

You can easily create aesthetic [project presentations](#) in Google Slides. No need to have advanced skills. Just follow the guide we have prepared below.

How to Make an Aesthetic Google Slide

- **Step 1: Open Google Slides to Start**

Open [Google Slides](#) on your go-to web browser app. Type docs.google.com/presentation on the URL bar which will lead you to the homepage. Click Blank to start [creating a new Google Slides](#) presentation.

- **Step 2: Choose Elegant Themes**

There are many design ideas for Google Slides. Speaking of design, the themes are a major part of it. That said, make sure to choose an elegant theme for your creative [Google Slides presentation](#). Go to Slide on the menu bar and click Change Theme. The Themes panel will appear on the right and it'll be there you can [add themes to Google Slides](#).

- **Step 3: Add Nice Fonts**

Font styles contribute a lot to your presentation's aesthetics. So make sure to [add fonts to Google Slides](#) that look nice and artistic. Click the Fonts menu and browse through the various font styles offered by Google Slides.

- **Step 4: Insert High-Quality Images**

Images can make your presentation look appealing, especially in slideshow mode. For that reason, you must [insert high-quality images into Google Slides](#). You can upload an image from your computer, search the web, or grab one from Google Drive.

- **Step 5: Apply Slide Transitions**

Add some razzle-dazzle to your presentation by applying slide transition effects. Click a slide on the Slides Navigation Pane on the right then click Transition on the toolbar. The Motion panel will appear on the right and under it is the Slides Transition settings. Choose a transition effect and set its speed using the Slow-Medium-Fast slider.

- **Step 6: Add Object Animations**

Another way to add some razzle-dazzle is to add object animations. If your slide has images, shapes, word art, and other visual objects, you can apply animation effects to them. Click on the object and select Animate on the toolbar. The Motion panel then appears which includes the Object Animations settings. Choose an animation and set up its speed using the slider.

Does Google Slides allow users to import themes?

Yes, Google Slides lets you import themes. Simply select the Import Themes option in the Themes settings.

Are the themes in Google Slides free?
