

Client Investment Profile (CIP) Questionnaire for – Individuals or Investment Companies 2018

Introduction

Why do we require this Questionnaire?

Understanding your investment objectives, investment risk appetite, and investment knowledge and experience is critical to ensuring that we recommend suitable investment products to you. It is the Bank's responsibility to ensure that this information is collected. It will help us determine the investment profile for your relationship with us and to assist us in acting in your best interests.

If you appoint an authorised person (as defined in the applicable General Terms and Conditions) having the authority to operate and give instructions on your account, you shall ensure that such authorised person has the required investment knowledge and experience.

Upon completion of this Questionnaire, you will be asked to confirm your Client Investment Profile "CIP" rating which will range from 1-6. The confirmed CIP rating will be used to guide our investment recommendations for you.

We may periodically request you to reconfirm or update your CIP. However, should there be changes that may affect your investment objectives, investment risk appetite or financial situation at any time, please let us know so that we may assist you with a reassessment of your CIP.

Please note that our ability to perform a suitability assessment will be dependent on the information you provide us, both here in this Questionnaire as well through other channels. Any inaccurate or incomplete information is likely to affect the suitability of any investment recommendation that we provide and result in your investing in a product or undertaking transactions that may not be suitable for you.

Who should complete this Questionnaire?

For an individual account holder, this Questionnaire should be completed by that account holder.

For a joint account, this Questionnaire should be completed by all the account holders, whereby the joint account holders' collective response will reflect your agreed financial objectives, circumstances and knowledge and experience with financial instruments. A collective CIP rating will be assigned to the joint relationship based on your combined responses. With respect to investment knowledge & experience, the Questionnaire responses should reflect the joint account holders' combined understanding of financial products and associated risks as well as their experience with investing in various product classes. By attesting to the common knowledge & experience, the joint account holders confirm that the Bank can issue investment recommendations and accept execution orders in line with the resulting Risk Profile, regardless of with which joint account holder we are communicating.

For a Private Investment Company "PIC", established solely to manage an individual's assets, this Questionnaire should be completed by the beneficial owner(s) of the PIC. A CIP rating will be assigned to the PIC based on that individual's response to this Questionnaire.

When should this Questionnaire be completed?

For new clients, this Questionnaire should be completed during the account opening process.

For existing clients, we may ask you to complete the Questionnaire as part of a periodic review of your bank relationship with us. However, should there be any material change to your financial situation and/or objectives, please notify your Relationship Manager to reassess your CIP.

How will this information be used to provide you with investment recommendation services?

This CIP questionnaire assesses an individual's investment strategy (including those individuals investing via PICs), financial situation, and risk attitude.

Standard Chartered uses analytical processes to determine the risk levels of investment products available to our customers, rating products from levels 1-6. We will use your CIP rating, together with the Product Risk Ratings¹ "PRRs" and other relevant information, to assess if a particular investment is suitable for you.

Even after we recommend any investment product, you should consider if you are comfortable with the features and risks of that investment product before making any decision to invest.

Where we alert you that your investment decision will result in a concentrated position based on your assets, and you still decide to continue with the investment approach, we will ask you to formally acknowledge that you have directed us to do so. We would recommend caution as highly concentrated portfolios may result in increased volatility and losses.

Further Information

If you have any questions, please do not hesitate to discuss them with your Relationship Manager.

¹All banks have analytical processes whereby investment products are risk rated, and client's risk appetite is assessed. Different banks will have different outcomes of product and client investment risk ratings, similarly clients and banks may also have different views. It is important to note that what a client may perceive to be a lower risk product or investment profile, the Bank may consider to be higher, or, vice versa. Such variations can result in varying outcomes for investors.

¹ Return: Best and worst calendar year performance over the period 1994 - 2017

² Volatility: Five year historic volatility using monthly data over the period 1994 – 2017 (rolling average, annualised)

Important points to note:

- (a) You should be aware that the time taken to recover from a downturn to the original level of your investment will vary by investment and that the higher the risk of the investment, the greater the potential loss and the longer the potential recovery period.
- (b) Past performance is no guarantee of future returns.

- D. I may require the ability to withdraw 10% of my investments with the Bank in the next 12 months.
- E. I do not require the ability to withdraw my investments with the Bank to meet my liquidity needs.

3. Investment Objective

3.1 Investments have varying time horizons. Some investments have fixed, potentially long-dated time horizons. Some may even have lock-in periods. What is the longest time horizon you would consider for any investment in your portfolio? Please pick the one that applies.

- A. Up to 1 year
- B. >1-3 years
- C. >3-5 years
- D. Over 5 years

3.2 What is your investment objective and risk attitude? Please pick the one that applies.

My investment objective and risk attitude is....

- A. Protect the value of my capital, I am not comfortable taking any investment risk.
- B. Achieve investment returns above deposit rates, whilst only taking low level of investment risk of around 1-10% of my investment.
- C. Achieve low to moderate income generation and/or capital growth on my investments, by taking moderate levels of investment risk of around 10-15% of my investment.
- D. Achieve moderate to high income generation and/or capital growth on my investments, by taking high levels of investment risk of around 15-20% of my investment.
- E. Achieve substantial income generation and/or capital growth on my investments, by taking significantly high levels of investment risk of around 20-30% of my investment.
- F. Achieve exceptional income generation and/or capital growth on my investments, by taking extreme levels of investment risk of over 30% of my investment. This could include very aggressive strategies, some of which could involve leverage, and may result in losing more than the original investment.

Examples
