

Budget & Logistics

A dedicated solution to optimize training operations

CHALLENGE

Training departments face fixed or decreasing budgets while learning and training needs continue to grow. Training professionals are under increased pressure to track costs and manage expenses in order to train more with less. In addition, Instructor-Led Training (ILT) still accounts for more than 60% of the budget and requires precise logistics management to make every dollar count. It is becoming increasingly critical to improve the management of resources, such as trainers and material assets, in order to increase utilization rate and maximize session occupancy.

Budget & Logistics is the solution to optimize training budgets and align them with the organization's strategy. It also allows organizations to optimize cost control and administrative productivity.

Train more with less through qualitative and cost-effective resource management

BENEFITS

Optimize training budgets

- Support for multiple hierarchical budget structures
- Automatic and precise expense management
- Real-time and exhaustive tracking of remaining budgets

Drive detailed forecast

- Predictive volumes and cost computation
- Complete scenario-based training plan
- Simple checkbox financial arbitration reconciliation

Automate logistics planning

- Predefined organizational configurations
- Built-in scheduling process
- Detailed status and milestone tracking

Enhance resources management

- Graphic overview of all training KPIs
- Customized thresholds for critical assets
- Real-time conflict alerts
