Door hangers are used to communicate and are also used as a means to market a company's product and services just like flyers and newsletters. To help you start creating, here are the standard door hanger sizes that you may take note of:

Mini

The mini size is a standard door hanger size measuring 3.5 × 8.5 inches. It is mainly used for simple applications like a "do not disturb" notice due to its minimal surface area for inserting text and images.

Standard

Next is the standard door hanger size, which has a dimension of 4.25 × 11 inches. Most people are pretty familiar with this size and would prefer to use it compared to the other measurement since it has sufficient room to write messages and is ideal to insert graphics.

Jumbo

The last standard door hanger size is the jumbo size, which is 5.5 × 17 in inches. It has the most room for inserting full messages and graphics and is also the costliest option of the other three sizes.

Mini

The size for mini templates in Adobe Photoshop is 3.5 × 8.5 inches (plus the bleed). As stated earlier, this best fits personal or straightforward marketing use only as it leaves little room for written and graphic content.

Standard

Jumbo

The size for jumbo templates in Adobe Photoshop is 5.5 × 17 inches (plus the bleed). This measurement is for people who prefer a considerable amount of room for their messages or graphics, however, this can also be quite costly when printed.
