### **Book Report-----Frankenstein**

The name of the book I've chosen is Frankenstein which is written by Mary Shelly. The book I read is the original one and Mary is a new writer to me. There are 281 pages and was written in the early nineteenth century.

It's content is about a doctor named Frankenstein who had expert knowledge in science and became the first scientist to create a monster. This monster was very sympathetic, tolerant and approachable at first. But since its appearance was very different from human beings, everyone was scared of it. It felt pathetic and asked its master Frankenstein to create another lady monster for him as a partner for it. The scientist refused and angered the monster. It killed Frankenstein's wife and since then their tension was further increased. At last the monster felt very lonely and never came back again.

The main plot of this story is to tell us not to judge by someone's appearance. What is more important is his honesty and loyalty to others. If everyone did not look upon the monster's particularly ugly appearance, this tragedy between the scientist and the monster would not happen.

I think the most innocent character was the transcendent genius Frankenstein. He was deeply imbued in the secrets of science and would have a good future. No one would know that his marvelous invention would send his relatives and wife to death. He refused to invent a partner for the monster because he knew that everyone had looked down upon his invention. This story told me that appearance can be misleading. We should judge friends by their characters and behaviour, not appearance.

As for the quality of the book, I would appreciate more if the size of the book is smaller. Also, there are too many descriptions about the school life of Frankenstein which is the unnecessary part of the story.

The cover page of this book is a scientist holding a test-tube in a laboratory with a monster beside him, which is related to the story. I appreciate and enjoy

reading this book because it teaches readers something about personal character.  
I would highly recommend this well-known book to others.
