INTERNSHIP AND PROJECT EXECUTION REPORT

(People Preneur-AIESEC)

Malang was one- of the biggest cities in Indonesia and I am so happy that we chose that place for the internship. This place was representation of new modern world and the natural beauty. We were there for a project People Preneur and the duration was from July 2, 2018 to 15 Aug, 2018.

When we reached there we were excited and curious to meet everyone over there. There were other exchange participants also from 12 countries. There was a day called IPS where we met to other projects EP also.

We got our SME one for each student on the day of business 101

Amit Kumar Meena= Arafahfood
Harshit Gupta= Ceramic Suesarto

Every week 3 days were fixed with SME, 2 days for finding problems and 1 for providing solutions. On other days we had meetings with experts and other EP for finding the best solutions. At the end of the project we gave them the mile stones and a business canvas model for the betterment of their business.

Other than work we learned about the culture of Indonesia, the traditional music, food, dresses and some museums. We went for so many places to visit. We did some adventure sports like paragliding, river rafting and camping etc.

There was a Global citizen day where we represented Indian culture like dress, dance and food; we won the best booth award.

So it was a life changing experience for us. Meeting new people from all over the world and learning their culture was awesome. It was one of the best days of our life. If I write it in one line "it was a journey of learning, experience with a lot of joy"

Certificate of Excellence

is hereby awarded to

India

as **BEST BOOTH**
during the Global Citizen Day 2018

Malang, July 28th 2018
