

# Mock Active Learning Session Feedback Form

## TA Workshop, Fall 2017

For 5 minutes after each 15 minute session, one group leader will moderate a discussion while the other group leader will make a written summary of the discussion. The summary should be read out and be modified and approved by the group as a whole prior to starting the next session. **The written summary should address both the mathematical and social aspects of the active learning session, both from the point of view of the TA's and the students.**

**Example Mathematical Aspects:** (a) Key mathematical ideas behind a problem; (b) Specific suggestions for how TAs can provide better guidance.

**Example Social Aspects:** (a) Degree to which group members felt included in discussion; (b) Extent to which TA's kept an eye on progress of groups and frequency with which groups were visited.
