Emails through mailing list system	Free
SMS's through Bulk SMS system	R0,22+VAT

Traffic & Data (space) allowance per website – currently there are no official limits on the amount of traffic (or data) that clients may have on their websites and/or email. The agreement states the traffic and data must be “within reason”. Seeing that data and traffic charges are continuously dropping, we do not specify a limit at this stage; if however, a client's website becomes extremely large and/or busy then we will negotiate a new reasonable hosting charge with the client and/or put the website on an overseas server (which is slightly slower than a SA server)

*** Note on cancelled or postponed meetings:**

Clients must please note that Kwikwap Agents set aside a few hours to see them, so if a client cancels within 24 hours of the meeting it often leaves the Agent with insufficient time to fill the hours. Therefore, meetings should be please be cancelled or postponed more than 24 hours in advance.

Two important notes:

1. All packages include a live report that tells you which search terms brought visitors to your site, which pages they visited and how many visits you had from which search engines and from which countries your web visitors come from.
2. The Level 2, 3 and 4 packages perform better on the search engines; if it is very important for you to be on the first page then choose one of those packages. The Level 3 and 4 package also allows you to use the extensive tools that are available at Google Webmasters Central.

Frequently asked questions

What do you get for your money?

A Complete website designed and set up as well as training in our Content Management System.

Continued support and free updates to the software

Lightning fast hosting

What functionality does your system have?

Just about anything!

A summary can be found on the bottom of this document. On the front page of our website, www.kwikwap.co.za, the features are discussed in more detail.

If there is no catch, so why is it so cheap?

This is not the world's first website design software, but we made 100% sure it is the easiest! Because our system is so user friendly, we can use normal people to develop your website. No longer do you have to pay a highly skilled developer to design or update your website. We talk your language!

Before you embark on your website development project, whether it is an upgrade or redesign of an existing or a brand new website, ask yourself these 20 questions:

1. Are you trained in person how to easily update your own website (included in the website design fee)? Can you update your own website? If yes, have you been trained sufficiently to be confident enough to make the changes yourself?
2. Will your webmaster ever pay a personal visit to your office or home?
3. Does your website get found for generic search terms? This means that you should be found not only when people search for your company name, but for your type of products and services as well.
4. Can you easily reach your webmaster on his cell phone?
5. Does your webmaster have a countrywide support network and/or online help manuals?
6. Does your webmaster keep your website's underlying structure up to date with the latest trends without charging you?
7. Can you request a new webmaster without any repercussions or cost to you?
8. Does your webmaster give you online access to hits and search term reports?
9. Does your web development company ever have free training sessions to help you with your website and Google results?
10. Can your webmaster offer you a fixed rate for a website of between 5 and 500 pages?
11. Is your website e-commerce enabled without paying extra fees?
12. Does your website pass the validator tests (tests to see if your website can be read by all PC's, cell phones and search engines)?
13. Is your website 100% cell phone and PDA compatible?
14. Does your webmaster use language that normal non-technical people can also understand?
15. Can you change your website language at the click of a button?
16. Does your website system have a free bulk sms, mailing list system and autoresponder included?
17. Does your website allow you to quickly and easily build forms and surveys?
18. Does your website have a built in events calendar, newsletter, advertising space, videos and map?
19. Do you think the so called free websites that are offered on the internet will make you money and save you time?
20. Does your website offer a special module for your specific industry or do your developers offer to develop you a module for free?

If you can find better value for money web design anywhere, then we pledge to offer you a free website!
