Created in 2012 by Betsy Wieland, Agriculture Extension Educator in Hennepin County. She can be contacted at eliza003@umn.edu

**Notes:**

This log can be kept by hand or in the computer. If using on computer, can have it sum totals for you, and simplify monthly totals

Brought = the number of units of that crop brought to market

Total - for each crop, indicate the number of crops sold. It is easier to reconcile at the end of the market than the cash

If crop price changes mid-market, leave a row blank, write in the new price in that line and circle it and make a comment about price change

For the sample column indicate amount of crop offered as samples

Donations - line 5 indicates an example of donating remaining crops at the end of market

Donation and sample rows can be left off if preferred
