

Research Project Update Report

As stated in our Access Procedures, as Principal Investigator (PI) you are required to provide UK Biobank with annual progress updates of your Project, and inform us of all publications, patents and results arising from your research.

Please complete and upload this report template to the Access Management System (AMS) within 2 weeks. For help, please see our AMS User Guide on the UK Biobank website.

Research Project Details	
Project Number:	
Project Name:	
Project PI Name:	
Project PI Institution:	

1. Are all researchers currently accessing UK Biobank data as part of this Project named in the collaborators list in AMS?	Yes / No
If no, please ask any unregistered researchers to submit a registration as soon as possible. After registration approval you can add them to the collaborator list. Please remove any collaborators who are no longer accessing the dataset.	

We ask that you remind yourself of your obligations as Applicant PI, paying particular attention to publications, patents and results, before you complete question 2 onwards. Please refer to your Material Transfer Agreement to assist you in completing the remainder of this report.

Analysis

2. Have you completed the analysis as detailed in your Project?	Yes / No
If yes, when all Publications have been uploaded to AMS and your results have been returned, please confirm below that the UK Biobank dataset has been deleted or rendered inaccessible. If no, please provide further details below:	

Publications

3. Please list all publications since your last Research Project Update Report, if any:

4. If you know where/when you intend to publish your findings, please provide further details below:

Patents

As stated in the Materials Transfer Agreement, the Applicant PI must provide UK Biobank with a copy of any patents whose claims cover, or are intended to cover, an Applicant Generated Invention¹ within 2 months of the patent rights being granted.

¹ **Applicant Generated Invention** - for definition please refer to your Material Transfer Agreement.

5. Have you, or are you about to, apply for a patent?	Yes / No
If yes, please provide further details below:	

6. Have any patents been granted	Yes / No
If yes, please provide UK Biobank with a copy of any patents.	

Results

As per our [Access Procedures](#) and [Data Management and Sharing Plan](#), you are required to return the results of your Project within six months of publication or twelve months of the end-date of the research project, whichever comes first.

You are required to provide us with your final analytical data file (i.e. that contains any derived data-fields and/or results) pertaining to each publication, and any accompanying metadata/algorithms etc., together with a sufficient description of the methods such that other researchers can replicate the published results. The provenance of all derived data-fields and results that are incorporated into the Data Showcase will be fully acknowledged.

7. Description of analytical dataset (size, exclusion criteria, definition of cases/controls, if applicable):

8. What, if any, derived data-fields may be of interest to other researchers? (please provide a brief description of each derived variable followed by the name in brackets, for example 'We derived prevalent cancer for males (prevcancer_m) and females (prevcancer_f))

9. If you received raw bulk fields (i.e. images, accelerometer, ECG etc.) as part of your project, do you have any derived variables to return?	Yes / Not yet / Not applicable
If not yet, please can you estimate when these might be returned to us:	

10. When do you intend to provide UK Biobank with the analytical data file relating to your publication(s)?	
--	--

11. Please provide any further details relating to this Progress Update Report below:

12. If this report is being completed by someone other than the PI (listed above), please provide your name and position below:

Date report completed:	
-------------------------------	--

Note: please save as a .pdf document and upload in AMS
