## **1] DOMAIN NAME REGISTRATION & WEBSITE HOSTING**

**Domain Name Registration:** Domain registration requires utilizing the services of a domain name registrar, an ICANN or national ccTLD accredited company that has the authority to register domain names. We help individuals and organizations to register a domain name that has an extension like .com, .org, .net, .info, .biz, .us, .mobi, .name, .pro, .tv, etc. depending on your choice.

**Website Hosting:** To make your Web site visible to the world, it has to be hosted on a Web server. We use the best architecture & web server technology to host all of our developed websites. Our hosting provider is larger than the next 8 closest competitors combined.

We will register a domain name for you, setup the server needed to host your Company site & create the initial website specific email you wish for your company

(example: you@yourdomain.com ). All these services are renewable on a yearly basis. We will inform you one month prior to expiry date of domain and hosting.

### **3] WEBSITE DESIGN PROCESS**

Artistic Design & Website layout, Creation of Web Graphics, Page designs Backgrounds or website skins. Optimization of graphics to ensure a fast loading web page. Edit, cropping, modification or adjustment of images needed. Ensure the usability & Credibility of web pages. Coding of HTML / XHTML structure of your website & ensure that it follows the latest web standards, look professional & modern. Coding Cascading Style Sheets (CSS) for your website pages. Creating the Navigation Menu & all the initial website pages you need for your website.

#### **COST OF WEBSITE DESIGN:**

3	Deluxe Template Package	Rs. 5,000/-
4	Extra Special Template Package	Rs. 7,000/-
5	Client Specific Template	Email us

\* To get the best deals on website design please contact us.

### **4] WEBSITE DEVELOPMENT**

Web development is a broad term for the work involved in developing a web site for the Internet (World Wide Web) or an intranet (a private network). Web development can range from developing the simplest static single page of plain text to the most complex web-based internet applications, electronic businesses, and social network services. A more comprehensive list of tasks to which web development commonly refers, include web content development, client liaison, client-side/server-side scripting, web server and network security configuration, and e-commerce development. Web development refers to the main non-design aspects of building web sites: writing markup and coding. We will develop the specific functionality & features you needed for your Company website.
