

Envelope Sizes

People may think envelopes are not worth much the investment simply because they are just a flat piece of folded paper that is disposable once torn open. However, an envelope could be the first interaction your prospective clients may have with you, so check out these envelope sizes before creating one.

Envelope Sizes for Email

Sending an email to your boss, client, or friend is similar to mailing a printed letter to someone. Both need the right address for the recipient (To) and sender (From); the ideal sizes for your envelope via email should be:

If you wish to add a header for your envelope, make sure that its height is only within the sizes of 70 px to 200 px. Lastly, before you send your email, make sure that it is within 75 KB to 102 KB only for optimal output.

Envelope Sizes for Business

In business, some of the most common types of envelopes used are the square flap envelopes, regular envelopes, window envelopes, square envelopes, booklet envelopes, document envelopes, remittance envelopes, pointed flap envelopes, mini envelopes, thumb cut envelopes, and expansion envelopes. When choosing an envelope, make sure that they leave an extra space worth 1/4 inches in height and width than the paper or document for mailing to prevent them from getting damaged.
