When working on numbers you may need to present them in bar graphs for visuals. Discover how to get that done in Google Sheets.

- # Step 1. Select the Data

When working on your spreadsheet, part of it may involve having to create a bar graph to make your content organized. You won't have to worry about making a bar chart from scratch as you can do it right away here in Google Sheets. Whether it be a double bar graph or whatever bar chart, to get started, first select the range where the data is.
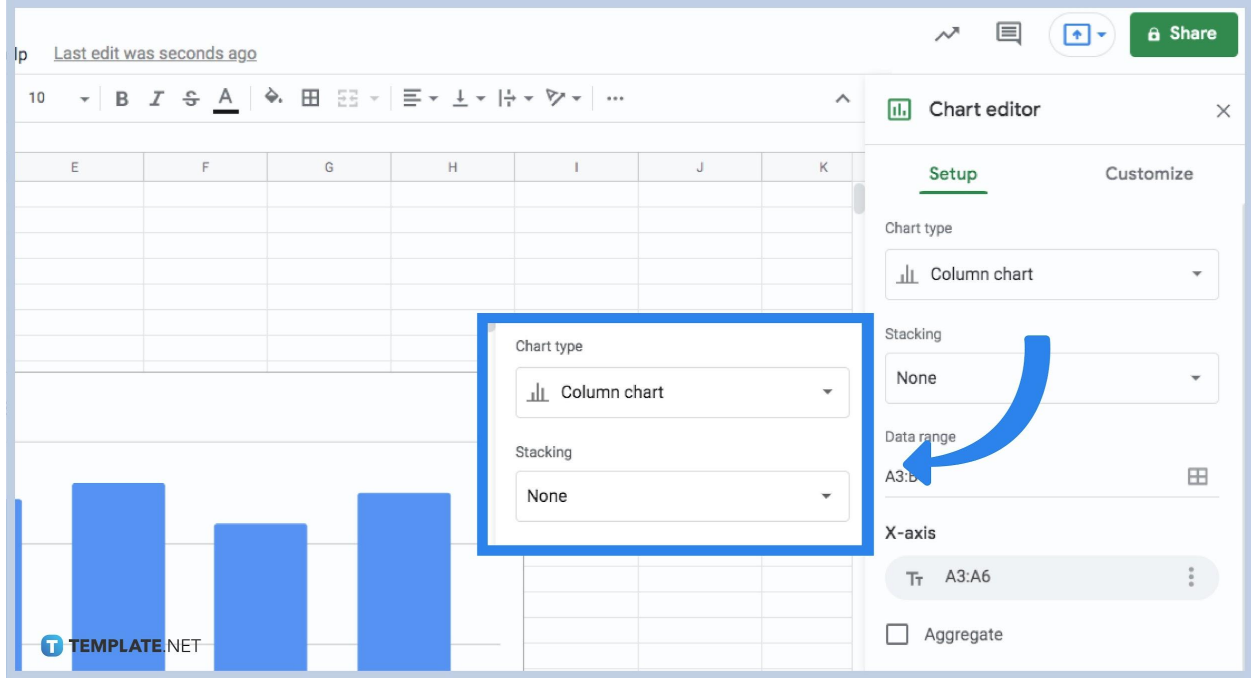

Step 2. Select Insert
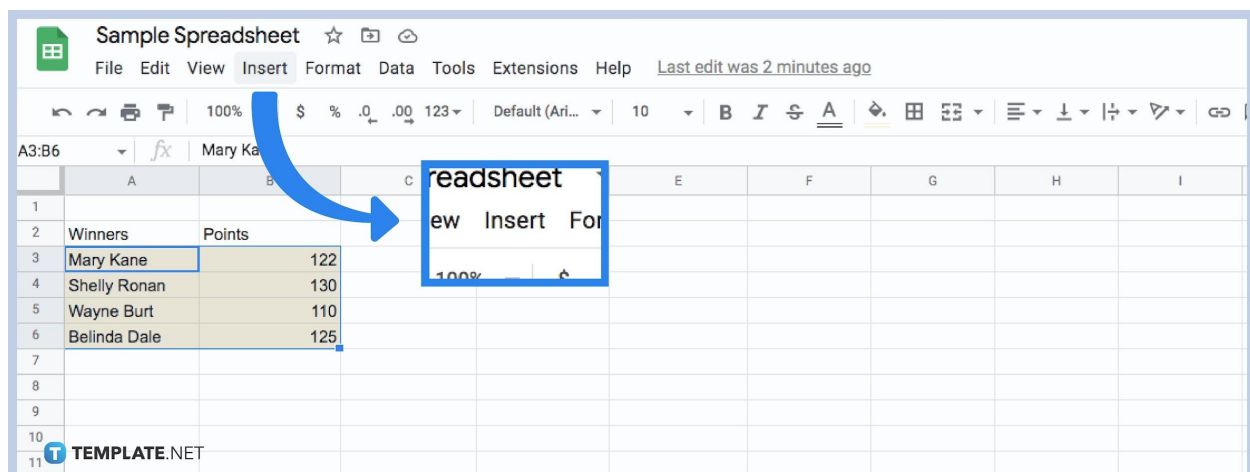

Next, move your cursor to the menu, and click on 'Insert' there you will see a dropdown.
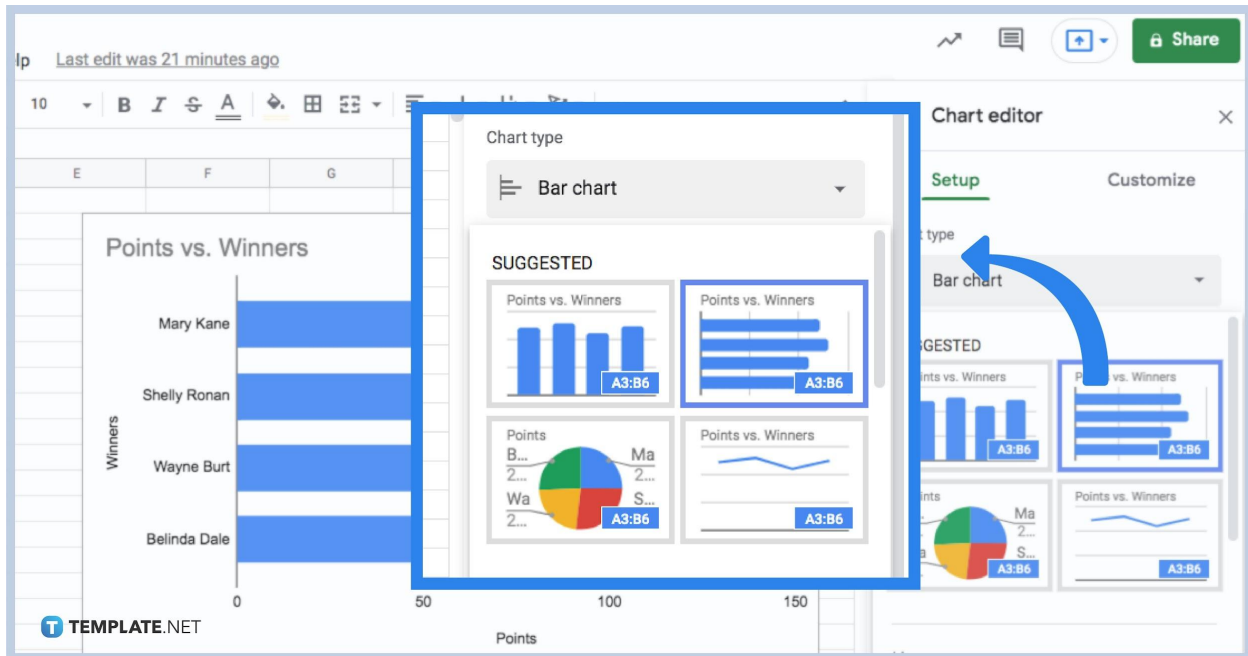

Step 3. Click Chart
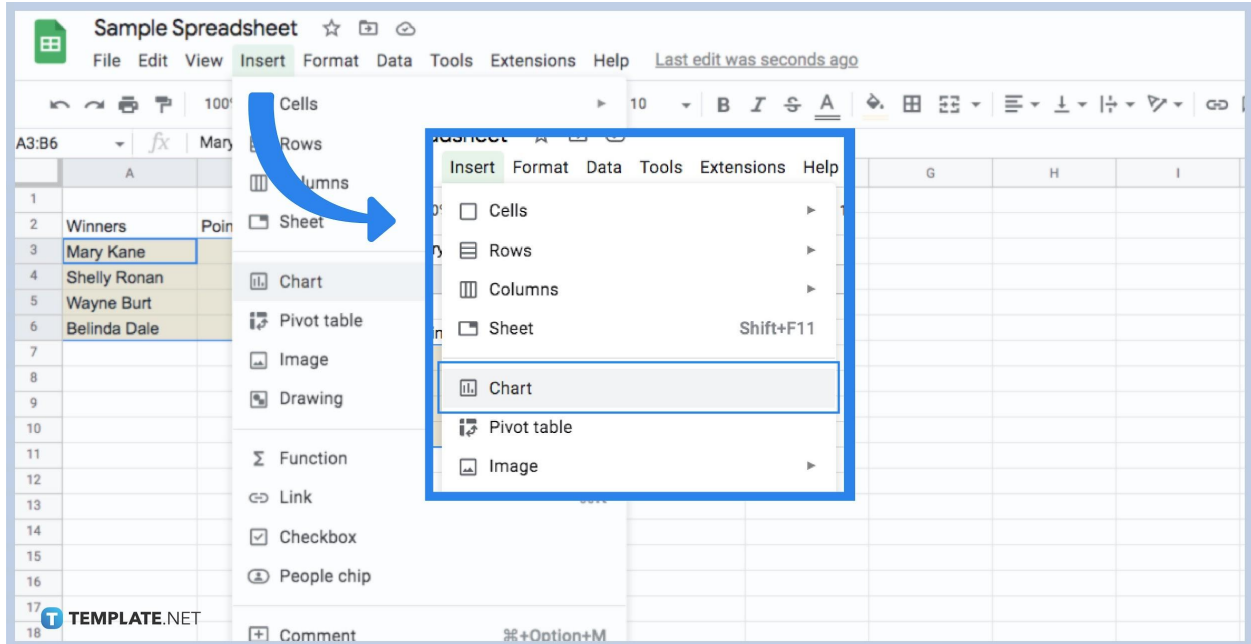

Next, move your cursor downwards, and select 'Chart'. A window will then open.

Step 4. Select Chart Type

In this next window, you have a variety of charts to make whether it is a stacked bar chart or a pie chart.

Step 5. Select Bar Section

Click on the bar and select your bar chart elements to decide details like gap width, deviation bars, error bars, etc. And that is how you make a bar graph in Google Sheets.

Are there shortcut keys for making a bar graph in Google Sheets?

No, there are no known shortcut keys for making a bar graph in Google Sheets.

Can I only make bar graphs in Google Sheets?

No, you can make all kinds of charts using google Sheets whether it be a horizontal line chart or even a line graph.
