Please note: Import permits that may result from this application will not permit the direct or indirect exposure of the imported materials or derivatives to plants or non-laboratory organisms. Some permits may restrict the use of good to in vitro laboratory studies only. For Vaccine production a separate application for in vivo use must be applied for and granted by the Department of Agriculture and Water Resources.

General note: Information provided in this questionnaire will be used to assess the biosecurity risk of product being imported into Australia i.e. the risk of imported product introducing a pest or disease into Australia. Based on a review of this information the Department of Agriculture and Water Resources Biological Imports Program will, where possible, apply conditions to an import permit that allows the relevant product(s) to be brought into Australia.

Under the *Biosecurity Act 2015*, the department of Agriculture and Water Resources has powers to inspect, sample, test and/or treat imported goods to mitigate biosecurity risk. These powers will be used where a Quarantine Officer (or other authorised person) is of the opinion that imported goods may represent an unacceptable level of biosecurity risk. These powers are distinct from those related to the import permit process.

DAFF may contact overseas Government competent authorities to verify any information provided by overseas manufacturers.
