## BUSINESS SUMMARY OF ENTIT

With a vision of providing customer oriented IT services, a group of experienced IT professionals came together to initiate **Entit Consultancy Services Private Limited** in the early 2011. After a lot of consideration and market research, Entit was setup in the heart of central India having a huge talent pool and easy access to bigger domestic & International markets. In such a small time of its existence Entit has established itself as one of the leading IT service provider in the region, bagging numerous clients in its portfolio. Besides, Entit is an **ISO 9001:2008 certified company**.

The founders have had years of experience through leading IT companies in the world, catering to Fortune 500 companies in multiple geographies across the world.

Entit's call to its customers is: "**Innovate with us**", which is achieved with a **VISION** to bring a difference in today's & tomorrow's enterprises, through our thought leadership & Innovative solutions. We believe in providing maximum cost benefits directly to the client by minimizing company overheads (without compromising on quality) which elsewhere is directly or indirectly charged to the customer.

Entit's offerings span across three pillars of our methodology of **Enable-Enhance-Engage**:

- **Enabling** through Training Services for organizations – End User Training, Train the Trainers, Business enablement, Soft Skills, Cross Cultural Sensitivities and many more.
- **Enhancing** through Application Services, Product Engineering, Software development, Technical and Business IT Consulting. Implementation & Maintenance of IT solutions is an integral part.
- **Engaging** through direct participation in the customer reach of our clients by providing Customer Service Solutions through our BPO solutions.

Our primary business focus and core competency is to provide customers with End-to-End Solutions in the area of emerging technologies, designed on the world class platforms, thereby empowering enterprises technologically for the new millennium.

Entit is operated from a State-of-the-art office setup including a Development center and a Training Facility. We have a strong team of experienced resources with excellent academic background.

Entit is a business partner with various renowned names in the industry like IBM, Oracle, HP, Dell, Honeywell, Ricoh, Xerox and New Horizons Learning centers.

## ABOUT THE DIRECTORS

### AMIT AGRAWAL

Amit is an IT industry stalwart with **over 11 years of experience** in managing large scale projects for various “Fortune 500 Companies” in North America, Europe, and Asian markets. It is necessary for them to understand the customer's requirements, suggest detail design, perform excellent use of best available resources/technologies in market, reduce wastes, increase productivity, optimize cost, manage risk, maintain quality, proactively approach to resolve future issues and provide guiding suggestions to them.

Entit as an IT company provides IT consulting and Implementation, Enhancement of existing Software and Maintenance of IT projects in the areas of strategy, application and enterprise (ERP). We provide results-oriented, value –added services to both commercial and public sector clients. Our services spread across multiple technology platforms, operating systems and infrastructures. Our teams of IT consultants come from rich variety of experience in solving complex business for various industries.

## OUR EXPERTISE:

### Enterprises Solutions – Oracle Applications

Enterprise Resource Planning or ERP system along with benefitting a business through improved efficiency, information integration for better decision-making, and faster response time to customer queries, helps in building better corporate image, improved customer goodwill, customer satisfaction and so on. ERP systems integrate all business management functions,

including planning, inventory/materials management, engineering, order processing, manufacturing, purchasing, accounting and finance, human resources, and more.

Oracle Application (Oracle E-Business Suite) is one of most demanding, stable and fastest growing ERP product in the world. Its current revenue comes around US \$35.6 billion. Oracle EBS uses Oracle RDBMS as a back end whereas other Oracle Apps modules (Manufacturing, Financial, CRM, Projects, SCM and Human Resources) as a front end.

At Entit, our ERP Consultants (Oracle apps) have years of experience of Oracle E-Business Suite in various industries like Semi-conductor, Retail, Telecom, Automobile etc. Our team of technical & functional resources is excelled in providing effective business solutions across all the modules of Oracle EBS.

Our team is well versed in all types of technical, reporting & scheduling tools in and around oracle EBS like:

- ❖ PL/SQL
- ❖ Oracle Discoverer
- ❖ D2K Forms & Reports
- ❖ XML Reporting
- ❖ Oracle Financial Analyzer (OFA)
- ❖ Oracle Workflows & Alerts
- ❖ Appworx
- ❖ UNIX scripting

We provide Implementation, Upgrade & Support services for different versions of Oracle EBS.

#### **IBM Collaboration Suite:**

Medium sized business face unique collaboration challenges that are magnified in today's economic climate. IBM Lotus Software is designed to provide simplified solutions and delivery models based on the needs of medium sized businesses. At Entit, we help our customers to better understand their technology options and how to leverage Lotus collaboration solutions to lower their IT total cost of ownership and increase organization's productivity. With collaboration solutions from IBM, organizations can:

- ✓ Stay within budget while delivering best-in-class collaborative solutions
- ✓ Provide mobile and remote workers with access to email, calendars and applications
- ✓ Automate and speed workflows to improve consistency and reduce errors
- ✓ Scale to address their growing needs

### IBM Tivoli Product Group:

IBM Tivoli SW offerings provide efficient and most effective endpoint management , centralized and automated data protection that can help reduce the risks associated with data loss while also helping to reduce complexity, manage cost and address compliance with corporate/ regulatory data retention and availability requirements. With trained & certified professionals on IBM Tivoli Product Groups, Entit understands the needs of its clients towards effective storage & End-point management.

### Data Ware Housing & Business Intelligence:

Data warehousing and business intelligence are key solutions towards performance management of an organization and plays a vital role towards keeping the customers current with the market. From business intelligence to financial performance and strategy management to analytics applications, these products can provide what your organization needs to become top-performing and analytics-driven. With products for the individual, workgroup, department, midsize business and large enterprise, these are designed to help everyone in your organization make the decisions that achieve better business outcomes—for now and in the future. At Entit, we have a dedicated team of experts working towards implementation of various DW and BI tools like Cognos, Business Objects, Informatica, Webmethods and more.

### Workforce & Time Management:

Entit provides services towards workforce and time and attendance management. We have a strong team working towards implementation and maintenance of various Workforce management tools like Kronos, Honeywell, Smarti, SecureEye and more. Various solutions towards our workforce management stream include:

- ✓ Track Employee time & attendance
- ✓ Administer Payroll & HR Services
- ✓ Time & Labor tracking
- ✓ Absence Management
- ✓ Advanced Scheduling

### **GIS Application Services:**

In emerging technology paradigm, “Geographical Information System (GIS)” has emerged as powerful tool which has potential to organize complex spatial environment with tabular relationships. We draw upon the talent of experienced researchers in the fields of GIS and Image Processing to provide a wide range of products and services. The prime services that we offer are:

- ❖ GIS consulting for urban planning, natural resources management etc.
- ❖ Spatial database design & development
- ❖ Integrated survey using Remote Sensing, GIS and GPS techniques
- ❖ Customized application development
- ❖ Photo-grammetry, Interpretation of Remote Sensing data
- ❖ Digital Elevation Modeling and contour map generation

### **Customized Web Solutions:**

We offer quality service in developing and deploying Open Source software solutions to clients. We have delivered several web and desktop software solutions using technologies like .NET, PHP, Java, etc to clients ranging from small enterprise to large organizations, accessed by hundreds of users’ access from different locations. Entit has in-depth functional and technical experiences in web design, development and deployment. In web domain, we offer scalable, modular and customized web designing & Portal services that meet our client’s innovative, user friendly and usability requirements. We have expertise in developing customized as well as CMS based websites using tools like Magento, Joomla, Word press, Drupal etc.

### **Validation Services (Testing Solutions):**

We help our clients to plan their test investments and manage critical testing processes to reduce the cost of producing quality software. We have a dedicated team of test engineers excelled in all kind of Manual & Automated testing methodologies and are capable in various testing types like Stress/Load testing, Performance Testing, Recovery Testing, Conversion testing, Usability testing and Configuration testing.

We are well versed with different methodologies of testing like:

- ✓ White Box Testing
- ✓ Black Box Testing
- ✓ Incremental testing
- ✓ Thread Testing

We have expertise in various testing tools like Selenium, QTP, Mercury Load Runner, WinRunner Etc. We follow a comprehensive approach towards different phases of software testing life cycle from Requirements study, Test Plan Design, Test execution, Test closure & Test process analysis.

### E-commerce:

E-commerce portals developed at Entit gives customer the edge by helping them increase profitability, reduce overheads and revolutionize their service. Our ecommerce sites have:

- ✓ Excellent communication with any new visitors and regular customers
- ✓ Promotion of your products
- ✓ Secure and on time conduction of business transactions
- ✓ Reduce operational costs
- ✓ Strengthen your company's image/brand

### BPO Services:

Business Process Outsourcing enhances the flexibility of an organization in different ways like helping in resource management and reducing response time to major environmental changes. We at Entit have a strong team of professionals capable of handling Inbound & Outbound Tele-services, Tele Marketing, Help Desks & Back Office services.

## WHY ENTIT?

At such a challenging time, companies need to struggle for sustenance. IT plays an integral role in succeeding. At Entit, we believe in providing cost-effective yet quality enabled solution. The key differentiators about us can be detailed as:

## WHAT IT MEANS TO THE CLIENT?

### ➤ **Best in Class HR Practices:**

Client will have access to trained and experienced resources to work on their projects. Each of our resources are hired and trained after a stringent process of recruitment. Our emphasis is on making the projects person independent, which is achieved through various attrition handling techniques. While we reduce the attrition in our projects through various motivational exercises and skills upgradation techniques, we also ensure a **smooth transition** in case needed.

- ✓ The knowledge transfer is transparent to client and done seamlessly, thereby saving cost and effort.
- ✓ A well-defined transition approach is followed, which is embedded into our delivery methodologies through well documented Process documents, Standard reports and Open & known Issues.

➤ **Robust & Transparent Project Management:**

This ensures smooth functioning of the project and gives clear understanding of the process to the client, thereby removing any kind of Gaps. This is to ensure a short turnaround time to achieve the steady state.

➤ **Emphasis on quality & Risk Management:**

Providing high quality ensures a low maintenance cost. **We are an ISO 9001:2008 certified company.** With our structured risk management approach, it is in our inbuilt capability to mitigate the risks at an early stage. Our Risk management approach involves six layered approach:

- ✓ **Identify** : Search for Risks before they are problems
- ✓ **Analyze** : Evaluate Impact & Probability, Classify, Prioritize risks
- ✓ **Plan** : Transform Risk Information in to decisions & actions & Implement them
- ✓ **Track** : Monitor risk indicators and mitigate actions
- ✓ **Control** : Correct for deviations from the risk management plans
- ✓ **Communicate**: Provide information and feedback to all the stakeholders at each level

➤ **Extensive Experience:**

Our experienced resources along with highly experienced Senior Management (having experience in multiple domains in multiple geographies) have an edge over Delivery functions.

➤ **Multi Phase solution approach:**

We deliver overall solution quality ensuring reliability, efficiency and maintainability of our solution by involving quality assurance resources from our business units at each stage. Multi layered approach ensures that each stage is given due importance in the development cycle. Our approach is to plan and to deliver the solution with maximum buy in from all the stakeholders. This can be seen in all types of our project, be it Implementation/Development, Testing or Maintenance support.

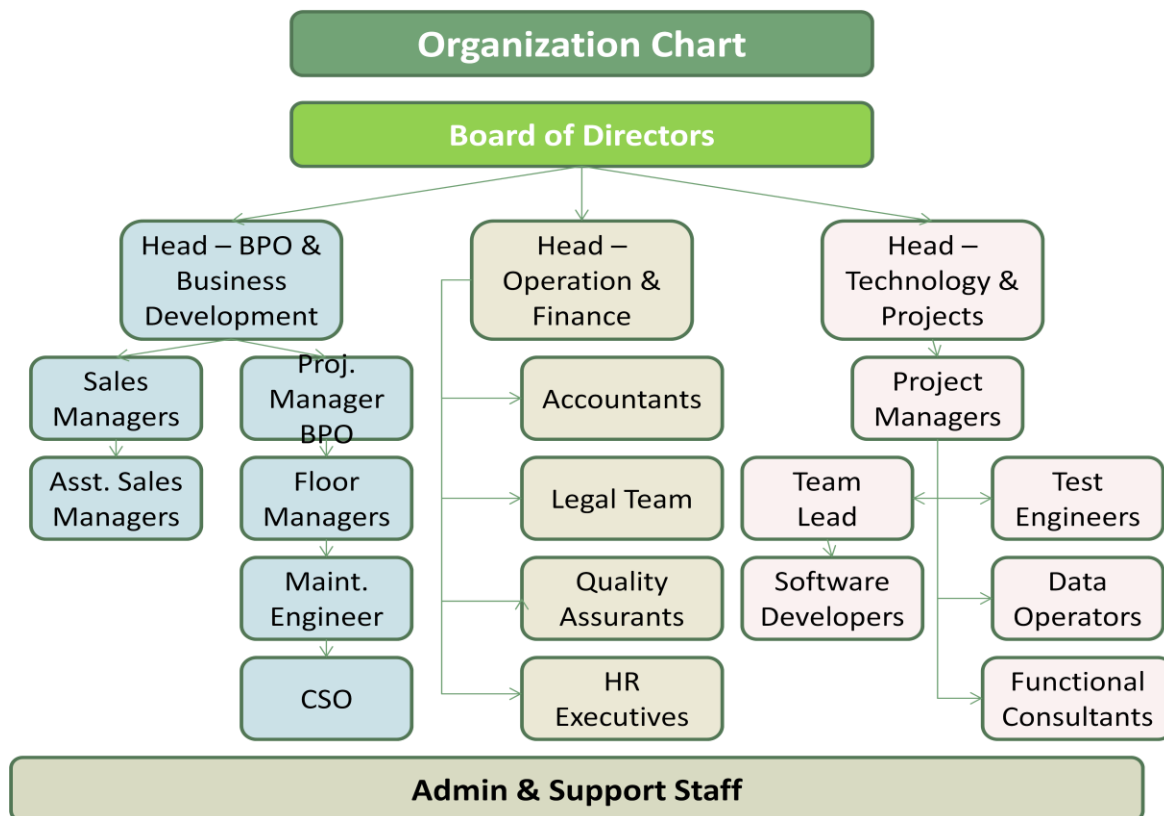

➤ **Low overhead costs:**

By removing overhead costs, we give the economical benefit straight to the client to help them reduce their TCO.

## ENTIT AS AN ORGANIZATION

### ORGANIZATION CHART
