

Single Touch Payroll Deferral Notice

The ATO has worked with Automatic Data Processing Limited and granted a deferred start date for Single Touch Payroll for the following products:

Product	Version	Deferred start date	Deferral Number
Payline	5.0 >	30 April 2019	81979207

Your payroll software provider will work with you to help you transition to Single Touch Payroll reporting within this timeframe. Contact your provider to find out more.

- > You are covered by your payroll software provider's deferred start date. You will need to start reporting on or before this date.
- > You do not need to contact the ATO if you intend to start reporting through this product by the deferred start date listed above.
- > If you have received ATO communications advising you need to start Single Touch Payroll reporting from 1 July 2018, the deferred start date listed above overrides this.
- > You do not need to apply for your own deferral separately **unless** you won't be ready by the deferred start date, and need additional time.
- > You can start reporting to us through your updated software as soon as it's ready.

Regards,

John Shepherd
Assistant Commissioner
Australian Taxation Office
