

If you're a dark mode user, you'll be delighted to know that Google Slides mobile has a dark mode option. Learn how to activate it by reading this guide.

How to Put Google Slides in Dark Mode

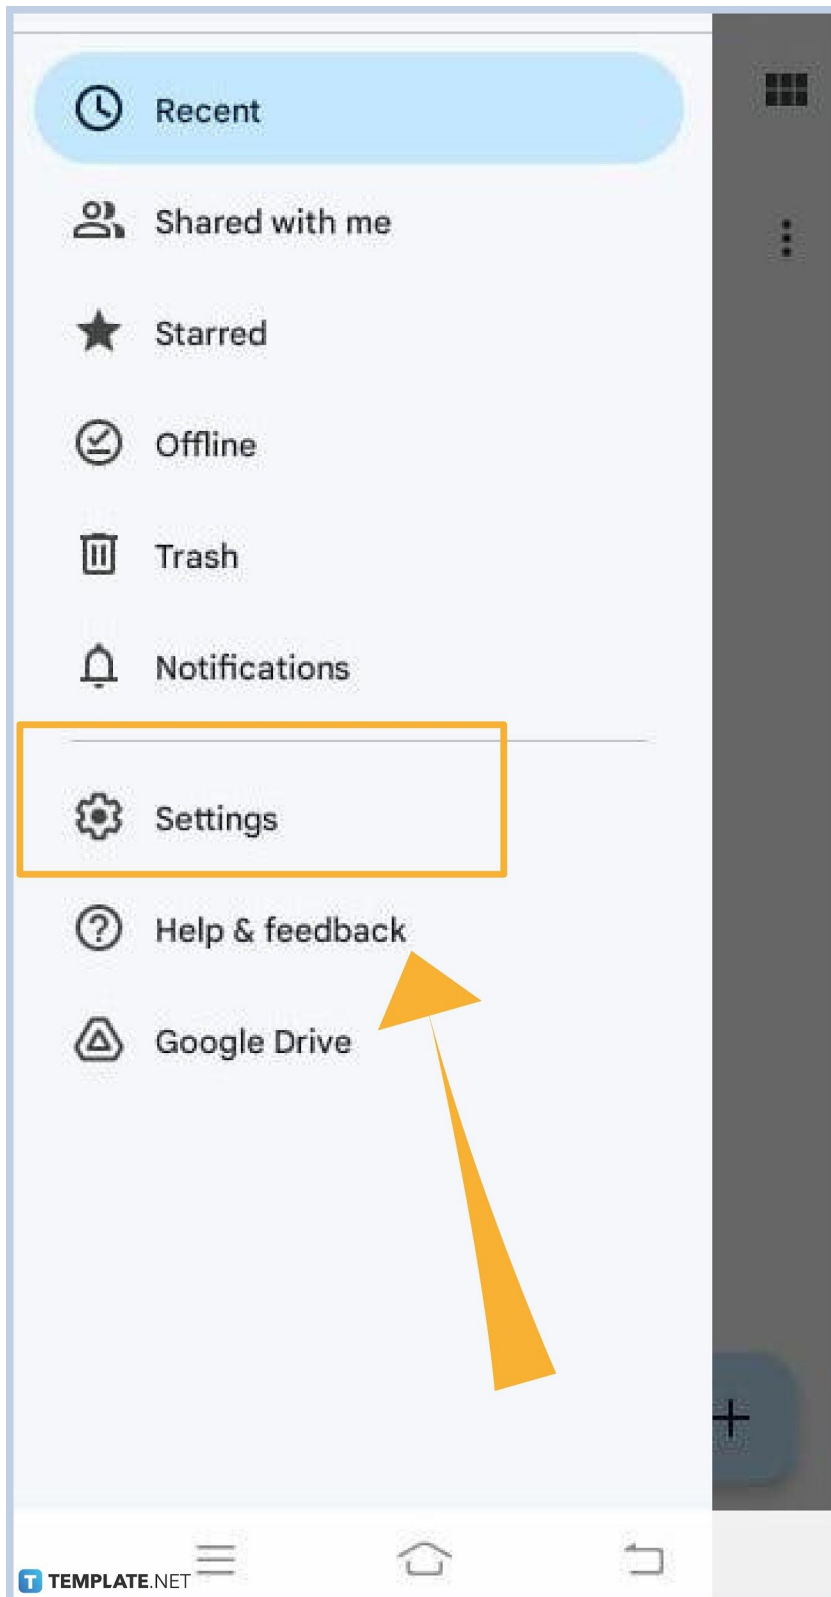

- **Step 1: Download the Google Slides Mobile App**

Visit Google Play Store and download the [Google Slides mobile app for Android](#). You can download it for free. Its size only takes a minimal amount of your storage space.

- **Step 2: Open the Google Slides Mobile App**

After downloading and installing [Google Slides](#), its icon should appear on your phone's home screen. Tap on it to start [using Google Slides on mobile](#).

- **Step 3: Tap the Three Horizontal Lines Icon and Go to Settings**

You can find the icon with three horizontal lines on the upper left corner of your screen. Tap it and go to Settings.

- **Step 4: Go to Choose Theme and Select Dark**

Make recent files available offline

Recent files will automatically be made available offline on this device.

Data usage

Transfer files only over Wi-Fi

Uploading and updating of files will pause when Wi-Fi connection isn't available.

Once you're in the Settings menu, go to Choose Theme. Tap it and select Dark. After you select Dark, your Google Slides app will automatically be in dark mode from its background to its entire interface. You can then start your work such as [adding a text box](#), [inserting images in Google Slides](#), etc.

Can Google Slides dark mode reduce eye strain?

Yes, setting Google Slides in dark mode theme option can reduce the strain on your eyes. Dark mode lessens the blue light that your screen produces. It really helps if you're someone who works on Google Slides on a regular basis.

Does Google Slides dark mode have a disadvantage?

Yes, Google Slides dark mode and other dark mode settings in other apps have a disadvantage. Dark mode or dark screen forces your pupils to dilate more, making it difficult to focus on your screen.

Can I switch back from dark mode to light mode?

Yes. If you're no longer comfortable with dark mode, you can switch back to light mode anytime. Just go to Settings, Choose Theme, and select Light.
