A sequence of questions guides students in school through the character's journey and how the story unravels from the beginning, middle, and finish of the narrative. This is a visual organizer that may be used across several grade levels.

### THE NEGATIVE EFFECTS OF CONSUMERISM

Anna Lincoln

Consumerism is nothing new. Many people enjoy buying things that sometimes end up in the landfills, and worst, in the streams and other bodies of water. Extreme consumerism has obvious implications for economic conditions, as well as in the environment.

The fashion industry is among the leading carbon emitters in the world. It produces over 92 million tonnes of fabric and textile waste annually.

Waste products from global industries go directly to landfills, oceans, and streams that can pollute air and water, causing a cycle of waste and health issues.

In the years to come, the rise in demand will lead the planet to deplete its natural resources resulting in scarcity, drought, and severe catastrophe.

Overall, as the demand for goods increases, the need to produce is also undeniably increasing leading to more toxins and pollutants annually. As a result, air and water pollutants will continue to increase that will eventually destroy Earth in the years to come.

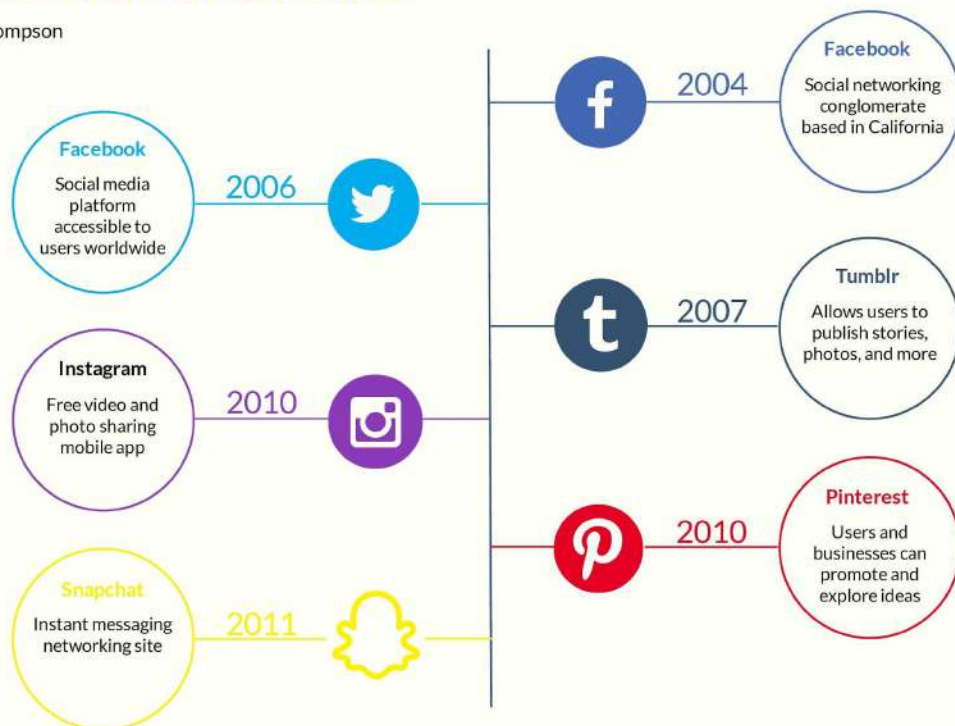

## Timeline Graphic Organizers

**Timeline graphic organizers** are a kind of visual organizer that depicts a chronological sequence of events. They are useful while learning history since they may be used to illustrate key historical events that occurred over a period of time, as well as crucial facts such as dates and places. Furthermore, timeline graphic organizers may be utilized to demonstrate company development or changes in the business.

# **Graphic Organizer Uses, Purpose, Importance**

Before you get into the process of creating a graphic organizer, you would need to determine the uses, purpose, and importance to maximize its usage. It is important that you are able to differentiate each unique type of graphic organizer so you can be more aware of which one is more effective for your usage. An effective action organizer can reach into the brains of your audiences, no matter their age range as they read through your chart.

## **Comprehension**

Graphic organizers can assist pupils in understanding the link between several bits of information that they may have missed otherwise. Such organizers are especially beneficial in assisting pupils in grasping complex topics. Readers receive no significance from what they read if they do not comprehend it.

## **Systematic**

You may boost your productivity by using a systematic graphic organizer. You will save time searching for items and have more time to focus on vital activities if you stay organized. You can make your team or class more productive by improving the channel of information between you and your team or students.

## **Knowledge Evaluation**

Instructors can do an assessment of students' prior knowledge of a subject by having them, complete graphic organizers. As a consequence, teachers may make strategic judgments about how to best convey extra information to pupils about the issue at hand and help them to manage their smarts.

## **Notetaking**

When students learn content through graphic representations, notetaking may diminish in some circumstances. As a result of the lack of a thorough reference to which students or workers may turn while revising content, their performance may suffer. Individuals who struggle with reading comprehension, writing, or note-taking, as well as those who have difficulties focusing during courses or meetings, might utilize graphic organizers to assist keep information organized.

## **Feedback Giving**

Creating an answer key for a graphic organizer might be time-consuming for some professionals. They utilize organizers to foster conversation but do not modify each student's organizer after completion, thus students may miss out on crucial input. When employee engagement is low, performance is poor, or failure is imminent, organized feedback will assist management in empowering and engaging staff.

## **What's In A Graphic Organizer? Parts?**

### **Title**

The graphic organizer's title does not necessarily mean it is at the start of the format or at the top most part of the graphic organizer. Since different types of diagrams come in many different forms, some titles may be at the center or at the right in most sections, but the purpose it serves remains the same all throughout as it would indicate what the graphic organizer is all about.

### **Containers**

Coming across as either shapes or symbols, these containers act to store the content within themselves. Furthermore, they are not strictly limited to one shape for every graphic organizer, instead, they can come in various forms.

## **Lines**

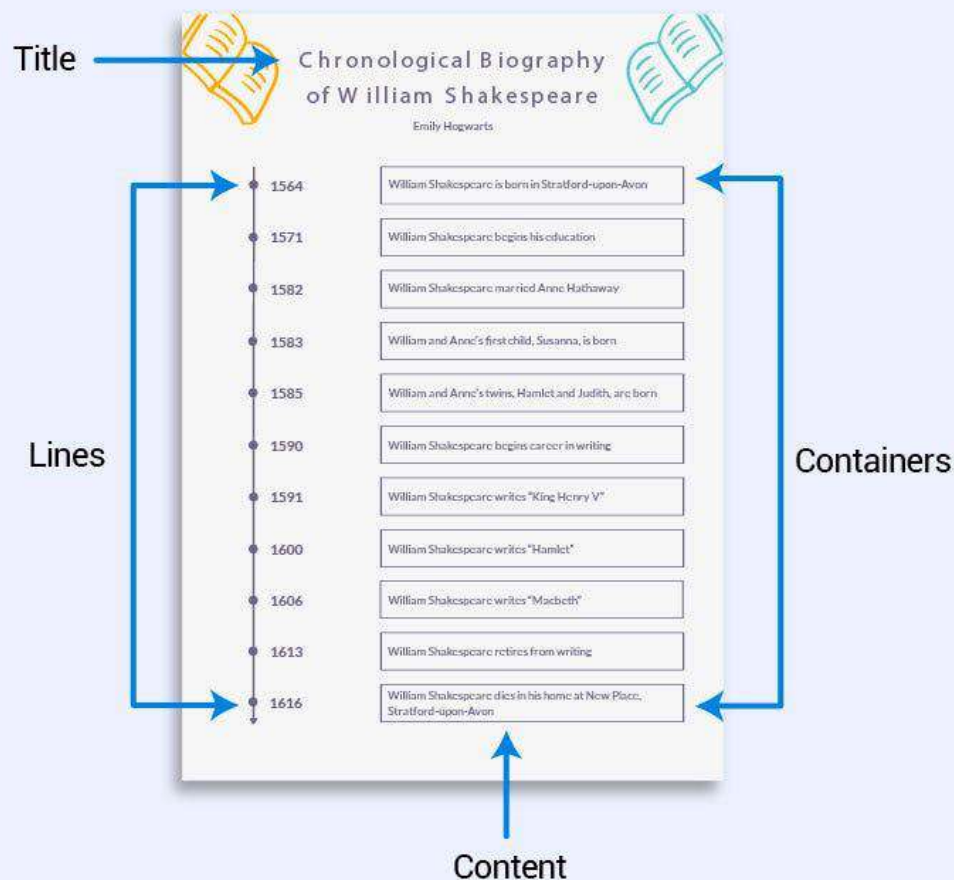

The lines or arrows within a graphic organizer don't merely serve to be for art or aesthetic purposes. They actually show the connection between information or facts to the title or other parts of the graphic organizer. Some lines can be in a linear direction, heading downward or outward, whereas others may act as a division.

## **Content**

The beauty of a graphic organizer is that they don't necessarily contain multiple paragraphs to convey a point. Most rely on important words or phrases that would help the user or readers identify their relation to the title but can already be sufficient to provide a guide to them when providing an expository in detail.
