# Thank You

for your support!

Edward works in our chain assembly department.  
"Having a new work space will be great!"

BLUE SKY OPPORTUNITIES IS  
PLANNING A MAJOR PROJECT  
WHICH BENEFITS ADULTS WITH  
DISABILITIES IN OUR COMMUNITY.

New building design

The new collection process.

Due to the communities overwhelming support of our recycling programs we have maximized our capacity. Land has been purchased to construct a new recycling / chain assembly building in Altona. Construction of the 14,400 sq. ft. facility is planned to begin in the spring of 2016.

The new building will house our recycling and combine chain assembly operations.

The new recycling sorting equipment.  
Working conditions and productivity will greatly improve!

We are asking for your financial support. Contributions can be a one-time donation, or divided up to a three year period. All donations are tax deductible!

Construction of this new facility will provide adults with intellectual disabilities a much improved working environment, and attract additional people to seek support and employment in our community. Our communities will benefit from improved and expanded services.

We are pleased to announce Ray Loewen as our  
Chair of our Fundraising Committee!
