TWITTER POST FORMAT

While it seems easy to design Twitter posts according to the given examples above, how about what makes up a correct Twitter post format? In this segment, you will learn about the key elements that make up a well-formatted Twitter post.

1. Goal-Oriented Tweets

Just like most social media sites, Twitter is a fast-paced platform for sharing posts. One moment you could get many likes but after a few minutes, your tweet can go under limbo. But you can grab as much attention as you can with a clear goal or intention for your Twitter post.

2. Appropriate Tone and Voice

Always know your audience so you would know if you should use humor, optimism, or a formal tone with what you write in a post. For example, your romantic-comedy movie-oriented puns in a tweet might misfire from a huge following of formal business owners from the older generation.

3. Eye-Catching Images

Attention-grabbing photos in a post can definitely sell! But, don't commit clickbait by making sure your impressive images are related to your goal or post.

4. Timing

Before posting anything on Twitter, you might need to check your timing. Maybe your posts are under the radar because of sharing Twitter posts at a time where only several people are online. Hence, find the right moment to post.

5. URL for Action

Most ads and promotions involve a call-to-action message. And you can redirect audiences to the right URL if you encourage them to sign up, register, order, or purchase.

6. Texts

Expect tweets to let you write from 120 up to 140 characters or only 20–40 characters if images are included. Your job is to make sure you can deliver enough messages in those limited characters with clear and understandable content.

7. Hashtags

Using unique and ongoing hashtags is a smart way to stay trending in the Twitterverse. So make sure you incorporate creative and appropriate hashtags into your posts for effective marketing.

FAQs

What is the standard Twitter post size?

Twitter image posts are usually measured around 1200 x 675.

How do you post on Twitter?

Simply make a tweet with a maximum of 280 characters in the box found at the top of the Home timeline. Or perhaps, you click the Tweet button right away. And in a post, you can incorporate a video, photo, or GIF until you are prepared to publish it to your profile.

Is it better to tweet or retweet?

It is much better to tweet when you want to make an original post where the content, structure, format, design, and rules are up to you. But you may find it better to retweet if you just need to share a post in pronto while also giving credit to who originally posted it.

What is not allowed to post on Twitter?

You can't post about NSFW content, sensitive media, graphic violence, sexual violence, and more which you can find in Twitter's policies.

Is it safe to post on Twitter?

Twitter is known for being a well-secured website due to requiring strong passwords for any user's protected accounts. But as a user, you should also be responsible for making secure passwords, adjusting privacy settings, and posting responsibly.
