

## Child Care Provider Testing Schedule

**This list will be updated weekly after sample bottles are mailed out from the lab.** If you do not see a child care provider on the schedule, the sample bottles have not been sent to that child care facility.

Child care providers are required to notify parents, guardians and staff as soon as they receive the sample bottles. Five days after notification, child care providers will collect water samples. Results will be emailed to child care providers within two to six weeks. Results will be posted on the [results website](#) one week after the child care provider receives the results.
