Family Tree Format

Though there are many types and forms of family trees, all of them follow the same basic format. Every family tree must have these components:

1. The Chart or Diagram

Without a chart or diagram, it won't be a family tree. You can craft the chart or diagram as creatively as possible. Just make sure that it's enough to accommodate all of your family members' names. Speaking of names...

2. Names of Family Members and Relatives

Write down the names of your family members and relatives using clear fonts. You can either write their full name or just their first name. You may also attach photographs of them if possible. That would make your family tree more presentable.

3. The Role in the Family

After writing each family member's name on their spot on the diagram, make sure to indicate what their role is in the family. If it's your dad, indicate "Father." If mom, indicate "Mother," and so on.

4. Title of the Family Tree

Last but definitely not least, the title of your family tree. The title should reflect the type of family tree you made. For example, if your family tree spans three generations, a perfect title for it would be "My Three-Generation Family Tree."
