicate (condensed), Tetraethoxysilane, Tetraethyl orthosilicate, Tetraethyl silicate					
Exposure Limits: NIOSH REL: TWA 10 ppm (85 mg/m ³) OSHA PEL†: TWA 100 ppm (850 mg/m ³)				Measurement Methods (see Table 1): NIOSH S264 (II-3)	
Physical Description: Colorless liquid with a sharp, alcohol-like odor.					
Chemical & Physical Properties: MW: 208.3 BP: 336°F Sol: Reacts Fl.P: 99°F IP: 9.77 eV Sp.Gr: 0.93 VP: 1 mmHg FRZ: -117°F UEL: ? LEL: ? Class IC Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R. Incompatibilities and Reactivities: Traces of alkalis (promote violent polymerization)					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, resp sys; head, dizz, lass, conf, convuls; dysp; abdom pain, nau, vomit TO: Eyes, skin, resp sys, CNS, CVS			First Aid (see Table 6): Eye: Irr immed Skin: Water wash immed Breath: Resp support Swallow: Medical attention immed		

Grain dust (oat, wheat, barley)	Formula:	CAS#:	RTECS#: MD7900000	IDLH: N.D.
Conversion:	DOT:			
Synonyms/Trade Names: None [Note: Grain dust consists of 60-75% organic materials (cereal grains) & 25-40% inorganic materials (soil), and includes fertilizers, pesticides & microorganisms.]				
Exposure Limits: NIOSH REL: TWA 4 mg/m ³ OSHA PEL: TWA 10 mg/m ³			Measurement Methods (see Table 1): NIOSH 0500	
Physical Description: Mixture of grain and all the other substances associated with its cultivation & harvesting.				
Chemical & Physical Properties: Properties depend upon the specific component of the grain dust.	Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: N.R. Remove: N.R. Change: Daily		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: None reported				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Irrit eyes, skin, upper resp sys; cough, dysp, wheez, asthma, bron, chronic obstructive pulm disease; conj, derm, rhinitis, grain fever TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Breath: Fresh air	

Graphite (natural)		Formula: C	CAS#: 7782-42-5	RTECS#: MD9659600	IDLH: 1250 mg/m ³
Conversion:		DOT:			
Synonyms/Trade Names: Black lead, Mineral carbon, Plumbago, Silver graphite, Stove black [Note: Also see specific listing for Graphite (synthetic).]					
Exposure Limits: NIOSH REL: TWA 2.5 mg/m ³ (resp) OSHA PEL: TWA 15 mppcf				Measurement Methods (see Table 1): NIOSH 0500, 0600	
Physical Description: Steel gray to black, greasy feeling, odorless solid.					
Chemical & Physical Properties: MW: 12.0 BP: Sublimes Sol: Insoluble Fl.P: NA IP: NA Sp.Gr: 2.0-2.25 VP: 0 mmHg (approx) MLT: 6602°F (Sublimes) UEL: NA LEL: NA Combustible Solid		Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: N.R. Remove: N.R. Change: N.R.		Respirator Recommendations (see Tables 3 and 4): NIOSH 12.5 mg/m³: Qm 25 mg/m³: 95XQ/Sa 62.5 mg/m³: PaprHie/Sa:Cf 125 mg/m³: 100F/PaprTHie/SaT:Cf/ScbaF/SaF 1250 mg/m³: SaF:Pd,Pp §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: 100F/ScbaE	
Incompatibilities and Reactivities: Very strong oxidizers such as fluorine, chlorine trifluoride & potassium peroxide					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Cough, dysp, black sputum, decr pulm func, lung fib TO: Resp sys, CVS				First Aid (see Table 6): Eye: Irr immed Breath: Fresh air	

Graphite (synthetic)	Formula: C	CAS#: 7440-44-0 (synthetic)	RTECS#: FF5250100 (synthetic)	IDLH: N.D.
Conversion:	DOT:			
Synonyms/Trade Names: Acheson graphite, Artificial graphite [Note: Also see specific listing for Graphite (natural).]				
Exposure Limits: NIOSH REL: See Appendix D OSHA PEL†: TWA 15 mg/m³ (total) TWA 5 mg/m³ (resp)			Measurement Methods (see Table 1): NIOSH 0500, 0600	
Physical Description: Steel gray to black, greasy feeling, odorless solid.				
Chemical & Physical Properties: MW: 12.0 BP: Sublimes Sol: Insoluble Fl.P: NA IP: NA Sp.Gr: 1.5-1.8 VP: 0 mmHg (approx) MLT: 6602°F (Sublimes) UEL: NA LEL: NA Combustible Solid		Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: N.R. Remove: N.R. Change: N.R.		Respirator Recommendations (see Tables 3 and 4): Not available.
Incompatibilities and Reactivities: Very strong oxidizers such as fluorine, chlorine trifluoride & potassium peroxide				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Cough, dysp, black sputum, decr pulm func, lung fib TO: Resp sys, CVS			First Aid (see Table 6): Eye: Irr immed Breath: Fresh air	

G

Gypsum	Formula: CaSO ₄ ×2H ₂ O	CAS#: 13397-24-5	RTECS#: MG2360000	IDLH: N.D.
Conversion:	DOT:			
Synonyms/Trade Names: Calcium(II) sulfate dihydrate, Gypsum stone, Hydrated calcium sulfate, Mineral white [Note: Gypsum is the dihydrate form of calcium sulfate; Plaster of Paris is the hemihydrate form.]				
Exposure Limits: NIOSH REL: TWA 10 mg/m ³ (total) TWA 5 mg/m ³ (resp) OSHA PEL: TWA 15 mg/m ³ (total) TWA 5 mg/m ³ (resp)			Measurement Methods (see Table 1): NIOSH 0500, 0600	
Physical Description: White or nearly white, odorless, crystalline solid.				
Chemical & Physical Properties: MW: 172.2 BP: ? Sol(77°F): 0.2% Fl.P: NA IP: NA Sp.Gr: 2.32 VP: 0 mmHg (approx) MLT: 262-325°F (Loses H ₂ O) UEL: NA LEL: NA Noncombustible Solid		Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: N.R. Remove: N.R. Change: N.R.		Respirator Recommendations (see Tables 3 and 4): Not available.
Incompatibilities and Reactivities: Aluminum (at high temperatures), diazomethane				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Irrit eyes, skin, muc memb, upper resp sys; cough, sneez, rhin TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Breath: Fresh air	

Hafnium	Formula: Hf	CAS#: 7440-58-6	RTECS#: MG4600000	IDLH: 50 mg/m³ (as Hf)
Conversion:	DOT: 1326 170 (powder, wet); 2545 135 (powder, dry)			
Synonyms/Trade Names: Celfium, Elemental hafnium, Hafnium metal				
Exposure Limits: NIOSH REL*: TWA 0.5 mg/m³ OSHA PEL*: TWA 0.5 mg/m³ [*Note: The REL and PEL also apply to other hafnium compounds (as Hf).]			Measurement Methods (see Table 1): NIOSH S194 (II-5) OSHA ID121	
Physical Description: Highly lustrous, ductile, grayish solid.				
Chemical & Physical Properties: MW: 178.5 BP: 8316°F Sol: Insoluble F.I.P: NA IP: NA Sp.Gr: 13.31 VP: 0 mmHg (approx) MLT: 4041°F UEL: NA LEL: NA Explosive in powder form (either dry or with <25% water); finely divided powder can be ignited by static electricity or even SPONTANEOUSLY.		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam/Daily Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 2.5 mg/m³: Qm 5 mg/m³: 95XQ/Sa 12.5 mg/m³: Sa:C*/Pap/Hie* 25 mg/m³: 100F/SaT:C*/PapTHie*/ ScaBf/SaF 50 mg/m³: SaF:Pd,Pp S: ScaBf:Pd,Pp/SaF:Pd,Pp:AScBa Escape: 100F/ScaBfE
Incompatibilities and Reactivities: Strong oxidizers, chlorine				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: In animals: irrit eyes, skin, muc memb; liver damage TO: Eyes, skin, muc memb, liver			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash prompt Breath: Resp support Swallow: Medical attention immed	

Halothane	Formula: CF ₃ CHBrCl	CAS#: 151-67-7	RTECS#: KH6550000	IDLH: N.D.
Conversion: 1 ppm = 8.07 mg/m ³		DOT:		
Synonyms/Trade Names: 1-Bromo-1-chloro-2,2,2-trifluoroethane; 2-Bromo-2-chloro-1,1,1-trifluoroethane; 1,1,1-Trifluoro-2-bromo-2-chloroethane; 2,2,2-Trifluoro-1-bromo-1-chloroethane				
Exposure Limits: NIOSH REL*: C 2 ppm (16.2 mg/m ³) [60-minute] [*Note: REL for exposure to waste anesthetic gas.] OSHA PEL: none			Measurement Methods (see Table 1): OSHA 29	
Physical Description: Clear, colorless liquid with a sweetish, pleasant odor. [inhalation anesthetic]				
Chemical & Physical Properties: MW: 197.4 BP: 122°F Sol: 0.3% F.I.P: NA IP: ? Sp.Gr: 1.87 VP: 243 mmHg FRZ: -180°F UEL: NA LEL: NA Noncombustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Provide: Eyewash		Respirator Recommendations (see Tables 3 and 4): Not available.
Incompatibilities and Reactivities: May attack rubber & some plastics; sensitive to light. [Note: Light causes decomposition. May be stabilized with 0.01% thymol.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, resp sys; conf, drow, dizz, nau, analgesia, anes; card arrhy; liver, kidney damage; decr audio-visual performance; in animals: repro effects TO: Eyes, skin, resp sys, CVS, CNS, liver, kidneys, repro sys			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash prompt Breath: Resp support Swallow: Medical attention immed	

Heptachlor		Formula: C ₁₀ H ₅ Cl ₇	CAS#: 76-44-8	RTECS#: PC0700000	IDLH: Ca [35 mg/m ³]
Conversion:		DOT: 2761 151 (organochlorine pesticide, solid)			
Synonyms/Trade Names: 1,4,5,6,7,8,8-Heptachloro-3a,4,7,7a-tetrahydro-4,7-methanoindene					
Exposure Limits: NIOSH REL: Ca TWA 0.5 mg/m ³ [skin] See Appendix A OSHA PEL: TWA 0.5 mg/m ³ [skin]				Measurement Methods (see Table 1): NIOSH S287 (II-5) OSHA PV2029	
Physical Description: White to light-tan crystals with a camphor-like odor. [insecticide]					
Chemical & Physical Properties: MW: 373.4 BP: 293°F (Decomposes) Sol: 0.0006% Fl.P: NA IP: ? Sp.Gr: 1.66 VP(77°F): 0.0003 mmHg MLT: 203°F UEL: NA LEL: NA Noncombustible Solid, but may be dissolved in flammable liquids. Incompatibilities and Reactivities: Nitrates; strong oxidizers, alkalis & acids					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, nose, throat; head; in animals: narco TO: Eyes, skin, resp sys, CNS			First Aid (see Table 6): Eye: Irr immed Skin: Water flush prompt Breath: Resp support Swallow: Medical attention immed		

H

Hexylene glycol	Formula: (CH ₃) ₂ COHCH ₂ CHOHCH ₃	CAS#: 107-41-5	RTECS#: SA0810000	IDLH: N.D.
Conversion: 1 ppm = 4.83 mg/m ³	DOT:			
Synonyms/Trade Names: 2,4-Dihydroxy-2-methylpentane; 2-Methyl-2,4-pentanediol; 4-Methyl-2,4-pentanediol; 2-Methylpentane-2,4-diol				
Exposure Limits: NIOSH REL: C 25 ppm (125 mg/m ³) OSHA PEL†: none			Measurement Methods (see Table 1): OSHA PV2101	
Physical Description: Colorless liquid with a mild, sweetish odor.				
Chemical & Physical Properties: MW: 118.2 BP: 388°F Sol: Miscible Fl.P: 209°F IP: ? Sp.Gr: 0.92 VP: 0.05 mmHg FRZ: -58°F (Sets to glass) UEL(est): 7.4% LEL(calc): 1.3% Class IIIB Combustible Liquid	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Provide: Eyewash		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Strong oxidizers, strong acids [Note: Hygroscopic (i.e., absorbs moisture from the air).]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, resp sys; head, dizz, nau, inco, CNS depres; derm, skin sens TO: Eyes, skin, resp sys, CNS			First Aid (see Table 6): Eye: Irr immed Skin: Water wash immed Breath: Resp support Swallow: Medical attention immed	

Hydrazine	Formula: H ₂ NNH ₂	CAS#: 302-01-2	RTECS#: MU7175000	IDLH: Ca [50 ppm]
Conversion: 1 ppm = 1.31 mg/m ³		DOT: 2029 132 (anhydrous); 3293 152 (≤ 37% solution); 2030 153 (37-64% solution); 2029 132 (>64% solution)		
Synonyms/Trade Names: Diamine, Hydrazine (anhydrous), Hydrazine base				
Exposure Limits: NIOSH REL: Ca C 0.03 ppm (0.04 mg/m ³) [2-hour] See Appendix A OSHA PEL†: TWA 1 ppm (1.3 mg/m ³) [skin]			Measurement Methods (see Table 1): NIOSH 3503 OSHA 20, 108	
Physical Description: Colorless, fuming, oily liquid with an ammonia-like odor. [Note: A solid below 36°F.]				
Chemical & Physical Properties: MW: 32.1 BP: 236°F Sol: Miscible F.I.P: 99°F IP: 8.93 eV Sp.Gr: 1.01 VP: 10 mmHg FRZ: 36°F UEL: 98% LEL: 2.9% Class IC Flammable Liquid	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R. Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH ✱: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: ScbaE	
Incompatibilities and Reactivities: Oxidizers, hydrogen peroxide, nitric acid, metallic oxides, acids [Note: Can ignite SPONTANEOUSLY on contact with oxidizers or porous materials such as earth, wood & cloth.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, nose, throat; temporary blindness; dizz, nau; derm; eye, skin burns; in animals: bron, pulm edema; liver, kidney damage; convuls; [carc] TO: Eyes, skin, resp sys, CNS, liver, kidneys [in animals: tumors of the lungs, liver, blood vessels & intestine]			First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed	

Hydrogenated terphenyls		Formula: (C ₆ H ₉) ₃	CAS#: 61788-32-7	RTECS#: WZ6535000	IDLH: N.D.
Conversion: 1 ppm = 12.19 mg/m ³ (40% hydrogenated)			DOT:		
Synonyms/Trade Names: Hydrogenated diphenylbenzenes, Hydrogenated phenylbiphenyls, Hydrogenated triphenyls [Note: Complex mixture of terphenyl isomers that are partially hydrogenated.]					
Exposure Limits: NIOSH REL: TWA 0.5 ppm (5 mg/m ³) OSHA PEL†: none				Measurement Methods (see Table 1): None available	
Physical Description: Clear, oily, pale-yellow liquids with a faint odor. [plasticizer/heat-transfer media]					
Chemical & Physical Properties: MW: 298 (40% hydrogenated) BP: 644°F (40% hydrogenated) Sol: Insoluble F.I.P.: 315°F (40% hydrogenated) IP: ? Sp.Gr(77°F): 1.003-1.009 (40% hydrogenated) VP: ? FRZ: ? UEL: ? LEL: ? Class IIIB Combustible Liquids			Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily		Respirator Recommendations (see Tables 3 and 4): Not available.
Incompatibilities and Reactivities: None reported [Note: When heated, irritating vapors will be released.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, resp sys; liver, kidney, hemato damage TO: Eyes, skin, resp sys, liver, kidneys, hemato sys			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed		

Hydrogen bromide		Formula: HBr	CAS#: 10035-10-6	RTECS#: MW3850000	IDLH: 30 ppm
Conversion: 1 ppm = 3.31 mg/m ³		DOT: 1048 125 (anhydrous); 1788 154 (solution)			
Synonyms/Trade Names: Anhydrous hydrogen bromide; Aqueous hydrogen bromide (i.e., Hydrobromic acid)					
Exposure Limits: NIOSH REL: C 3 ppm (10 mg/m ³) OSHA PEL†: TWA 3 ppm (10 mg/m ³)				Measurement Methods (see Table 1): NIOSH 7903 OSHA ID165SG	
Physical Description: Colorless gas with a sharp, irritating odor. [Note: Shipped as a liquefied compressed gas. Often used in an aqueous solution.]					
Chemical & Physical Properties: MW: 80.9 BP: -88°F Sol: 49% Fl.P: NA IP: 11.62 eV RGasD: 2.81 VP: 20 atm FRZ: -124°F UEL: NA LEL: NA Nonflammable Gas		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact (solution)/Frostbite Eyes: Prevent eye contact (solution)/Frostbite Wash skin: When contam (solution) Remove: When wet or contam (solution) Change: N.R. Provide: Eyewash (liquid) Quick drench (solution) Frostbite wash		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 30 ppm: Sa:CfE/PaprAgE/GmFag/ ScaF/SaF §: ScaF:Pd,Pp/SaF:Pd,Pp:AScBa Escape: GmFag/ScaFE	
Incompatibilities and Reactivities: Strong oxidizers, strong caustics, moisture, copper, brass, zinc [Note: Hydrobromic acid is highly corrosive to most metals.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing (solution), Con SY: Irrit eyes, skin, nose, throat; solution: eye, skin burns; liquid: frostbite TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed (solution)/Frostbite Skin: Water flush immed (solution)/Frostbite Breath: Resp support Swallow: Medical attention immed (solution)		

H

Hydrogen chloride		Formula: HCl	CAS#: 7647-01-0	RTECS#: MW4025000	IDLH: 50 ppm
Conversion: 1 ppm = 1.49 mg/m ³		DOT: 1050 125 (anhydrous); 1789 157 (solution)			
Synonyms/Trade Names: Anhydrous hydrogen chloride; Aqueous hydrogen chloride (i.e., Hydrochloric acid, Muriatic acid) [Note: Often used in an aqueous solution.]					
Exposure Limits: NIOSH REL: C 5 ppm (7 mg/m ³) OSHA PEL: C 5 ppm (7 mg/m ³)				Measurement Methods (see Table 1): NIOSH 7903 OSHA ID174SG	
Physical Description: Colorless to slightly yellow gas with a pungent, irritating odor. [Note: Shipped as a liquefied compressed gas.]					
Chemical & Physical Properties: MW: 36.5 BP: -121°F Sol(86°F): 67% Fl.P: NA IP: 12.74 eV RGasD: 1.27 VP: 40.5 atm FRZ: -174°F UEL: NA LEL: NA Nonflammable Gas		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact (solution)/Frostbite Eyes: Prevent eye contact/Frostbite Wash skin: When contam (solution) Remove: When wet or contam (solution) Change: N.R. Incompatibilities and Reactivities: Oxidizable materials, iron, copper, brass, bronze, chromium, zinc, lead, silver, manganese [Note: Contact with combustible material may result in SPONTANEOUS combustion.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, nose, throat; corn ulcer; eryt, vesic skin; bleaching hair TO: Eyes, skin, resp sys				First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed	

H

Hydrogen selenide		Formula: H ₂ Se	CAS#: 7783-07-5	RTECS#: MX1050000	IDLH: 1 ppm
Conversion: 1 ppm = 3.31 mg/m ³		DOT: 2202 117 (anhydrous)			
Synonyms/Trade Names: Selenium dihydride, Selenium hydride					
Exposure Limits: NIOSH REL: TWA 0.05 ppm (0.2 mg/m ³) OSHA PEL: TWA 0.05 ppm (0.2 mg/m ³)				Measurement Methods (see Table 1): None available	
Physical Description: Colorless gas with an odor resembling decayed horseradish. [Note: Shipped as a liquefied compressed gas.]					
Chemical & Physical Properties: MW: 81.0 BP: -42°F Sol(73°F): 0.9% F.L.P: NA (Gas) IP: 9.88 eV RGasD: 2.80 VP(70°F): 9.5 atm FRZ: -87°F UEL: ? LEL: ? Flammable Gas		Personal Protection/Sanitation (see Table 2): Skin: Frostbite Eyes: Frostbite Wash skin: N.R. Remove: When wet (flamm) Change: N.R. Provide: Frostbite wash		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 0.5 ppm: Sa 1 ppm: Sa:C*/ScbaF/SaF S: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFS ₂ /ScbaE	
Incompatibilities and Reactivities: Strong oxidizers, acids, water, halogenated hydrocarbons					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Irrit eyes, nose, throat; nau, vomit, diarr; metallic taste, garlic breath; dizz, lass; liquid: frostbite; in animals: pneu; liver damage TO: Eyes, resp sys, liver				First Aid (see Table 6): Eye: Frostbite Skin: Frostbite Breath: Resp support	

Hydrogen sulfide		Formula: H ₂ S	CAS#: 7783-06-4	RTECS#: MX1225000	IDLH: 100 ppm
Conversion: 1 ppm = 1.40 mg/m ³		DOT: 1053 117			
Synonyms/Trade Names: Hydrosulfuric acid, Sewer gas, Sulfuretted hydrogen					
Exposure Limits: NIOSH REL: C 10 ppm (15 mg/m ³) [10-minute] OSHA PEL†: C 20 ppm 50 ppm [10-minute maximum peak]				Measurement Methods (see Table 1): NIOSH 6013 OSHA ID141	
Physical Description: Colorless gas with a strong odor of rotten eggs. [Note: Sense of smell becomes rapidly fatigued & can NOT be relied upon to warn of the continuous presence of H ₂ S. Shipped as a liquefied compressed gas.]					
Chemical & Physical Properties: MW: 34.1 BP: -77°F Sol: 0.4% Fl.P: NA (Gas) IP: 10.46 eV RGasD: 1.19 VP: 17.6 atm FRZ: -122°F UEL: 44.0% LEL: 4.0% Flammable Gas		Personal Protection/Sanitation (see Table 2): Skin: Frostbite Eyes: Frostbite Wash skin: N.R. Remove: When wet (flamm) Change: N.R. Provide: Frostbite wash		Respirator Recommendations (see Tables 3 and 4): NIOSH 100 ppm: PaprS/GmFS/Sa*/ScbaF §: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFS/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers, strong nitric acid, metals					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Irrit eyes, resp sys; apnea, coma, convuls; conj, eye pain, lac, photo, corn vesic; dizz, head, lass, irrity, insom; GI dist; liquid: frostbite TO: Eyes, resp sys, CNS				First Aid (see Table 6): Eye: Frostbite Skin: Frostbite Breath: Resp support	

Hydroquinone		Formula: C ₆ H ₄ (OH) ₂	CAS#: 123-31-9	RTECS#: MX3500000	IDLH: 50 mg/m ³
Conversion:		DOT: 2662 153			
Synonyms/Trade Names: p-Benzenediol; 1,4-Benzenediol; Dihydroxybenzene; 1,4-Dihydroxybenzene; Quinol					
Exposure Limits: NIOSH REL: C 2 mg/m ³ [15-minute] OSHA PEL: TWA 2 mg/m ³				Measurement Methods (see Table 1): NIOSH 5004 OSHA PV2094	
Physical Description: Light-tan, light-gray, or colorless crystals.					
Chemical & Physical Properties: MW: 110.1 BP: 545°F Sol: 7% Fl.P: 329°F (Molten) IP: 7.95 eV Sp.Gr: 1.33 VP: 0.00001 mmHg MLT: 338°F UEL: ? LEL: ? Combustible Solid; dust cloud may explode if ignited in an enclosed area.		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily Provide: Eyewash (>7%)		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 50 mg/m³: PaprHie£/100F/SaT:Cf£/ScbaF/SaF §: ScbaF: Pd,Pp/SaF: Pd,Pp: AScba Escape: 100F/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers, alkalis					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes; conj; kera; CNS excitement; colored urine, nau, dizz, suffocation, rapid breath; musc twitch, delirium; collapse; skin irrit, sens, derm TO: Eyes, skin, resp sys, CNS				First Aid (see Table 6): Eye: Irr immed Skin: Water flush Breath: Resp support Swallow: Medical attention immed	

2-Hydroxypropyl acrylate		Formula: CH ₂ =CHCOOCH ₂ CHOHCH ₃	CAS#: 999-61-1	RTECS#: AT1925000	IDLH: N.D.
Conversion: 1 ppm = 5.33 mg/m ³		DOT:			
Synonyms/Trade Names: HPA, β-Hydroxypropyl acrylate, Propylene glycol monoacrylate					
Exposure Limits: NIOSH REL: TWA 0.5 ppm (3 mg/m ³) [skin] OSHA PEL†: none				Measurement Methods (see Table 1): None available	
Physical Description: Clear to light-yellow liquid with a sweetish, solvent odor.					
Chemical & Physical Properties: MW: 130.2 BP: 376°F Sol: ? F.L.P: 149°F IP: ? Sp.Gr: 1.05 VP: ? FRZ: ? UEL: ? LEL: 1.8% Class IIIA Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Water [Note: Can become unstable at high temperatures & pressures or may react with water with some release of energy, but not violently.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, resp sys; eye, skin burns; cough, dysp TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Skin: Soap flush immed Breath: Resp support Swallow: Medical attention immed		

Indene		Formula: C ₉ H ₈	CAS#: 95-13-6	RTECS#: NK8225000	IDLH: N.D.
Conversion: 1 ppm = 4.75 mg/m ³			DOT:		
Synonyms/Trade Names: Indonaphthene					
Exposure Limits: NIOSH REL: TWA 10 ppm (45 mg/m ³) OSHA PEL†: none				Measurement Methods (see Table 1): None available	
Physical Description: Colorless liquid. [Note: A solid below 29°F.]					
Chemical & Physical Properties: MW: 116.2 BP: 359°F Sol: Insoluble F.L.P: 173°F IP: 8.81 eV Sp.Gr: 0.997 VP: ? FRZ: 29°F UEL: ? LEL: ? Class IIIA Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: Daily Remove: When wet or contam Change: N.R.		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: None reported [Note: Polymerizes & oxidizes on standing. It has exploded during nitration with (H ₂ SO ₄ + HNO ₃).]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: In animals: irrit eyes, skin, muc memb; derm, skin sens; chemical pneu (aspir liquid); liver, kidney, spleen inj TO: Eyes, skin, resp sys, liver, kidneys, spleen			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash Breath: Resp support Swallow: Medical attention immed		

Indium	Formula: In	CAS#: 7440-74-6	RTECS#: NL1050000	IDLH: N.D.
Conversion:		DOT:		
Synonyms/Trade Names: Indium metal				
Exposure Limits: NIOSH REL*: TWA 0.1 mg/m ³ [* Note: The REL also applies to other indium compounds (as In).] OSHA PEL†: none			Measurement Methods (see Table 1): NIOSH 7303, P&CAM173 (II-5) OSHA ID121	
Physical Description: Ductile, shiny, silver-white metal that is softer than lead.				
Chemical & Physical Properties: MW: 114.8 BP: 3767°F Sol: Insoluble Fl.P: NA IP: NA Sp.Gr: 7.31 VP: 0 mmHg (approx) MLT: 314°F UEL: NA LEL: NA Noncombustible Solid in bulk form, but may ignite in powdered or dust form.		Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: N.R. Remove: N.R. Change: N.R.		Respirator Recommendations (see Tables 3 and 4): Not available.
Incompatibilities and Reactivities: (Dinitrogen tetraoxide + acetonitrile), mercury(II) bromide (at 662°F), sulfur (mixtures ignite when heated) [Note: oxidizes readily at higher temperatures.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, resp sys; possible liver, kidney, heart, blood effects; pulm edema TO: Eyes, skin, resp sys, liver, kidneys, heart, blood			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash Breath: Resp support Swallow: Medical attention immed	

Iodine	Formula: I ₂	CAS#: 7553-56-2	RTECS#: NN1575000	IDLH: 2 ppm
Conversion: 1 ppm = 10.38 mg/m ³		DOT:		
Synonyms/Trade Names: Iodine crystals, Molecular iodine				
Exposure Limits: NIOSH REL: C 0.1 ppm (1 mg/m ³) OSHA PEL: C 0.1 ppm (1 mg/m ³)			Measurement Methods (see Table 1): NIOSH 6005 OSHA ID212	
Physical Description: Violet solid with a sharp, characteristic odor.				
Chemical & Physical Properties: MW: 253.8 BP: 365°F Sol: 0.01% Fl.P: NA IP: 9.31 eV Sp.Gr: 4.93 VP(77°F): 0.3 mmHg MLT: 236°F UEL: NA LEL: NA Noncombustible Solid	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily Provide: Eyewash (>7%) Quick drench (>7%)	Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 1 ppm: Sa* 2 ppm: Sa:C*/ScbaF/SaF §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFAg100/ScbaE		
Incompatibilities and Reactivities: Ammonia, acetylene, acetaldehyde, powdered aluminum, active metals, liquid chlorine				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, nose; lac; head; chest tight; skin burns, rash; cutaneous hypersensitivity TO: Eyes, skin, resp sys, CNS, CVS		First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed		

Iodoform	Formula: CHI ₃	CAS#: 75-47-8	RTECS#: PB7000000	IDLH: N.D.
Conversion: 1 ppm = 16.10 mg/m ³	DOT:			
Synonyms/Trade Names: Triiodomethane				
Exposure Limits: NIOSH REL: TWA 0.6 ppm (10 mg/m ³) OSHA PEL†: none			Measurement Methods (see Table 1): None available	
Physical Description: Yellow to greenish-yellow powder or crystalline solid with a pungent, disagreeable odor. [antiseptic for external use]				
Chemical & Physical Properties: MW: 393.7 BP: 410°F (Decomposes) Sol: 0.01% Fl.P: NA IP: ? Sp.Gr: 4.01 VP: ? MLT: 246°F UEL: NA LEL: NA Noncombustible Solid	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Strong oxidizers, lithium, metallic salts (e.g., mercuric oxide, silver nitrate), strong bases, calomel, tannin				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin; lass, dizz, nau, inco, CNS depres; dysp; liver, kidney, heart damage; vis dist TO: Eyes, skin, resp sys, liver, kidneys, heart			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed	

Iron oxide dust and fume (as Fe)		Formula: Fe ₂ O ₃	CAS#: 1309-37-1	RTECS#: NO7400000 NO7525000 (fume)	IDLH: 2500 mg/m ³ (as Fe)
Conversion:		DOT: 1376 135 (spent)			
Synonyms/Trade Names: Ferric oxide, Iron(III) oxide					
Exposure Limits: NIOSH REL: TWA 5 mg/m ³ OSHA PEL: TWA 10 mg/m ³				Measurement Methods (see Table 1): NIOSH 7300, 7301, 7303, 9102 OSHA ID121, ID125G	
Physical Description: Reddish-brown solid. [Note: Exposure to fume may occur during the arc-welding of iron.]					
Chemical & Physical Properties: MW: 159.7 BP: ? Sol: Insoluble Fl.P: NA IP: NA Sp.Gr: 5.24 VP: 0 mmHg (approx) MLT: 2664°F UEL: NA LEL: NA Noncombustible Solid		Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: N.R. Respirator Recommendations (see Tables 3 and 4): NIOSH 50 mg/m³: 95XQ/Sa 125 mg/m³: Sa:Cf/PapRHe 250 mg/m³: 100F/SaT:Cf/PapRTHie/ScbaF/SaF 2500 mg/m³: Sa:Pd,Pp §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: 100F/ScbaE	
Incompatibilities and Reactivities: Calcium hypochlorite					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh SY: Benign pneumoconiosis with X-ray shadows indistinguishable from fibrotic pneumoconiosis (siderosis) TO: Resp sys				First Aid (see Table 6): Breath: Resp support	

Iron pentacarbonyl (as Fe)		Formula: Fe(CO) ₅	CAS#: 13463-40-6	RTECS#: NO4900000	IDLH: N.D.
Conversion: 1 ppm = 2.28 mg/m ³ (as Fe)		DOT: 1994 131			
Synonyms/Trade Names: Iron carbonyl, Pentacarbonyl iron					
Exposure Limits: NIOSH REL: TWA 0.1 ppm (0.23 mg/m ³) ST 0.2 ppm (0.45 mg/m ³) OSHA PEL†: none				Measurement Methods (see Table 1): None available	
Physical Description: Colorless to yellow to dark-red, oily liquid.					
Chemical & Physical Properties: MW: 195.9 BP(749 mmHg): 217°F Sol: Insoluble F.P.: 5°F IP: ? Sp.Gr: 1.46-1.52 VP(87°F): 40 mmHg FRZ: -6°F UEL: ? LEL: ? Class IB Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R. Provide: Quick drench		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Oxidizers, nitrogen oxide, (zinc + cobalt halides) [Note: Pyrophoric (i.e., ignites spontaneously in air). Decomposed by light or air, releasing carbon monoxide.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, muc memb, resp sys; head, dizz, nau, vomit; fever, cyan, cough, dysp; liver, kidney, lung inj; degenerative changes in CNS TO: Eyes, resp sys, CNS, liver, kidneys			First Aid (see Table 6): Eye: Irr immed Skin: Soap flush immed Breath: Resp support Swallow: Medical attention immed		

Iron salts (soluble, as Fe)		Formula:	CAS#:	RTECS#:	IDLH: N.D.
Conversion:		DOT:			
Synonyms/Trade Names: FeSO₄ : Ferrous sulfate, Iron(II) sulfate; FeCl₂ : Ferrous chloride, Iron(II) chloride; Fe(NO₃)₃ : Ferric nitrate, Iron(III) nitrate; Fe(SO₄)₃ : Ferric sulfate, Iron(III) sulfate; FeCl₃ : Ferric chloride, Iron (III) chloride					
Exposure Limits: NIOSH REL: TWA 1 mg/m ³ OSHA PEL†: none			Measurement Methods (see Table 1): NIOSH 7300, 7301, 7303, 9102 OSHA ID121, ID125G		
Physical Description: Appearance and odor vary depending upon the specific soluble iron salt.					
Chemical & Physical Properties: Properties vary depending upon the specific soluble iron salt. Noncombustible Solids		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: Daily Remove: N.R. Change: Daily		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Varies					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, muc memb; abdom pain, diarr, vomit; possible liver damage TO: Eyes, skin, resp sys, liver, GI tract			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash Breath: Resp support Swallow: Medical attention immed		

Isoamyl acetate	Formula: CH ₃ COOCH ₂ CH ₂ CH(CH ₃) ₂	CAS#: 123-92-2	RTECS#: NS9800000	IDLH: 1000 ppm
Conversion: 1 ppm = 5.33 mg/m ³		DOT: 1104 129		
Synonyms/Trade Names: Banana oil, Isopentyl acetate, 3-Methyl-1-butanol acetate, 3-Methylbutyl ester of acetic acid, 3-Methylbutyl ethanoate				
Exposure Limits: NIOSH REL: TWA 100 ppm (525 mg/m ³) OSHA PEL: TWA 100 ppm (525 mg/m ³)			Measurement Methods (see Table 1): NIOSH 1450 OSHA 7	
Physical Description: Colorless liquid with a banana-like odor.				
Chemical & Physical Properties: MW: 130.2 BP: 288°F Sol: 0.3% F.L.P: 77°F IP: ? Sp.Gr: 0.87 VP: 4 mmHg FRZ: -109°F UEL: 7.5% LEL(212°F): 1.0% Class IC Flammable Liquid	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R. Incompatibilities and Reactivities: Strong oxidizers, hydrogen peroxide, acids				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Lass, insom; facial pallor; anor, low-wgt, malnut; constip, abdom pain, colic; anemia; gingival lead line; tremor; para wrist, ankles; encephalopathy; kidney disease; irrit eyes; hypotension TO: Eyes, GI tract, CNS, kidneys, blood, gingival tissue			First Aid (see Table 6): Eye: Irr immed Skin: Soap flush prompt Breath: Resp support Swallow: Medical attention immed	

Limestone	Formula: CaCO ₃	CAS#: 1317-65-3	RTECS#:	IDLH: N.D.	
Conversion:	DOT:				
Synonyms/Trade Names: Calcium carbonate, Natural calcium carbonate [Note: Calcite & aragonite are commercially important natural calcium carbonates.]					
Exposure Limits: NIOSH REL: TWA 10 mg/m ³ (total) TWA 5 mg/m ³ (resp) OSHA PEL: TWA 15 mg/m ³ (total) TWA 5 mg/m ³ (resp)			Measurement Methods (see Table 1): NIOSH 0500, 0600		
Physical Description: Odorless, white to tan powder.					
Chemical & Physical Properties: MW: 100.1 BP: Decomposes Sol: 0.001% Fl.P: NA IP: NA Sp.Gr: 2.7-2.9 VP: 0 mmHg (approx) MLT: 1517-2442°F (Decomposes) UEL: NA LEL: NA Noncombustible Solid		Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: N.R. Remove: N.R. Change: N.R.			
		Respirator Recommendations (see Tables 3 and 4): Not available.			
Incompatibilities and Reactivities: Fluorine, magnesium, acids, alum, ammonium salts					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Irrit eyes, skin, muc memb; cough, sneez, rhin; lac TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash Breath: Fresh air		

Lindane	Formula: C ₆ H ₆ Cl ₆	CAS#: 58-89-9	RTECS#: GV4900000	IDLH: 50 mg/m ³
Conversion:	DOT: 2761 151			
Synonyms/Trade Names: BHC; HCH; γ-Hexachlorocyclohexane; gamma isomer of 1,2,3,4,5,6-Hexachlorocyclohexane				
Exposure Limits: NIOSH REL: TWA 0.5 mg/m ³ [skin] OSHA PEL: TWA 0.5 mg/m ³ [skin]			Measurement Methods (see Table 1): NIOSH 5502	
Physical Description: White to yellow, crystalline powder with a slight, musty odor. [pesticide]				
Chemical & Physical Properties: MW: 290.8 BP: 614°F Sol: 0.001% Fl.P: NA IP: ? Sp.Gr: 1.85 VP: 0.00001 mmHg MLT: 235°F UEL: NA LEL: NA Noncombustible Solid, but may be dissolved in flammable liquids.	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: N.R. Wash skin: When contam Remove: When wet or contam Change: Daily Provide: Quick drench	Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 5 mg/m³: CcrOv95/Sa 12.5 mg/m³: Sa:Cf*/PaprvOvHie* 25 mg/m³: CcrFOv100/GmFOv100/ PaprvOvHie*/ScbaF/SaF 50 mg/m³: SaF:Pd,Pp §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFOv100/ScbaE		
Incompatibilities and Reactivities: Corrosive to metals				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, nose, throat; head; nau; clonic convuls; resp difficulty; cyan; aplastic anemia; musc spasm; in animals: liver, kidney damage TO: Eyes, skin, resp sys, CNS, blood, liver, kidneys			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash prompt Breath: Resp support Swallow: Medical attention immed	

Lithium hydride	Formula: LiH	CAS#: 7580-67-8	RTECS#: OJ6300000	IDLH: 0.5 mg/m ³
Conversion:	DOT: 1414 138; 2805 138 (fused, solid)			
Synonyms/Trade Names: Lithium monohydride				
Exposure Limits: NIOSH REL: TWA 0.025 mg/m ³ OSHA PEL: TWA 0.025 mg/m ³			Measurement Methods (see Table 1): OSHA ID121	
Physical Description: Odorless, off-white to gray, translucent, crystalline mass or white powder.				
Chemical & Physical Properties: MW: 7.95 BP: Decomposes Sol: Reacts Fl.P: NA IP: NA Sp.Gr: 0.78 VP: 0 mmHg (approx) MLT: 1256°F UEL: NA LEL: NA Combustible Solid that can form airborne dust clouds which may explode on contact with flame, heat, or oxidizers.	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: Brush (DO NOT WASH) Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench (>0.5 mg/m ³)	Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 0.25 mg/m³: 100XQ/Sa 0.5 mg/m³: Sa:Cf*/100F/PapriHe'/ScbaF/SaF §: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: 100F/ScbaE		
Incompatibilities and Reactivities: Strong oxidizers, halogenated hydrocarbons, acids, water [Note: May ignite SPONTANEOUSLY in air and may reignite after fire is extinguished. Reacts with water to form hydrogen & lithium hydroxide.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin; eye, skin burns; mouth, esophagus burns (if ingested); nau; musc twitches; mental conf; blurred vision TO: Eyes, skin, resp sys, CNS		First Aid (see Table 6): Eye: Irr immed Skin: Brush (DO NOT WASH) Breath: Resp support Swallow: Medical attention immed		

L.P.G.	Formula: C ₃ H ₈ /C ₃ H ₆ /C ₄ H ₁₀ /C ₄ H ₈	CAS#: 68476-85-7	RTECS#: SE7545000	IDLH: 2000 ppm [10%LEL]
Conversion: 1 ppm = 1.72-2.37 mg/m ³		DOT: 1075 115		
Synonyms/Trade Names: Bottled gas, Compressed petroleum gas, Liquefied hydrocarbon gas, Liquefied petroleum gas, LPG [Note: A fuel mixture of propane, propylene, butanes & butylenes.]				
Exposure Limits: NIOSH REL: TWA 1000 ppm (1800 mg/m ³) OSHA PEL: TWA 1000 ppm (1800 mg/m ³)				Measurement Methods (see Table 1): NIOSH S93 (II-2)
Physical Description: Colorless, noncorrosive, odorless gas when pure. [Note: A foul-smelling odorant is usually added. Shipped as a liquefied compressed gas.]				
Chemical & Physical Properties: MW: 42-58 BP: >44°F Sol: Insoluble F.L.P: NA (Gas) IP: 10.95 eV RGasD: 1.45-2.00 VP: >1 atm FRZ: ? 		Incompatibilities and Reactivities: Strong oxidizers, water, alkalis, metals, caustics, and amines above 150°F [Note: Reacts slowly with water (hydrolyzes) to form maleic acid.]			
		Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit nose, upper resp sys; conj; photo, double vision; bronchial asthma; derm TO: Eyes, skin, resp sys		First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed	

Malonaldehyde		Formula: CHOCH ₂ CHO	CAS#: 542-78-9	RTECS#: TX6475000	IDLH: Ca [N.D.]
Conversion:		DOT:			
Synonyms/Trade Names: Malonic aldehyde; Malonodialdehyde; Propanedial; 1,3-Propanedial [Note: Pure Malonaldehyde is unstable and may be used as its sodium salt.]					
Exposure Limits: NIOSH REL: Ca See Appendix A See Appendix C (Aldehydes) OSHA PEL: none				Measurement Methods (see Table 1): None available	
Physical Description: Solid (needles).					
Chemical & Physical Properties: MW: 72.1 BP: ? Sol: ? Fl.P: ? IP: ? Sp.Gr: ? VP: ? MLT: 161°F UEL: ? LEL: ?		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam/Daily Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH ⚠: ScbaF: Pd, Pp/ SaF: Pd, Pp: AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Proteins [Note: Pure compound is stable under neutral conditions, but not under acidic conditions.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, resp sys; CNS depres; [carc] TO: Eyes, skin, resp sys, CNS [in animals: thyroid gland tumors]			First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed		

Malononitrile		Formula: NCCH ₂ CN	CAS#: 109-77-3	RTECS#: OO3150000	IDLH: N.D.
Conversion: 1 ppm = 2.70 mg/m ³		DOT: 2647 153			
Synonyms/Trade Names: Cyanoacetoneitrile, Dicyanomethane, Malonic dinitrile					
Exposure Limits: NIOSH REL: TWA 3 ppm (8 mg/m ³) OSHA PEL: none			Measurement Methods (see Table 1): NIOSH Nitriles Criteria Document		
Physical Description: White powder or colorless crystals. [Note: Melts above 90°F. Forms cyanide in the body.]					
Chemical & Physical Properties: MW: 66.1 BP: 426°F Sol: 13% Fl.P(oc): 266°F IP: 12.88 eV Sp.Gr: 1.19 VP: ? MLT: 90°F UEL: ? LEL: ? Combustible Solid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH 80 mg/m³: Sa 200 mg/m³: Sa:Cf 400 mg/m³: ScbaF/SaF 667 mg/m³: SaF: Pd, Pp \$: ScbaF: Pd, Pp/ SaF: Pd, Pp: AScba Escape: GmFOw/ScbaE	
Incompatibilities and Reactivities: Strong bases [Note: May polymerize violently on prolonged heating at 265°F, or in contact with strong bases at lower temperatures.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, nose, throat; head, dizz, lass, conf, convuls; dysp; abdom pain, nau, vomit TO: Eyes, skin, resp sys, CNS, CVS			First Aid (see Table 6): Eye: Irr immed Skin: Water wash immed Breath: Resp support Swallow: Medical attention immed		

Manganese compounds and fume (as Mn)		Formula: Mn (metal)	CAS#: 7439-96-5 (metal)	RTECS#: OO9275000 (metal)	IDLH: 500 mg/m³ (as Mn)
Conversion:		DOT:			
Synonyms/Trade Names: Manganese metal: Colloidal manganese, Manganese-55 Synonyms of other compounds vary depending upon the specific manganese compound.					
Exposure Limits: NIOSH REL*: TWA 1 mg/m³ ST 3 mg/m³ [*Note: Also see specific listings for Manganese cyclopentadienyl tricarbonyl, Methyl cyclopentadienyl manganese tricarbonyl, and Manganese tetroxide.] OSHA PEL*: C 5 mg/m³ [*Note: Also see specific listings for Manganese cyclopentadienyl tricarbonyl and Methyl cyclopentadienyl manganese tricarbonyl.]				Measurement Methods (see Table 1): NIOSH 7300, 7301, 7303, 9102 OSHA ID121, ID125G	
Physical Description: A lustrous, brittle, silvery solid.					
Chemical & Physical Properties: MW: 54.9 BP: 3564°F Sol: Insoluble Fl.P: NA IP: NA Sp.Gr: 7.20 (metal) VP: 0 mmHg (approx) MLT: 2271°F UEL: NA LEL: NA Metal: Combustible Solid		Personal Protection/Sanitation (see Table 2): Skin: N.R. Incompatibilities and Reactivities: Acetylene, ammonia, chlorine dioxide, azides, calcium (amalgam formation), sodium carbide, lithium, rubidium, copper					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin; cough, chest pain, dysp, bron, pneu; tremor, insom, irity, indecision, head, lass; stomatitis, saliv; GI dist, anor, low-wgt; prot TO: Eyes, skin, resp sys, CNS, kidneys				First Aid (see Table 6): Eye: Irr immed Skin: Soap wash prompt Breath: Resp support Swallow: Medical attention immed	

Mercury (organo) alkyl compounds (as Hg)		Formula:	CAS#:	RTECS#:	IDLH: 2 mg/m ³ (as Hg)
Conversion:			DOT:		
Synonyms/Trade Names: Synonyms vary depending upon the specific (organo) alkyl mercury compound.					
Exposure Limits: NIOSH REL: TWA 0.01 mg/m ³ ST 0.03 mg/m ³ [skin]			OSHA PEL†: TWA 0.01 mg/m ³ C 0.04 mg/m ³		Measurement Methods (see Table 1): None available
Physical Description: Appearance and odor vary depending upon the specific (organo) alkyl mercury compound.					
Chemical & Physical Properties: Properties vary depending upon the specific (organo) alkyl mercury compound.	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 0.1 mg/m³: Sa 0.25 mg/m³: Sa:Cf 0.5 mg/m³: SaT:Cf/ScbaF/SaF 2 mg/m³: Sa:Pd,Pp §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: ScbaE		
Incompatibilities and Reactivities: Strong oxidizers such as chlorine					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Pares; ataxia, dysarthria; vision, hearing dist; spasticity, jerking limbs; dizz; saliv; lac; nau, vomit, diarr, constip; skin burns; emotional dist; kidney inj; possible terato effects TO: Eyes, skin, CNS, PNS, kidneys			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed		

Mesityl oxide		Formula: (CH ₃) ₂ C=CHCOCH ₃	CAS#: 141-79-7	RTECS#: SB4200000	IDLH: 1400 ppm [10%LEL]
Conversion: 1 ppm = 4.02 mg/m ³		DOT: 1229 129			
Synonyms/Trade Names: Isobutenyl methyl ketone, Isopropylideneacetone, Methyl isobutenyl ketone, 4-Methyl-3-penten-2-one					
Exposure Limits: NIOSH REL: TWA 10 ppm (40 mg/m ³) OSHA PEL†: TWA 25 ppm (100 mg/m ³)				Measurement Methods (see Table 1): NIOSH 1301, 2553 OSHA 7	
Physical Description: Oily, colorless to light-yellow liquid with a peppermint- or honey-like odor.					
Chemical & Physical Properties: MW: 98.2 BP: 266°F Sol: 3% Fl.P: 87°F IP: 9.08 eV Sp.Gr(59°F): 0.86 VP: 9 mmHg FRZ: -52°F UEL: 7.2% LEL: 1.4% Class IC Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R. Provide: Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH 250 ppm: Sa:Cf£/PapOv£ 500 ppm: CcrFOv/GmFOv/PapTOv£/ScbaF/SaF 1400 ppm: SaF:Pd,Pp \$: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Oxidizers, acids					
Exposure Routes, Symptoms, Target Organs (see Table 5): EY: Inh, Ing, Con SY: Irrit eyes, skin, muc memb; narco, coma; in animals: liver, kidney damage; CNS effects TO: Eyes, skin, resp sys, CNS, liver, kidneys			First Aid (see Table 6): EY: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed		

Methacrylic acid		Formula: CH ₂ =C(CH ₃)COOH	CAS#: 79-41-4	RTECS#: OZ2975000	IDLH: N.D.
Conversion: 1 ppm = 3.52 mg/m ³		DOT: 2531 153P (inhibited)			
Synonyms/Trade Names: Methacrylic acid (glacial), Methacrylic acid (inhibited), α-Methacrylic acid, 2-Methylacrylic acid, 2-Methylpropenoic acid					
Exposure Limits: NIOSH REL: TWA 20 ppm (70 mg/m ³) [skin] OSHA PEL†: none				Measurement Methods (see Table 1): OSHA PV2005	
Physical Description: Colorless liquid or solid (below 61°F) with an acrid, repulsive odor.					
Chemical & Physical Properties: MW: 86.1 BP: 325°F Sol(77°F): 9% Fl.P(oc): 171°F IP: ? Sp.Gr: 1.02 (Liquid) VP: 0.7 mmHg FRZ: 61°F UEL: ? LEL: ? Class IIIA Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Oxidizers, elevated temperatures, hydrochloric acid [Note: Typically contains 100 ppm of the monomethyl ether of hydroquinone to prevent polymerization.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, muc memb; eye, skin burns TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed		

Methomyl	Formula: CH ₃ C(SCH ₃)NOC(O)NHCH ₃	CAS#: 16752-77-5	RTECS#: AK2975000	IDLH: N.D.
Conversion:	DOT: 2757 151 (carbamate pesticide, solid, toxic)			
Synonyms/Trade Names: Lannate®, Methyl N-((methylamino)carbonyloxy)ethanimidothioate, S-Methyl-N-(methylcarbamoyloxy)thioacetimidate				
Exposure Limits: NIOSH REL: TWA 2.5 mg/m ³ OSHA PEL†: none			Measurement Methods (see Table 1): NIOSH 5601	
Physical Description: White, crystalline solid with a slight, sulfur-like odor. [insecticide]				
Chemical & Physical Properties: MW: 162.2 BP: ? Sol(77°F): 6% F.L.P: NA IP: ? Sp.Gr(75°F): 1.29 VP(77°F): 0.00005 mmHg MLT: 172°F UEL: NA LEL: NA Noncombustible Solid, but may be dissolved in flammable liquids.		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily Provide: Quick drench		Respirator Recommendations (see Tables 3 and 4): Not available.
Incompatibilities and Reactivities: Strong bases				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes; blurred vision, miosis; saliv; abdom cramps, nau, vomit; dysp; lass, musc twitch; liver, kidney damage TO: Eyes, resp sys, CNS, CVS, liver, kidneys, blood chol			First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed	

M

Methoxychlor	Formula: (C ₆ H ₄ OCH ₃) ₂ CHCCl ₃	CAS#: 72-43-5	RTECS#: KJ3675000	IDLH: Ca [5000 mg/m ³]
Conversion:	DOT: 2761 151 (organochlorine pesticide, solid, toxic)			
Synonyms/Trade Names: p,p'-Dimethoxydiphenyltrichloroethane; DMDT; Methoxy-DDT; 2,2-bis(p-Methoxyphenyl)-1,1,1-trichloroethane; 1,1,1-Trichloro-2,2-bis-(p-methoxyphenyl)ethane				
Exposure Limits: NIOSH REL: Ca See Appendix A OSHA PEL†: TWA 15 mg/m ³			Measurement Methods (see Table 1): NIOSH S371 (II-4) OSHA PV2038	
Physical Description: Colorless to light-yellow crystals with a slight, fruity odor. [insecticide]				
Chemical & Physical Properties: MW: 345.7 BP: Decomposes Sol: 0.00001% Fl.P: ? IP: ? Sp.Gr: 1.41 VP: Very low MLT: 171°F UEL: ? LEL: ? Combustible Solid, but difficult to burn.	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: N.R. Wash skin: When contam/Daily Remove: When wet or contam Change: Daily	Respirator Recommendations (see Tables 3 and 4): NIOSH ✱: ScbaF: Pd, Pp/ SaF: Pd, Pp: AScba Escape: GmFOv100/ScbaE		
Incompatibilities and Reactivities: Oxidizers				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing SY: In animals: fasc, trembling, convuls; kidney, liver damage; [carc] TO: CNS, liver, kidneys [in animals: liver & ovarian cancer]			First Aid (see Table 6): Skin: Soap wash Breath: Fresh air Swallow: Medical attention immed	

Methoxyflurane		Formula: CHCl ₂ CF ₂ OCH ₃	CAS#: 76-38-0	RTECS#: KN7820000	IDLH: N.D.
Conversion: 1 ppm = 6.75 mg/m ³		DOT:			
Synonyms/Trade Names: 2,2-Dichloro-1,1-difluoroethyl methyl ether; 2,2-Dichloro-1,1-difluoro-1-methoxyethane; Methoflurane; Methoxyfluorane; Penthrane					
Exposure Limits: NIOSH REL*: C 2 ppm (13.5 mg/m ³) [60-minute] [*Note: REL for exposure to waste anesthetic gas.] OSHA PEL: none				Measurement Methods (see Table 1): None available	
Physical Description: Colorless liquid with a fruity odor. [inhalation anesthetic]					
Chemical & Physical Properties: MW: 165.0 BP: 220°F Sol: Slight Fl.P: ? IP: ? Sp.Gr(77°F): 1.42 VP: 23 mmHg FRZ: -31°F UEL: ? LEL(176°F): 7% Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: Prevent eye contact Wash skin: N.R. Remove: When wet or contam Change: N.R.		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: None reported					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes; CNS depres, analgesia, anes, convuls, resp depres; liver, kidney inj; in animals: repro, terato effects TO: Eyes, CNS, liver, kidneys, repro sys			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash Breath: Resp support Swallow: Medical attention immed		

M

4-Methoxyphenol		Formula: CH ₃ OC ₆ H ₄ OH	CAS#: 150-76-5	RTECS#: SL7700000	IDLH: N.D.
Conversion:		DOT:			
Synonyms/Trade Names: Hydroquinone monomethyl ether, p-Hydroxyanisole, Mequinol, p-Methoxyphenol, Monomethyl ether hydroquinone					
Exposure Limits: NIOSH REL: TWA 5 mg/m ³ OSHA PEL†: none				Measurement Methods (see Table 1): None available	
Physical Description: Colorless to white, waxy solid with an odor of caramel & phenol.					
Chemical & Physical Properties: MW: 124.2 BP: 469°F Sol(77°F): 4% Fl.P(oc): 270°F IP: 7.50 eV Sp.Gr: 1.55 VP: <0.01 mmHg MLT: 135°F UEL: ? LEL: ? Combustible Solid; under certain conditions, a dust cloud can probably explode if ignited by a spark or flame.		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Strong oxidizers, strong bases, acid chlorides, acid anhydrides					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, nose, throat, upper resp sys; eye, skin burns; CNS depres TO: Eyes, skin, resp sys, CNS			First Aid (see Table 6): Eye: Irr immed Skin: Soap flush immed Breath: Resp support Swallow: Medical attention immed		

Methyl acetate		Formula: CH ₃ COOCH ₃	CAS#: 79-20-9	RTECS#: AI9100000	IDLH: 3100 ppm [10%LEL]
Conversion: 1 ppm = 3.03 mg/m ³		DOT: 1231 129			
Synonyms/Trade Names: Methyl ester of acetic acid, Methyl ethanoate					
Exposure Limits: NIOSH REL: TWA 200 ppm (610 mg/m ³) ST 250 ppm (760 mg/m ³) OSHA PEL†: TWA 200 ppm (610 mg/m ³)					Measurement Methods (see Table 1): NIOSH 1458 OSHA 7
Physical Description: Colorless liquid with a fragrant, fruity odor.					
Chemical & Physical Properties: MW: 74.1 BP: 135°F Sol: 25% FLP: 14°F IP: 10.27 eV Sp.Gr: 0.93 VP: 173 mmHg FRZ: -145°F UEL: 16% LEL: 3.1% Class IB Flammable Liquid	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R.		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 2000 ppm: CcrOv*/Sa* 3100 ppm: Sa:Cf*/CcrFOv/GmFOv/ PapOv*/ScbaF/SaF §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFOv/ScbaE		
	Incompatibilities and Reactivities: Nitrates; strong oxidizers, alkalis & acids; water [Note: Reacts slowly with water to form acetic acid & methanol.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, nose, throat; head, drow; optic nerve atrophy; chest tight; in animals: narco TO: Eyes, skin, resp sys, CNS			First Aid (see Table 6): Eye: Irr immed Skin: Water flush prompt Breath: Resp support Swallow: Medical attention immed		

M

Methyl acetylene		Formula: CH ₃ C≡CH	CAS#: 74-99-7	RTECS#: UK4250000	IDLH: 1700 ppm [10%LEL]
Conversion: 1 ppm = 1.64 mg/m ³		DOT:			
Synonyms/Trade Names: Allylene, Propine, Propyne, 1-Propyne					
Exposure Limits: NIOSH REL: TWA 1000 ppm (1650 mg/m ³) OSHA PEL: TWA 1000 ppm (1650 mg/m ³)					Measurement Methods (see Table 1): NIOSH S84 (II-5)
Physical Description: Colorless gas with a sweet odor. [Note: A fuel that is shipped as a liquefied compressed gas.]					
Chemical & Physical Properties: MW: 40.1 BP: -10°F Sol: Insoluble FLP: NA (Gas) IP: 10.36 eV RGasD: 1.41 VP: 5.2 atm FRZ: -153°F UEL: ? LEL: 1.7% Flammable Gas					
Personal Protection/Sanitation (see Table 2): Skin: Frostbite Eyes: Frostbite Wash skin: N.R. Remove: When wet (flamm) Change: N.R. Provide: Frostbite wash		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 1700 ppm: Sa/ScbaF §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFOv/ScbaE			
Incompatibilities and Reactivities: Strong oxidizers (such as chlorine), copper alloys [Note: Can decompose explosively at 4.5 to 5.6 atmospheres of pressure.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con (liquid) SY: Irrit resp sys; tremor, hyperexcitability, anes; liquid: frostbite TO: Resp sys, CNS			First Aid (see Table 6): Eye: Frostbite Skin: Frostbite Breath: Resp support		

Methyl acetylene-propadiene mixture		Formula: $\text{CH}_3\equiv\text{CH}/\text{CH}_2=\text{C}=\text{CH}_2$	CAS#: 59355-75-8	RTECS#: UK4920000	IDLH: 3400 ppm [10%LEL]
Conversion: 1 ppm = 1.64 mg/m ³		DOT: 1060 116P (stabilized)			
Synonyms/Trade Names: MAPP gas, Methyl acetylene-allene mixture, Propadiene-methyl acetylene, Methyl acetylene-propadiene mixture (stabilized), Propyne-allene mixture, Propyne-propadiene mixture					
Exposure Limits: NIOSH REL: TWA 1000 ppm (1800 mg/m ³) ST 1250 ppm (2250 mg/m ³) OSHA PEL†: TWA 1000 ppm (1800 mg/m ³)				Measurement Methods (see Table 1): NIOSH S85 (II-6) OSHA 7	
Physical Description: Colorless gas with a strong, characteristic, foul odor. [Note: A fuel that is shipped as a liquefied compressed gas.]					
Chemical & Physical Properties: MW: 40.1 BP: -36 to -4°F Sol: Insoluble Fl.P: NA (Gas) IP: ? RGasD: 1.48 VP: >1 atm FRZ: -213°F UEL: 10.8% LEL: 3.4% Flammable Gas		Personal Protection/Sanitation (see Table 2): Skin: Frostbite Eyes: Frostbite Wash skin: N.R. Remove: When wet (flamm) Change: N.R. Provide: Frostbite wash		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 3400 ppm: Sa/ScbaF §: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFS/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers, copper alloys [Note: Forms explosive compounds at high pressure in contact with alloys containing more than 67% copper.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con (liquid) SY: Irrit resp sys; excitement, conf, anes; liquid: frostbite TO: Resp sys, CNS			First Aid (see Table 6): Eye: Frostbite Skin: Frostbite Breath: Resp support		

Methyl acrylate		Formula: CH ₂ =CHCOOCH ₃	CAS#: 96-33-3	RTECS#: AT2800000	IDLH: 250 ppm
Conversion: 1 ppm = 3.52 mg/m ³		DOT: 1919 129P (inhibited)			
Synonyms/Trade Names: Methoxycarbonylethylene, Methyl ester of acrylic acid, Methyl propenoate					
Exposure Limits: NIOSH REL: TWA 10 ppm (35 mg/m ³) [skin] OSHA PEL: TWA 10 ppm (35 mg/m ³) [skin]				Measurement Methods (see Table 1): NIOSH 1459, 2552 OSHA 92	
Physical Description: Colorless liquid with an acid odor.					
Chemical & Physical Properties: MW: 86.1 BP: 176°F Sol: 6% Fl.P: 27°F IP: 9.90 eV Sp.Gr: 0.96 VP: 65 mmHg FRZ: -106°F UEL: 25% LEL: 2.8% Class IB Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R. Provide: Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 100 ppm: Sa* 250 ppm: Sa:Cf*/ScbaF/SaF §: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Nitrates, oxidizers such as peroxides, strong alkalis [Note: Polymerizes easily; usually contains an inhibitor such as hydroquinone.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, upper resp sys TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed		

Methylacrylonitrile	Formula: CH ₂ =C(CH ₃)CN	CAS#: 126-98-7	RTECS#: UD1400000	IDLH: N.D.
Conversion: 1 ppm = 2.74 mg/m ³		DOT: 3079 131P (inhibited)		
Synonyms/Trade Names: 2-Cyanopropene-1, 2-Cyano-1-propene, Isoprene cyanide, Isopropenyl nitrile, Methacrylonitrile, α-Methylacrylonitrile, 2-Methylpropenenitrile				
Exposure Limits: NIOSH REL: TWA 1 ppm (3 mg/m ³) [skin] OSHA PEL†: none			Measurement Methods (see Table 1): None available	
Physical Description: Colorless liquid with an odor like bitter almonds.				
Chemical & Physical Properties: MW: 67.1 BP: 195°F Sol: 3% FLP: 34°F IP: ? Sp.Gr: 0.80 VP(77°F): 71 mmHg FRZ: -32°F UEL: 6.8% LEL: 2% Class IB Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R.		Respirator Recommendations (see Tables 3 and 4): Not available.
Incompatibilities and Reactivities: Strong acids, strong oxidizers, alkali, light [Note: Polymerization may occur due to elevated temperature, visible light, or contact with a concentrated alkali.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin; lac; in animals: convuls, loss of motor control in hind limbs TO: Eyes, skin, CNS			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed	

M

Methylal	Formula: CH ₃ OCH ₂ OCH ₃	CAS#: 109-87-5	RTECS#: PA8750000	IDLH: 2200 ppm [10%LEL]
Conversion: 1 ppm = 3.11 mg/m ³		DOT: 1234 127		
Synonyms/Trade Names: Dimethoxymethane, Formal, Formaldehyde dimethylacetal, Methoxymethyl methyl ether, Methylene dimethyl ether				
Exposure Limits: NIOSH REL: TWA 1000 ppm (3100 mg/m ³) OSHA PEL: TWA 1000 ppm (3100 mg/m ³)				Measurement Methods (see Table 1): NIOSH 1611
Physical Description: Colorless liquid with a chloroform-like odor.				
Chemical & Physical Properties: MW: 76.1 BP: 111°F Sol: 33% FLP(oc): -26°F IP: 10.00 eV Sp.Gr: 0.86 VP: 330 mmHg FRZ: -157°F UEL: 13.8% LEL: 2.2% Class IB Flammable Liquid	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R. Incompatibilities and Reactivities: Strong acids, alkalis & oxidizers [Note: Will attack some forms of plastic.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, muc memb; head; narco, coma; derm TO: Eyes, skin, resp sys, CNS, PNS		First Aid (see Table 6): Eye: Irr immed Skin: Soap wash Breath: Fresh air Swallow: Medical attention immed		

M

Methyl bromide	Formula: CH ₃ Br	CAS#: 74-83-9	RTECS#: PA4900000	IDLH: Ca [250 ppm]
Conversion: 1 ppm = 3.89 mg/m ³		DOT: 1062 123		
Synonyms/Trade Names: Bromomethane, Monobromomethane				
Exposure Limits: NIOSH REL: Ca See Appendix A OSHA PEL†: C 20 ppm (80 mg/m ³) [skin]			Measurement Methods (see Table 1): NIOSH 2520 OSHA PV2040	
Physical Description: Colorless gas with a chloroform-like odor at high concentrations. [Note: A liquid below 38°F. Shipped as a liquefied compressed gas.]				
Chemical & Physical Properties: MW: 95.0 BP: 38°F Sol: 2% Fl.P: NA (Gas) IP: 10.54 eV RGasD: 3.36 Sp.Gr: 1.73 (Liquid at 32°F) VP: 1.9 atm FRZ: -137°F UEL: 16.0% LEL: 10% Flammable Gas, but only in presence of a high energy ignition source.		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact (liquid) Eyes: Prevent eye contact (liquid) Wash skin: When contam (liquid) Remove: When wet (flamm) Change: N.R. Provide: Quick drench (liquid)		Respirator Recommendations (see Tables 3 and 4): NIOSH ✱: ScbaF: Pd,Pp/SaF: Pd,Pp: AScba Escape: GmFOv/ScbaE
		Incompatibilities and Reactivities: Aluminum, magnesium, strong oxidizers [Note: Attacks aluminum to form aluminum trimethyl, which is SPONTANEOUSLY flammable.]		
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs (liquid), Con (liquid) SY: Irrit eyes, skin, resp sys; musc weak, inco, vis dist, dizz; nau, vomit, head; mal; hand tremor; convuls; dysp; skin vesic; liquid: frostbite; [carc] TO: Eyes, skin, resp sys, CNS [in animals: lung, kidney & forestomach tumors]			First Aid (see Table 6): Eye: Irr immed (liquid) Skin: Water flush immed (liquid) Breath: Resp support	

Methyl Cellosolve®		Formula: CH ₃ OCH ₂ CH ₂ OH	CAS#: 109-86-4	RTECS#: KL5775000	IDLH: 200 ppm
Conversion: 1 ppm = 3.11 mg/m ³		DOT: 1188 127			
Synonyms/Trade Names: EGME, Ethylene glycol monomethyl ether, Glycol monomethyl ether, 2-Methoxyethanol					
Exposure Limits: NIOSH REL: TWA 0.1 ppm (0.3 mg/m ³) [skin] OSHA PEL: TWA 25 ppm (80 mg/m ³) [skin]				Measurement Methods (see Table 1): NIOSH 1403 OSHA 53, 79	
Physical Description: Colorless liquid with a mild, ether-like odor.					
Chemical & Physical Properties: MW: 76.1 BP: 256°F Sol: Miscible F.I.P: 102°F IP: 9.60 eV Sp.Gr: 0.96 VP: 6 mmHg FRZ: -121°F UEL: 14% LEL: 1.8% Class II Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Provide: Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH 1 ppm: Sa* 2.5 ppm: Sa:Cf* 5 ppm: ScbaF/SaF 100 ppm: Sa:Pd,Pp* 200 ppm: SaF:Pd,Pp §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers, caustics					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, nose, throat; head, drow, lass; ataxia, tremor; anemic pallor; in animals: repro, terato effects TO: Eyes, resp sys, CNS, blood, kidneys, repro sys, hemato sys			First Aid (see Table 6): Eye: Irr immed Skin: Water flush prompt Breath: Resp support Swallow: Medical attention immed		

M

Methyl Cellosolve® acetate		Formula: CH ₃ COOCH ₂ CH ₂ OCH ₃	CAS#: 110-49-6	RTECS#: KL5950000	IDLH: 200 ppm
Conversion: 1 ppm = 4.83 mg/m ³		DOT: 1189 129			
Synonyms/Trade Names: EGMEA, Ethylene glycol monomethyl ether acetate, Glycol monomethyl ether acetate, 2-Methoxyethyl acetate					
Exposure Limits: NIOSH REL: TWA 0.1 ppm (0.5 mg/m ³ [skin] OSHA PEL: TWA 25 ppm (120 mg/m ³ [skin]				Measurement Methods (see Table 1): NIOSH 1451 OSHA 53, 79	
Physical Description: Colorless liquid with a mild, ether-like odor.					
Chemical & Physical Properties: MW: 118.1 BP: 293°F Sol: Miscible F.I.P: 120°F IP: ? Sp.Gr: 1.01 VP: 2 mmHg FRZ: -85°F UEL: 8.2% LEL: 1.7% Class II Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R.		Respirator Recommendations (see Tables 3 and 4): NIOSH 1 ppm: Sa* 2.5 ppm: Sa:Cf* 5 ppm: ScbaF/SaF 100 ppm: Sa:Pd,Pp* 200 ppm: SaF:Pd,Pp §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Nitrates; strong oxidizers, alkalis & acids					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, nose, throat; kidney, brain damage; in animals: narco; repro, terato effects TO: Eyes, resp sys, kidneys, brain, CNS, PNS, repro sys, hemato sys				First Aid (see Table 6): Eye: Irr immed Skin: Water flush prompt Breath: Resp support Swallow: Medical attention immed	

Methyl chloride	Formula: CH ₃ Cl	CAS#: 74-87-3	RTECS#: PA6300000	IDLH: Ca [2000 ppm]
Conversion: 1 ppm = 2.07 mg/m ³		DOT: 1063 115		
Synonyms/Trade Names: Chloromethane, Monochloromethane				
Exposure Limits: NIOSH REL: Ca See Appendix A OSHA PEL†: TWA 100 ppm C 200 ppm 300 ppm (5-minute maximum peak in any 3 hours)			Measurement Methods (see Table 1): NIOSH 1001	
Physical Description: Colorless gas with a faint, sweet odor which is not noticeable at dangerous concentrations. [Note: Shipped as a liquefied compressed gas.]				
Chemical & Physical Properties: MW: 50.5 BP: -12°F Sol: 0.5% Fl.P: NA (Gas) IP: 11.28 eV RGasD: 1.78 VP: 5.0 atm FRZ: -144°F UEL: 17.4% LEL: 8.1% Flammable Gas		Personal Protection/Sanitation (see Table 2): Skin: Frostbite Eyes: Frostbite Wash skin: N.R. Remove: When wet (flamm) Change: N.R. Provide: Frostbite wash		Respirator Recommendations (see Tables 3 and 4): NIOSH ✱: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: ScbaE
Incompatibilities and Reactivities: Chemically-active metals such as potassium, powdered aluminum, zinc, and magnesium; water [Note: Reacts with water (hydrolyzes) to form hydrochloric acid.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con (liquid) SY: Dizz, nau, vomit; vis dist, stagger, slurred speech, convuls, coma; liver, kidney damage; liquid: frostbite; repro, terato effects; [carc] TO: CNS, liver, kidneys, repro sys [in animals: lung, kidney & forestomach tumors]			First Aid (see Table 6): Eye: Frostbite Skin: Frostbite Breath: Resp support	

M

Methyl chloroform	Formula: CH ₃ CCl ₃	CAS#: 71-55-6	RTECS#: KJ2975000	IDLH: 700 ppm
Conversion: 1 ppm = 5.46 mg/m ³		DOT: 2831 160		
Synonyms/Trade Names: Chloroethene; 1,1,1-Trichloroethane; 1,1,1-Trichloroethane (stabilized)				
Exposure Limits: NIOSH REL: C 350 ppm (1900 mg/m ³) [15-minute] See Appendix C (Chloroethanes) OSHA PEL†: TWA 350 ppm (1900 mg/m ³)			Measurement Methods (see Table 1): NIOSH 1003	
Physical Description: Colorless liquid with a mild, chloroform-like odor.				
Chemical & Physical Properties: MW: 133.4 BP: 165°F Sol: 0.4% F.L.P. : ? IP: 11.00 eV Sp.Gr: 1.34 VP: 100 mmHg FRZ: -23°F UEL: 12.5% LEL: 7.5% Combustible Liquid, but burns with difficulty.	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R.	Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 700 ppm: Sa*/ScbaF §: ScbaF: Pd,Pp/SaF: Pd,Pp: AScba Escape: GmFOv/ScbaE		
	Incompatibilities and Reactivities: Strong caustics; strong oxidizers; chemically-active metals such as zinc, aluminum, magnesium powders, sodium & potassium; water [Note: Reacts slowly with water to form hydrochloric acid.]			
	Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin; head, lass, CNS depres, poor equi; derm; card arrhy; liver damage TO: Eyes, skin, CNS, CVS, liver		First Aid (see Table 6): Eye: Irr immed Skin: Soap wash prompt Breath: Resp support Swallow: Medical attention immed	

Methyl-2-cyanoacrylate		Formula: CH ₂ =C(CN)COOCH ₃	CAS#: 137-05-3	RTECS#: AS7000000	IDLH: N.D.
Conversion: 1 ppm = 4.54 mg/m ³		DOT:			
Synonyms/Trade Names: Mecrylate, Methyl cyanoacrylate, Methyl α-cyanoacrylate, Methyl ester of 2-cyanoacrylic acid					
Exposure Limits: NIOSH REL: TWA 2 ppm (8 mg/m ³) ST 4 ppm (16 mg/m ³) OSHA PEL†: none				Measurement Methods (see Table 1): OSHA 55	
Physical Description: Colorless liquid with a characteristic odor.					
Chemical & Physical Properties: MW: 111.1 BP: ? Sol: 30% Fl.P: 174°F IP: ? Sp.Gr(81°F): 1.10 VP(77°F): 0.2 mmHg FRZ: ? UEL: ? LEL: ? Class IIIA Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: Daily Remove: N.R. Change: N.R. Provide: Eyewash		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Moisture [Note: Contact with moisture causes rapid polymerization.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, nose; blurred vision, lac; rhinitis TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Skin: Water wash Breath: Resp support Swallow: Medical attention immed		

M

Methylcyclohexane		Formula: CH ₃ C ₆ H ₁₁	CAS#: 108-87-2	RTECS#: GV6125000	IDLH: 1200 ppm [LEL]
Conversion: 1 ppm = 4.02 mg/m ³		DOT: 2296 128			
Synonyms/Trade Names: Cyclohexylmethane, Hexahydrotoluene					
Exposure Limits: NIOSH REL: TWA 400 ppm (1600 mg/m ³) OSHA PEL†: TWA 500 ppm (2000 mg/m ³)					Measurement Methods (see Table 1): NIOSH 1500 OSHA 7
Physical Description: Colorless liquid with a faint, benzene-like odor.					
Chemical & Physical Properties: MW: 98.2 BP: 214°F Sol: Insoluble Fl.P: 25°F IP: 9.85 eV Sp.Gr: 0.77 VP: 37 mmHg FRZ: -196°F UEL: 6.7% LEL: 1.2% Class IB Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R.		Respirator Recommendations (see Tables 3 and 4): NIOSH 1200 ppm: Sa/ScbaF §: ScbaF: Pd,Pp/SaF: Pd,Pp: AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, nose, throat; dizz, drow; in animals: narco TO: Eyes, skin, resp sys, CNS			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash prompt Breath: Resp support Swallow: Medical attention immed		

Methyl cyclopentadienyl manganese tricarbonyl (as Mn)		Formula: CH ₃ C ₅ H ₄ Mn(CO) ₃	CAS#: 12108-13-3	RTECS#: OP1450000	IDLH: N.D.
Conversion:		DOT:			
Synonyms/Trade Names: Cl-2, Combustion Improver-2, Manganese tricarbonylmethylcyclopentadienyl, 2-Methylcyclopentadienyl manganese tricarbonyl, MMT					
Exposure Limits: NIOSH REL: TWA 0.2 mg/m ³ [skin] OSHA PEL†: C 5 mg/m ³				Measurement Methods (see Table 1): None available	
Physical Description: Yellow to dark-orange liquid with a faint, pleasant odor. [Note: A solid below 36°F.]					
Chemical & Physical Properties: MW: 218.1 BP: 449°F Sol: Insoluble F.L.P: 230°F IP: ? Sp.Gr: 1.39 VP(212°F): 7 mmHg FRZ: 36°F UEL: ? LEL: ? Class IIIB Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R.		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Light (decomposes)					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes; dizz, nau, head; in animals: tremor, severe clonic spasms, lass, slow respiration; liver, kidney inj TO: Eyes, CNS, liver, kidneys			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed		

Methyl demeton		Formula: C ₆ H ₁₅ O ₃ PS ₂	CAS#: 8022-00-2	RTECS#: TG1760000	IDLH: N.D.
Conversion:		DOT:			
Synonyms/Trade Names: Demeton methyl; O,O-Dimethyl 2-ethylmercaptoethyl thiophosphate; Metasystox®; Methyl mercaptophos; Methyl systox®					
Exposure Limits: NIOSH REL: TWA 0.5 mg/m ³ [skin] OSHA PEL†: none				Measurement Methods (see Table 1): None available	
Physical Description: Oily, colorless to pale-yellow liquid with an unpleasant odor. [insecticide] [Note: Technical grade consists of 2 isomers: thiono & thiolo.]					
Chemical & Physical Properties: MW: 230.3 BP: Decomposes Sol: 0.03-0.3% F.P.? IP: ? Sp.Gr: 1.20 VP: 0.0004 mmHg FRZ: ? UEL: ? LEL: ? Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Strong oxidizers, alkalis, water					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin; ache eyes, rhin; nau, head, dizz, vomit TO: Eyes, skin, resp sys, CNS, CVS, blood chol			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed		

4,4'-Methylenebis(2-chloroaniline)		Formula: CH ₂ (C ₆ H ₄ ClNH ₂) ₂	CAS#: 101-14-4	RTECS#: CY1050000	IDLH: Ca [N.D.]
Conversion:		DOT:			
Synonyms/Trade Names: DACPM; 3,3'-Dichloro-4,4'-diaminodiphenylmethane; MBOCA; 4,4'-Methylenebis(o-chloro aniline); 4,4'-Methylenebis(2-chlorobenzenamine); MOCA					
Exposure Limits: NIOSH REL: Ca TWA 0.003 mg/m ³ [skin] See Appendix A OSHA PEL†: none				Measurement Methods (see Table 1): OSHA 24, 71	
Physical Description: Tan-colored pellets or flakes with a faint, amine-like odor.					
Chemical & Physical Properties: MW: 267.2 BP: ? Sol: Slight Fl.P: ? IP: ? Sp.Gr: 1.44 VP(77°F): 0.00001 mmHg MLT: 230°F UEL: ? LEL: ?		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam/Daily Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH ✱: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFOV100/ScbaE	
Incompatibilities and Reactivities: Chemically-active metals (e.g., potassium, sodium, magnesium, zinc)					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Hema, cyan, nau, methemo, kidney irrit; [carc] TO: Liver, blood, kidneys [in animals: liver, lung & bladder tumors]				First Aid (see Table 6): Eye: Irr immed Skin: Soap flush immed Breath: Resp support Swallow: Medical attention immed	

M

Methylene bis(4-cyclohexylisocyanate)		Formula: CH ₂ [(C ₆ H ₁₀)NCO] ₂	CAS#: 5124-30-1	RTECS#: NQ9250000	IDLH: N.D.
Conversion: 1 ppm = 10.73 mg/m ³		DOT:			
Synonyms/Trade Names: Dicyclohexylmethane 4,4'-diisocyanate; DMDI; bis(4-Isocyanatocyclohexyl)methane; HMDI; Hydrogenated MDI; Reduced MDI; Saturated MDI					
Exposure Limits: NIOSH REL: C 0.01 ppm (0.11 mg/m ³) OSHA PEL†: none				Measurement Methods (see Table 1): NIOSH 5525 OSHA PV2092	
Physical Description: Clear, colorless to light-yellow liquid.					
Chemical & Physical Properties: MW: 262.4 BP: ? Sol: Reacts Fl.P: >395°F IP: ? Sp.Gr(77°F): 1.07 VP(77°F): 0.001 mmHg FRZ: <14°F UEL: ? LEL: ? Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): Not available.
Incompatibilities and Reactivities: Organic materials, heat, flames, sunlight, trace contaminants [Note: A strong oxidizing agent. Pure MEKP is shock sensitive. Commercial product is diluted with 40% dimethyl phthalate, cyclohexane peroxide, or diallyl phthalate to reduce sensitivity to shock.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, nose, throat; cough, dysp, pulm edema; blurred vision; blisters, scars skin; abdom pain, vomit, diarr; derm; in animals: liver, kidney damage TO: Eyes, skin, resp sys, liver, kidneys			First Aid (see Table 6): Eye: Irr immed Skin: Water wash immed Breath: Resp support Swallow: Medical attention immed	

Methyl formate		Formula: HCOOCH ₃	CAS#: 107-31-3	RTECS#: LQ8925000	IDLH: 4500 ppm
Conversion: 1 ppm = 2.46 mg/m ³		DOT: 1243 129			
Synonyms/Trade Names: Methyl ester of formic acid, Methyl methanoate					
Exposure Limits: NIOSH REL: TWA 100 ppm (250 mg/m ³) ST 150 ppm (375 mg/m ³) OSHA PEL†: TWA 100 ppm (250 mg/m ³)				Measurement Methods (see Table 1): NIOSH S291 (II-5) OSHA PV2041	
Physical Description: Colorless liquid with a pleasant odor. [Note: A gas above 89°F.]					
Chemical & Physical Properties: MW: 60.1 BP: 89°F Sol: 30% F.L.P.: -2°F IP: 10.82 eV Sp.Gr: 0.98 VP: 476 mmHg FRZ: -148°F UEL: 23% LEL: 4.5% Class IA Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R.		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 1000 ppm: Sa* 2500 ppm: Sa:Cf* 4500 ppm: ScbaF/SaF §: ScbaF: Pd,Pp/SaF: Pd,Pp: AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers [Note: Reacts slowly with water to form methanol & formic acid.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, nose; chest tight, dysp; vis dist; CNS depres; in animals: pulm edema; narco TO: Eyes, resp sys, CNS				First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed	

5-Methyl-3-heptanone		Formula: C ₂ H ₅ COCH ₂ CH(CH ₃)CH ₂ CH ₃	CAS#: 541-85-5	RTECS#: MJ7350000	IDLH: 100 ppm
Conversion: 1 ppm = 5.24 mg/m ³		DOT: 2271 127			
Synonyms/Trade Names: Amyl ethyl ketone, Ethyl amyl ketone, 3-Methyl-5-heptanone					
Exposure Limits: NIOSH REL: TWA 25 ppm (130 mg/m ³) OSHA PEL: TWA 25 ppm (130 mg/m ³)				Measurement Methods (see Table 1): NIOSH 1301, 2553	
Physical Description: Colorless liquid with a pungent odor.					
Chemical & Physical Properties: MW: 128.2 BP: 315°F Sol: Insoluble F.L.P.: 138°F IP: ? Sp.Gr: 0.82 VP: 2 mmHg FRZ: -70°F UEL: ? LEL: ? Class II Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R.		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 100 ppm: CcrOv*/Paprv*/GmFOv/ Sa*/ScbaF §: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, muc memb; head; narco, coma; derm TO: Eyes, skin, resp sys, CNS				First Aid (see Table 6): Eye: Irr immed Skin: Water flush Breath: Resp support Swallow: Medical attention immed	

Methyl hydrazine		Formula: CH ₃ NNH ₂	CAS#: 60-34-4	RTECS#: MV5600000	IDLH: Ca [20 ppm]
Conversion: 1 ppm = 1.89 mg/m ³			DOT: 1244 131		
Synonyms/Trade Names: MMH, Monomethylhydrazine					
Exposure Limits: NIOSH REL: Ca C 0.04 ppm (0.08 mg/m ³) [2-hr] See Appendix A OSHA PEL: C 0.2 ppm (0.35 mg/m ³) [skin]				Measurement Methods (see Table 1): NIOSH 3510	
Physical Description: Fuming, colorless liquid with an ammonia-like odor.					
Chemical & Physical Properties: MW: 46.1 BP: 190°F Sol: Miscible Fl.P: 17°F IP: 8.00 eV Sp.Gr(77°F): 0.87 VP: 38 mmHg FRZ: -62°F UEL: 92% LEL: 2.5% Class IB Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R. Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH ✱: ScbaF: Pd, Pp/SaF: Pd, Pp/AScBa Escape: ScbaE	
		Incompatibilities and Reactivities: Oxides of iron; copper; manganese; lead; copper alloys; porous materials such as earth, asbestos, wood & cloth; strong oxidizers such as fluorine & chlorine; nitric acid; hydrogen peroxide			
		Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, resp sys; vomit, diarr, tremor, ataxia; anoxia, cyan; convuls; [carc] TO: Eyes, skin, resp sys, CNS, liver, blood, CVS [in animals: lung, liver, blood vessel & intestine tumors]			First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed

M

Methyl iodide		Formula: CH ₃ I	CAS#: 74-88-4	RTECS#: PA9450000	IDLH: Ca [100 ppm]
Conversion: 1 ppm = 5.80 mg/m ³			DOT: 2644 151		
Synonyms/Trade Names: Iodomethane, Monoiodomethane					
Exposure Limits: NIOSH REL: Ca TWA 2 ppm (10 mg/m ³) [skin] See Appendix A OSHA PEL: TWA 5 ppm (28 mg/m ³) [skin]				Measurement Methods (see Table 1): NIOSH 1014	
Physical Description: Colorless liquid with a pungent, ether-like odor. [Note: Turns yellow, red, or brown on exposure to light & moisture.]					
Chemical & Physical Properties: MW: 141.9 BP: 109°F Sol: 1% Fl.P: NA IP: 9.54 eV Sp.Gr: 2.28 VP: 400 mmHg FRZ: -88°F UEL: NA LEL: NA Noncombustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH ✱: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers [Note: Decomposes at 518°F.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, resp sys; nau, vomit; dizz, ataxia; slurred speech, drow; dermat; [carc] TO: Eyes, skin, resp sys, CNS [in animals: lung, kidney & forestomach tumors]			First Aid (see Table 6): Eye: Irr immed Skin: Soap flush immed Breath: Resp support Swallow: Medical attention immed		

Methyl isoamyl ketone		Formula: CH ₃ COCH ₂ CH ₂ CH(CH ₃) ₂	CAS#: 110-12-3	RTECS#: MP3850000	IDLH: N.D.
Conversion: 1 ppm = 4.67 mg/m ³		DOT: 2302 127			
Synonyms/Trade Names: Isoamyl methyl ketone, Isopentyl methyl ketone, 2-Methyl-5-hexanone, 5-Methyl-2-hexanone, MIAK					
Exposure Limits: NIOSH REL: TWA 50 ppm (240 mg/m ³) OSHA PEL†: TWA 100 ppm (475 mg/m ³)				Measurement Methods (see Table 1): OSHA PV2042	
Physical Description: Colorless, clear liquid with a pleasant, fruity odor.					
Chemical & Physical Properties: MW: 114.2 BP: 291°F Sol: 0.5% Fl.P: 97°F IP: 9.284 eV Sp.Gr: 0.81 VP: 5 mmHg FRZ: -101°F UEL(200°F): 8.2% LEL(200°F): 1.0% Class IC Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R.		Respirator Recommendations (see Tables 3 and 4): NIOSH 500 ppm: CcrOv*/Sa* 1250 ppm: Sa:Cf*/PaprOv* 2500 ppm: CcrFOv/GmFOv/PaprTOv*/ SaT:Cf*/ScbaF/SaF 5000 ppm: SaF:Pd,Pp §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Oxidizers					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, muc memb; head, narco, coma; derm; in animals: liver, kidney damage TO: Eyes, skin, resp sys, CNS, liver, kidneys			First Aid (see Table 6): Eye: Irr immed Skin: Soap flush prompt Breath: Resp support Swallow: Medical attention immed		

M

Methyl isobutyl carbinol		Formula: (CH ₃) ₂ CHCH ₂ CH(OH)CH ₃	CAS#: 108-11-2	RTECS#: SA7350000	IDLH: 400 ppm
Conversion: 1 ppm = 4.18 mg/m ³		DOT: 2053 129			
Synonyms/Trade Names: Isobutylmethylcarbinol, Methyl amyl alcohol, 4-Methyl-2-pentanol, MIBC					
Exposure Limits: NIOSH REL: TWA 25 ppm (100 mg/m ³) ST 40 ppm (165 mg/m ³) [skin] OSHA PEL†: TWA 25 ppm (100 mg/m ³) [skin]				Measurement Methods (see Table 1): NIOSH 1402, 1405 OSHA 7	
Physical Description: Colorless liquid with a mild odor.					
Chemical & Physical Properties: MW: 102.2 BP: 271°F Sol: 2% Fl.P: 106°F IP: ? Sp.Gr: 0.81 VP: 3 mmHg FRZ: -130°F UEL: 5.5% LEL: 1.0% Class II Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R.		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 250 ppm: Sa* 400 ppm: Sa:Cf*/ScbaF/SaF §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin; head, drow; derm; in animals: narco TO: Eyes, skin, CNS			First Aid (see Table 6): Eye: Irr immed Skin: Water flush prompt Breath: Resp support Swallow: Medical attention immed		

Methyl isocyanate	Formula: CH ₃ NCO	CAS#: 624-83-9	RTECS#: NQ9450000	IDLH: 3 ppm
Conversion: 1 ppm = 2.34 mg/m ³		DOT: 2480 155		
Synonyms/Trade Names: Methyl ester of isocyanic acid, MIC				
Exposure Limits: NIOSH REL: TWA 0.02 ppm (0.05 mg/m ³) [skin] OSHA PEL: TWA 0.02 ppm (0.05 mg/m ³) [skin]			Measurement Methods (see Table 1): OSHA 54	
Physical Description: Colorless liquid with a sharp, pungent odor.				
Chemical & Physical Properties: MW: 57.1 BP: 102-104°F Sol(59°F): 10% Fl.P: 19°F IP: 10.67 eV Sp.Gr: 0.96 VP: 348 mmHg FRZ: -49°F UEL: 26% LEL: 5.3% Class IB Flammable Liquid	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R. Provide: Eyewash Quick drench	Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 0.2 ppm: Sa* 0.5 ppm: Sa:Cf* 1 ppm: ScbaF/SaF 3 ppm: SaF:Pd,Pp S: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFOv/ScbaE		
Incompatibilities and Reactivities: Water, oxidizers, acids, alkalis, amines, iron, tin, copper [Note: Usually contains inhibitors to prevent polymerization.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, nose, throat; resp sens, cough, pulm secretions, chest pain, dysp; asthma; eye, skin damage; in animals: pulm edema TO: Eyes, skin, resp sys		First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed		

M

Methyl isopropyl ketone	Formula: CH ₃ COCH(CH ₃) ₂	CAS#: 563-80-4	RTECS#: EL9100000	IDLH: N.D.
Conversion: 1 ppm = 3.53 mg/m ³		DOT: 2397 127		
Synonyms/Trade Names: 2-Acetyl propane, Isopropyl methyl ketone, 3-Methyl-2-butanone, 3-Methyl butan-2-one, MIPK				
Exposure Limits: NIOSH REL: TWA 200 ppm (705 mg/m ³) OSHA PEL†: none			Measurement Methods (see Table 1): None available	
Physical Description: Colorless liquid with an acetone-like odor.				
Chemical & Physical Properties: MW: 86.2 BP: 199°F Sol: Very slight F.L.P: ? IP: 9.32 eV Sp.Gr: 0.81 VP: 42 mmHg FRZ: -134°F UEL: ? LEL: ? Combustible Liquid	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R.		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Oxidizers				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, muc memb, resp sys; cough TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed	

Methyl mercaptan		Formula: CH ₃ SH	CAS#: 74-93-1	RTECS#: PB4375000	IDLH: 150 ppm
Conversion: 1 ppm = 1.97 mg/m ³		DOT: 1064 117			
Synonyms/Trade Names: Mercaptomethane, Methanethiol, Methyl sulphydrate					
Exposure Limits: NIOSH REL: C 0.5 ppm (1 mg/m ³) [15-minute] OSHA PEL†: C 10 ppm (20 mg/m ³)				Measurement Methods (see Table 1): NIOSH 2542 OSHA 26	
Physical Description: Colorless gas with a disagreeable odor like garlic or rotten cabbage. [Note: A liquid below 43°F. Shipped as a liquefied compressed gas.]					
Chemical & Physical Properties: MW: 48.1 BP: 43°F Sol: 2% Fl.P: NA (Gas) (oc) 0°F (Liquid) IP: 9.44 eV RGasD: 1.66 Sp.Gr: 0.90 (Liquid at 32°F) VP: 1.7 atm FRZ: -186°F UEL: 21.8% LEL: 3.9% Flammable Gas		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact (liquid) Frostbite Eyes: Prevent eye contact (liquid) Frostbite Wash skin: N.R. Remove: When wet (flamm) Change: N.R. Provide: Eyewash (liquid) Quick drench (liquid) Frostbite wash		Respirator Recommendations (see Tables 3 and 4): NIOSH 5 ppm: CcrOv/Sa 12.5 ppm: Sa:Cf/PapRov 25 ppm: CcrFOv/GmFOv/PapRTOv/ SaT:Cf/ScbaF/SaF 150 ppm: Sa:Pd,Pp S: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers, bleaches, copper, aluminum, nickel-copper alloys					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con (liquid) SY: Irrit eyes, skin, resp sys; narco; cyan; convuls; liquid: frostbite TO: Eyes, skin, resp sys, CNS, blood				First Aid (see Table 6): Eye: Irr immed (liquid)/Frostbite Skin: Water flush immed (liquid)/Frostbite Breath: Resp support	

Methyl methacrylate		Formula: CH ₂ =C(CH ₃)COOCH ₃	CAS#: 80-62-6	RTECS#: OZ5075000	IDLH: 1000 ppm
Conversion: 1 ppm = 4.09 mg/m ³		DOT: 1247 129P (inhibited)			
Synonyms/Trade Names: Methacrylate monomer, Methyl ester of methacrylic acid, Methyl-2-methyl-2-propenoate					
Exposure Limits: NIOSH REL: TWA 100 ppm (410 mg/m ³) OSHA PEL: TWA 100 ppm (410 mg/m ³)				Measurement Methods (see Table 1): NIOSH 2537 OSHA 94	
Physical Description: Colorless liquid with an acrid, fruity odor.					
Chemical & Physical Properties: MW: 100.1 BP: 214°F Sol: 1.5% Fl.P(oc): 50°F IP: 9.70 eV Sp.Gr: 0.94 VP: 29 mmHg FRZ: -54°F UEL: 8.2% LEL: 1.7% Class IB Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R. Incompatibilities and Reactivities: Strong oxidizers				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: In animals: irrit eyes, nose, throat; anor, diarr, low-wgt; listlessness; liver, kidney damage TO: Eyes, resp sys, liver, kidneys		First Aid (see Table 6): Eye: Irr immed Breath: Resp support Swallow: Medical attention immed		

Molybdenum (soluble compounds, as Mo)	Formula:	CAS#:	RTECS#:	IDLH: 1000 mg/m ³ (as Mo)
Conversion:	DOT:			
Synonyms/Trade Names: Synonyms vary depending upon the specific soluble molybdenum compound.				
Exposure Limits: NIOSH REL: See Appendix D OSHA PEL: TWA 5 mg/m ³			Measurement Methods (see Table 1): NIOSH 7300, 7301, 7303, 9102 OSHA ID121, ID125G	
Physical Description: Appearance and odor vary depending upon the specific soluble molybdenum compound.				
Chemical & Physical Properties: Properties vary depending upon the specific soluble molybdenum compound.	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R.	Respirator Recommendations (see Tables 3 and 4): OSHA 25 mg/m³: Qm* 50 mg/m³: 95XQ*/Sa* 125 mg/m³: Sa:C*/Pap/Hie* 250 mg/m³: 100F/SaT:Cf*/PaprTHie*/ScbaF/SaF 1000 mg/m³: SaF:Pd,Pp §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScBa Escape: 100F/ScbaE		
Incompatibilities and Reactivities: Varies				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: In animals: irrit eyes, nose, throat; anor; inco; dysp; anemia TO: Eyes, resp sys, kidneys, blood		First Aid (see Table 6): Eye: Irr immed Skin: Water flush Breath: Resp support Swallow: Medical attention immed		

Monocrotophos	Formula: C ₇ H ₁₄ NO ₅ P	CAS#: 6923-22-4	RTECS#: TC4375000	IDLH: N.D.
Conversion:	DOT: 2783 152 (organophosphorus pesticide, solid)			
Synonyms/Trade Names: Azodrin®, 3-Hydroxy-N-methylcrotonamide dimethylphosphate, Monocron				
Exposure Limits: NIOSH REL: TWA 0.25 mg/m ³ OSHA PEL†: none			Measurement Methods (see Table 1): NIOSH 5600 OSHA PV2045	
Physical Description: Colorless to reddish-brown solid with a mild, ester odor. [insecticide]				
Chemical & Physical Properties: MW: 223.2 BP: 257°F Sol: Miscible FLP: >200°F IP: ? Sp.Gr: ? VP: 0.000007 mmHg MLT: 129°F UEL: ? LEL: ? Combustible Solid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily		Respirator Recommendations (see Tables 3 and 4): Not available.
Incompatibilities and Reactivities: Metals, low molecular weight alcohols & glycols [Note: Corrosive to black iron, drum steel, stainless steel 304 & brass. Should be stored at 70-80°F.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, miosis, blurred vision; dizz, convuls; dysp; salv, abdom cramps, nau, diarr, vomit; in animals: possible terato effects TO: Eyes, resp sys, CNS, CVS, blood chol, repro sys			First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed	

M

Monomethyl aniline		Formula: C ₆ H ₅ NHCH ₃	CAS#: 100-61-8	RTECS#: BY4550000	IDLH: 100 ppm
Conversion: 1 ppm = 4.38 mg/m ³		DOT: 2294 153			
Synonyms/Trade Names: MA, (Methylamino)benzene, N-Methyl aniline, Methylphenylamine, N-Phenylmethylamine					
Exposure Limits: NIOSH REL: TWA 0.5 ppm (2 mg/m ³) [skin] OSHA PEL†: TWA 2 ppm (9 mg/m ³) [skin]				Measurement Methods (see Table 1): NIOSH 3511	
Physical Description: Yellow to light-brown liquid with a weak, ammonia-like odor.					
Chemical & Physical Properties: MW: 107.2 BP: 384°F Sol: Insoluble FLP: 175°F IP: 7.32 eV Sp.Gr: 0.99 VP: 0.3 mmHg FRZ: -71°F UEL: ? LEL: ? Class IIIA Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R.		Respirator Recommendations (see Tables 3 and 4): NIOSH 5 ppm: Sa 12.5 ppm: Sa:Cf 25 ppm: SaT:Cf/ScbaF/SaF 100 ppm: SaF:Pd,Pp S: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFS/ScbaE	
Incompatibilities and Reactivities: Strong acids, strong oxidizers					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Lass, dizz, head; dysp, cyan; methemo; pulm edema; liver, kidney damage TO: Resp sys, liver, kidneys, blood, CNS				First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed	

Morpholine		Formula: C ₄ H ₉ ON	CAS#: 110-91-8	RTECS#: QD6475000	IDLH: 1400 ppm [10%LEL]
Conversion: 1 ppm = 3.56 mg/m ³		DOT: 2054 132			
Synonyms/Trade Names: Diethylene imidoxide; Diethylene oximide; Tetrahydro-1,4-oxazine; Tetrahydro-p-oxazine					
Exposure Limits: NIOSH REL: TWA 20 ppm (70 mg/m ³) [skin] ST 30 ppm (105 mg/m ³) OSHA PEL†: TWA 20 ppm (70 mg/m ³) [skin]					Measurement Methods (see Table 1): NIOSH S150 (II-3)
Physical Description: Colorless liquid with a weak, ammonia- or fish-like odor. [Note: A solid below 23°F.]					
Chemical & Physical Properties: MW: 87.1 BP: 264°F Sol: Miscible Fl.P(oc): 98°F IP: 8.88 eV Sp.Gr: 1.007 VP: 6 mmHg FRZ: 23°F UEL: 11.2% LEL: 1.4% Class IC Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R. Incompatibilities and Reactivities: Fluorine, combustible materials, ozone, NH ₃ , chlorinated hydrocarbons, metals, carbon disulfide [Note: Reacts with water to form nitric acid. Rapidly converted in air to nitrogen dioxide.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh SY: Irrit eyes, wet skin, nose, throat; drow, uncon; methemo TO: Eyes, skin, resp sys, blood, CNS			First Aid (see Table 6): Breath: Resp support	

p-Nitroaniline		Formula: NO ₂ C ₆ H ₄ NH ₂	CAS#: 100-01-6	RTECS#: BY7000000	IDLH: 300 mg/m ³
Conversion:		DOT: 1661 153			
Synonyms/Trade Names: para-Aminonitrobenzene, 4-Nitroaniline, 4-Nitrobenzenamine, p-Nitrophenylamine, PNA					
Exposure Limits: NIOSH REL: TWA 3 mg/m ³ [skin] OSHA PEL†: TWA 6 mg/m ³ (1 ppm) [skin]				Measurement Methods (see Table 1): NIOSH 5033	
Physical Description: Bright yellow, crystalline powder with a slight ammonia-like odor.					
Chemical & Physical Properties: MW: 138.1 BP: 630°F Sol: 0.08% F.I.P: 390°F IP: 8.85 eV Sp.Gr: 1.42 VP: 0.00002 mmHg MLT: 295°F UEL: ? LEL: ? Combustible Solid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam/Daily Remove: When wet or contam Change: Daily Provide: Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH 30 mg/m³: Sa* 75 mg/m³: Sa:Cf* 150 mg/m³: ScbaF/SaF 300 mg/m³: SaF:Pd,Pp §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFOv100/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers, strong reducers [Note: May result in spontaneous heating of organic materials in the presence of moisture.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit nose, throat; cyan, ataxia; tacar, tachypnea; dysp; irrity; vomit, diarr; convuls; resp arrest; anemia; methemo; jaundice TO: Resp sys, blood, heart, liver				First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed	

Nitrobenzene		Formula: C ₆ H ₅ NO ₂	CAS#: 98-95-3	RTECS#: DA6475000	IDLH: 200 ppm
Conversion: 1 ppm = 5.04 mg/m ³		DOT: 1662 152			
Synonyms/Trade Names: Essence of mirbane, Nitrobenzol, Oil of mirbane					
Exposure Limits: NIOSH REL: TWA 1 ppm (5 mg/m ³) [skin] OSHA PEL: TWA 1 ppm (5 mg/m ³) [skin]				Measurement Methods (see Table 1): NIOSH 2005, 2017	
Physical Description: Yellow, oily liquid with a pungent odor like paste shoe polish. [Note: A solid below 42°F.]					
Chemical & Physical Properties: MW: 123.1 BP: 411°F Sol: 0.2% F.I.P: 190°F IP: 9.92 eV Sp.Gr: 1.20 VP(77°F): 0.3 mmHg FRZ: 42°F UEL: ? LEL(200°F): 1.8% Class IIIA Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: N.R. Remove: When wet or contam Change: Daily Provide: Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 10 ppm: CcrOv*/Sa* 25 ppm: Sa:Cf*/PaprOv* 50 ppm: CcrFOv/GmFOv/PaprTOv*/ ScbaF/SaF 200 ppm: SaF:Pd,Pp §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Concentrated nitric acid, nitrogen tetroxide, caustics, phosphorus pentachloride, chemically-active metals such as tin or zinc					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin; anoxia; derm; anemia; methemo; in animals: liver, kidney damage; testicular effects TO: Eyes, skin, blood, liver, kidneys, CVS, repro sys			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed		

4-Nitrobiphenyl	Formula: C ₆ H ₅ C ₆ H ₄ NO ₂	CAS#: 92-93-3	RTECS#: DV5600000	IDLH: Ca [N.D.]
Conversion:	DOT:			
Synonyms/Trade Names: p-Nitrobiphenyl, p-Nitrodiphenyl, 4-Nitrodiphenyl, p-Phenylnitrobenzene, 4-Phenylnitrobenzene, PNB				
Exposure Limits: NIOSH REL: Ca See Appendix A OSHA PEL: [1910.1003] See Appendix B			Measurement Methods (see Table 1): NIOSH P&CAM273 (II-4) OSHA PV2082	
Physical Description: White to yellow, needle-like, crystalline solid with a sweetish odor.				
Chemical & Physical Properties: MW: 199.2 BP: 644°F Sol: Insoluble Fl.P: 290°F IP: ? Sp.Gr: ? VP: ? MLT: 237°F UEL: ? LEL: ? Combustible Solid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam/Daily Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH *: ScbaF: Pd,Pp/SaF: Pd,Pp:AScba Escape: 100F/ScbaE See Appendix E (page 351)
Incompatibilities and Reactivities: Strong reducers				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Head, drow, dizz; dysp; ataxia, lass; methemo; urinary burning; acute hemorrhagic cystitis; [carc] TO: Bladder, blood [in animals: bladder tumors]			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed	

N

p-Nitrochlorobenzene		Formula: ClC ₆ H ₄ NO ₂	CAS#: 100-00-5	RTECS#: CZ1050000	IDLH: Ca [100 mg/m ³]
Conversion:		DOT: 1578 152			
Synonyms/Trade Names: p-Chloronitrobenzene, 4-Chloronitrobenzene, 1-Chloro-4-nitrobenzene, 4-Nitrochlorobenzene, PCNB, PNCB					
Exposure Limits: NIOSH REL: Ca See Appendix A [skin] OSHA PEL: TWA 1 mg/m ³ [skin]				Measurement Methods (see Table 1): NIOSH 2005	
Physical Description: Yellow, crystalline solid with a sweet odor.					
Chemical & Physical Properties: MW: 157.6 BP: 468°F Sol: Slight Fl.P: 261°F IP: 9.96 eV Sp.Gr: 1.52 VP(86°F): 0.2 mmHg MLT: 182°F UEL: ? LEL: ? Solid that does not burn, or burns with difficulty.		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam/Daily Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH ✱: ScbaF: Pd, Pp/ SaF: Pd, Pp: AScba Escape: 100F/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers, alkalis					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Anoxia; unpleasant taste; anemia; methemo; in animals: hema; spleen, kidney, bone marrow changes; repro effects; [carc] TO: Blood, liver, kidneys, CVS, spleen, bone marrow, repro sys [in animals: vascular & liver tumors]				First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed	

Nitroethane		Formula: CH ₃ CH ₂ NO ₂	CAS#: 79-24-3	RTECS#: KI5600000	IDLH: 1000 ppm
Conversion: 1 ppm = 3.07 mg/m ³		DOT: 2842 129			
Synonyms/Trade Names: Nitroetan					
Exposure Limits: NIOSH REL: TWA 100 ppm (310 mg/m ³) OSHA PEL: TWA 100 ppm (310 mg/m ³)				Measurement Methods (see Table 1): NIOSH 2526	
Physical Description: Colorless, oily liquid with a mild, fruity odor.					
Chemical & Physical Properties: MW: 75.1 BP: 237°F Sol: 5% F.L.P.: 82°F IP: 10.88 eV Sp.Gr: 1.05 VP(77°F): 21 mmHg FRZ: -130°F UEL: ? LEL: 3.4% Class IC Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R.		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 1000 ppm: ScbaF/SaF \$: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: ScbaE	
Incompatibilities and Reactivities: Amines; strong acids, alkalis & oxidizers; hydrocarbons; combustibles; metal oxides					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Derm; in animals: lac; dysp, pulm rales, edema; liver, kidney inj; narco TO: Skin, resp sys, CNS, kidneys, liver				First Aid (see Table 6): Eye: Irr immed Skin: Soap wash prompt Breath: Resp support Swallow: Medical attention immed	
Nitrogen dioxide		Formula: NO ₂	CAS#: 10102-44-0	RTECS#: QW9800000	IDLH: 20 ppm
Conversion: 1 ppm = 1.88 mg/m ³		DOT: 1067 124			
Synonyms/Trade Names: Dinitrogen tetroxide (N ₂ O ₄), Nitrogen peroxide					
Exposure Limits: NIOSH REL: ST 1 ppm (1.8 mg/m ³) OSHA PEL †: C 5 ppm (9 mg/m ³)				Measurement Methods (see Table 1): NIOSH 6014 OSHA ID182	
Physical Description: Yellowish-brown liquid or reddish-brown gas (above 70°F) with a pungent, acid odor. [Note: In solid form (below 15°F) it is found structurally as N ₂ O ₄ .]					
Chemical & Physical Properties: MW: 46.0 BP: 70°F Sol: Reacts F.L.P.: NA IP: 9.75 eV RGasD: 2.62 Sp.Gr: 1.44 (Liquid at 68°F) VP: 720 mmHg FRZ: 15°F UEL: NA LEL: NA Noncombustible Liquid/Gas, but will accelerate the burning of combustible materials.		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH 20 ppm: Sa: Cff/ScbaF/SaF \$: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFS ₂ /ScbaE	
Incompatibilities and Reactivities: Combustible material, water, chlorinated hydrocarbons, carbon disulfide, ammonia [Note: Reacts with water to form nitric acid.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, nose, throat; cough, mucoid frothy sputum, decr pulm func, chronic bron, dysp; chest pain; pulm edema, cyan, tachypnea, tacar TO: Eyes, resp sys, CVS				First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed	

Nitrogen trifluoride	Formula: NF ₃	CAS#: 7783-54-2	RTECS#: QX1925000	IDLH: 1000 ppm	
Conversion: 1 ppm = 2.90 mg/m ³		DOT: 2451 122			
Synonyms/Trade Names: Nitrogen fluoride, Trifluorammine, Trifluorammonia					
Exposure Limits: NIOSH REL: TWA 10 ppm (29 mg/m ³) OSHA PEL: TWA 10 ppm (29 mg/m ³)			Measurement Methods (see Table 1): None available		
Physical Description: Colorless gas with a moldy odor. [Note: Shipped as a nonliquefied compressed gas.]					
Chemical & Physical Properties: MW: 71.0 BP: -200°F Sol: Slight F.L.P: NA IP: 12.97 eV RGasD: 2.46 VP: >1 atm FRZ: -340°F UEL: NA LEL: NA Nonflammable Gas		Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: N.R. Remove: N.R. Change: N.R.			Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 100 ppm: CcrS/Sa 250 ppm: Sa:Cf/PapRS 500 ppm: CcrFS/GmFS/PapRTS*/ SaT:C*/ScbaF/SaF 1000 ppm: SaF:Pd,Pp S: ScbaF:Pd,Pp/PaF:Pd,Pp:AScBa Escape: GmFS/ScbaE
Incompatibilities and Reactivities: Water, oil, grease, oxidizable materials, ammonia, carbon monoxide, methane, hydrogen, hydrogen sulfide, activated charcoal, diborane					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh SY: In animals: anoxia, cyan; methemo; lass, dizz, head; liver, kidney inj TO: Blood, liver, kidneys			First Aid (see Table 6): Breath: Resp support		

N

Nitroglycerine	Formula: CH ₂ NO ₃ CHNO ₃ CH ₂ NO ₃	CAS#: 55-63-0	RTECS#: QX2100000	IDLH: 75 mg/m ³
Conversion: 1 ppm = 9.29 mg/m ³	DOT: 1204 127 (≤ 1% solution in alcohol); 3064 127 (1-5% solution in alcohol)			
Synonyms/Trade Names: Glyceryl trinitrate; NG; 1,2,3-Propanetriol trinitrate; Trinitroglycerine				
Exposure Limits: NIOSH REL: ST 0.1 mg/m ³ [skin] OSHA PEL†: C 0.2 ppm (2 mg/m ³) [skin]			Measurement Methods (see Table 1): NIOSH 2507 OSHA 43	
Physical Description: Colorless to pale-yellow, viscous liquid or solid (below 56°F). [Note: An explosive ingredient in dynamite (20-40%) with ethylene glycol dinitrate (80-60%).]				
Chemical & Physical Properties: MW: 227.1 BP: Begins to decompose at 122-140°F Sol: 0.1% F.L.P: Explodes IP: ? Sp.Gr: 1.60 VP: 0.0003 mmHg FRZ: 56°F UEL: ? LEL: ? Physical Description: Crystalline solid with a weak, aromatic odor.				
Chemical & Physical Properties: MW: 137.1 BP: 460°F Sol: 0.04% FLP: 223°F IP: 9.50 eV Sp.Gr: 1.12 VP: 0.1 mmHg MLT: 126°F UEL: ? LEL: 1.6% Combustible Solid	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily	Respirator Recommendations (see Tables 3 and 4): NIOSH 20 ppm: Sa* 50 ppm: Sa:Cf* 100 ppm: SaT:Cf*/ScbaF/SaF 200 ppm: SaF:Pd,Pp §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFOv100/ScbaE		
Incompatibilities and Reactivities: Strong oxidizers, sulfuric acid				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Anoxia, cyan; head, lass, dizz; ataxia; dysp; tacar; nau, vomit TO: Blood, CNS, CVS, skin, GI tract		First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed		

Nitrous oxide		Formula: N ₂ O	CAS#: 10024-97-2	RTECS#: QX1350000	IDLH: N.D.
Conversion: 1 ppm = 1.80 mg/m ³		DOT: 1070 122; 2201 122 (refrigerated liquid)			
Synonyms/Trade Names: Dinitrogen monoxide, Hyponitrous acid anhydride, Laughing gas					
Exposure Limits: NIOSH REL*: TWA 25 ppm (46 mg/m ³) (TWA over the time exposed) [*Note: REL for exposure to waste anesthetic gas.] OSHA PEL: none				Measurement Methods (see Table 1): NIOSH 3800, 6600 OSHA ID166	
Physical Description: Colorless gas with a slightly sweet odor. [inhalation anesthetic] [Note: Shipped as a liquefied compressed gas.]					
Chemical & Physical Properties: MW: 44.0 BP: -127°F Sol(77°F): 0.1% F.I.P: NA IP: 12.89 eV RGasD: 1.53 VP: 51.3 atm FRZ: -132°F UEL: NA LEL: NA Nonflammable Gas, but supports combustion at elevated temperatures.		Personal Protection/Sanitation (see Table 2): Skin: Frostbite Eyes: Frostbite Wash skin: N.R. Remove: N.R. Change: N.R. Provide: Frostbite wash		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Aluminum, boron, hydrazine, lithium hydride, phosphine, sodium					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con (liquid) SY: Dysp; drow, head; asphy; repro effects; liquid: frostbite TO: Resp sys, CNS, repro sys			First Aid (see Table 6): Eye: Frostbite Skin: Frostbite Breath: Fresh air		

Nonane		Formula: CH ₃ (CH ₂) ₇ CH ₃	CAS#: 111-84-2	RTECS#: RA6115000	IDLH: N.D.
Conversion: 1 ppm = 5.25 mg/m ³			DOT: 1920 128		
Synonyms/Trade Names: n-Nonane, Nonyl hydride					
Exposure Limits: NIOSH REL: TWA 200 ppm (1050 mg/m ³) OSHA PEL†: none				Measurement Methods (see Table 1): None available	
Physical Description: Colorless liquid with a gasoline-like odor.					
Chemical & Physical Properties: MW: 128.3 BP: 303°F Sol: Insoluble F.I.P: 88°F IP: 10.21 eV Sp.Gr: 0.72 VP: 3 mmHg FRZ: -60°F UEL: 2.9% LEL: 0.8% Class IC Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: Prevent eye contact Wash skin: Daily Remove: When wet (flamm) Change: N.R. Provide: Eyewash		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Strong oxidizers (e.g., peroxides, nitrates, perchlorates)					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, nose, throat; head, drow, dizz, conf, nau, tremor, inco; chemical pneu (aspir liquid) TO: Eyes, skin, resp sys, CNS			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed		

1-Nonanethiol	Formula: CH ₃ (CH ₂) ₈ SH	CAS#: 1455-21-6	RTECS#:	IDLH: N.D.
Conversion: 1 ppm = 6.56 mg/m ³		DOT: 1228 131		
Synonyms/Trade Names: 1-Mercaptononane, n-Nonyl mercaptan, Nonylthiol				
Exposure Limits: NIOSH REL: C 0.5 ppm (3.3 mg/m ³) [15-minute] OSHA PEL: none			Measurement Methods (see Table 1): None available	
Physical Description: Liquid.				
Chemical & Physical Properties: MW: 160.3 BP: ? Sol: Insoluble F.I.P: ? IP: ? Sp.Gr: ? VP: ? FRZ: ? UEL: ? LEL: ? Combustible Liquid	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R.	Respirator Recommendations (see Tables 3 and 4): NIOSH 5 ppm: CcrOv/Sa 12.5 ppm: Sa:Cf/PapRov 25 ppm: CcrFov/GmFOv/PapTOv/ ScbaF/SaF \$: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFOv/ScbaE		
Incompatibilities and Reactivities: Oxidizers, reducing agents, strong acids & bases, alkali metals				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, nose, throat; lass, cyan, incr respiration, nau, drow, head, vomit TO: Eyes, skin, resp sys, blood, CNS		First Aid (see Table 6): Eye: Irr immed Skin: Soap wash Breath: Resp support Swallow: Medical attention immed		

Octachloronaphthalene	Formula: C ₁₀ Cl ₈	CAS#: 2234-13-1	RTECS#: QK0250000	IDLH: See Appendix F
Conversion:		DOT:		
Synonyms/Trade Names: Halowax® 1051; 1,2,3,4,5,6,7,8-Octachloronaphthalene; Perchloronaphthalene				
Exposure Limits: NIOSH REL: TWA 0.1 mg/m ³ ST 0.3 mg/m ³ [skin] OSHA PEL†: TWA 0.1 mg/m ³ [skin]			Measurement Methods (see Table 1): NIOSH S97 (II-2)	
Physical Description: Waxy, pale-yellow solid with an aromatic odor.				
Chemical & Physical Properties: MW: 403.7 BP: 770°F Sol: Insoluble F.I.P: NA IP: ? Sp.Gr: 2.00 VP: <1 mmHg MLT: 365°F UEL: NA LEL: NA Noncombustible Solid	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam/Daily Remove: When wet or contam Change: Daily	Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 1 mg/m ³ : Sa/ScbaF \$: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFOv100/ScbaE See Appendix F		
Incompatibilities and Reactivities: Strong oxidizers				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Acne-form derm; liver damage, jaun TO: Skin, liver		First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed		

1-Octadecanethiol		Formula: CH ₃ (CH ₂) ₁₇ SH	CAS#: 2885-00-9	RTECS#:	IDLH: N.D.
Conversion: 1 ppm = 11.72 mg/m ³		DOT: 1228 131 (liquid)			
Synonyms/Trade Names: 1-Mercaptotetradecane, Octadecyl mercaptan, Stearyl mercaptan					
Exposure Limits: NIOSH REL: C 0.5 ppm (5.9 mg/m ³) [15-minute] OSHA PEL: none				Measurement Methods (see Table 1): None available	
Physical Description: Solid or liquid (above 77°F).					
Chemical & Physical Properties: MW: 286.6 BP: ? Sol: Insoluble F.P.: ? IP: ? Sp.Gr: 0.85 VP: ? MLT: 77°F UEL: ? LEL: ? Combustible Solid Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily		Respirator Recommendations (see Tables 3 and 4): NIOSH 5 ppm: CcrOv/Sa 12.5 ppm: Sa:Cf/Paprov 25 ppm: CcrFov/GmFOv/PapTOv/ ScbaF/SaF §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Oxidizers, reducing agents, strong acids & bases, alkali metals					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, resp sys; head, dizz, lass, cyan, nau, convuls TO: Eyes, skin, resp sys, CNS, blood			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed		
Octane		Formula: CH ₃ [CH ₂] ₆ CH ₃	CAS#: 111-65-9	RTECS#: RG8400000	IDLH: 1000 ppm [10%LEL]
Conversion: 1 ppm = 4.67 mg/m ³		DOT: 1262 128			
Synonyms/Trade Names: n-Octane, normal-Octane					
Exposure Limits: NIOSH REL: TWA 75 ppm (350 mg/m ³) C 385 ppm (1800 mg/m ³) [15-minute] OSHA PEL†: TWA 500 ppm (2350 mg/m ³)				Measurement Methods (see Table 1): NIOSH 1500 OSHA 7	
Physical Description: Colorless liquid with a gasoline-like odor.					
Chemical & Physical Properties: MW: 114.2 BP: 258°F Sol(77°F): 0.00007% F.P.: 56°F IP: 9.82 eV Sp.Gr: 0.70 VP: 10 mmHg FRZ: -70°F UEL: 6.5% LEL: 1.0% Class IB Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R. Incompatibilities and Reactivities: None reported				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Irrit eyes, skin, resp sys TO: Eyes, skin, resp sys		First Aid (see Table 6): Skin: Soap wash Breath: Fresh air		

Osmium tetroxide		Formula: OsO ₄	CAS#: 20816-12-0	RTECS#: RN1140000	IDLH: 1 mg/m ³
Conversion: 1 ppm = 10.40 mg/m ³		DOT: 2471 154			
Synonyms/Trade Names: Osmic acid anhydride, Osmium oxide					
Exposure Limits: NIOSH REL: TWA 0.002 mg/m ³ (0.0002 ppm) ST 0.006 mg/m ³ (0.0006 ppm) OSHA PEL†: TWA 0.002 mg/m ³				Measurement Methods (see Table 1): None available	
Physical Description: Colorless, crystalline solid or pale-yellow mass with an unpleasant, acrid, chlorine-like odor. [Note: A liquid above 105°F.]					
Chemical & Physical Properties: MW: 254.2 BP: 266°F Sol(77°F): 6% F.P.: NA IP: 12.60 eV Sp.Gr: 5.10 VP: 7 mmHg MLT: 105°F UEL: NA LEL: NA Noncombustible Solid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily Provide: Eyewash		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 0.1 mg/m³: CcrFS100/GmFS100/ ScbaF/SaF 1 mg/m³: SaF: Pd, Pp §: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFS100/ScbaE	
Incompatibilities and Reactivities: Hydrochloric acid, easily oxidized organic materials [Note: Begins to sublime below BP. Contact with other materials may cause fire.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, resp sys; lac, vis dist; conj; head; cough, dysp; derm TO: Eyes, skin, resp sys				First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed	
Oxalic acid		Formula: HOCCOOH×2H ₂ O	CAS#: 144-62-7	RTECS#: RO2450000	IDLH: 500 mg/m ³
Conversion:		DOT:			
Synonyms/Trade Names: Ethanedioic acid, Oxalic acid (aqueous), Oxalic acid dihydrate					
Exposure Limits: NIOSH REL: TWA 1 mg/m ³ ST 2 mg/m ³ OSHA PEL†: TWA 1 mg/m ³				Measurement Methods (see Table 1): None available	
Physical Description: Colorless, odorless powder or granular solid. [Note: The anhydrous form (COOH) ₂ is an odorless, white solid.]					
Chemical & Physical Properties: MW: 126.1 BP: Sublimes Sol: 14% F.P.: ? IP: ? Sp.Gr: 1.90 VP: <0.001 mmHg MLT: 215°F (Sublimes) UEL: ? LEL: ? Combustible Solid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily Provide: Eyewash		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 25 mg/m³: Sa: CcFf/PapRHiEf 50 mg/m³: 100F/ScbaF/SaF 500 mg/m³: SaF: Pd, Pp §: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: 100F/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers, silver compounds, strong alkalis, chlorites [Note: Gives off water of crystallization at 215°F and begins to sublime.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, muc memb; eye burns; local pain, cyan; shock, collapse, convuls; kidney damage TO: Eyes, skin, resp sys, kidneys				First Aid (see Table 6): Eye: Irr immed Skin: Water flush prompt Breath: Resp support Swallow: Medical attention immed	

Oxygen difluoride	Formula: OF ₂	CAS#: 7783-41-7	RTECS#: RS2100000	IDLH: 0.5 ppm
Conversion: 1 ppm = 2.21 mg/m ³		DOT: 2190 124		
Synonyms/Trade Names: Difluorine monoxide, Fluorine monoxide, Oxygen fluoride				
Exposure Limits: NIOSH REL: C 0.05 ppm (0.1 mg/m ³) OSHA PEL†: TWA 0.05 ppm (0.1 mg/m ³)			Measurement Methods (see Table 1): None available	
Physical Description: Colorless gas with a peculiar, foul odor. [Note: Shipped as a nonliquefied compressed gas.]				
Chemical & Physical Properties: MW: 54.0 BP: -230°F Sol: 0.02% Fl.P: NA IP: 13.11 eV RGasD: 1.88 VP: >1 atm FRZ: -371°F UEL: NA LEL: NA Nonflammable Gas, but a strong oxidizer. Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 0.5 ppm: Sa/ScbaF §: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFS ₂ /ScbaE		
Incompatibilities and Reactivities: Combustible materials, chlorine, bromine, iodine, platinum, metal oxides, moist air, hydrogen sulfide, hydrocarbons, water [Note: Reacts very slowly with water to form hydrofluoric acid.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Irrit eyes, skin, resp sys; head; pulm edema; eye, skin burns (from contact with the gas under pressure) TO: Eyes, skin, resp sys		First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support		

O

Ozone	Formula: O ₃	CAS#: 10028-15-6	RTECS#: RS8225000	IDLH: 5 ppm
Conversion: 1 ppm = 1.96 mg/m ³	DOT:			
Synonyms/Trade Names: Triatomic oxygen				
Exposure Limits: NIOSH REL: C 0.1 ppm (0.2 mg/m ³) OSHA PEL†: TWA 0.1 ppm (0.2 mg/m ³)			Measurement Methods (see Table 1): OSHA ID214	
Physical Description: Colorless to blue gas with a very pungent odor.				
Chemical & Physical Properties: MW: 48.0 BP: -169°F Sol(32°F): 0.001% Fl.P: NA IP: 12.52 eV RGasD: 1.66 VP: >1 atm FRZ: -315°F UEL: NA LEL: NA Nonflammable Gas, but a powerful oxidizer.	Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: N.R. Remove: N.R. Change: N.R.	Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 1 ppm: CcrS ₂ /Sa 2.5 ppm: Sa:Cf/PapRS ₂ 5 ppm: CcrFS ₂ /GmFS ₂ /SaT:Cf/ScbaF/SaF §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFS ₂ /ScbaE		
Incompatibilities and Reactivities: All oxidizable materials (both organic & inorganic)				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Irrit eyes, muc memb; pulm edema; chronic resp disease TO: Eyes, resp sys			First Aid (see Table 6): Eye: Medical attention Breath: Fresh air; 100% O ₂	

Paraffin wax fume	Formula: C _n H _{2n+2}	CAS#: 8002-74-2	RTECS#: RV0350000	IDLH: N.D.
Conversion:	DOT:			
Synonyms/Trade Names: Paraffin fume, Paraffin scale fume				
Exposure Limits: NIOSH REL: TWA 2 mg/m ³ OSHA PEL†: none			Measurement Methods (see Table 1): OSHA PV2047	
Physical Description: Paraffin wax is a white to slightly yellowish, odorless solid. [Note: Consists of a mixture of high molecular weight hydrocarbons (e.g., C ₃₆ H ₇₄).]				
Chemical & Physical Properties: MW: 350-420 BP: ? Sol: Insoluble Fl.P: 390°F IP: ? Sp.Gr: 0.88-0.92 VP: ? MLT: 115-154°F UEL: ? LEL: ? Combustible Solid		Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: Prevent eye contact Wash skin: N.R. Remove: N.R. Change: N.R.		
		Respirator Recommendations (see Tables 3 and 4): Not available.		
Incompatibilities and Reactivities: None reported				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Irrit eyes, skin, resp sys; discomfort, nau TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Breath: Resp support	

P

Paraquat (Paraquat dichloride)	Formula: $CH_3(C_5H_4N)_2CH_3 \cdot 2Cl$	CAS#: 1910-42-5	RTECS#: DW2275000	IDLH: 1 mg/m ³
Conversion:	DOT:			
Synonyms/Trade Names: 1,1'-Dimethyl-4,4'-bipyridinium dichloride; N,N'-Dimethyl-4,4'-bipyridinium dichloride; Paraquat chloride; Paraquat dichloride [Note: Paraquat is a cation ($C_{12}H_{14}N_2^{2+}$; 1,1-Dimethyl-4,4-bipyridinium ion); the commercial product is the dichloride salt of paraquat.]				
Exposure Limits: NIOSH REL: TWA 0.1 mg/m ³ (resp) [skin] OSHA PEL†: TWA 0.5 mg/m ³ (resp) [skin]			Measurement Methods (see Table 1): NIOSH 5003	
Physical Description: Yellow solid with a faint, ammonia-like odor. [herbicide] [Note: Paraquat may also be found commercially as a methyl sulfate salt $C_{12}H_{14}N_2 \cdot 2CH_3SO_4$.]				
Chemical & Physical Properties: MW: 257.2 BP: Decomposes Sol: Miscible Fl.P: NA IP: ? Sp.Gr: 1.24 VP: <0.0000001 mmHg MLT: 572°F (Decomposes) UEL: NA LEL: NA Noncombustible Solid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Incompatibilities and Reactivities: Strong oxidizers, alkaline materials				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, resp sys; miosis; rhin; head: chest tight, wheez, lar spasm, salv, cyan; anor, nau, vomit, abdom cramps, diarr; sweat; musc fasc, lass, para; dizz, conf, ataxia; convuls, coma; low BP; card irreg TO: Eyes, skin, resp sys, CNS, CVS, blood chol			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed	

Particulates not otherwise regulated		Formula:	CAS#:	RTECS#:	IDLH: N.D.
Conversion:		DOT:			
Synonyms/Trade Names: "Inert" dusts, Nuisance dusts, PNOR [Note: Includes all inert or nuisance dusts, whether mineral, inorganic, not listed specifically in 1910.1000.]					
Exposure Limits: NIOSH REL: See Appendix D OSHA PEL: TWA 15 mg/m ³ (total) TWA 5 mg/m ³ (resp)				Measurement Methods (see Table 1): NIOSH 0500, 0600	
Physical Description: Dusts from solid substances without specific occupational exposure standards.					
Chemical & Physical Properties: Properties vary depending upon the specific solid.		Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: N.R. Remove: N.R. Change: N.R.		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Varies					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Irrit eyes, skin, throat, upper resp sys TO: Eyes, skin, resp sys				First Aid (see Table 6): Eye: Irr immed Breath: Fresh air	

Pentaborane		Formula: B ₅ H ₉	CAS#: 19624-22-7	RTECS#: RY8925000	IDLH: 1 ppm
Conversion: 1 ppm = 2.58 mg/m ³		DOT: 1380 135			
Synonyms/Trade Names: Pentaboron nonahydride					
Exposure Limits: NIOSH REL: TWA 0.005 ppm (0.01 mg/m ³) ST 0.015 ppm (0.03 mg/m ³) OSHA PEL†: TWA 0.005 ppm (0.01 mg/m ³)				Measurement Methods (see Table 1): None available	
Physical Description: Colorless liquid with a pungent odor like sour milk.					
Chemical & Physical Properties: MW: 63.1 BP: 140°F Sol: Reacts FLP: 86°F IP: 9.90 eV Sp.Gr: 0.62 VP: 171 mmHg FRZ: -52°F UEL: ? LEL: 0.42% Class IC Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R. Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 0.05 ppm: Sa 0.125 ppm: Sa:Cf 0.25 ppm: SaT:Cf/ScbaF/SaF 1 ppm: Sa:Pd,Pp §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFS/ScbaE	
Incompatibilities and Reactivities: Oxidizers, halogens, water, halogenated hydrocarbons [Note: May ignite SPONTANEOUSLY in moist air. Corrosive to natural rubber. Hydrolyzes slowly with heat in water to form boric acid.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin; dizz, head, drow, inco, tremor, convuls, behavioral changes; tonic spasm face, neck, abdom, limbs TO: Eyes, skin, CNS			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed		

P

Pentachloroethane		Formula: CHCl ₂ CCl ₃	CAS#: 76-01-7	RTECS#: KI6300000	IDLH: N.D.
Conversion:		DOT: 1669 151			
Synonyms/Trade Names: Ethane pentachloride, Pentalin					
Exposure Limits: NIOSH REL: Handle with care in the workplace. See Appendix C (Chloroethanes) OSHA PEL: none				Measurement Methods (see Table 1): NIOSH 2517	
Physical Description: Colorless liquid with a sweetish, chloroform-like odor.					
Chemical & Physical Properties: MW: 202.3 BP: 322°F Sol: 0.05% F.L.P. ? IP: 11.28 eV Sp.Gr: 1.68 VP: 3 mmHg FRZ: -20°F UEL: ? LEL: ? Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: (Sodium-potassium alloy + bromoform), alkalis, metals, water [Note: Hydrolysis produces dichloroacetic acid. Reaction with alkalis & metals produces spontaneously explosive chloroacetylenes.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: In animals: irrit eyes, skin; lass, restless, irreg respiration, musc inco; liver, kidney, lung changes TO: Eyes, skin, resp sys, CNS, liver, kidneys			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash Breath: Resp support Swallow: Medical attention immed		

Pentachloronaphthalene		Formula: C ₁₀ H ₃ Cl ₅	CAS#: 1321-64-8	RTECS#: QK0300000	IDLH: See Appendix F
Conversion:		DOT:			
Synonyms/Trade Names: Halowax® 1013; 1,2,3,4,5-Pentachloronaphthalene					
Exposure Limits: NIOSH REL: TWA 0.5 mg/m ³ [skin] OSHA PEL: TWA 0.5 mg/m ³ [skin]				Measurement Methods (see Table 1): NIOSH S96 (II-2)	
Physical Description: Pale-yellow or white solid or powder with an aromatic odor.					
Chemical & Physical Properties: MW: 300.4 BP: 636°F Sol: Insoluble FLP: NA IP: ? Sp.Gr: 1.67 VP: <1 mmHg MLT: 248°F UEL: NA LEL: NA Noncombustible Solid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 5 mg/m³: Sa*/ScbaF \$: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFOv100/ScbaE See Appendix F	
Incompatibilities and Reactivities: Strong oxidizers					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Head, lass, dizz, anor; pruritus, acne-form skin eruptions; jaun, liver nec TO: Skin, liver, CNS			First Aid (see Table 6): Eye: Irr immed Skin: Soap prompt/molten flush immed Breath: Resp support Swallow: Medical Attention immed		

Pentachlorophenol	Formula: C ₆ Cl ₅ OH	CAS#: 87-86-5	RTECS#: SM6300000	IDLH: 2.5 mg/m ³
Conversion:	DOT: 3155 154			
Synonyms/Trade Names: PCP; Penta; 2,3,4,5,6-Pentachlorophenol				
Exposure Limits: NIOSH REL: TWA 0.5 mg/m ³ [skin] OSHA PEL: TWA 0.5 mg/m ³ [skin]			Measurement Methods (see Table 1): NIOSH 5512	
Physical Description: Colorless to white, crystalline solid with a benzene-like odor. [fungicide]				
Chemical & Physical Properties: MW: 266.4 BP: 588°F (Decomposes) Sol: 0.001% Fl.P: NA IP: NA Sp.Gr: 1.98 VP(77°F): 0.0001 mmHg MLT: 374°F UEL: NA LEL: NA Noncombustible Solid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 2.5 mg/m³: CcrOv95*/PapOvHie*/ Sa*/ScbaF \$: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFOv100/ScbaE
Incompatibilities and Reactivities: Strong oxidizers, acids, alkalis				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, nose, throat; sneez, cough; lass, anor, low-wgt; sweat; head, dizz; nau, vomit; dysp, chest pain; high fever; derm TO: Eyes, skin, resp sys, CVS, liver, kidneys, CNS			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed	

P

Pentaerythritol		Formula: C(CH ₂ OH) ₄	CAS#: 115-77-5	RTECS#: RZ2490000	IDLH: N.D.
Conversion:		DOT:			
Synonyms/Trade Names: 2,2-bis(Hydroxymethyl)-1,3-propanediol; Methane tetramethylol; Monopentaerythritol; PE; Tetrahydroxymethylolmethane; Tetramethylolmethane					
Exposure Limits: NIOSH REL: TWA 10 mg/m ³ (total) TWA 5 mg/m ³ (resp) OSHA PEL†: TWA 15 mg/m ³ (total) TWA 5 mg/m ³ (resp)				Measurement Methods (see Table 1): NIOSH 0500, 0600	
Physical Description: Colorless to white, crystalline, odorless powder. [Note: Technical grade is 88% monopentaerythritol & 12% dipentaerythritol.]					
Chemical & Physical Properties: MW: 136.2 BP: Sublimes Sol(59°F): 6% Fl.P.? IP? Sp.Gr: 1.38 VP: 0.00000008 mmHg MLT: 500°F (Sublimes) UEL? LEL? Conversion: 1 ppm = 6.96 mg/m ³		DOT:			
Synonyms/Trade Names: Diphenyl ether, Diphenyl oxide, Phenoxy benzene, Phenyl oxide					
Exposure Limits: NIOSH REL: TWA 1 ppm (7 mg/m ³) OSHA PEL: TWA 1 ppm (7 mg/m ³)				Measurement Methods (see Table 1): NIOSH 1617 OSHA PV2022	
Physical Description: Colorless, crystalline solid or liquid (above 82°F) with a geranium-like odor.					
Chemical & Physical Properties: MW: 170.2 BP: 498°F Sol: Insoluble F.L.P: 239°F IP: 8.09 eV Sp.Gr: 1.08 VP(77°F): 0.02 mmHg MLT: 82°F UEL: 6.0% LEL: 0.7% Combustible Solid Class IIIB Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R.		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 25 ppm: Sa:Cf£/PapOvHie£ 50 ppm: CcrFOv100/GmFOv100/ ScbaF/SaF 100 ppm: SaF:Pd,Pp \$: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFOv100/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Irrit eyes, nose, skin; nau TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash prompt Breath: Resp support		

P

Phenyl ether-biphenyl mixture (vapor)		Formula: C ₆ H ₅ OC ₆ H ₅ /C ₆ H ₅ C ₆ H ₅	CAS#: 8004-13-5	RTECS#: DV1500000	IDLH: 10 ppm
Conversion: 1 ppm = 6.79 mg/m ³ (approx)		DOT:			
Synonyms/Trade Names: Diphenyl oxide-diphenyl mixture, Dowtherm® A					
Exposure Limits: NIOSH REL: TWA 1 ppm (7 mg/m ³) OSHA PEL: TWA 1 ppm (7 mg/m ³)				Measurement Methods (see Table 1): NIOSH 2013	
Physical Description: Colorless to straw-colored liquid or solid (below 54°F) with a disagreeable, aromatic odor. [Note: A mixture typically contains 75% phenyl ether & 25% biphenyl.]					
Chemical & Physical Properties: MW: 166 (approx) BP: 495°F Sol: Insoluble FLP: 239°F IP: ? Sp.Gr(77°F): 1.06 VP(77°F): 0.08 mmHg FRZ: 54°F UEL: ? LEL: ? Class IIIB Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R.		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 10 ppm: Sa:CfE/CcrFOv100/GmFOv100/ PaprOvHieL/ScbaF/SaF S: ScbaF: Pd,Pp/SaF: Pd,Pp:AScba Escape: GmFOv100/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Irrit eyes, nose, skin; nau TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash prompt Breath: Resp support		

P

Phenyl glycidyl ether		Formula: C ₉ H ₁₀ O ₂	CAS#: 122-60-1	RTECS#: TZ3675000	IDLH: Ca [100 ppm]
Conversion: 1 ppm = 6.14 mg/m ³		DOT:			
Synonyms/Trade Names: 1,2-Epoxy-3-phenoxy propane; Glycidyl phenyl ether; PGE; Phenyl 2,3-epoxypropyl ether					
Exposure Limits: NIOSH REL: Ca C 1 ppm (6 mg/m ³) [15-minute] See Appendix A OSHA PEL†: TWA 10 ppm (60 mg/m ³)				Measurement Methods (see Table 1): NIOSH 1619 OSHA 7	
Physical Description: Colorless liquid. [Note: A solid below 38°F.]					
Chemical & Physical Properties: MW: 150.1 BP: 473°F Sol: 0.2% F.L.P: 248°F IP: ? Sp.Gr: 1.11 VP: 0.01 mmHg FRZ: 38°F UEL: ? LEL: ? Class IIIB Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH ✱: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFov/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers, amines, strong acids, strong bases					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin; upper resp sys; skin sens; narco; possible hemato, repro effects; [carc] TO: Eyes, skin, CNS, hemato sys, repro sys [in animals: nasal cancer]				First Aid (see Table 6): Eye: Irr immed Skin: Soap wash prompt Breath: Resp support Swallow: Medical attention immed	

Phenylhydrazine		Formula: C ₆ H ₅ NNH ₂	CAS#: 100-63-0	RTECS#: MV8925000	IDLH: Ca [15 ppm]
Conversion: 1 ppm = 4.42 mg/m ³		DOT: 2572 153			
Synonyms/Trade Names: Hydrazinobenzene, Monophenylhydrazine					
Exposure Limits: NIOSH REL: Ca C 0.14 ppm (0.6 mg/m ³) [2-hr] [skin] See Appendix A OSHA PEL†: TWA 5 ppm (22 mg/m ³) [skin]				Measurement Methods (see Table 1): NIOSH 3518	
Physical Description: Colorless to pale-yellow liquid or solid (below 67°F) with a faint, aromatic odor.					
Chemical & Physical Properties: MW: 108.1 BP: 470°F (Decomposes) Sol: Slight Fl.P: 190°F IP: 7.64 eV Sp.Gr: 1.10 VP(77°F): 0.04 mmHg FRZ: 67°F UEL: ? LEL: ? Class IIIA Combustible Liquid Combustible Solid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam/Daily Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH ✖: ScbaF: Pd,Pp/SaF: Pd,Pp: AScba Escape: ScbaE	
Incompatibilities and Reactivities: Strong oxidizers, lead dioxide					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Skin sens, hemolytic anemia, dysp, cyan; jaun; kidney damage; vascular thrombosis; [carc] TO: Blood, resp sys, liver, kidneys, skin [in animals: tumors of the lungs, liver, blood vessels & intestine]			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed		

N-Phenyl-β-naphthylamine		Formula: C ₁₀ H ₇ NHC ₆ H ₅	CAS#: 135-88-6	RTECS#: QM4550000	IDLH: Ca [N.D.]
Conversion:		DOT:			
Synonyms/Trade Names: 2-Anilidonaphthalene, β-Naphthylphenylamine, PBNA, 2-Phenylaminonaphthalene, Phenyl-β-naphthylamine					
Exposure Limits: NIOSH REL: Ca* See Appendix A [*Note: Since metabolized to β-Naphthylamine.] OSHA PEL: none				Measurement Methods (see Table 1): OSHA 96	
Physical Description: White to yellow crystals or gray to tan flakes or powder. [Note: Commercial product may contain 20-30 ppm of β-Naphthylamine.]					
Chemical & Physical Properties: MW: 219.3 BP: 743°F Sol: Insoluble Fl.P: ? IP: ? Sp.Gr: 1.24 VP: ? MLT: 226°F UEL: ? LEL: ? Combustible Solid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam/Daily Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH ✖: ScbaF: Pd, Pp/ SaF: Pd, Pp: AScba Escape: GmF Ov100/ ScbaE	
		Incompatibilities and Reactivities: Oxidizers			
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irritation; leucoplakia; acne, hypersensitivity to sunlight; [carc] TO: Eyes, skin, bladder [bladder cancer]			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed		

Phenylphosphine	Formula: C ₆ H ₅ PH ₂	CAS#: 638-21-1	RTECS#: SZ2100000	IDLH: N.D.
Conversion: 1 ppm = 4.50 mg/m ³		DOT:		
Synonyms/Trade Names: Fenylfosfin, PF, Phosphaniline				
Exposure Limits: NIOSH REL: C 0.05 ppm (0.25 mg/m ³) OSHA PEL†: none			Measurement Methods (see Table 1): None available	
Physical Description: Clear, colorless liquid with a foul odor.				
Chemical & Physical Properties: MW: 110.1 BP: 320°F Sol: Insoluble FLP: ? IP: ? Sp.Gr(59°F): 1.001 VP: ? FRZ: ? UEL: ? LEL: ? Combustible Liquid	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: Daily Remove: When wet or contam Change: N.R.		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: None reported [Note: Spontaneously combustible in high concentrations in air. Potential exposure to gaseous PF when polyphosphinates are heated above 392°F.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: In animals: blood changes, anemia, testicular degeneration; loss of appetite, diarr, lac, hind leg tremor; derm TO: Blood, CNS, skin, repro sys			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash Breath: Resp support Swallow: Medical attention immed	

P

Phorate	Formula: (C ₂ H ₅ O) ₂ P(S)SCH ₂ SC ₂ H ₅	CAS#: 298-02-2	RTECS#: TD9450000	IDLH: N.D.
Conversion:	DOT: 3018 152 (organophosphorus pesticide, liquid, toxic)			
Synonyms/Trade Names: O,O-Diethyl S-(ethylthio)methylphosphorodithioate; O,O-Diethyl S-ethylthiomethylthionophosphate; Thimet; Timet				
Exposure Limits: NIOSH REL: TWA 0.05 mg/m ³ ST 0.2 mg/m ³ [skin] OSHA PEL†: none			Measurement Methods (see Table 1): NIOSH 5600	
Physical Description: Clear liquid with a skunk-like odor. [insecticide]				
Chemical & Physical Properties: MW: 260.4 BP: ? Sol: 0.005% FLP(oc): 320°F IP: ? Sp.Gr(77°F): 1.16 VP: 0.0008 mmHg FRZ: -45°F UEL: ? LEL: ? Class IIIB Combustible Liquid, but does not readily ignite.		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): Not available.
Incompatibilities and Reactivities: Water, alkalis [Note: Hydrolyzed in the presence of moisture and by alkalis.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, resp sys; miosis; rhin; head; chest tight, wheez, lar spasm, salv, cyan; anor, nau, vomit, abdom cramps, diarr; sweat; musc fasc, lass, para; dizz, conf, ataxia; convuls, coma; low BP; card irreg TO: Eyes, skin, resp sys, CNS, CVS, blood chol			First Aid (see Table 6): Eye: Irr immed Skin: Soap flush immed Breath: Resp support Swallow: Medical attention immed	

Phosdrin	Formula: C ₇ H ₁₃ PO ₆	CAS#: 7786-34-7	RTECS#: GQ5250000	IDLH: 4 ppm
Conversion: 1 ppm = 9.17 mg/m ³		DOT: 2783 152		
Synonyms/Trade Names: 2-Carbomethoxy-1-methylvinyl dimethyl phosphate, Mevinphos [Note: Commercial product is a mixture of the cis- & trans-isomers.]				
Exposure Limits: NIOSH REL: TWA 0.01 ppm (0.1 mg/m ³) [skin] ST 0.03 ppm (0.3 mg/m ³) OSHA PEL†: TWA 0.1 mg/m ³ [skin]			Measurement Methods (see Table 1): NIOSH 5600	
Physical Description: Pale-yellow to orange liquid with a weak odor. [Note: Insecticide that may be absorbed on a dry carrier.]				
Chemical & Physical Properties: MW: 224.2 BP: Decomposes Sol: Miscible FLP(oc): 347°F IP: ? Sp.Gr: 1.25 VP: 0.003 mmHg FRZ: 44°F (trans-) 70°F (cis-) UEL: ? LEL: ? Class IIIB Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Incompatibilities and Reactivities: Strong oxidizers [Note: Corrosive to cast iron, some stainless steels & brass.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, resp sys; miosis; rhin; head; chest tight, wheez, lar spasm, salv, cyan; anor, nau, vomit, abdom cramps, diarr; para; ataxia, convuls; low BP, card irreg TO: Eyes, skin, resp sys, CNS, CVS, blood chol			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed	

P

Phosgene	Formula: COCl ₂	CAS#: 75-44-5	RTECS#: SY5600000	IDLH: 2 ppm
Conversion: 1 ppm = 4.05 mg/m ³		DOT: 1076 125		
Synonyms/Trade Names: Carbon oxychloride, Carbonyl chloride, Carbonyl dichloride, Chloroformyl chloride				
Exposure Limits: NIOSH REL: TWA 0.1 ppm (0.4 mg/m ³) C 0.2 ppm (0.8 mg/m ³) [15-minute] OSHA PEL: TWA 0.1 ppm (0.4 mg/m ³)			Measurement Methods (see Table 1): OSHA 61	
Physical Description: Colorless gas with a suffocating odor like musty hay. [Note: A fuming liquid below 47°F. Shipped as a liquefied compressed gas.]				
Chemical & Physical Properties: MW: 98.9 BP: 47°F Sol: Slight FLP: NA IP: 11.55 eV RGasD: 3.48 Sp.Gr: 1.43 (Liquid at 32°F) VP: 1.6 atm FRZ: -198°F UEL: NA LEL: NA Nonflammable Gas				
Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact (liquid) Eyes: Prevent eye contact (liquid) Wash skin: When contam (liquid) Remove: When wet or contam (liquid) Change: N.R. Provide: Quick drench (liquid)			Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 1 ppm: Sa* 2 ppm: ScbaF/SaF §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFS/ScbaE	
Incompatibilities and Reactivities: Moisture, alkalis, ammonia, alcohols, copper [Note: Reacts slowly in water to form hydrochloric acid & carbon dioxide.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con (liquid) SY: Irrit eyes; dry burning throat; vomit; cough, foamy sputum, dysp, chest pain, cyan; liquid: frostbite TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed (liquid) Skin: Water flush immed (liquid) Breath: Resp support	

Phosphine		Formula: PH ₃	CAS#: 7803-51-2	RTECS#: SY7525000	IDLH: 50 ppm
Conversion: 1 ppm = 1.39 mg/m ³		DOT: 2199 119			
Synonyms/Trade Names: Hydrogen phosphide, Phosphorated hydrogen, Phosphorus hydride, Phosphorus trihydride					
Exposure Limits: NIOSH REL: TWA 0.3 ppm (0.4 mg/m ³) ST 1 ppm (1 mg/m ³) OSHA PEL†: TWA 0.3 ppm (0.4 mg/m ³)				Measurement Methods (see Table 1): OSHA 1003, ID180	
Physical Description: Colorless gas with a fish- or garlic-like odor. [pesticide] [Note: Shipped as a liquefied compressed gas. Pure compound is odorless.]					
Chemical & Physical Properties: MW: 34.0 BP: -126°F Sol: Slight F.L.P: NA (Gas) IP: 9.96 eV R.GasD: 1.18 VP: 41.3 atm FRZ: -209°F UEL: ? LEL: 1.79% Flammable Gas		Personal Protection/Sanitation (see Table 2): Skin: Frostbite Eyes: Frostbite Wash skin: N.R. Remove: When wet (flamm) Change: N.R. Provide: Frostbite wash		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 3 ppm: Sa 7.5 ppm: Sa:Cf 15 ppm: GmFS/ScbaF/SaF 50 ppm: Sa:Pd,Pp §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFS/ScbaE	
Incompatibilities and Reactivities: Air, oxidizers, chlorine, acids, moisture, halogenated hydrocarbons, copper [Note: May ignite SPONTANEOUSLY on contact with air.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con (liquid) SY: Nau, vomit, abdom pain, diarr; thirst; chest tight, dysp; musc pain, chills; stupor or syncope; pulm edema; liquid: frostbite TO: Resp sys			First Aid (see Table 6): Eye: Frostbite Skin: Frostbite Breath: Resp support		

P

Phosphoric acid		Formula: H ₃ PO ₄	CAS#: 7664-38-2	RTECS#: TB6300000	IDLH: 1000 mg/m ³
Conversion:		DOT: 1805 154 (liquid or solution); 3453 154 (solid)			
Synonyms/Trade Names: Orthophosphoric acid, Phosphoric acid (aqueous), White phosphoric acid					
Exposure Limits: NIOSH REL: TWA 1 mg/m ³ ST 3 mg/m ³ OSHA PEL†: TWA 1 mg/m ³				Measurement Methods (see Table 1): NIOSH 7903 OSHA ID165SG	
Physical Description: Thick, colorless, odorless, crystalline solid. [Note: Often used in an aqueous solution.]					
Chemical & Physical Properties: MW: 98.0 BP: 415°F Sol: Miscible F.L.P: NA IP: ? Sp.Gr(77°F): 1.87 (pure) 1.33 (50% solution) VP: 0.03 mmHg MLT: 108°F UEL: NA LEL: NA Noncombustible Solid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily Provide: Eyewash (>1.6%) Quick drench (>1.6%)		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 25 mg/m³: Sa:Cf* 50 mg/m³: 100F/ScbaF/SaF 1000 mg/m³: SaF:Pd,Pp §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: 100F/ScbaE	
Incompatibilities and Reactivities: Strong caustics, most metals [Note: Readily reacts with metals to form flammable hydrogen gas. DO NOT MIX WITH SOLUTIONS CONTAINING BLEACH OR AMMONIA.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, upper resp sys; eye, skin, burns; derm TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Skin: Water flush Immed Breath: Resp support Swallow: Medical attention immed		

Phosphorus (yellow)		Formula: P ₄	CAS#: 7723-14-0	RTECS#: TH3500000	IDLH: 5 mg/m ³
Conversion:		DOT: 1381 136			
Synonyms/Trade Names: Elemental phosphorus, White phosphorus					
Exposure Limits: NIOSH REL: TWA 0.1 mg/m ³ OSHA PEL: TWA 0.1 mg/m ³				Measurement Methods (see Table 1): NIOSH 7905	
Physical Description: White to yellow, soft, waxy solid with acrid fumes in air. [Note: Usually shipped or stored in water.]					
Chemical & Physical Properties: MW: 124.0 BP: 536°F Sol: 0.0003% FLP: ? IP: ? Sp.Gr: 1.82 VP: 0.03 mmHg MLT: 111°F UEL: ? LEL: ? Flammable Solid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact* [* Note: Flame retardant personal protective equipment should be provided.] Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench			
		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 1 mg/m³: Sa 2.5 mg/m³: Sa,CfE 5 mg/m³: ScbaF/SaF S: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: ScbaE			
Incompatibilities and Reactivities: Air, oxidizers (including elemental sulfur & strong caustics), halogens [Note: Ignites SPONTANEOUSLY in moist air.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, resp tract; eye, skin burns; abdom pain, nau, jaun; anemia; cachexia; dental pain, salv, jaw pain, swell TO: Eyes, skin, resp sys, liver, kidneys, jaw, teeth, blood			First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed		

Phosphorus oxychloride		Formula: POCl ₃	CAS#: 10025-87-3	RTECS#: TH4897000	IDLH: N.D.
Conversion: 1 ppm = 6.27 mg/m ³		DOT: 1810 137			
Synonyms/Trade Names: Phosphorus chloride, Phosphorus oxytrichloride, Phosphoryl chloride					
Exposure Limits: NIOSH REL: TWA 0.1 ppm (0.6 mg/m ³) ST 0.5 ppm (3 mg/m ³) OSHA PEL†: none				Measurement Methods (see Table 1): None available	
Physical Description: Clear, colorless to yellow, oily liquid with a pungent & musty odor. [Note: A solid below 34°F.]					
Chemical & Physical Properties: MW: 153.3 BP: 222°F Sol: Decomposes Fl.P: NA IP: ? Sp.Gr(77°F): 1.65 VP(81°F): 40 mmHg FRZ: 34°F UEL: NA LEL: NA Noncombustible Liquid, but may set fire to combustible materials. Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Provide: Eyewash Quick drench	Respirator Recommendations (see Tables 3 and 4): NIOSH 10 ppm: ScaBa/SaF 25 ppm: SaF,Pd,Pp §: ScaBa:Pd,Pp/SaF:Pd,Pp:AScBa Escape: GmFS ₂ /ScaBE		
	Incompatibilities and Reactivities: Water, chemically-active metals such as sodium & potassium, aluminum, strong nitric acid, acetic acid, organic matter [Note: Hydrolyzes in water to form hydrochloric acid and phosphoric acid.]			
	Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, nose, throat; pulm edema; eye, skin burns TO: Eyes, skin, resp sys		First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed	

Phthalic anhydride		Formula: C ₈ H ₄ (CO) ₂ O	CAS#: 85-44-9	RTECS#: TI3150000	IDLH: 60 mg/m ³
Conversion: 1 ppm = 6.06 mg/m ³		DOT: 2214 156			
Synonyms/Trade Names: 1,2-Benzenedicarboxylic anhydride; PAN; Phthalic acid anhydride					
Exposure Limits: NIOSH REL: TWA 6 mg/m ³ (1 ppm) OSHA PEL†: TWA 12 mg/m ³ (2 ppm)				Measurement Methods (see Table 1): NIOSH S179 (II-3) OSHA 90	
Physical Description: White solid (flake) or a clear, colorless, mobile liquid (molten) with a characteristic, acrid odor.					
Chemical & Physical Properties: MW: 148.1 BP: 563°F Sol: 0.6% Fl.P: 305°F IP: 10.00 eV Sp.Gr: 1.53 (Flake) 1.20 (Molten) VP: 0.0015 mmHg MLT: 267°F UEL: 10.5% LEL: 1.7% Combustible Solid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily		Respirator Recommendations (see Tables 3 and 4): NIOSH 30 mg/m³: Qm* 60 mg/m³: 95XQ*/95F/PapRHe*/ Sa*/ScbaF §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: 100F/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers, water [Note: Converted to phthalic acid in hot water.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, upper resp sys; conj; nasal ulcer bleeding; bron, bronchial asthma; dermat; in animals: liver, kidney damage TO: Eyes, skin, resp sys, liver, kidneys			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash prompt Breath: Resp support Swallow: Medical attention immed		

m-Phthalodinitrile	Formula: C ₆ H ₄ (CN) ₂	CAS#: 626-17-5	RTECS#: CZ1900000	IDLH: N.D.
Conversion:	DOT:			
Synonyms/Trade Names: 1,3-Benzenedicarbonitrile; m-Dicyanobenzene; 1,3-Dicyanobenzene; Isophthalodinitrile; m-PDN				
Exposure Limits: NIOSH REL: TWA 5 mg/m ³ OSHA PEL†: none			Measurement Methods (see Table 1): None available	
Physical Description: Needle-like, colorless to white, crystalline, flaky solid with an almond-like odor.				
Chemical & Physical Properties: MW: 128.1 BP: Sublimes Sol: Slight F.I.P.: ? IP: ? Sp.Gr: 4.42 VP: 0.01 mmHg MLT: 324°F (Sublimes) UEL: ? LEL: ? Combustible Solid and a severe explosion hazard.	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: Daily Remove: When wet or contam Change: Daily		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Strong oxidizers (e.g., chlorine, bromine, fluorine)				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Head, nau, conf; in animals: irrit eyes, skin TO: Eyes, skin, CNS			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed	

P

Picloram	Formula: C ₆ H ₃ Cl ₃ O ₂ N ₂	CAS#: 1918-02-1	RTECS#: TJ7525000	IDLH: N.D.
Conversion:	DOT:			
Synonyms/Trade Names: 4-Amino-3,5,6-trichloropicolinic acid; 4-Amino-3,5,6-trichloro-2-picolinic acid; ATCP; Tordon®				
Exposure Limits: NIOSH REL: See Appendix D OSHA PEL†: TWA 15 mg/m ³ (total) TWA 5 mg/m ³ (resp)			Measurement Methods (see Table 1): NIOSH 0500, 0600	
Physical Description: Colorless to white crystals with a chlorine-like odor. [herbicide]				
Chemical & Physical Properties: MW: 241.5 BP: Decomposes Sol: 0.04% F.I.P.: ? IP: ? Sp.Gr: ? VP(95°F): 0.0000006 mmHg MLT: 424°F (Decomposes) UEL: ? LEL: ? Combustible Solid	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: N.R. Change: Daily		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Hot concentrated alkali (hydrolyzes)				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, resp sys; nau; in animals: liver, kidney changes TO: Eyes, skin, resp sys, liver, kidneys			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash Breath: Fresh air Swallow: Medical attention immed	

Picric acid	Formula: (NO ₂) ₃ C ₆ H ₂ OH	CAS#: 88-89-1	RTECS#: TJ7875000	IDLH: 75 mg/m ³
Conversion: 1 ppm = 9.37 mg/m ³	DOT: 1344 113 (wet, ≥ 10% water); 3364 113 (wetted, ≥ 10% water)			
Synonyms/Trade Names: Phenol trinitrate; 2,4,6-Trinitrophenol [Note: An OSHA Class A Explosive (1910.109).]				
Exposure Limits: NIOSH REL: TWA 0.1 mg/m ³ ST 0.3 mg/m ³ [skin] OSHA PEL: TWA 0.1 mg/m ³ [skin]			Measurement Methods (see Table 1): NIOSH S228 (II-4)	
Physical Description: Yellow, odorless solid. [Note: Usually used as an aqueous solution.]				
Chemical & Physical Properties: MW: 229.1 BP: Explodes above 572°F Sol: 1% FLP: 302°F IP: ? Sp.Gr: 1.76 VP(383°F): 1 mmHg MLT: 252°F UEL: ? LEL: ? Combustible Solid	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam/Daily Remove: When wet or contam Change: Daily	Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 0.5 mg/m³: Qm 1 mg/m³: 95XQ/Sa 2.5 mg/m³: Sa:Cf/PaprHie 5 mg/m³: 100F/SaT:Cf/PaprTHie/ ScbaF/SaF 75 mg/m³: SaF:Pd,Pp §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: 100F/ScbaE		
Incompatibilities and Reactivities: Copper, lead, zinc & other metals; salts; plaster; concrete; ammonia [Note: Corrosive to metals. An explosive mixture results when the aqueous solution crystallizes.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin; sens derm; yellow-stained hair, skin; lass, myalgia, anuria, polyuria; bitter taste, GI dist; hepatitis, hema, album, neph TO: Eyes, skin, kidneys, liver, blood			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash prompt Breath: Resp support Swallow: Medical attention immed	

Pindone	Formula: C ₉ H ₅ O ₂ C(O)C(CH ₃) ₃	CAS#: 83-26-1	RTECS#: NK6300000	IDLH: 100 mg/m ³
Conversion:	DOT:			
Synonyms/Trade Names: tert-Butyl valone; 1,3-Dioxo-2-pivaloyl-lindane; Pival®; Pivalyl; 2-Pivalyl-1,3-indandione				
Exposure Limits: NIOSH REL: TWA 0.1 mg/m ³ OSHA PEL: TWA 0.1 mg/m ³			Measurement Methods (see Table 1): None available	
Physical Description: Bright-yellow powder with almost no odor. [rodenticide]				
Chemical & Physical Properties: MW: 230.3 BP: Decomposes Sol(77°F): 0.002% FLP: ? IP: ? Sp.Gr: 1.06 VP: Very low MLT: 230°F UEL: ? LEL: ?	Personal Protection/Sanitation (see Table 2): Skin: N.R. Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit skin, muc memb; CNS depres; in animals: liver, kidney damage TO: Skin, resp sys, CNS, liver, kidneys			First Aid (see Table 6): Eye: Irr immed Skin: Water flush prompt Breath: Resp support Swallow: Medical attention immed	

β-Propiolactone	Formula: C ₃ H ₄ O ₂	CAS#: 57-57-8	RTECS#: RQ7350000	IDLH: Ca [N.D.]
Conversion:		DOT:		
Synonyms/Trade Names: BPL; Hydroacrylic acid, β-lactone; 3-Hydroxy-β-lactone; 3-Hydroxy-propionic acid; β-Lactone; 2-Oxetanone; 3-Propiolactone				
Exposure Limits: NIOSH REL: Ca See Appendix A OSHA PEL: [1910.1013] See Appendix B			Measurement Methods (see Table 1): None available	
Physical Description: Colorless liquid with a slightly sweet odor.				
Chemical & Physical Properties: MW: 72.1 BP: 323°F (Decomposes) Sol: 37% Fl.P: 165°F IP: ? Sp.Gr: 1.15 VP(77°F): 3 mmHg FRZ: -28°F UEL: ? LEL: 2.9% Class IIIA Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam/Daily Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH ✱: ScbaF: Pd, Pp/ SaF: Pd, Pp: AScba Escape: GmFOv/ScbaE See Appendix E (page 351)
Incompatibilities and Reactivities: Acetates, halogens, thiocyanates, thiosulfates [Note: May polymerize upon storage.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Skin irrit, blistering, burns; corn opac; frequent urination; dysuria; hema; [carc] TO: Kidneys, skin, lungs, eyes [in animals: tumors of the liver, skin & stomach]			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed	

Propionic acid	Formula: CH ₃ CH ₂ COOH	CAS#: 79-09-4	RTECS#: UE5950000	IDLH: N.D.
Conversion: 1 ppm = 3.03 mg/m ³		DOT: 1848 132		
Synonyms/Trade Names: Carboxyethane, Ethanecarboxylic acid, Ethylformic acid, Metacetonio acid, Methyl acetic acid, Propanoic acid				
Exposure Limits: NIOSH REL: TWA 10 ppm (30 mg/m ³) ST 15 ppm (45 mg/m ³) OSHA PEL†: none			Measurement Methods (see Table 1): None available	
Physical Description: Colorless, oily liquid with a pungent, disagreeable, rancid odor. [Note: A solid below 5°F.]				
Chemical & Physical Properties: MW: 74.1 BP: 286°F Sol: Miscible F.I.P.: 126°F IP: 10.24 eV Sp.Gr: 0.99 VP: 3 mmHg FRZ: 5°F UEL: 12.1% LEL: 2.9% Class II Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): Not available.
Incompatibilities and Reactivities: Alkalis, strong oxidizers (e.g., chromium trioxide) [Note: Corrosive to steel.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, nose, throat; blurred vision, corn burns; skin burns; abdom pain, nau, vomit TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed	

P

Propionitrile		Formula: CH ₃ CH ₂ CN	CAS#: 107-12-0	RTECS#: UF9625000	IDLH: N.D.
Conversion: 1 ppm = 2.25 mg/m ³		DOT: 2404 131			
Synonyms/Trade Names: Cyanoethane, Ethyl cyanide, Propanenitrile, Propionic nitrile, Propiononitrile					
Exposure Limits: NIOSH REL: TWA 6 ppm (14 mg/m ³) OSHA PEL: none				Measurement Methods (see Table 1): NIOSH 1606 (adapt)	
Physical Description: Colorless liquid with a pleasant, sweetish, ethereal odor. [Note: Forms cyanide in the body.]					
Chemical & Physical Properties: MW: 55.1 BP: 207°F Sol: 11.9% F.I.P: 36°F IP: 11.84 eV Sp.Gr: 0.78 VP: 35 mmHg FRZ: -133°F UEL: ? LEL: 3.1% Class IB Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Provide: Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH 60 ppm: CcrOv/Sa 150 ppm: Sa:Cf/PapRov 300 ppm: CcrFOv/GmFOv/PapRTOv/ScbaF/SaF 1000 ppm: SaF:Pd,Pp §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers & reducing agents, strong acids & bases [Note: Hydrogen cyanide is produced when propionitrile is heated to decomposition.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, resp sys; nau, vomit; chest pain; lass; stupor, convuls; in animals: liver, kidney damage TO: Eyes, skin, resp sys, CVS, CNS, liver, kidneys			First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed		

Propoxur	Formula: CH ₃ NHCOOC ₆ H ₄ OCH(CH ₃) ₂	CAS#: 114-26-1	RTECS#: FC3150000	IDLH: N.D.
Conversion:	DOT:			
Synonyms/Trade Names: Aprocarb®, o-Isopropoxyphenyl-N-methylcarbamate, N-Methyl-2-isopropoxyphenyl-carbamate				
Exposure Limits: NIOSH REL: TWA 0.5 mg/m ³ OSHA PEL†: none			Measurement Methods (see Table 1): NIOSH 5601 OSHA PV2007	
Physical Description: White to tan, crystalline powder with a faint, characteristic odor. [insecticide]				
Chemical & Physical Properties: MW: 209.3 BP: Decomposes Sol: 0.2% F.L.P.: >300°F IP: ? Sp.Gr.: ? VP: 0.000007 mmHg MLT: 187-197°F UEL: ? LEL: ? Class IIIB Combustible Liquid	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: Daily Remove: When wet or contam Change: Daily		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Strong oxidizers, alkalis [Note: Emits highly toxic methyl isocyanate fumes when heated to decomposition.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Miosis, blurred vision; sweat, saliv; abdom cramps, nau, diarr, vomit; head, lass, musc twitch TO: CNS, liver, kidneys, GI tract, blood chol			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed	

n-Propyl acetate		Formula: CH ₃ COOCH ₂ CH ₂ CH ₃	CAS#: 109-60-4	RTECS#: AJ3675000	IDLH: 1700 ppm
Conversion: 1 ppm = 4.18 mg/m ³		DOT: 1276 129			
Synonyms/Trade Names: Propylacetate, n-Propyl ester of acetic acid					
Exposure Limits: NIOSH REL: TWA 200 ppm (840 mg/m ³) ST 250 ppm (1050 mg/m ³) OSHA PEL†: TWA 200 ppm (840 mg/m ³)				Measurement Methods (see Table 1): NIOSH 1450 OSHA 7	
Physical Description: Colorless liquid with a mild, fruity odor.					
Chemical & Physical Properties: MW: 102.2 BP: 215°F Sol: 2% Fl.P: 55°F IP: 10.04 eV Sp.Gr: 0.84 VP: 25 mmHg FRZ: -134°F UEL: 8% LEL(100°F): 1.7% Class IB Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R.		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 1700 ppm: Sa:CfE/CcrFOv/GmFOv/ PapOvE/ScbaF/SaF §: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Nitrates; strong oxidizers, alkalis & acids					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: In animals: irrit eyes, nose, throat; narco; derm TO: Eyes, skin, resp sys, CNS			First Aid (see Table 6): Eye: Irr immed Skin: Water flush prompt Breath: Resp support Swallow: Medical attention immed		

P

n-Propyl alcohol		Formula: CH ₃ CH ₂ CH ₂ OH	CAS#: 71-23-8	RTECS#: UH8225000	IDLH: 800 ppm
Conversion: 1 ppm = 2.46 mg/m ³		DOT: 1274 129			
Synonyms/Trade Names: Ethyl carbinol, 1-Propanol, n-Propanol, Propyl alcohol					
Exposure Limits: NIOSH REL: TWA 200 ppm (500 mg/m ³) [skin] ST 250 ppm (625 mg/m ³) OSHA PEL†: TWA 200 ppm (500 mg/m ³)				Measurement Methods (see Table 1): NIOSH 1401, 1405 OSHA 7	
Physical Description: Colorless liquid with a mild, alcohol-like odor.					
Chemical & Physical Properties: MW: 60.1 BP: 207°F Sol: Miscible Fl.P: 72°F IP: 10.15 eV Sp.Gr: 0.81 VP: 15 mmHg FRZ: -196°F UEL: 13.7% LEL: 2.2% Class IB Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R. Incompatibilities and Reactivities: Strong oxidizers					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, nose, throat; dry cracking skin; drow, head; ataxia, GI pain; abdom cramps, nau, vomit, diarr; in animals: narco TO: Eyes, skin, resp sys, GI tract, CNS			First Aid (see Table 6): Eye: Irr immed Skin: Water flush Breath: Resp support Swallow: Medical attention immed		

P

Propylene dichloride		Formula: CH ₂ CHClCH ₂ Cl	CAS#: 78-87-5	RTECS#: TX9625000	IDLH: Ca [400 ppm]
Conversion: 1 ppm = 4.62 mg/m ³		DOT: 1279 130			
Synonyms/Trade Names: Dichloro-1,2-propane; 1,2-Dichloropropane					
Exposure Limits: NIOSH REL: Ca See Appendix A OSHA PEL†: TWA 75 ppm (350 mg/m ³)				Measurement Methods (see Table 1): NIOSH 1013 OSHA 7	
Physical Description: Colorless liquid with a chloroform-like odor. [pesticide]					
Chemical & Physical Properties: MW: 113.0 BP: 206°F Sol: 0.3% Fl.P: 60°F IP: 10.87 eV Sp.Gr: 1.16 VP: 40 mmHg FRZ: -149°F UEL: 14.5% LEL: 3.4% Class IB Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet (flamm) Change: N.R. Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH ✱: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFOv/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers, strong acids, active metals					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, resp sys; drow, dizz; liver, kidney damage; in animals: CNS depres; [carc] TO: Eyes, skin, resp sys, liver, kidneys, CNS [in animals: liver & mammary gland tumors]				First Aid (see Table 6): Eye: Irr immed Skin: Soap wash prompt Breath: Resp support Swallow: Medical attention immed	

Propylene glycol dinitrate		Formula: CH ₃ CNO ₂ OHCHNO ₂ OH	CAS#: 6423-43-4	RTECS#: TY6300000	IDLH: N.D.
Conversion: 1 ppm = 6.79 mg/m ³		DOT:			
Synonyms/Trade Names: PGDN; Propylene glycol-1,2-dinitrate; 1,2-Propylene glycol dinitrate					
Exposure Limits: NIOSH REL: TWA 0.05 ppm (0.3 mg/m ³) [skin] OSHA PEL†: none				Measurement Methods (see Table 1): None available	
Physical Description: Colorless liquid with a disagreeable odor. [Note: A solid below 18°F.]					
Chemical & Physical Properties: MW: 166.1 BP: ? Sol: 0.1% F.L.P.: ? IP: ? Sp.Gr(77°F): 1.23 VP(72°F): 0.07 mmHg FRZ: 18°F UEL: ? LEL: ? Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: N.R. Remove: N.R. Change: N.R.		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Ammonia compounds, amines, oxidizers, reducing agents, combustible materials [Note: Similar to Ethylene glycol dinitrate in explosion potential.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes; conj; methemo; head, impaired balance, vis dist; in animals: liver, kidney damage TO: Eyes, CNS, blood, liver, kidneys			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash Breath: Resp support Swallow: Medical attention immed		

Propylene glycol monomethyl ether		Formula: CH ₃ OCH ₂ CHCH ₃	CAS#: 107-98-2	RTECS#: UB7700000	IDLH: N.D.
Conversion: 1 ppm = 3.69 mg/m ³		DOT:			
Synonyms/Trade Names: Dowtherm® 209, 1-Methoxy-2-hydroxypropane, 1-Methoxy-2-propanol, 2-Methoxy-1-methylethanol, Propylene glycol methyl ether					
Exposure Limits: NIOSH REL: TWA 100 ppm (360 mg/m ³) ST 150 ppm (540 mg/m ³) OSHA PEL†: none				Measurement Methods (see Table 1): NIOSH 2554 OSHA 99	
Physical Description: Clear, colorless liquid with a mild, ethereal odor.					
Chemical & Physical Properties: MW: 90.1 BP: 248°F Sol: Miscible F.L.P.: 97°F IP: ? Sp.Gr: 0.96 VP(77°F): 12 mmHg FRZ: -139°F (Sets to glass) UEL(calc): 13.8% LEL(calc.): 1.6% Class IC Flammable Liquid		Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: Prevent eye contact Wash skin: N.R. Remove: When wet (flamm) Change: N.R.		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Oxidizers, strong acids [Note: Hygroscopic (i.e., absorbs moisture from air). May slowly form reactive peroxides during prolonged storage.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, nose, throat; head, nau, dizz, drow, inco; vomit, diarr TO: Eyes, skin, resp sys, CNS			First Aid (see Table 6): Eye: Irr immed Skin: Water wash Breath: Resp support Swallow: Medical attention immed		

Propylene imine	Formula: C ₃ H ₇ N	CAS#: 75-55-8	RTECS#: CM8050000	IDLH: Ca [100 ppm]
Conversion: 1 ppm = 2.34 mg/m ³		DOT: 1921 131P (inhibited)		
Synonyms/Trade Names: 2-Methylaziridine, 2-Methylethyleneimine, Propyleneimine, Propylene imine (inhibited). Propylenimine				
Exposure Limits: NIOSH REL: Ca TWA 2 ppm (5 mg/m ³) [skin] See Appendix A OSHA PEL: TWA 2 ppm (5 mg/m ³) [skin]			Measurement Methods (see Table 1): None available	
Physical Description: Colorless, oily liquid with an ammonia-like odor.				
Chemical & Physical Properties: MW: 57.1 BP: 152°F Sol: Miscible F.I.P.: 25°F IP: 9.00 eV Sp.Gr: 0.80 VP: 112 mmHg FRZ: -85°F UEL: ? LEL: ? 		Incompatibilities and Reactivities: Acetanilide, albumin, alkalis, antipyrine, camphor, ferric salts, menthol, spirit nitrous ether, strong oxidizers & bases [Note: Hygroscopic (i.e., absorbs moisture from the air).]			
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, nose, throat, upper resp sys; methemo; cyan, convuls; restless, bluish skin, incr heart rate, dysp; dizz, drow, hypothermia, hema; spleen, kidney, liver changes; derm TO: Eyes, skin, resp sys, CVS, CNS, blood, spleen, liver, kidneys				First Aid (see Table 6): Eye: Irr immed Skin: Water wash immed Breath: Resp support Swallow: Medical attention immed	

Rhodium (metal fume and insoluble compounds, as Rh)		Formula: Rh (metal)	CAS#: 7440-16-6 (metal)	RTECS#: VI9069000	IDLH: 100 mg/m ³ (as Rh)
Conversion:		DOT:			
Synonyms/Trade Names: Rhodium metal: Elemental rhodium Synonyms of other insoluble rhodium compounds vary depending upon the specific compound.					
Exposure Limits: NIOSH REL: TWA 0.1 mg/m ³ OSHA PEL: TWA 0.1 mg/m ³				Measurement Methods (see Table 1): NIOSH S188 (II-3)	
Physical Description: Metal: White, hard, ductile, malleable solid with a bluish-gray luster.					
Chemical & Physical Properties: MW: 102.9 BP: 6741°F Sol: Insoluble F.P: NA IP: NA Sp.Gr: 12.41 (metal) VP: 0 mmHg (approx) MLT: 3571°F UEL: NA LEL: NA Metal: Noncombustible Solid in bulk form, but flammable as dust or powder.		Personal Protection/Sanitization (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: N.R. Remove: N.R. Change: N.R.		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 0.5 mg/m ³ : Qm 1 mg/m ³ : 95XQ/Sa 2.5 mg/m ³ : Sa:Cf/PapRHe 5 mg/m ³ : 100F/SaT:Cf/PapRTHie/ ScbaF/SaF 100 mg/m ³ : Sa:Pd,Pp §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: 100F/ScbaE	
Incompatibilities and Reactivities: Chlorine trifluoride, oxygen difluoride					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh SY: Possible resp sens TO: Resp sys			First Aid (see Table 6): Breath: Resp support Swallow: Medical attention immed		

R

Rhodium (soluble compounds, as Rh)		Formula:	CAS#:	RTECS#:	IDLH: 2 mg/m ³ (as Rh)
Conversion:			DOT:		
Synonyms/Trade Names: Synonyms vary depending upon the specific soluble rhodium compound.					
Exposure Limits: NIOSH REL: TWA 0.001 mg/m ³ OSHA PEL: TWA 0.001 mg/m ³				Measurement Methods (see Table 1): NIOSH S189 (II-3)	
Physical Description: Appearance and odor vary depending upon the specific soluble rhodium compound.					
Chemical & Physical Properties: Properties vary depending upon the specific soluble rhodium compound.	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R.		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 0.01 mg/m³: 100XQ*/Sa* 0.025 mg/m³: Sa:C*/PaprHie* 0.05 mg/m³: 100F/PaprTHie*/ScbaF/SaF 2 mg/m³: SaF:Pd,Pp §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: 100F/ScbaE		
Incompatibilities and Reactivities: Varies					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: In animals: irrit eyes; CNS damage TO: Eyes, CNS			First Aid (see Table 6): Eye: Irr immed Skin: Water flush Breath: Resp support Swallow: Medical attention immed		

Ronnel	Formula: (CH ₃ O) ₂ P(S)OC ₆ H ₂ Cl ₃	CAS#: 299-84-3	RTECS#: TG0525000	IDLH: 300 mg/m ³
Conversion:		DOT:		
Synonyms/Trade Names: O,O-Dimethyl O-(2,4,5-trichlorophenyl) phosphorothioate; Fenchlorophos				
Exposure Limits: NIOSH REL: TWA 10 mg/m ³ OSHA PEL†: TWA 15 mg/m ³			Measurement Methods (see Table 1): NIOSH 5600 OSHA PV2054	
Physical Description: White to light-tan, crystalline solid. [insecticide] [Note: A liquid above 106°F.]				
Chemical & Physical Properties: MW: 321.6 BP: Decomposes Sol(77°F): 0.004% Fl.P: NA IP: ? Sp.Gr(77°F): 1.49 VP(77°F): 0.0008 mmHg MLT: 106°F UEL: NA LEL: NA Noncombustible Solid	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily	Respirator Recommendations (see Tables 3 and 4): NIOSH 100 mg/m³: CcrOv95/Sa 250 mg/m³: Sa:Cf/PaprvOvHie 300 mg/m³: CcrFOv100/GmFOv100/ PaprvTOvHie*/ScbaF/SaF §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFOv100/ScbaE		
Incompatibilities and Reactivities: Strong oxidizers				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: In animals: irrit eyes; chol inhibition; liver, kidney damage TO: Eyes, liver, kidneys, blood plasma		First Aid (see Table 6): Eye: Irr immed Skin: Soap wash prompt Breath: Resp support Swallow: Medical attention immed		

Rosin core solder, pyrolysis products (as formaldehyde)		Formula:	CAS#:	RTECS#:	IDLH: N.D.
Conversion:		DOT:			
Synonyms/Trade Names: Rosin flux pyrolysis products, Rosin core soldering flux pyrolysis products					
Exposure Limits: NIOSH REL*: TWA 0.1 mg/m ³ [*Note: "Ca" in the presence of formaldehyde, acetaldehyde, or malonaldehyde. See Appendices A & C (Aldehydes).] OSHA PEL†: none				Measurement Methods (see Table 1): NIOSH 2541, 3500	
Physical Description: Pyrolysis products of rosin core solder include acetone, aliphatic aldehydes, methyl alcohol, methane, ethane, various abietic acids (the major components of rosin), CO & CO ₂ .					
Chemical & Physical Properties: Properties vary depending upon the specific rosin core solder being used.	Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: N.R. Remove: N.R. Change: N.R.		Respirator Recommendations (see Tables 3 and 4): Not available. In the presence of Formaldehyde, Acetaldehyde, or Malonaldehyde: NIOSH ⚠: ScbaF: Pd, Pp/ SaF: Pd, Pp: AScba Escape: GmFov100/ScbaE		
Incompatibilities and Reactivities: Varies					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh SY: Irrit eyes, nose, throat, upper resp sys [carc (in the presence of Formaldehyde, Acetaldehyde, or Malonaldehyde)] TO: Eyes, resp sys [nasal cancer; thyroid gland tumors in animals (in the presence of Formaldehyde, Acetaldehyde, or Malonaldehyde)]				First Aid (see Table 6): Eye: Irr immed Breath: Resp support	

Rotenone		Formula: C ₂₃ H ₂₂ O ₆	CAS#: 83-79-4	RTECS#: DJ2800000	IDLH: 2500 mg/m ³
Conversion:		DOT:			
Synonyms/Trade Names: 1,2,12,12a-Tetrahydro-8,9-dimethoxy-2-(1-methylethenyl)-[1]benzopyrano[3,4-b]furo[2,3-h][1]benzopyran-6(6aH)-one					
Exposure Limits: NIOSH REL: TWA 5 mg/m ³ OSHA PEL: TWA 5 mg/m ³				Measurement Methods (see Table 1): NIOSH 5007	
Physical Description: Colorless to red, odorless, crystalline solid. [insecticide]					
Chemical & Physical Properties: MW: 394.4 BP: Decomposes Sol: Insoluble FLP: ? IP: ? Sp.Gr: 1.27 VP: <0.00004 mmHg MLT: 330°F UEL: ? LEL: ? Combustible Solid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 5 mg/m³: CcrOv95/Sa 125 mg/m³: Sa: Cf/PapRovHie 250 mg/m³: CcrFov100/GmFov100/ PapRTOvHie/SaT: Cf/ ScbaF/SaF 2500 mg/m³: Sa: Pd, Pp §: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFOv100/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers, alkalis					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, resp sys; numb muc memb; nau, vomit, abdom pain; musc tremor, inco, clonic convuls, stupor TO: Eyes, skin, resp sys, CNS				First Aid (see Table 6): Eye: Irr immed Skin: Soap wash prompt Breath: Resp support Swallow: Medical attention immed	

R

Rouge	Formula: Fe ₂ O ₃	CAS#: 1309-37-1	RTECS#: NO7400000	IDLH: N.D.
Conversion:	DOT:			
Synonyms/Trade Names: Iron(III)oxide, Iron oxide red, Red iron oxide, Red oxide				
Exposure Limits: NIOSH REL: See Appendix D OSHA PEL†: TWA 15 mg/m ³ (total) TWA 5 mg/m ³ (resp)			Measurement Methods (see Table 1): NIOSH 0500, 0600	
Physical Description: A fine, red powder of ferric oxide. [Note: Usually used in cake form or impregnated in paper or cloth.]				
Chemical & Physical Properties: MW: 159.7 BP: ? Sol: Insoluble F.I.P: NA IP: NA Sp.Gr: 5.24 VP: 0 mmHg (approx) MLT: 2849°F UEL: NA LEL: NA Noncombustible Solid		Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: N.R. Remove: N.R. Change: N.R.		Respirator Recommendations (see Tables 3 and 4): Not available.
Incompatibilities and Reactivities: Calcium hypochlorite, carbon monoxide, hydrogen peroxide				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Irrit eyes, skin, resp sys TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Breath: Fresh air	

Selenium		Formula: Se	CAS#: 7782-49-2	RTECS#: VS7700000	IDLH: 1 mg/m ³ (as Se)
Conversion:		DOT: 2658 152 (powder)			
Synonyms/Trade Names: Elemental selenium, Selenium alloy					
Exposure Limits: NIOSH REL*: TWA 0.2 mg/m ³ OSHA PEL*: TWA 0.2 mg/m ³ [*Note: The REL and PEL also apply to other selenium compounds (as Se) except Selenium hexafluoride.]				Measurement Methods (see Table 1): NIOSH 7300, 7301, 7303, 9102, S190 (II-7) OSHA ID121	
Physical Description: Amorphous or crystalline, red to gray solid. [Note: Occurs as an impurity in most sulfide ores.]					
Chemical & Physical Properties: MW: 79.0 BP: 1265°F Sol: Insoluble F.I.P: NA IP: NA Sp.Gr: 4.28 VP: 0 mmHg (approx) MLT: 392°F UEL: NA LEL: NA Combustible Solid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: N.R. Incompatibilities and Reactivities: Acids, metals, water [Note: Over a period of time, sodium azide may react with copper, lead, brass, or solder in plumbing systems to form an accumulation of the HIGHLY EXPLOSIVE compounds of lead azide & copper azide.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin; head, dizz, lass, blurred vision; low BP, bradycardia; kidney changes TO: Eyes, skin, CNS, CVS, kidneys			First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed		

S

Sodium bisulfite	Formula: NaHSO ₃	CAS#: 7631-90-5	RTECS#: VZ2000000	IDLH: N.D.
Conversion:	DOT: 2693 154 (solution)			
Synonyms/Trade Names: Monosodium salt of sulfurous acid, Sodium acid bisulfite, Sodium bisulphite, Sodium hydrogen sulfite				
Exposure Limits: NIOSH REL: TWA 5 mg/m ³ OSHA PEL†: none			Measurement Methods (see Table 1): NIOSH 0500	
Physical Description: White crystals or powder with a slight odor of sulfur dioxide.				
Chemical & Physical Properties: MW: 104.1 BP: Decomposes Sol: 29% F.P: NA IP: NA Sp.Gr: 1.48 VP: ? MLT: Decomposes UEL: NA LEL: NA Noncombustible Solid	Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: N.R. Remove: N.R. Change: N.R.	Respirator Recommendations (see Tables 3 and 4): Not available.		
Incompatibilities and Reactivities: Heat (decomposes) [Note: Slowly oxidized to the sulfate on exposure to air.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, muc memb TO: Eyes, skin, resp sys		First Aid (see Table 6): Eye: Irr immed Breath: Fresh air Swallow: Medical attention immed		

Sodium cyanide (as CN)	Formula: NaCN	CAS#: 143-33-9	RTECS#: VZ7525000	IDLH: 25 mg/m³ (as CN)
Conversion:	DOT: 1689 157 (solid); 3414 157 (solution)			
Synonyms/Trade Names: Sodium salt of hydrocyanic acid				
Exposure Limits: NIOSH REL*: C 5 mg/m³ (4.7 ppm) [10-minute] OSHA PEL*: TWA 5 mg/m³ [*Note: The REL and PEL also apply to other cyanides (as CN) except Hydrogen cyanide.]			Measurement Methods (see Table 1): NIOSH 6010, 7904	
Physical Description: White, granular or crystalline solid with a faint, almond-like odor.				
Chemical & Physical Properties: MW: 49.0 BP: 2725°F Sol(77°F): 58% FI.P: NA IP: NA Sp.Gr: 1.60 VP: 0 mmHg (approx) MLT: 1047°F UEL: NA LEL: NA Noncombustible Solid, but contact with acids releases highly flammable hydrogen cyanide.	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench	Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 25 mg/m³: Sa/ScbaF §: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFS100/ScbaE		
Incompatibilities and Reactivities: Strong oxidizers (such as acids, acid salts, chlorates & nitrates) [Note: Absorbs moisture from the air forming a syrup.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin; asphy; lass, head, conf; nau, vomit; incr resp rate; slow gasping respiration; thyroid, blood changes TO: Eyes, skin, CVS, CNS, thyroid, blood		First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed		

Sodium fluoride (as F)	Formula: NaF	CAS#: 7681-49-4	RTECS#: WB0350000	IDLH: 250 mg/m ³ (as F)
Conversion:	DOT: 1690 154			
Synonyms/Trade Names: Floridine, Sodium monofluoride				
Exposure Limits: NIOSH REL*: TWA 2.5 mg/m ³ OSHA PEL*: TWA 2.5 mg/m ³ [*Note: The REL and PEL also apply to other inorganic, solid fluorides (as F).]			Measurement Methods (see Table 1): NIOSH 7902, 7906 OSHA ID110	
Physical Description: Odorless, white powder or colorless crystals. [Note: Pesticide grade is often dyed blue.]				
Chemical & Physical Properties: MW: 42.0 BP: 3099°F Sol: 4% F.I.P: NA IP: NA Sp.Gr: 2.78 VP: 0 mmHg (approx) MLT: 1819°F UEL: NA LEL: NA Noncombustible Solid				
Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily				
Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 12.5 mg/m ³ : Qm 25 mg/m ³ : 95XQ*/Sa* 62.5 mg/m ³ : Sa:C*/Pap/Hie*+ 125 mg/m ³ : 100F+/ScbaF/SaF 250 mg/m ³ : SaF:Pd,Pp §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: 100F+/ScbaE +Note: May need acid gas sorbent				
Incompatibilities and Reactivities: Strong oxidizers				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, resp sys; nau, abdom pain, diarr; salv, thirst, sweat; stiff spine; derm; calcification of ligaments of ribs, pelvis TO: Eyes, skin, resp sys, CNS, skeleton, kidneys			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash prompt Breath: Fresh air Swallow: Medical attention immed	

Sodium fluoroacetate	Formula: FCH ₂ COONa	CAS#: 62-74-8	RTECS#: AH9100000	IDLH: 2.5 mg/m ³						
Conversion:		DOT: 2629 151								
Synonyms/Trade Names: SFA, Sodium monofluoroacetate										
Exposure Limits: NIOSH REL: TWA 0.05 mg/m ³ ST 0.15 mg/m ³ [skin] OSHA PEL†: TWA 0.05 mg/m ³ [skin]			Measurement Methods (see Table 1): NIOSH S301 (II-5)							
Physical Description: Fluffy, colorless to white (sometimes dyed black), odorless powder. [Note: A liquid above 95°F.] [rodenticide]										
Chemical & Physical Properties: MW: 100.0 BP: Decomposes Sol: Miscible F.I.P: NA IP: ? Sp.Gr: ? VP: Low MLT: 392°F UEL: NA LEL: NA Noncombustible Solid					Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily Provide: Quick drench			Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 0.25 mg/m³: Qm 0.5 mg/m³: 95XQ/Sa 1.25 mg/m³: Sa:Cf/Pap/Hie 2.5 mg/m³: 100F/SaT:Cf/Pap/THie/ ScbaF/SaF §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: 100F/ScbaE		
Incompatibilities and Reactivities: None reported										
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Vomit; anxi, auditory halu; facial pares; twitch face musc; pulsus alternans, ectopic heartbeat, tacar, card arrhy; pulm edema; nystagmus; convuls; liver, kidney damage TO: Resp sys, CVS, liver, kidneys, CNS					First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed					

S

Sodium hydroxide	Formula: NaOH	CAS#: 1310-73-2	RTECS#: WB4900000	IDLH: 10 mg/m ³
Conversion:	DOT: 1823 154 (dry, solid); 1824 154 (solution)			
Synonyms/Trade Names: Caustic soda, Lye, Soda lye, Sodium hydrate				
Exposure Limits: NIOSH REL: C 2 mg/m ³ OSHA PEL†: TWA 2 mg/m ³			Measurement Methods (see Table 1): NIOSH 7401	
Physical Description: Colorless to white, odorless solid (flakes, beads, granular form).				
Chemical & Physical Properties: MW: 40.0 BP: 2534°F Sol: 111% F.P.: NA IP: NA Sp.Gr: 2.13 VP: 0 mmHg (approx) MLT: 605°F UEL: NA LEL: NA Noncombustible Solid, but when in contact with water may generate sufficient heat to ignite combustible materials.	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily Provide: Eyewash Quick drench	Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 10 mg/m³: Sa:CfE/100F/PapHie/L ScbaF/SaF §: ScbaF: Pd,Pp/SaF: Pd,Pp: AScba Escape: 100F/ScbaE		
Incompatibilities and Reactivities: Water; acids; flammable liquids; organic halogens; metals such as aluminum, tin & zinc; nitromethane [Note: Corrosive to metals.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, muc memb; pneu; eye, skin burns; temporary loss of hair TO: Eyes, skin, resp sys		First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed		

Sodium metabisulfite	Formula: Na ₂ S ₂ O ₅	CAS#: 7681-57-4	RTECS#: UX8225000	IDLH: N.D.
Conversion:	DOT:			
Synonyms/Trade Names: Disodium pyrosulfite, Sodium metabisulphite, Sodium pyrosulfite				
Exposure Limits: NIOSH REL: TWA 5 mg/m ³ OSHA PEL†: none			Measurement Methods (see Table 1): NIOSH 0500	
Physical Description: White to yellowish crystals or powder with an odor of sulfur dioxide.				
Chemical & Physical Properties: MW: 190.1 BP: Decomposes Sol: 54% F.P: NA IP: NA Sp.Gr: 1.4 VP: ? MLT: >302°F (Decomposes) UEL: NA LEL: NA Noncombustible Solid		Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: N.R. Remove: N.R. Change: N.R.		Respirator Recommendations (see Tables 3 and 4): Not available.
Incompatibilities and Reactivities: Heat (decomposes) [Note: Slowly oxidized to the sulfate on exposure to air & moisture.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, muc memb TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Breath: Fresh air Swallow: Medical attention immed	

Starch	Formula: (C ₆ H ₁₀ O ₅) _n	CAS#: 9005-25-8	RTECS#: GM5090000	IDLH: N.D.
Conversion:	DOT:			
Synonyms/Trade Names: Corn starch, Rice starch, Sorghum gum, α-Starch, Starch gum, Tapioca starch				
Exposure Limits: NIOSH REL: TWA 10 mg/m ³ (total) TWA 5 mg/m ³ (resp) OSHA PEL: TWA 15 mg/m ³ (total) TWA 5 mg/m ³ (resp)			Measurement Methods (see Table 1): NIOSH 0500, 0600	
Physical Description: Fine, white, odorless powder. [Note: A carbohydrate polymer composed of 25% amylose & 75% amylopectin.]				
Chemical & Physical Properties: MW: varies BP: Decomposes Sol: Insoluble F.I.P: NA IP: NA Sp.Gr: 1.45 VP: 0 mmHg (approx) MLT: Decomposes UEL: NA LEL: NA MEC: 50 g/m ³ Noncombustible Solid, but may form explosive mixture with air.		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: Daily Remove: When wet or contam Change: Daily		Respirator Recommendations (see Tables 3 and 4): Not available.
Incompatibilities and Reactivities: Oxidizers, acids, iodine, alkalis				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, muc memb; cough, chest pain; derm; rhin TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash Breath: Fresh air Swallow: Medical attention immed	

Stibine	Formula: SbH ₃	CAS#: 7803-52-3	RTECS#: WJ0700000	IDLH: 5 ppm
Conversion: 1 ppm = 5.10 mg/m ³		DOT: 2676 119		
Synonyms/Trade Names: Antimony hydride, Antimony trihydride, Hydrogen antimonide				
Exposure Limits: NIOSH REL: TWA 0.1 ppm (0.5 mg/m ³) OSHA PEL: TWA 0.1 ppm (0.5 mg/m ³)			Measurement Methods (see Table 1): NIOSH 6008	
Physical Description: Colorless gas with a disagreeable odor like hydrogen sulfide.				
Chemical & Physical Properties: MW: 124.8 BP: -1°F Sol: Slight Fl.P: NA (Gas) IP: 9.51 eV RGasD: 4.31 VP: >1 atm FRZ: -126°F UEL: ? LEL: ? Incompatibilities and Reactivities: Disilane				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh SY: Asphy: incr breath rate, pulse rate; slight musc inco, emotional upset; lass, nau, vomit, convuls; liquid: frostbite TO: Resp sys			First Aid (see Table 6): Eye: Frostbite Skin: Frostbite Breath: Resp support	

S

Sulfuric acid	Formula: H ₂ SO ₄	CAS#: 7664-93-9	RTECS#: WS5600000	IDLH: 15 mg/m ³
Conversion:	DOT: 1830 137; 1831 137 (fuming); 1832 137 (spent)			
Synonyms/Trade Names: Battery acid, Hydrogen sulfate, Oil of vitriol, Sulfuric acid (aqueous)				
Exposure Limits: NIOSH REL: TWA 1 mg/m ³ OSHA PEL: TWA 1 mg/m ³			Measurement Methods (see Table 1): NIOSH 7903 OSHA ID113, ID165SG	
Physical Description: Colorless to dark-brown, oily, odorless liquid. [Note: Pure compound is a solid below 51°F. Often used in an aqueous solution.]				
Chemical & Physical Properties: MW: 98.1 BP: 554°F Sol: Miscible F.I.P: NA IP: ? Sp.Gr: 1.84 (96-98% acid) VP: 0.001 mmHg FRZ: 51°F UEL: NA LEL: NA Noncombustible Liquid, but capable of igniting finely divided combustible materials.	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Provide: Eyewash (>1%) Quick drench (>1%)		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 15 mg/m³: Sa:CfE/PapR/AgHieE/ CcrFAg100/GmFAg100/ ScbaF/SaF \$: ScbaF: Pd,Pp/SaF: Pd,Pp:AScba Escape: GmFAg100/ScbaE	
			Incompatibilities and Reactivities: Organic materials, chlorates, carbides, fulminates, water, powdered metals [Note: Reacts violently with water with evolution of heat. Corrosive to metals.]	
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, nose, throat; pulm edema, bron; emphy; conj; stomatitis; dental erosion; eye, skin burns; derm TO: Eyes, skin, resp sys, teeth			First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed	

Sulfur monochloride		Formula: S ₂ Cl ₂	CAS#: 10025-67-9	RTECS#: WS4300000	IDLH: 5 ppm
Conversion: 1 ppm = 5.52 mg/m ³		DOT: 1828 137			
Synonyms/Trade Names: Sulfur chloride, Sulfur subchloride, Thiosulfurous dichloride					
Exposure Limits: NIOSH REL: C 1 ppm (6 mg/m ³) OSHA PEL†: TWA 1 ppm (6 mg/m ³)				Measurement Methods (see Table 1): None available	
Physical Description: Light-amber to yellow-red, oily liquid with a pungent, nauseating, irritating odor.					
Chemical & Physical Properties: MW: 135.0 BP: 280°F Sol: Decomposes F.I.P: 245°F IP: 9.40 eV Sp.Gr: 1.68 VP: 7 mmHg FRZ: -107°F UEL: ? LEL: ? Class IIIB Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Provide: Eyewash Quick drench			
		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 5 ppm: CcrFS/GmFS/PapRSE/ ScbaF/SaF \$: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: GmFS/ScbaE			
Incompatibilities and Reactivities: Peroxides, oxides of phosphorous, organics, water [Note: Decomposes violently in water to form hydrochloric acid, sulfur dioxide, sulfur, sulfite, thiosulfate, and hydrogen sulfide. Corrosive to metals.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, muc memb; lac; cough; eye, skin burns; pulm edema TO: Eyes, skin, resp sys				First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed	

Sulfur pentafluoride	Formula: S ₂ F ₁₀	CAS#: 5714-22-7	RTECS#: WS4480000	IDLH: 1 ppm
Conversion: 1 ppm = 10.39 mg/m ³		DOT:		
Synonyms/Trade Names: Disulfur decafluoride, Sulfur decafluoride				
Exposure Limits: NIOSH REL: C 0.01 ppm (0.1 mg/m ³) OSHA PEL†: TWA 0.025 ppm (0.25 mg/m ³)			Measurement Methods (see Table 1): None available	
Physical Description: Colorless liquid or gas (above 84°F) with an odor like sulfur dioxide.				
Chemical & Physical Properties: MW: 254.1 BP: 84°F Sol: Insoluble F.L.P: NA IP: ? R.GasD: 8.77 Sp.Gr(32°F): 2.08 VP: 561 mmHg FRZ: -134°F UEL: NA LEL: NA Noncombustible Liquid Nonflammable Gas	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: N.R. Remove: When wet or contam Change: N.R. Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): NIOSH 0.1 ppm: Sa 0.25 ppm: Sa:Cf 0.5 ppm: Sa:T:Cf/ScbaF/SaF 1 ppm: Sa:Pd,Pp S: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFAg/ScbaE	
Incompatibilities and Reactivities: None reported				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, resp sys; in animals: pulm edema, hemorrh TO: Eyes, skin, resp sys, CNS			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed	

Sulfur tetrafluoride	Formula: SF ₄	CAS#: 7783-60-0	RTECS#: WT4800000	IDLH: N.D.
Conversion: 1 ppm = 4.42 mg/m ³	DOT: 2418 125			
Synonyms/Trade Names: Tetrafluorosulfurane				
Exposure Limits: NIOSH REL: C 0.1 ppm (0.4 mg/m ³) OSHA PEL†: none			Measurement Methods (see Table 1): OSHA ID110	
Physical Description: Colorless gas with an odor like sulfur dioxide. [Note: Shipped as a liquefied compressed gas.]				
Chemical & Physical Properties: MW: 108.1 BP: -41°F Sol: Reacts Fl.P: NA IP: 12.63 eV RGasD: 3.78 VP(70°F): 10.5 atm FRZ: -185°F UEL: NA LEL: NA Nonflammable Gas		Personal Protection/Sanitation (see Table 2): Skin: Frostbite Eyes: Frostbite Wash skin: N.R. Remove: N.R. Change: N.R. Provide: Frostbite wash		Respirator Recommendations (see Tables 3 and 4): Not available.
Incompatibilities and Reactivities: Moisture, concentrated sulfuric acid, dioxygen difluoride [Note: Readily hydrolyzed by moisture, forming hydrofluoric acid & thionyl fluoride.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Irrit eyes, skin, muc memb; eye, skin burns (from SF ₄ releasing hydrofluoric acid on exposure to moisture); liquid: frostbite; in animals: dysp, lass, rhin TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Frostbite Skin: Frostbite Breath: Resp support	

S

Sulfuryl fluoride		Formula: SO ₂ F ₂	CAS#: 2699-79-8	RTECS#: WT5075000	IDLH: 200 ppm
Conversion: 1 ppm = 4.18 mg/m ³		DOT: 2191 123			
Synonyms/Trade Names: Sulfur difluoride dioxide, Vikane®					
Exposure Limits: NIOSH REL: TWA 5 ppm (20 mg/m ³) ST 10 ppm (40 mg/m ³) OSHA PEL†: TWA 5 ppm (20 mg/m ³)				Measurement Methods (see Table 1): NIOSH 6012	
Physical Description: Colorless, odorless gas. [insecticide/fumigant] [Note: Shipped as a liquefied compressed gas.]					
Chemical & Physical Properties: MW: 102.1 BP: -68°F Sol(32°F): 0.2% FLP: NA IP: 13.04 eV RGasD: 3.72 VP(70°F): 15.8 atm FRZ: -212°F UEL: NA LEL: NA Nonflammable Gas		Personal Protection/Sanitation (see Table 2): Skin: Frostbite Eyes: Frostbite Wash skin: N.R. Remove: N.R. Change: N.R. Provide: Frostbite wash		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 50 ppm: Sa* 125 ppm: Sa;Cf* 200 ppm: ScbaF/SaF §: ScbaF;Pd,Pp/SaF;Pd,Pp:AScba Escape: GmFS/ScbaE	
Incompatibilities and Reactivities: None reported					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con (liquid) SY: Conj, rhinitis, pharyngitis, pares; liquid: frostbite: in animals: narco, tremor, convuls; pulm edema; kidney inj TO: Eyes, skin, resp sys, CNS, kidneys				First Aid (see Table 6): Eye: Frostbite Skin: Frostbite Breath: Resp support	

Sulprofos		Formula: C ₁₂ H ₁₉ O ₂ PS ₃	CAS#: 35400-43-2	RTECS#: TE4165000	IDLH: N.D.
Conversion: 1 ppm = 13.19 mg/m ³		DOT:			
Synonyms/Trade Names: Bolstar®, O-Ethyl O-(4-methylthio)phenyl S-propylphosphorodithioate					
Exposure Limits: NIOSH REL: TWA 1 mg/m ³ OSHA PEL†: none				Measurement Methods (see Table 1): NIOSH 5600 OSHA PV2037	
Physical Description: Tan-colored liquid with a sulfide-like odor.					
Chemical & Physical Properties: MW: 322.5 BP: ? Sol: Low F.L.P: ? IP: ? Sp.Gr: 1.20 VP: <8 mmHg FRZ: ? UEL: ? LEL: ?		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: N.R. Wash skin: When contam Remove: When wet or contam Change: N.R.		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: None reported					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing SY: Nau, vomit, abdom cramps, diarr, salv; head, dizz, lass; rhin, chest tight; blurred vision, miosis; card irreg; musc fasc; dysp TO: Resp sys, CNS, CVS, blood chol			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed		

2,4,5-T	Formula: Cl ₃ C ₆ H ₂ OCH ₂ COOH	CAS#: 93-76-5	RTECS#: AJ8400000	IDLH: 250 mg/m ³
Conversion:	DOT: 2765 152			
Synonyms/Trade Names: 2,4,5-Trichlorophenoxyacetic acid				
Exposure Limits: NIOSH REL: TWA 10 mg/m ³ OSHA PEL: TWA 10 mg/m ³			Measurement Methods (see Table 1): NIOSH 5001	
Physical Description: Colorless to tan, odorless, crystalline solid. [herbicide]				
Chemical & Physical Properties: MW: 255.5 BP: Decomposes Sol(77°F): 0.03% Fl.P: ? IP: ? Sp.Gr: 1.80 VP: 1 x 10 ⁻⁷ mmHg MLT: 307°F UEL: ? LEL: ? Combustible Solid, but burns with difficulty.	Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: N.R. Remove: N.R. Change: N.R.	Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 50 mg/m ³ : Qm 100 mg/m ³ : 95XQ/Sa 250 mg/m ³ : Sa:Cf/100F/PapHie/ ScbaF/SaF §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: 100F/ScbaE		
Incompatibilities and Reactivities: None reported				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: In animals: ataxia; skin irrit, acne-like rash; liver damage TO: Skin, liver, GI tract		First Aid (see Table 6): Eye: Irr immed Skin: Soap wash Breath: Resp support Swallow: Medical attention immed		

Talc (containing no asbestos and less than 1% quartz)	Formula: Mg ₃ Si ₄ O ₁₀ (OH) ₂	CAS#: 14807-96-6	RTECS#: WW2710000	IDLH: 1000 mg/m ³
Conversion:	DOT:			
Synonyms/Trade Names: Hydrous magnesium silicate, Steatite talc				
Exposure Limits: NIOSH REL: TWA 2 mg/m ³ (resp) OSHA PEL†: TWA 20 mppcf			Measurement Methods (see Table 1): NIOSH P&CAM355 (III)	
Physical Description: Odorless, white powder.				
Chemical & Physical Properties: MW: Varies BP: ? Sol: Insoluble Fl.P: NA IP: NA Sp.Gr: 2.70-2.80 VP: 0 mmHg (approx) MLT: 1652°F to 1832°F UEL: NA LEL: NA Noncombustible Solid	Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: N.R. Remove: N.R. Change: N.R.		Respirator Recommendations (see Tables 3 and 4): NIOSH 10 mg/m ³ : Qm 20 mg/m ³ : 95XQ/Sa 50 mg/m ³ : PaprHie/Sa:Cf 100 mg/m ³ : 100F/SaT:Cf/PaprTHie/ ScbaF/SaF 1000 mg/m ³ : Sa:Pd,Pp §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: 100F/ScbaE	
Incompatibilities and Reactivities: None reported				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Fibrotic pneumoconiosis, irrit eyes TO: Eyes, resp sys, CVS			First Aid (see Table 6): Eye: Irr immed Breath: Fresh air	

T

Tantalum (metal and oxide dust, as Ta)	Formula: Ta (metal)	CAS#: 7440-25-7 (metal)	RTECS#: WW5505000 (metal)	IDLH: 2500 mg/m ³ (as Ta)
Conversion:	DOT:			
Synonyms/Trade Names: Tantalum metal: Tantalum-181 Synonyms of other tantalum dusts (including oxide dusts) vary depending upon the specific compound.				
Exposure Limits: NIOSH REL: TWA 5 mg/m ³ ST 10 mg/m ³ OSHA PEL: TWA 5 mg/m ³			Measurement Methods (see Table 1): NIOSH 0500	
Physical Description: Metal: Steel-blue to gray solid or black, odorless powder.				
Chemical & Physical Properties: MW: 180.9 BP: 9797°F Sol: Insoluble F.L.P: NA IP: NA Sp.Gr: 16.65 (metal) 14.40 (powder) VP: 0 mmHg (approx) MLT: 5425°F UEL: NA LEL: NA MEC: <200 g/m ³ Metal: Combustible Solid; powder ignites SPONTANEOUSLY in air.	Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: N.R. Remove: N.R. Change: N.R.	Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 25 mg/m ³ : Qm 50 mg/m ³ : 95XQ/Sa 125 mg/m ³ : Sa:Cf/PaprHie 250 mg/m ³ : 100F/SaT:Cf/PaprTHie/ ScbaF/SaF 2500 mg/m ³ : Sa:Pd,Pp §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: HieF/ScbaE		
Incompatibilities and Reactivities: Strong oxidizers, bromine trifluoride, fluorine				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Con SY: Irrit eyes, skin; in animals: pulm irrit TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Breath: Resp support	

TEDP	Formula: [(CH ₃ CH ₂ O) ₂ PS] ₂ O	CAS#: 3689-24-5	RTECS#: XN4375000	IDLH: 10 mg/m ³
Conversion: 1 ppm = 13.18 mg/m ³		DOT: 1704 153		
Synonyms/Trade Names: Bladafum®, Dithion®, Sulfotep, Tetraethyl dithionopyrophosphate, Tetraethyl dithiopyrophosphate, Thiotepp®				
Exposure Limits: NIOSH REL: TWA 0.2 mg/m ³ [skin] OSHA PEL: TWA 0.2 mg/m ³ [skin]			Measurement Methods (see Table 1): None available	
Physical Description: Pale-yellow liquid with a garlic-like odor. [Note: A pesticide that may be absorbed on a solid carrier or mixed in a more flammable liquid.]				
Chemical & Physical Properties: MW: 322.3 BP: Decomposes Sol: 0.0007% F.L.P.: ? IP: ? Sp.Gr(77°F): 1.20 VP: 0.0002 mmHg FRZ: ? UEL: ? LEL: ? Combustible Liquid	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Provide: Eyewash Quick drench	Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 2 mg/m ³ : Sa 5 mg/m ³ : Sa:Cf 10 mg/m ³ : ScbaF/SaF §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: GmFOv100/ScbaE		
Incompatibilities and Reactivities: Strong oxidizers, iron [Note: Corrosive to iron.]				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin; eye pain, blurred vision, lac; rhin; head; cyan; anor, nau, vomit, diarr; local sweat, lass, twitch, para, Cheyne-Stokes respiration, convuls, low BP, card irreg TO: Eyes, skin, resp sys, CNS, CVS, blood chol			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash immed Breath: Resp support Swallow: Medical attention immed	

Tellurium	Formula: Te	CAS#: 13494-80-9	RTECS#: WY2625000	IDLH: 25 mg/m³ (as Te)
Conversion:		DOT:		
Synonyms/Trade Names: Aurum paradoxum, Metallum problematum				
Exposure Limits: NIOSH REL*: TWA 0.1 mg/m³ OSHA PEL*: TWA 0.1 mg/m³ [*Note: The REL and PEL also apply to other tellurium compounds (as Te) except Tellurium hexafluoride and Bismuth telluride.]			Measurement Methods (see Table 1): NIOSH 7300, 7301, 7303, 9102 OSHA ID121	
Physical Description: Odorless, dark-gray to brown, amorphous powder or grayish-white, brittle solid.				
Chemical & Physical Properties: MW: 127.6 BP: 1814°F Sol: Insoluble Fl.P: NA IP: NA Sp.Gr: 6.24 VP: 0 mmHg (approx) MLT: 842°F UEL: NA LEL: NA Combustible Solid	Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: N.R. Remove: N.R. Change: N.R. Thallium (soluble compounds, as TI)	Formula:	CAS#:	RTECS#:	IDLH: 15 mg/m ³ (as TI)
Conversion:	DOT: 1707 151 (compounds, n.o.s.)			
Synonyms/Trade Names: Synonyms vary depending upon the specific soluble thallium compound.				
Exposure Limits: NIOSH REL: TWA 0.1 mg/m ³ [skin] OSHA PEL: TWA 0.1 mg/m ³ [skin]			Measurement Methods (see Table 1): NIOSH 7300, 7301, 7303, 9102 OSHA ID121	
Physical Description: Appearance and odor vary depending upon the specific soluble thallium compound.				
Chemical & Physical Properties: Properties vary depending upon the specific soluble thallium compound.	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 0.5 mg/m³: Qm 1 mg/m³: 95XQ/Sa 2.5 mg/m³: Sa:Cf/PapRhie 5 mg/m³: 100F/SaT:Cf/PapRThie/ScbaF/SaF 15 mg/m³: SaF:Pd,Pp §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: 100F/ScbaE	
Incompatibilities and Reactivities: Varies				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Nau, diarr, abdom pain, vomit; ptosis, strabismus; peri neuritis, tremor; retster tight, chest pain, pulm edema; convuls, chorea, psychosis; liver, kidney damage; alopecia; pares legs TO: Eyes, resp sys, CNS, liver, kidneys, GI tract, body hair			First Aid (see Table 6): Eye: Irr immed Skin: Water flush prompt Breath: Resp support Swallow: Medical attention immed	

4,4'-Thiobis(6-tert-butyl-m-cresol)		Formula: [CH ₃ (OH)C ₆ H ₂ C(CH ₃) ₃] ₂ S	CAS#: 96-69-5	RTECS#: GP3150000	IDLH: N.D.
Conversion:		DOT:			
Synonyms/Trade Names: 4,4'-Thiobis(3-methyl-6-tert-butylphenol); 1,1'-Thiobis(2-methyl-4-hydroxy-5-tert-butylbenzene)					
Exposure Limits: NIOSH REL: TWA 10 mg/m ³ (total) TWA 5 mg/m ³ (resp) OSHA PEL†: TWA 15 mg/m ³ (total) TWA 5 mg/m ³ (resp)				Measurement Methods (see Table 1): NIOSH 0500, 0600	
Physical Description: Light-gray to tan powder with a slightly aromatic odor.					
Chemical & Physical Properties: MW: 358.6 BP: ? Sol: 0.08% FLP: 420°F IP: ? Sp.Gr: 1.10 VP: 0.0000006 mmHg MLT: 302°F UEL: NA LEL: NA Combustible Solid		Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: N.R. Remove: N.R. Change: N.R.			
Incompatibilities and Reactivities: None reported					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, resp sys TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Breath: Fresh air Swallow: Medical attention immed		

Thioglycolic acid		Formula: HSCH ₂ COOH	CAS#: 68-11-1	RTECS#: AI5950000	IDLH: N.D.
Conversion: 1 ppm = 3.77 mg/m ³		DOT: 1940 153			
Synonyms/Trade Names: Acetyl mercaptan, Mercaptoacetate, Mercaptoacetic acid, 2-Mercaptoacetic acid, 2-Thioglycolic acid, Thiovanic acid					
Exposure Limits: NIOSH REL: TWA 1 ppm (4 mg/m ³) [skin] OSHA PEL†: none				Measurement Methods (see Table 1): None available	
Physical Description: Colorless liquid with a strong, disagreeable odor characteristic of mercaptans. [Note: Olfactory fatigue may occur after short exposures.]					
Chemical & Physical Properties: MW: 92.1 BP: ? Sol: Miscible F.P.: >230°F IP: ? Sp.Gr: 1.32 VP(64°F): 10 mmHg FRZ: 2°F UEL: ? LEL: 5.9% Class IIIB Combustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Air, strong oxidizers, bases, active metals (e.g., sodium potassium, magnesium, calcium) [Note: Readily oxidized by air.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Abs, Ing, Con SY: Irrit eyes, skin, nose, throat; lac, corn damage; skin burns, blisters; in animals: lass; gasping respirations; convuls TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed		

Thionyl chloride		Formula: SOCl ₂	CAS#: 7719-09-7	RTECS#: XM5150000	IDLH: N.D.
Conversion: 1 ppm = 4.87 mg/m ³		DOT: 1836 137			
Synonyms/Trade Names: Sulfenyl chloride, Sulfur chloride oxide, Sulfurous dichloride, Sulfurous oxychloride, Thionyl dichloride					
Exposure Limits: NIOSH REL: C 1 ppm (5 mg/m ³) OSHA PEL†: none				Measurement Methods (see Table 1): None available	
Physical Description: Colorless to yellow to reddish liquid with a pungent odor like sulfur dioxide. [Note: Fumes form when exposed to moist air.]					
Chemical & Physical Properties: MW: 119.0 BP: 169°F Sol: Reacts FLP: NA IP: ? Sp.Gr: 1.64 VP(70°F): 100 mmHg FRZ: -156°F UEL: NA LEL: NA Noncombustible Liquid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: N.R. Provide: Eyewash Quick drench		Respirator Recommendations (see Tables 3 and 4): Not available.	
Incompatibilities and Reactivities: Water, acids, alkalis, ammonia, chloryl perchlorate [Note: Reacts violently with water to form sulfur dioxide & hydrogen chloride.]					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, muc memb; eye, skin burns TO: Eyes, skin, resp sys			First Aid (see Table 6): Eye: Irr immed Skin: Water flush immed Breath: Resp support Swallow: Medical attention immed		

Thiram		Formula: C ₆ H ₁₂ N ₂ S ₄	CAS#: 137-26-8	RTECS#: JO1400000	IDLH: 100 mg/m ³
Conversion:		DOT: 2771 151			
Synonyms/Trade Names: bis(Dimethylthiocarbamoyl) disulfide, Tetramethylthiuram disulfide					
Exposure Limits: NIOSH REL: TWA 5 mg/m ³ OSHA PEL: TWA 5 mg/m ³				Measurement Methods (see Table 1): NIOSH 5005	
Physical Description: Colorless to yellow, crystalline solid with a characteristic odor. [Note: Commercial pesticide products may be dyed blue.]					
Chemical & Physical Properties: MW: 240.4 BP: Decomposes Sol: 0.003% Fl.P.? IP? Sp.Gr: 1.29 VP: 0.000008 mmHg MLT: 312°F UEL? LEL? Combustible Solid		Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam Remove: When wet or contam Change: Daily		Respirator Recommendations (see Tables 3 and 4): NIOSH/OSHA 50 mg/m³: CcrOv95*/Sa* 100 mg/m³: Sa:Cf*/CcrFOv100/GmFOv100/ PapOvHie*/ScbaF/SaF §: ScbaF;Pd,Pp/SaF;Pd,Pp;Ascba Escape: GmFOv100/ScbaE	
Incompatibilities and Reactivities: Strong oxidizers, strong acids, oxidizable materials					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, muc memb; derm; Antabuse-like effects TO: Eyes, skin, resp sys, CNS				First Aid (see Table 6): Eye: Irr immed Skin: Soap wash prompt Breath: Resp support Swallow: Medical attention immed	

Tin		Formula:	CAS#:	RTECS#:	IDLH:
		Sn	7440-31-5	XP7320000	100 mg/m³ (as Sn)
Conversion:		DOT:			
Synonyms/Trade Names: Metallic tin, Tin flake, Tin metal, Tin powder					
Exposure Limits: NIOSH REL*: TWA 2 mg/m³ OSHA PEL*: TWA 2 mg/m³ [*Note: The REL and PEL also apply to other inorganic tin compounds (as Sn) except tin oxides.]				Measurement Methods (see Table 1): NIOSH 7300, 7301, 7303 OSHA ID121, ID206	
Physical Description: Gray to almost silver-white, ductile, malleable, lustrous solid.					
Chemical & Physical Properties: MW: 118.7 BP: 4545°F Sol: Insoluble F.I.P: NA IP: NA Sp.Gr: 7.28 VP: 0 mmHg (approx) MLT: 449°F UEL: NA LEL: NA Noncombustible Solid, but powdered form may ignite. Incompatibilities and Reactivities: None reported				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing SY: Minor changes in blood enzymes; in animals: musc weak, para TO: Blood, PNS			First Aid (see Table 6): Breath: Resp support Swallow: Medical attention immed	

Tungsten		Formula: W	CAS#: 7440-33-7	RTECS#: YO7175000	IDLH: N.D.
Conversion:		DOT:			
Synonyms/Trade Names: Tungsten metal, Wolfram					
Exposure Limits: NIOSH REL*: TWA 5 mg/m ³ ST 10 mg/m ³ [*Note: The REL also applies to other insoluble tungsten compounds (as W).] OSHA PEL†: none				Measurement Methods (see Table 1): NIOSH 7074, 7300, 7301 OSHA ID213	
Physical Description: Hard, brittle, steel-gray to tin-white solid.					
Chemical & Physical Properties: MW: 183.9 BP: 10,701°F Sol: Insoluble F.P.: NA IP: NA Sp.Gr: 19.3 VP: 0 mmHg (approx) MLT: 6170°F UEL: NA LEL: NA Combustible in the form of finely divided powder; may ignite spontaneously.		Personal Protection/Sanitation (see Table 2): Skin: N.R. Eyes: N.R. Wash skin: N.R. Remove: N.R. Change: N.R.		Respirator Recommendations (see Tables 3 and 4): NIOSH 50 mg/m ³ : 100XQ/Sa/ScbaF \$: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: 100XQ/ScbaE	
Incompatibilities and Reactivities: Bromine trifluoride, chlorine trifluoride, fluorine, iodine pentafluoride					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, resp sys; diffuse pulm fib; loss of appetite, nau, cough; blood changes TO: Eyes, skin, resp sys, blood			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash Breath: Fresh air Swallow: Medical attention immed		

Tungsten (soluble compounds, as W)		Formula:	CAS#:	RTECS#:	IDLH: N.D.
Conversion:		DOT:			
Synonyms/Trade Names: Synonyms vary depending upon the specific soluble tungsten compound.					
Exposure Limits: NIOSH REL: TWA 1 mg/m ³ ST 3 mg/m ³ OSHA PEL†: none				Measurement Methods (see Table 1): NIOSH 7074, 7300, 7301 OSHA ID213	
Physical Description: Appearance and odor vary depending upon the specific soluble tungsten compound.					
Chemical & Physical Properties: Properties vary depending upon the specific soluble tungsten compound.		Personal Protection/Sanitation (see Table 2): Recommendations regarding personal protective clothing vary depending upon the specific compound.		Respirator Recommendations (see Tables 3 and 4): NIOSH 10 mg/m³: 100XQ/Sa 25 mg/m³: Sa:Cf 50 mg/m³: 100F/ScbaF/SaF \$: ScbaF: Pd, Pp/SaF: Pd, Pp: AScba Escape: 100F/ScbaE	
Incompatibilities and Reactivities: Varies					
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, resp sys; in animals: CNS disturbances; diarr; resp failure; behavioral, body weight, blood changes TO: Eyes, skin, resp sys, CNS, GI tract			First Aid (see Table 6): Eye: Irr immed Skin: Water wash Breath: Resp support Swallow: Medical attention immed		

Tungsten carbide (cemented)	Formula: WC/Co/Ni/Ti	CAS#: 1: 11107-01-0 2: 12718-69-3 3: 37329-49-0	RTECS#: 1: YO7350000 2: YO7525000 3: YO7700000	IDLH: N.D.
Conversion:		DOT:		
Synonyms/Trade Names: Cemented tungsten carbide, Cemented WC, Hard metal [Note: The tungsten carbide (WC) content is generally 85-95% & the cobalt content is generally 5-15%.] [1: 85% WC, 15% Co; 2: 92% WC, 8% Co; 3: 78% WC, 14% Co, 8% Ti]				
Exposure Limits: NIOSH REL: See Appendix C OSHA PEL†: See Appendix C			Measurement Methods (see Table 1): None available	
Physical Description: A mixture of tungsten carbide, cobalt, and sometimes other metals & metal oxides or carbides.				
Chemical & Physical Properties: Properties vary depending upon the specific mixture.	Personal Protection/Sanitation (see Table 2): Skin: Prevent skin contact Eyes: Prevent eye contact Wash skin: When contam/Daily (Ni) Remove: When wet or contam Change: Daily		Respirator Recommendations (see Tables 3 and 4): NIOSH 0.25 mg Co/m³: Qm 0.5 mg Co/m³: 95XQ*/Sa* 1.25 mg Co/m³: Sa:C†/Pap/Hie*/Pap/Hie* 2.5 mg Co/m³: 100F/ScbaF/SaF 20 mg Co/m³: SaF:Pd,Pp §: ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: 100F/ScbaE	
			Tungsten carbide (cemented) containing Nickel: NIOSH ‡:ScbaF:Pd,Pp/SaF:Pd,Pp:AScba Escape: 100F/ScbaE	
Incompatibilities and Reactivities: Tungsten carbide: Fluorine, chlorine trifluoride, oxides of nitrogen, lead dioxide				
Exposure Routes, Symptoms, Target Organs (see Table 5): ER: Inh, Ing, Con SY: Irrit eyes, skin, resp sys; possible skin sens to cobalt, nickel; diffuse pulm fib; loss of appetite, nau, cough; blood changes TO: Eyes, skin, resp sys, blood			First Aid (see Table 6): Eye: Irr immed Skin: Soap wash Breath: Fresh air Swallow: Medical attention immed	

Turpentine	Formula: C ₁₀ H ₁₆ (approx)	CAS#: 8006-64-2	RTECS#: Y08400000	IDLH: 800 ppm
Conversion: 1 ppm = 5.56 mg/m ³ (approx)		DOT: 1299 128		
Synonyms/Trade Names: Gumsprits, Gum turpentine, Spirits of turpentine, Steam distilled turpentine, Sulfate wood turpentine, Turps, Wood turpentine				
Exposure Limits: NIOSH REL: TWA 100 ppm (560 mg/m ³) OSHA PEL: TWA 100 ppm (560 mg/m ³)				Measurement Methods (see Table 1): NIOSH 1551
Physical Description: Colorless liquid with a characteristic odor.				
Chemical & Physical Properties: MW: 136 (approx) BP: 309-338°F Sol: Insoluble F.L.P: 95°F IP: ? Sp.Gr: 0.86 VP: 4 mmHg FRZ: -58 to -76°F UEL: ? HEALTH AND SAFETY PLAN (HASP)
Tailgate Safety Meeting Form

Site Name & Number:

ATC Project Number:

Work Being Performed:

Date & Time of Meeting:

Name of Presenter:

NOTE: On the initial day of the project, the Project Manager or designee should conduct a visual inspection of the project site (using the Site Safety Checklist) prior to the Tailgate Safety Meeting. This inspection should include a review of project site equipment, hazards, and specific job tasks, activities or operations to be performed for that day. These specific items must be covered during the Tailgate Safety Meeting. For subsequent days, any changes to the site or operations must be covered in the Tailgate Safety Meeting. In addition, "Task-Specific" Job Safety Analysis (JSA) for the tasks/activities at the project site must be integrated into the HASP and Tailgate discussions.

Itemize the Specific Topics Discussed (if more space is needed use the back of this page):

- ☐ Are all employees okay?

☐ Are all employees physically able to perform their job duties?

☐ "Shared Learning" items?

☐ Has PPE been checked?

☐ Emergency evacuation area identified?

☐ Asked for Sub interactions or questions?

☐ **Client Requirements** - By checking the box to the left, the Presenter of the Tailgate Meeting acknowledges that all Client-specific requirements have been completed for both ATC and Subcontractor employees.

Participants (if needed, list additional participants on back of this page):

Print Name	Signature	Company	Date

A Tailgate Safety Meeting must be conducted and documented at the beginning of each workday when two or more ATC employees and/or Subcontractor representatives are present on site. Employees, client representatives and subcontractors who arrive at the site after the Tailgate Safety Meeting has been conducted must be briefed on the topics and acknowledge by signing this form. The JSA must be completed at the beginning of each day when one or more ATC employees and/or subcontractor representatives are present on a site.

Comments

Site Name: _____

Site Address: _____

Project No.: _____

To understand and use this checklist correctly you must refer to and follow ATC's Subsurface Investigation Procedures.

PRE-DRILLING PREPARATION

Review definition of "Critical" and "Non-Critical" areas.

Request as-built drawings, and/or approval to use private utility locator service and/or air knife to locate/protect subsurface utilities.

Obtain Site access agreement.

Pre-plan boring locations.

Establish surface boring method.

Obtain permits and clearances.

Do borehole and utility markouts.

Establish Site-specific Health and Safety Plan

Notify Client, owner, operator prior to mobilization.

If not using Air Knife-type technology, why?

ON-SITE PROCEDURES

Conduct tailgate safety meeting with topics as indicated in procedure.

Read and follow Drilling/Probing procedures

--1. Do Site walk and verify that utility location checklist is complete.

--2. Locate all markouts and planned borehole locations. Start intrusive procedures at least 5 feet away from and perpendicular to utility markouts.

--3. Break surface cover.

--4. Do surface boring to required depth using hand auger, post-hole digger, shovel or "air knife".

--5. If necessary, use alternate procedure for surface boring.

--6. Collect soil samples by hand augering to required depth.

--7. Protect the borehole from pedestrian and vehicular traffic.

*Buried utilities can be found at any depth, but are most often found within the first 5 feet below the ground surface. Proceed slowly and with extra caution when working within 5 feet of the ground surface.

APPENDIX D

Excavating & Trenching

All ATC employees and subcontractors shall be trained and be familiar with the OSHA Excavation Standard and the ATC Employee Health and Safety Policy Manual, Policy No. 16 (Excavation and Trenching) and Policy No. 33 (Subsurface Investigation).

1.0 UNDERGROUND UTILITIES

Prior to any work beginning, the estimated location of utility installations (such as sewer, telephone, fuel, electric, water lines, or any other underground installation) that reasonably may be expected to be encountered during excavation work must be determined prior to opening an excavation. Utility companies or owners shall be contacted and advised of the proposed work and asked to establish the location of the utility underground installations. When utility companies or owners cannot respond to a request to locate underground utilities within 24-48 hours (unless a longer period is required by State or local law), or cannot establish the exact location of these installations, the work may proceed, provided that the work is conducted with caution, and provided detection equipment or other acceptable means to located utilities are used.

When excavation operations approach the estimated location of underground installations (approximately 18 inches from the installation), the exact location of the installations shall be determined by a safe and acceptable means. While the excavation is open, underground installations shall be protected, supported, or removed to safeguard employees.

2.0 ENTERING EXCAVATIONS OR TRENCHES

Daily inspections of excavations, the adjacent areas, and protective systems shall be made by a “*Competent Person*” for evidence of a situation that could result in a possible cave-in, indications of failure of protective systems, hazardous atmospheres, or other hazardous conditions. An inspection shall be conducted by the Competent Person prior to the start of work and as needed throughout the shift. Inspections shall also be made after every rainstorm or other hazard increasing occurrence. All inspections made by the Competent Person should be recorded in the field log book.

No person(s) shall perform work in a trench or excavation that contains accumulated water.

2.1.1 Access/Egress

A stairway, ladder, ramp, or other safe means of egress shall be located in trench excavations that are 4 feet or more in depth so as to require no more than 25 feet of lateral travel distance in any direction.

2.1.2 Exposure to Falling Loads

No employee or subcontractor is permitted underneath loads handled by lifting or digging equipment.

All personnel shall be required to stand away from any vehicle being loaded or unloaded to avoid being struck by spilling or falling materials. Operators may remain in the cabs of vehicles being loaded or unloaded when the equipment is provided with a cab shield and/or canopy adequate to protect the operator from falling materials.

2.1.3 Warning Systems

When mobile equipment is operated adjacent to an excavation and the operators/drivers do not have a clear and direct view of the edge of the excavation, a warning system such as barricades, hand or mechanical signals, or stop logs are required.

APPENDIX D

Excavating & Trenching

2.1.4 Protection from Loose Rock or Soil

Adequate protection shall be provided to protect employees from loose rock or soil that could pose a hazard to personnel in the excavation. All temporary spoil piles shall be kept at least 2 feet away from the edge of the excavation. Spoil piles should be placed to channel rainwater or other run-off water away from the excavation.

2.1.5 Hazardous Atmospheres

All excavations deeper than 4 feet deep and which have the potential to have a hazardous atmosphere or oxygen deficient atmospheres (Less than 19.5% oxygen) must be tested to ensure safe working conditions, prior to entry. Air monitoring shall be conducted in accordance with Section 4.0 of the HASP.

2.1.6 Protective Systems

Each employee in an excavation shall be protected from cave-ins by an adequate protective system except when excavations are made entirely in stable rock or the excavation is less than 5 feet in depth and examination by the Competent Person provides no indication of a potential cave-in. Protective systems consist of sloping or benching, use of trench boxes or other shielding mechanisms, or the use of a shoring system in accordance with the regulations.

APPENDIX E

Lockout/Tagout Requirements & Procedures

1.0 DEFINITIONS

1. Lockout – Involves using a device such as a padlock, blank pipe flange, chain key block, etc. to isolate energy from employee exposure.
2. Tagout – Involves applying a tag to the energy isolating device with written information concerning the date and name of person who applied the lock and tag.

2.0 LOCKOUT/TAGOUT POLICY

This procedure establishes the minimum requirements for lockout/tagout of electrical energy sources, mechanical, hydraulic, pneumatic, thermal or chemical process energy. It is to be used to ensure that conductors and circuit parts are disconnected from sources of electrical energy, locked (tagged), and tested before work begins where employees or subcontractor could be exposed to dangerous conditions. Sources of stored energy, such as capacitors or springs, shall be relieved of their energy, and a mechanism shall be engaged to prevent the re-accumulation of energy.

Lockout/tagout procedures shall be used prior to performing tie-in operations, maintenance, repair or adjustment of any device where exposure to hazardous energy sources may occur.

3.0 RESPONSIBILITY

All effected employees and subcontractors shall be instructed in the safety significance of the lockout/tagout procedure. All new or transferred employees and all other persons whose work operations are or might be in the area shall be instructed in the purpose and use of this procedure. The ATC Project Manager shall ensure that appropriate personnel receive instructions on their roles and responsibilities. All persons installing a lockout/tagout device shall sign their names and the date on the tag and on the Lockout/Tagout Isolation Record (see Appendix E.1).

4.0 PREPARATION FOR LOCKOUT/TAGOUT

1. Review current diagrammatic drawings (or other equally effective means), tags, labels, and signs to identify and locate all disconnecting means to determine that the source of energy is interrupted by a physical break and not deenergized by a circuit interlock. Make a list of disconnecting means to be locked/tagged.
2. Review other work activities to identify where and how other personnel might be exposed to sources of energy. Establish energy control methods for control of other hazardous energy sources in the area.
3. Provide an adequately rated voltage detector to test each electrical phase conductor or circuit part to verify that they are deenergized. Test the voltage detector to make sure that it is working properly.

5.0 LOCKOUT PROCEDURE

1. Complete the Lockout/Tagout Isolation Record (see Appendix E.1).
2. All affected employees in the area shall be notified that a lockout is being performed.
3. The equipment being locked out shall be shut down using normal shutdown procedures. (i.e. operator's control station, stop button, etc.).
4. Any residual energy shall be identified and dissipated at this time.
5. All equipment energy sources shall be neutralized. (i.e. electrical disconnects shall be opened, valves closed, blanks inserted in piping, springs returned to neutral position, other energy sources as required)

APPENDIX E

Lockout/Tagout Requirements & Procedures

6. The qualified employee performing the lockout shall place his/her personal lock and tag on EACH energy isolation point isolated in Step 4. If more than two (2) isolation points are required to lockout the device, a group lockbox may be used. A tag indicating all persons who applied a lock, date, time, equipment type, and number and duration of lockout shall also be applied at this time. A subcontractor representative and an ATC employee shall also apply a lock at this time.
7. Test the lockout by clearing the area and attempting to operate the machine or attempting to operate disconnecting means to determine that the operation is prohibited. A voltage-detecting instrument should be used for electrical components. Inspect the instrument prior to use for physical damage and operation.

6.0 REMOVAL OF LOCKOUT/TAGOUT

1. Upon completion of the lockout an authorized employee must check the area for completeness of work. If the employee who initiated the lockout is available, he/she should conduct this inspection.
2. Remove all tools and nonessential items from the area.
3. Replace all guards.
4. Ensure all employees are clear of the equipment/process.
5. Notify all affected employees in the area that the lockout device(s) are being removed.
6. Remove lockout device(s).
7. Restart the machine to insure proper operation.

7.0 GROUP LOCKOUT

1. When multiple isolation points, three (3) or more, must be controlled during a lockout, or when multiple persons (craft) are involved, a group lockout shall be used.
2. Follow the steps for a normal lockout as documented in steps 1-6 above.
3. Each key for the locks used shall be placed in a group lockout box. The group lockbox shall be kept in view of the work being performed when practical.
4. A Job Control Lock shall be installed on the group lockbox by an ATC Employee. This lock shall remain in place until the lockout has been completed.
5. Each employee shall remove their own lock when their portion of the work is completed or at the end of each shift.
6. Upon completion of the work, the ATC employee shall inspect the work area for completeness.
7. When all of the conditions of the lockout termination procedures have been satisfied, the Job Control Lock shall be removed from the group lockbox.

8.0 EMERGENCY REMOVAL LOCKOUT/TAGOUT DEVICE

1. If an employee leaves the facility without removing his/her lock and tag, an effort shall be made to notify the employee that the supervisor in charge will authorize the removal of their lock. It must be deemed necessary that removal of the lock is required by at least two supervisory personnel, but only after confirming beyond any doubt it is safe to do so.
2. Verify the employee has left the Site.
3. Check with co-workers.
4. Check the employee's time card.
5. Attempt to reach him/her at home.

APPENDIX E
Lockout/Tagout Requirements & Procedures

6. Verify the employee is not in the equipment.
7. Visually confirm the completeness of work.
8. Contact the Regional Safety Coordinator and the Project Manager.
9. An authorized employee, under the direct supervision of an ATC Supervisor shall remove the lock.
10. Upon return to the Site by the employee involved, he/she shall be informed of the removal.
11. A review of the incident may be conducted by the ATC RSC Coordinator to determine any disciplinary actions necessary.

Robert Dobruskin
Director, Environmental Assessment and Review
New York City Department of City Planning
22 Reade Street, Room 4E
New York, New York 10017

**Re: Sugar Hill Rezoning
Block 2069, Lots 14, 21, 26 and 28
10DCP031M/ 10DEPTECH074M**

Dear Mr. Dobruskin:

The New York City Department of Environmental Protection, Bureau of Environmental Planning and Analysis (DEP) has reviewed the March 2008 Phase I Environmental Site Assessment (Phase I) and the January 2009 Phase II Environmental Site Investigation Work Plan (Workplan) prepared by ATC Associates Inc. on behalf of Broadway Housing Communities (applicant) for the above-referenced project. It is our understanding that the applicant is seeking zoning map amendments from the New York City Department of City Planning (DCP) to change the zoning for Block 2069, Lots 21, 28, and part of lots 14 from a C8-3 and R7-2 zoning to a R8A zoning district in addition to acquisition/disposition of City-owned property. The site is bounded by West 155th Street on the north, St. Nicholas Avenue on the west, St. Nicholas Place on the east, and West 153rd Street on the south in the Hamilton Heights North neighborhood of West Harlem, in Manhattan Community District 9. The proposed actions would facilitate the development of an approximately 169,333 gsf (gross square feet) 13-story mixed-use building with 124 dwelling units on Lot 21. As currently proposed, the building will consist of an approximately 18,036 sf (square feet) Faith Ringgold Children's Museum of Art and Storytelling, a 12,196 sf day care facility and early childhood center, a 2,350 sf of non-profit program and office space, and a 114-space below-grade accessory parking garage. The project site currently consists of a two-story building with a 300-space cellar public parking garage on an approximately 21,685 sf lot. The existing on-site facility would be demolished to allow construction of the proposed new building. It is our understanding that the proposed action would not result in development on Lots 14 and 28, and improvements to Lot 26 (City-owned) would be limited to landscaping and paving to provide access to the uses on Lot 21.

The March 2008 Phase I revealed that historical on-site land and surrounding area land uses consisted of commercial and industrial uses including auto repair shop and a garage. Petroleum staining was observed on the floor and

the presences of two (2) 275-gallon lube oil tanks were located in the cellar of the on-site structure.

It should be noted that adjacent to the east of the site is a historical gasoline filling and service station with documented soil and groundwater contamination that is reportedly being remediated. The January 2009 Workplan proposes to collect six composite soil samples (from 14 to 16 feet below ground surface) and analyze for volatile organic compounds (VOCs) and methyl tertiary butyl ether (MTBE) using EPA method 8260 (full list), target compounds list (TCL) semi volatile organic compounds, target analyte list (TAL) metals, polychlorinated biphenyls (PCBs) and pesticides. The six soil borings will be converted to monitoring wells, if groundwater is encountered.

Based upon our review of the submitted documentations, we have the following comments/recommendations:

Proposed Development Site (Block 2069, Lot 21)

Workplan

DEP finds the January 2009 Phase II Workplan for the proposed project acceptable as long as the following information is incorporated into the Workplan

- Soil and groundwater samples should be collected and analyzed by a New York State Department of Health Environmental Laboratory Approval Program certified (NYSDOH ELAP-certified) laboratory for the presence of Volatile Organic Compounds (VOCs) by U.S. EPA Method 8260, Semi-Volatile Organic Compounds (SVOCs) by Method 8270, Pesticides/Polychlorinated Biphenyl (Pesticides/PCBs) by Method 8081/8082 and Target Analyte List (TAL) metals.
- Upon completion of the investigation activities, the consultant should submit a detailed Phase II report to DEP for review and approval. The report should include, at a minimum, an executive summary, narrative of the field activities, laboratory data and conclusions, comparison of soil and groundwater analytical result (i.e., New York State Department of Environmental Conservation 6NYCRR Part 375 and NYSDEC Water Quality Regulations), updated site plans depicting sample locations, boring logs, and remedial recommendations.

Health and Safety Plan

DCP should instruct the applicant that an Investigation Health and Safety Plan must be submitted to DEP for review and approval prior to any field work.

In order to ensure that the aforementioned comments/recommendations are implemented for Lot 21, a Restrictive Declaration should be recorded to ensure that the potential hazardous materials issues are adequately addressed prior to and during construction activities. This institutional control would bind the property owners and their successors or assigns to address these

recommendations prior to construction activities. The Restrictive Declaration should be drafted and submitted to the DEP for review and approval. Once approved, the Restrictive Declaration should be fully executed to ensure remedial measures are implemented and future construction proceeds in a manner protective of public health.

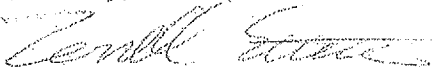

Proposed Access Easement Site (Block 2069, Lot 26)

The Proposed Development Site is bounded on its western side by a roughly triangular, 4,597 square foot paved portion of City-owned property on Lot 26 that has frontage along St. Nicholas Avenue. The applicant would acquire an easement over this area for use as a plaza, which would be paved and landscaped to provide access to the primary entrances for the museum, day care and residential spaces of the Proposed Development; the existing uses (DEP vehicle parking and storage) would be relocated under a Reciprocal Easement Agreement to the southern portion of the Proposed Development Site.

It is our understanding that the applicant commits through the Reciprocal Easement Agreement to prepare and submit to DEP a site specific Health and Safety Plan to protect workers during paving and landscaping activities; this measure will prevent significant adverse hazardous materials impacts for activities on Lot 26.

This letter supersedes our June 14, 2010 correspondence. Future correspondence related to this project should include the following tracking number 10DEPTECH074M. If you have any questions or comments, you may contact me at (718) 595-4473 or Ms. Mahalia Myrie at (718) 595-3212.

Sincerely,

Terrell Estes

Director, Wastewater Review and Special Projects

DESIGN DIAGRAMS AND SPECIFICATIONS FOR

VAPOR BARRIER/WATERPROOFING

MEMBRANE

STEGO® WRAP VAPOR BARRIER

ASTM E 1745 Class A-B-C Compliant

STEGO® WRAP VAPOR BARRIER

represents a recent breakthrough in state-of-the-art plastic extrusion processes. By combining multi-layer extrusion technology with our proven trade secret blend of prime virgin resins and additives, we at Stego Industries have produced an ASTM E 1745 Class A polyolefin **VAPOR BARRIER**. Stego's emphasis has always been very low permeance (the most important quality according to industry experts). Our latest blend continues to provide next to zero permeance, while exceeding ASTM E 1745 Class A requirements for puncture resistance and tensile strength. All this comes with the same competitive pricing our customers have come to expect.

FEATURES & BENEFITS

Unsurpassed Permeance Characteristics

Life of the Building Protection

Exceptional Tear and Puncture Resistance

Easy, Reliable Installation

Competitively Priced

Available Nationwide

→ RADON GAS → MOISTURE

Regardless of the location of the water table, humidity below concrete slabs approximates 100%. Typical below slab vapor pressure is more than twice that of building interiors at room temperature, creating vapor drive from the substrate, up through the slab, and into the building.

THE STEGO® ADVANTAGES

SUPERIOR DEFENSE Against Floor Failures:

Experts say "the need for a vapor barrier (as opposed to a vapor retarder) is becoming increasingly clear." Concrete Construction Magazine, August 2003, p.18.

Infiltration of moisture through concrete slabs is a major building defect liability. Stego Wrap Vapor Barrier has an extremely low permeance preventing water vapor, soil gases (i.e. Radon), alkaline salts and soil sulfates from compromising the integrity of the building envelope and leading to serious problems with the concrete slab, floor coverings and indoor air quality. Stego Wrap Vapor Barrier is the best protection against these costly failures.

MOLD PREVENTION:

Mold needs three things to survive: moisture, sustained temperature (between 50° and 122° F), and a food source (dust, drywall, etc.). In any given building environment, contractors can only control one of these variables: moisture. Mold spores are present in 100% of building interiors. If moisture is allowed into your building environment, mold can and will grow. Toxic molds like *Stachybotrys* can be fatal for nearly 5% of people (Institute of Medicine 1993), and cause a variety of serious health problems in others. Several recent well-publicized cases involving toxic mold have resulted in multimillion-dollar insurance settlements. Many of the nation's leading Insurance companies have severely limited or removed coverage for mold claims fearing that these claims will bankrupt their companies. Now more than ever, it is critically important that extra attention be paid to preventing the intrusion of moisture vapor from your below-slab environment. Stego Wrap Vapor Barrier offers the level of protection that many architects are now seeking and is considered to be inexpensive insurance against these costly failures.

LONGEVITY AND STRENGTH:

Stego Wrap Vapor Barrier is NOT made with recycled materials and will not degrade. Prime, virgin resins are the key. Molecules within Stego Wrap "interlock" to provide strength, durability and unprecedented resistance to moisture vapor and radon gas. Stego Wrap's puncture resistance is excellent. Stego Wrap will not tear, crack, flake, snag or puncture, even when 18,000 lb. laser-screed machines are driving directly across the barrier (see the reverse side for Stego Wrap Vapor Barrier's specifications).

STEGO® WRAP VAPOR BARRIER SPECIFICATIONS

PROPERTIES	TEST METHOD	ASTM E 1745 Class A Requirements	TEST RESULT	EXPLANATION
Permeance	ASTM F 1249	0.1 perms	0.0084 perms * 0.0035 WVTR	Very impermeable to water vapor
Puncture Resistance	ASTM D 1709	2200 grams	Method B 2326 grams	Resistant to puncturing from construction abuse
Tensile Strength	ASTM D 882	45.0 lbf./in.	79.6 lbf./in.	Will not tear easily
Permeance After Conditioning (ASTM E 1745 Sections 7.1.2 - 7.1.5)	ASTM E 154 section 8	0.1 perms	0.0091 perms	Permeance after wetting, drying, and soaking
	ASTM E 154 section 11	0.1 perms	0.0092 perms	Permeance after heat conditioning
	ASTM E 154 section 12	0.1 perms	0.0089 perms	Permeance after low temperature conditioning
	ASTM E 154 section 13	0.1 perms	0.0092 perms	Permeance after soil organism exposure
Methane Transmission Rate	ASTM D 1434		**149.6 GTR 2.12×10^{-6} perms	Greatly impedes the transmission of methane gas
Radon Diffusion Coefficient			1.3×10^{-13} m ² /second	Greatly impedes the transmission of radon gas
Thickness			15 mils	Stronger, tougher and less permeable than much thicker membranes
Roll Dimensions			14 ft. X 140 ft.	1,960 ft ² /roll - allows for a minimum of seams
Roll Weight			140 lbs.	Easy to unroll and install

Note: perm unit = grains/(ft² *hr* in.Hg) * WVTR = water vapor transmission rate **GTR = Gas Transmission Rate

INSTALLATION INSTRUCTIONS: (Based on ASTM E 1643)

Unroll Stego Wrap over the area where the slab is to be placed. Stego Wrap should completely cover the concrete placement area. Overlap seams 6 inches and tape using Stego Tape. All penetrations and blockouts should be sealed using a combination of Stego Wrap, Stego Tape and/or Stego Mastic. If the Stego Wrap is damaged, cut a piece from the Stego Wrap roll, place over the damaged area, and tape around all edges. Concrete may be placed directly on Stego Wrap.

STEGO® TAPE:

STEGO WRAP RED POLYETHYLENE TAPE (3.75" x 180'/roll) is specially designed to seal seams and penetrations on Stego Wrap installations. The acrylic, pressure-sensitive adhesive provides permanent bonding and quick-stick properties. The area to be bonded should be free of dust, dirt and moisture. If properly installed Stego Tape will provide years of continuous protection.

WARRANTY:

STEGO INDUSTRIES, LLC believes, to the best of its knowledge, that specifications and recommendations herein are accurate and reliable. However, since site conditions and installations are not within our control, STEGO INDUSTRIES, LLC does not guarantee results from use of the information provided and disclaims all liability from any loss or damage. Product Description

USES: Stego Wrap Vapor Barrier is used as a true below-slab vapor barrier, and as a protection course for below grade waterproofing applications.

COMPOSITION: Stego Wrap Vapor Barrier is a multi-layer plastic extrusion manufactured with only the highest grade of prime, virgin, polyolefin resins.

ENVIRONMENTAL FACTORS: Stego Wrap Vapor Barrier can be used in systems for the control of soil gases (radon, methane), soil poisons (oil by-products) and sulfates.

Installation

UNDER SLAB: Unroll Stego Wrap Vapor Barrier over an aggregate, sand or

tamped earth base. Overlap all seams a minimum of six inches and tape using Stego Tape. All penetrations must be sealed using a combination of Stego Wrap Vapor Barrier, Stego Tape and/or Stego Mastic.

VERTICAL WALL: Install Stego Wrap Vapor Barrier over the waterproofing membrane while still tacky. Mechanically fasten Stego Wrap Vapor Barrier to the wall at the top with termination bar and concrete nails. Drape Stego Wrap Vapor Barrier down across the footer and under the french drain.

Availability & Cost

Stego Wrap Vapor Barrier is available nationally via building supply distributors. For current cost information, contact your local Stego Wrap distributor or Stego Industries' sales department.

Warranty

Product Description

USES: Stego Tape is a low permeance tape designed for protective sealing, hanging, seaming, splicing, and patching applications where a highly conformable material is required. It has been engineered to bond specifically to Stego Wrap, making it ideal for sealing Stego Wrap seams and penetrations.

COMPOSITION: Stego Tape is composed of polyethylene film and an acrylic, pressure-sensitive adhesive.

SIZE: Stego Tape is 3.75" wide and 180' long. Stego Tape ships 12 rolls in a case.

Technical Data

APPLICABLE STANDARDS:
Pressure Sensitive Tape Council (PSTC)

- PSTC 101 – International Standard for Peel Adhesion of Pressure Sensitive Tape
- American Society for Testing & Materials (ASTM)
- ASTM E 1643 - Standard Practice for Installation of Water Vapor Retarders Used in Contact with Earth or Granular Fill under Concrete Slabs

Installation

SEAMS:

Overlap Stego Wrap six inches and seal with Stego Tape. Make sure the area of adhesion is free from dust, dirt and moisture to allow maximum adhesion of the pressure sensitive tape.

PIPE PENETRATION SEALING

- 1) Install Stego Wrap around pipe by slitting/cutting material

- 2) If void space around pipe is minimal, seal around base of pipe with Stego Tape (Stego Mastic can be used for additional coverage)

DETAIL PATCH FOR PIPE PENETRATION SEALING

- 1) Cut a piece of Stego Wrap that creates a six inch overlap around all edges of the void space
- 2) Cut an "X" in the center of the detail patch
- 3) Slide detail patch over pipe, secure tightly
- 4) Tape down all sides of detail patch with Stego Tape
- 5) Seal around base of pipe with Stego Tape (Stego Mastic can be used for additional coverage)

Stego Tape should be installed above 40 °F

NOTE: See Stego's installation instructions for complete instructions and detailed drawings. Each user should make their own tests to determine the products suitability for their own intended use and shall assume all risks and liability in connection therewith.

Availability & Cost

Stego Tape is available nationally via building supply distributors. For current cost information, contact your local Stego distributor or Stego Industries' sales department.

Warranty

Stego Industries, LLC believes to the best of its knowledge, that specifications and recommendations herein are accurate and reliable. However, since site conditions are not within its control, Stego Industries does not guarantee results from the use of the information provided and disclaims all liability from any loss or damage. Stego® Mastic

STEGO INDUSTRIES, LLC

Vapor Retarders
07260, 03300

1. Product Name

Stego Mastic

2. Manufacturer

Stego Industries, LLC
216 Avenida Fabricante, Suite 101
San Clemente, CA 92672
Sales, Technical Assistance
Ph: (877) 464-7834
Fx: (949) 257-4113
www.stegoindustries.com

3. Product Description

USES: Stego Mastic is designed to be used as a waterproofing and vapor retardant membrane for use in conjunction with Stego Wrap 10-mil and 15-mil Vapor Retarder/Barrier. Stego Mastic can be used as an alternate to boots for pipe penetrations in Stego Wrap Vapor Barrier. Stego Mastic can also be used as a primary waterproofing for below grade walls.

COMPOSITION: Stego Mastic is a medium-viscosity, water-based, polymer-modified anionic bituminous/asphalt emulsion, which exhibits bonding, elongation and waterproofing characteristics.

SIZE: Stego Mastic comes in five-gallon buckets.

4. Technical Data

APPLICABLE STANDARDS:

American Society for Testing and Materials (ASTM)

- ASTM D 412 Standard Test Method for Vulcanized Rubber and Thermoplastic Elastomers - Tension
- ASTM E 154 Standard Test Methods for Water Vapor Retarders Used in Contact with Earth under Concrete Slabs, on Walls, or as Ground Cover
- ASTM G 23 Practice for Operating Light-Exposure Apparatus (Carbon-Arc Type) With and Without Water for Exposure of Nonmetallic Materials (Withdrawn 2000)
- ASTM E 96 Standard Test Methods for Water Vapor Transmission of Materials
- ASTM D 751 Standard Test Methods for Coated Fabrics
- ASTM D 1434 Standard Test Method for Determining Gas Permeability Characteristics of Plastic Film and Sheeting

- ASTM C 836 Standard Specification for High Solids Content, Cold Liquid-Applied Elastomeric Waterproofing Membrane for Use with Separate Wearing Course.
- ASTM E 1643 Standard Practice for Installation of Water Vapor Retarders Used in Contact with Earth or Granular Fill under Concrete Slabs.

5. Installation

PREPARATION:

- A test application simulating the project environment should always be done prior to final usage of Stego Mastic.
- All Surfaces should be dry and free of loose materials, oils and other contaminants. The surfaces should be cleaned in the same fashion as the test surface in order to ensure proper results.
- Store above 40°F

PENETRATIONS:

For small pipe and rebar penetrations in Stego Wrap Vapor Barrier cut Stego Wrap just big enough for the penetration. Liberally apply Stego Mastic around the penetration to keep the integrity of the membrane intact. Stego Mastic can be applied by brush, roller, or sprayer.

NOTES: 1) For larger penetrations or wide cut-outs of Stego Wrap, use Stego Wrap and Stego Red Polyethylene Tape to repair and seal. 2) Solvent-based products should not be applied over this product.

CLEANING:

Clean all tools with kerosene and/or oil-based cleaners.

6. Availability & Cost

Stego Mastic is available nationally via building supply distributors. For current cost information, contact your local Stego distributor or Stego Industries' sales department.

7. Warranty

Stego Industries, LLC believes to the best of its knowledge, that specifications and recommendations herein are accurate and reliable. However, since site conditions are not within its control, Stego Industries does not guarantee results from the use of the information provided and disclaims all liability from any loss or damage. No warranty, express or implied, is given as to the merchantability, fitness for a particular purpose, or otherwise with respect to the products referred to.

8. Maintenance

None required.

9. Technical Services

Technical advice, custom CAD drawings, and additional information can be obtained by contacting Stego Industries' technical assistance department or by visiting the website.

PART 1

STEGO WRAP VAPOR BARRIER/RETARDER INSTALLATION INSTRUCTIONS

IMPORTANT: Please read these installation instructions completely, prior to beginning any Stego Wrap installation to ensure suitable use of the product. The following installation instructions are based on ASTM E 1643 - Standard Practice for Installation of Water Vapor Retarders Used in Contact with Earth or Granular Fill under Concrete Slabs.

FIGURE 1: UNDER-SLAB INSTALLATION

UNDER-SLAB INSTRUCTIONS:

1. Stego Wrap can be installed over an aggregate, sand, or tamped earth base. It is not necessary to have a cushion layer or sand base, as Stego Wrap is tough enough to withstand rugged construction environments.
2. Unroll Stego Wrap over the area where the slab is to be placed. Stego Wrap should completely cover the concrete placement area. All joints/seams both lateral and butt should be overlapped six inches and taped using Stego Tape.

NOTE: The area of adhesion should be free from dust, dirt and moisture to allow maximum adhesion of the pressure sensitive tape.

3. The most effective installation method includes positioning Stego Wrap on top of the footing and against the vertical wall. Stego Wrap will then be sandwiched between the footing, vertical wall and placed concrete floor (see part 2, figure 6a, Basement/Below Grade Wall Installation). This method will help protect the concrete slab from external moisture sources after the slab has been placed.

4. In the event that Stego Wrap is damaged during or after installation, repairs must be made. Stego Tape can be used to repair small holes in the material. For larger holes, cut a piece of Stego Wrap to a size and shape that covers any damage by a minimum overlap of six inches in all directions. Clean all adhesion areas of dust, dirt and moisture. Tape down all edges using Stego Tape (see figure 2, Sealing Damaged Areas).

FIGURE 2: SEALING DAMAGED AREAS

NOTE: These installation instructions are based on practices outlined in ASTM E 1643 - Standard Practice for Installation of Water Vapor Retarders Used in Contact with Earth or Granular Fill Under Concrete Slabs. These instructions are meant to be used as a guide, and do not take into account specific job site situations. Consult local building codes and regulations along with the building owner or owner's representative before proceeding. If you have any questions regarding the above mentioned installation instructions, Stego products, or a specific job site situation, please call us at 877-464-7834 for technical assistance.

5. **IMPORTANT: ALL PENETRATIONS MUST BE SEALED.** All pipe, ducting, rebar, wire penetrations and block outs should be sealed using Stego Wrap, Stego Tape and/or Stego Mastic (see figure 3a, Pipe Penetration Sealing).

FIGURE 3a: PIPE PENETRATION SEALING

STEGO WRAP PIPE PENETRATION REPAIR DETAIL:

- 1: Install Stego Wrap around pipe penetration by slitting/cutting material as needed. Try to minimize the void space created.
- 2: If Stego Wrap is close to pipe and void space is minimized then seal around pipe penetration with Stego Tape and/or Stego Mastic.
(See Figure 3a)
- 3: If detail patch is needed to minimize void space around penetration, then cut a detail patch to a size and shape that creates a six inch overlap on all edges around the void space at the base of the pipe.
- 4: Cut an "X" the size of the pipe diameter in the center of the detail patch and slide tightly over pipe.
- 5: Tape down all sides of detail patch with Stego Tape.
- 6: Seal around the base of the pipe using Stego Tape and/or Stego Mastic.
(See Figure 3b)

FIGURE 3b: DETAIL PATCH FOR PIPE PENETRATION SEALING

FIGURE 4: MULTIPLE PIPE PENETRATION SEALING

MULTIPLE PIPE PENETRATION SEALING:

Multiple pipe penetrations in close proximity and very small pipes may be sealed using Stego Wrap and Stego Mastic for ease of installation (see figure 4, Multiple Pipe Penetration Sealing).

6. Many vapor retarder manufacturers recommend a cushion layer (fine washed gravel or sand) on top of the retarder before the concrete placement to guard against the possibility of damage due to construction traffic. **This is permissible, but not a necessity with Stego Wrap.** Stego Wrap is strong enough to withstand normal construction traffic without a protective layer. In fact, ACI guidelines and many flooring companies recommend placement of the concrete slab directly on the vapor barrier/retarder. This eliminates the potential for water to be trapped in the blotter layer and ultimately resurfacing through the slab adversely affecting the flooring system.

NOTE: These instructions are meant to be used as a guide, and do not take into account specific job site situations. Consult local building codes and regulations along with the building owner or owner's representative before proceeding.

REMEMBER: If damaged, Stego Wrap must be repaired using the techniques outlined above.

PART 2

STEGO WRAP VAPOR BARRIER/RETARDER INSTALLATION INSTRUCTIONS

CRAWL SPACE INSTALLATION INSTRUCTIONS:

1. Place Stego Wrap directly over the crawl space floor. If rigid insulation is to be used, install Stego Wrap prior to insulation (under insulation and between the foundation wall and insulation).
2. Overlap seams a minimum of six inches and seal with Stego Tape.
3. Seal Stego Wrap around all penetrations and columns using Stego Tape and/or Stego Mastic.
4. Turn Stego Wrap up the foundation wall to a minimum height of six inches above the outside/exterior grade or in compliance with local building codes and terminate with pressure treated nail strip/termination bar or construction adhesive. If using a nail strip/termination bar, extend Stego Wrap above termination bar and fold back over nail strip/termination bar and tape with Stego Tape to seal nail holes.

FIGURE 5: CRAWL SPACE INSTALLATION

INSTALLATION TIPS:

1. For a cleaner look and to prevent against tenting of Stego Wrap at the foundation wall/foundation floor intersection, consider mechanically fastening Stego Wrap to base of foundation wall in addition to the above mentioned wall termination.
2. To provide additional protection against moisture migration through nail holes, consider applying a layer of Stego Mastic to the foundation wall prior to installing nail strip/termination bar. Allow one hour for Stego Mastic to cure prior to installing nail strip/termination bar.

NOTE: There are well-publicized pros and cons regarding different approaches to vapor barrier placement. Consult local building codes, regulations and ACI guidelines along with the design or architectural firm's recommendations before proceeding.

FIGURE 6a: BASEMENT/BELOW GRADE WALL INSTALLATION

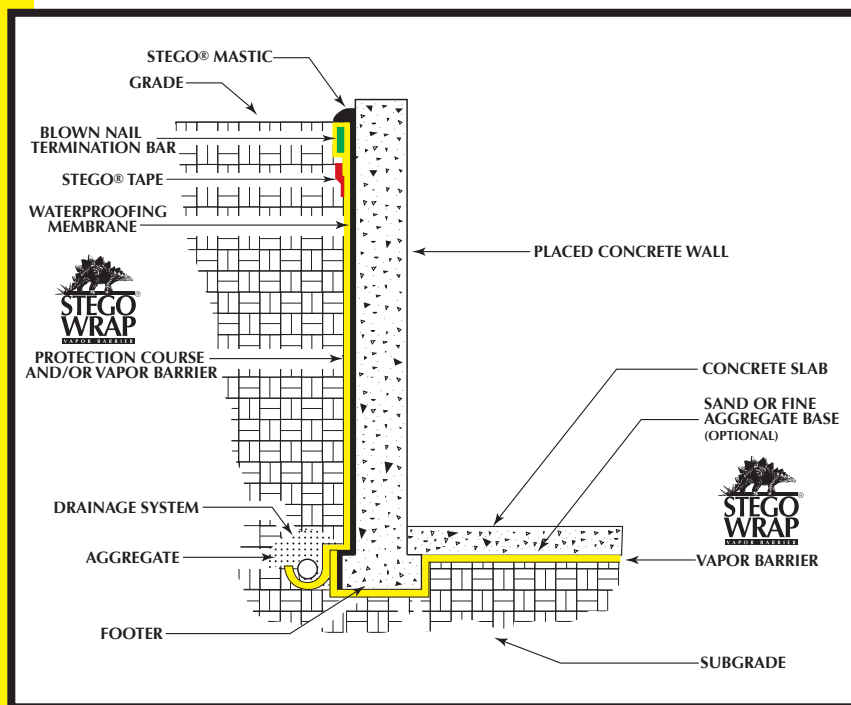

FIGURE 6b: OPTIONAL INSTALLATION FOR FOOTING ENCAPSULATION AND WATERPROOFING TIE-IN

NOTE: These installation instructions are based on practices outlined in ASTM E 1643 - Standard Practice for Installation of Water Vapor Retarders Used in Contact with Earth or Granular Fill Under Concrete Slabs. These instructions are meant to be used as a guide, and do not take into account specific job site situations. Consult local building codes and regulations along with the building owner or owner's representative before proceeding. If you have any questions regarding the above mentioned installation instructions, Stego products, or a specific job site situation, please call us at 877-464-7834 for technical assistance.

BASEMENT/BELOW GRADE WALL INSTALLATION:

1. Install an approved waterproofing membrane according to the manufacturer's installation instructions. This may include sheet goods, or liquid applied membranes be they roll, brush or spray.
2. While the membrane is still tacky, install Stego Wrap as a protective course/vapor barrier over the applied waterproofing membrane. Using a termination bar with concrete nails at the termination of the waterproofing membrane is advisable in some applications (see figure 6a, Basement/ Below Grade Wall Installation).
3. Supervised care must be taken during back filling against the material so that it is not damaged or punctured. If damage occurs, patch using the techniques outlined in part 1.

WARNING: Any untreated punctures, tears or damage during back filling will greatly reduce the effectiveness of Stego Wrap as a protection course/vapor barrier.

OPTIONAL INSTALLATION FOR FOOTING ENCAPSULATION AND WATER PROOFING TIE-IN:

1. Install Stego Wrap into footing depression prior to concrete placement.
2. Leave outside edge of footing exposed to allow for primary waterproofing application and tie-in (see figure 6b, Optional Installation For Footing Encapsulation and Waterproofing Tie-In).

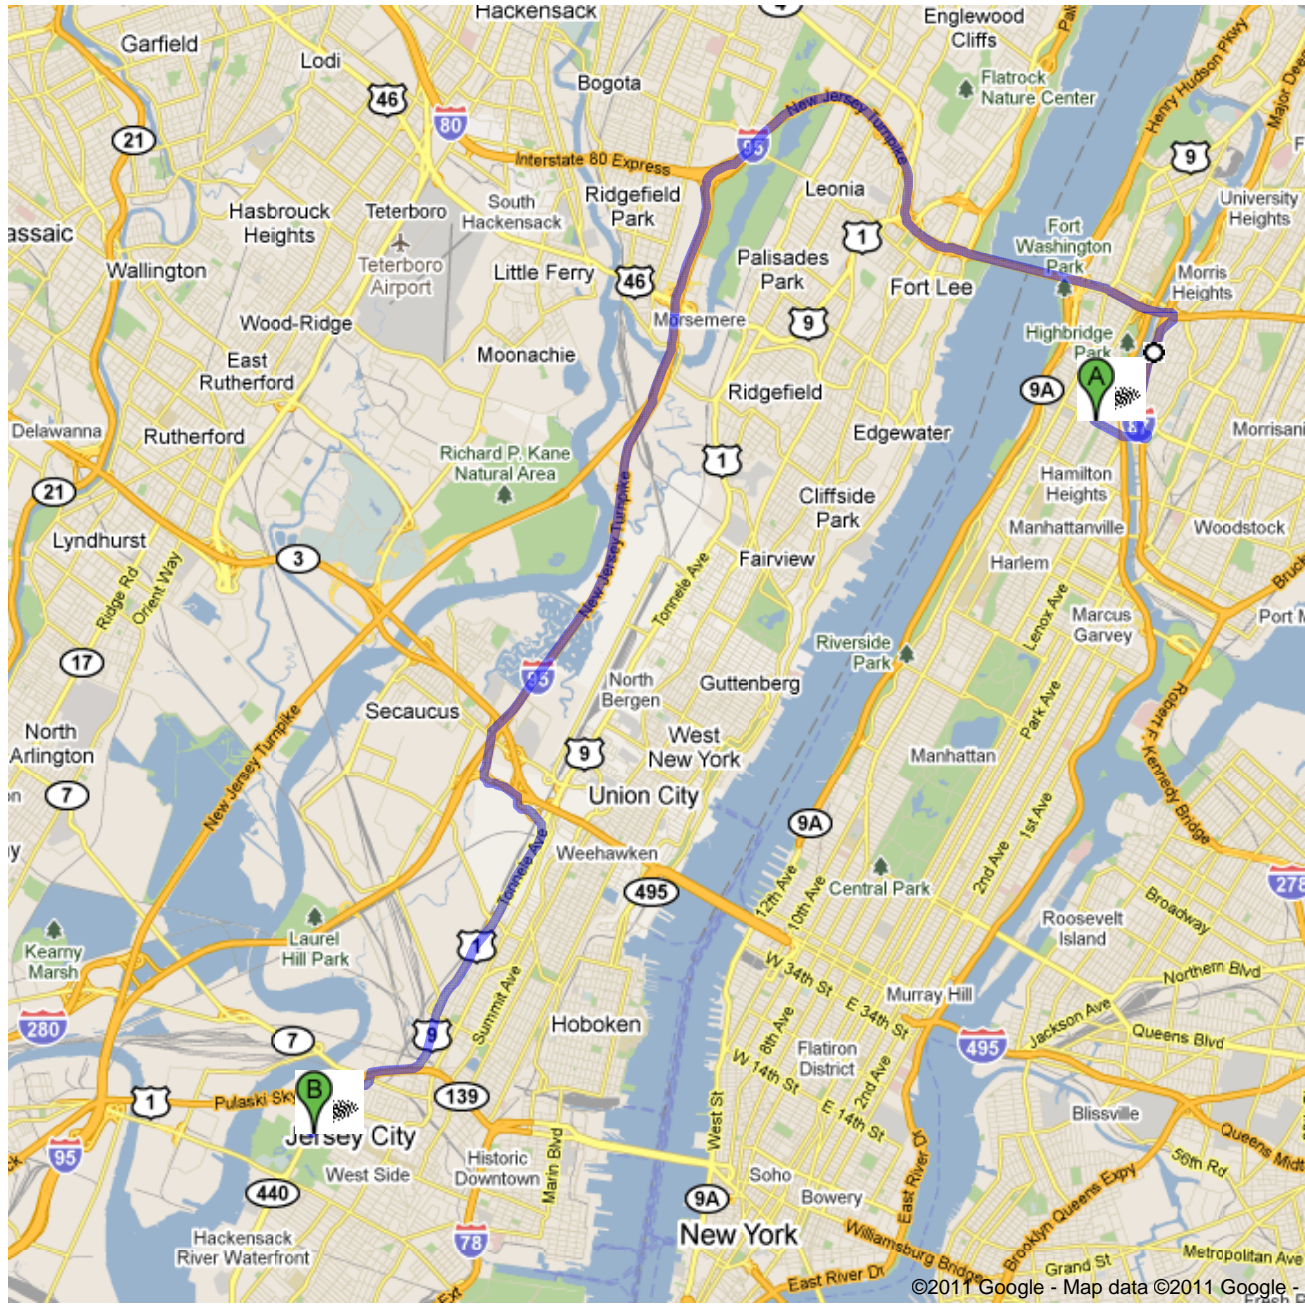

NOTE: Consult Structural Engineer prior to footing encapsulation.

APPENDIX 10

DIRECTIONS TO DISPOSAL FACILITY

Save trees. Go green!
Download Google Maps on your phone at google.com/gmm

W 155th St & St Nicholas Pl, New York, NY

	1. Head southeast on W 155th St toward Edgecombe Ave	go 0.3 mi total 0.3 mi
	2. W 155th St turns slightly left and becomes Macombs Dam Bridge About 1 min	go 0.2 mi total 0.5 mi
	3. Take the ramp to I-87 N/Maj Deegan Expy/Albany	go 0.1 mi total 0.6 mi
	4. Continue straight	go 0.2 mi total 0.9 mi
	5. Take the I-87 N/Major Deegan Expressway ramp on the left to Albany	go 397 ft total 0.9 mi
	6. Merge onto I-87 N About 1 min	go 0.5 mi total 1.5 mi
	7. Take exit 7S to merge onto I-95 S/US-1 S toward Trenton About 1 min	go 0.7 mi total 2.2 mi
	8. Slight left onto Interstate 95 Upper Level S/George Washington Bridge (signs for I-95 S/Trenton) Entering New Jersey About 3 mins	go 2.5 mi total 4.7 mi
	9. Continue onto Interstate 95 Express S About 3 mins	go 2.9 mi total 7.6 mi
	10. Merge onto I-95 S About 7 mins	go 5.8 mi total 13.4 mi
	11. Take exit 17 toward NJ-495 E Toll road About 1 min	go 0.6 mi total 14.0 mi
	12. Keep left at the fork and merge onto NJ-495 E Partial toll road	go 0.5 mi total 14.5 mi
	13. Take the exit toward NJ-3 E	go 0.3 mi total 14.7 mi

Mr. Chris Zacharias
Grid Logistics, LLC
100 Manhattan Avenue
Union City, New Jersey 07087

RE: Project #3245: Sugar Hill

Dear Mr. Zacharias:

Impact Environmental is the review engineer for the Hudson County Improvement Authority's exclusive Landfill Closure contractor for the Lincoln Park Landfill, Persistent Construction. In this capacity, Impact Environmental has reviewed the data contained within the application provided by your firm that included the following:

- AmeriSci Lab reports from November 12, 2010.

Based upon the analytical results contained within the reports, the following eight (8) sample IDs meet the acceptance criteria of the Lincoln Park Landfill project:

**SB01 (0-1), SB02 (0-2), SB02 (4.5-5.5), SB03 (0-2),
SB03 (8-9), SB04 (0-2), SB05 (0-1) and SB06 (0-2)**

This pre-approval is conditional upon our receipt and review of the additional analytical data requested (i.e. TCLP RCRA Metals and TPH). Additionally, this analytical data must be forwarded to the Hudson County Approval Authority for final remittance to be utilized as landfill capping media. Upon concurrence of our determination, the HCIA will issue tickets to be utilized to gain access into the facility.

The Lincoln Park Landfill project is open Monday through Friday from 7:00 AM to 4:00 PM.

Please contact me if you have any questions or comments concerning this approval.

Sincerely,

IMPACT ENVIRONMENTAL

Richard Parrish, P.G.
President

Notes:

All concentrations are reported in milligram per kilogram (mg/kg)

ND = Compound not detected above method detection limit (see attached lab report for mdl's)

NS = No Standard

TAGM RSCOs = NYSDEC Technical and Administrative Guidance Memorandum (TAGM #4046) Recommended Soil Cleanup Objectives (RSCOs) (January 24, 1994), amended December 20, 2000

SCOs = Soil Cleanup Objectives as per the NYSDEC Regulations 6 NYCRR Subpart 375-6 Remedial Program Soil Cleanup Objectives (December 14, 2006)

BOLD = Concentration exceeds NYSDEC TAGM RSCOs

Underline = Concentration exceeds Unrestricted Use Soil Cleanup Objectives

Shading = Concentration exceeds Restricted-Residenital Use Soil Cleanup Objectives

Notes:
All concentrations are in milligram per kilogram (mg/kg)
ND = Compound not detected above method detection limit (see attached lab report for mdl's)
NS = No Standard
SB = Site Background Concentration
TAGM RSCOs = NYSDEC Technical and Administrative Guidance Memorandum (TAGM #4046) Recommended Soil Cleanup Objectives (RSCOs) (January 24, 1994)
BOLD = Concentration exceeds NYSDEC TAGM RSCOs
Box = Detected concentration exceeds Eastern Soil Background Concentrations as per TAGM RSCOs
Shading = Concentration exceeds Restricted-Residenital Use Soil Cleanup Objectives
Underline = Concentration exceeds Unrestricted Use Soil Cleanup Objectives
*Background levels for lead vary widely. Average levels in undeveloped, rural areas may range from 4 - 61 ppm. Average background levels in metropolitan or suburban areas or near highways are much higher and typically range from 200 - 500 ppm
